Total Range catalog 2023/2024

NUMERIC

1/2 inch cardan joint	1451,1490,1504-1507,1509-1510
1/2-inch and 1/4 inch socket wrench assortment.....	1512
1/2-inch extension	1451,1491,1504-1507,1509-1510
1/2-inch jointed handle	1490
1/2-inch multi-socket wrench assortment.....	1450-1451
1/2-inch pass-through ratchet adapter.....	1472
1/2-inch power socket wrench assortment.....	2913
1/2-inch power socket wrench insert.....	1501,1516-1518,1520,2913
1/2-inch power socket wrench set.....	2913
1/2-inch socket wrench assortment.....	1501-1510
1/2-inch socket wrench insert	1494-1495,1497,1507,1836
1/2-inch socket wrench insert, metric....	1494-1496,1502,1508
1/2-inch socket wrench insert, POWERDRIV	1494-1495
1/2-inch T-handle	1505
1/4 and 3/8-inch socket wrench assortment	1469-1470
1/4 inch cardan joint1448,1453-1454,1461-1462,1464-1469	
1/4-inch extension ...	1448,1454,1461-1462,1464-1469,2916
1/4-inch multi-socket wrench assortment1447-1448,1463-1464	
1/4-inch pass-through ratchet adapter.....	1471
1/4-inch power socket wrench assortment.....	1603,1626
1/4-inch power socket wrench set.....	1603,1626
1/4-inch socket wrench assortment.....	1460-1462,1464-1468
1/4-inch socket wrench insert	1456-1458
1/4-inch socket wrench insert, metric....	1456-1457,1466,2916
1/4-inch torque wrench, hexagonal.....	1527
12V trailer electrical system	2980-2982
15-pin repair connector.....	2985
15-pin repair socket.....	2984-2985
1A assembly cleaner.....	239
1C engine sealant	75
1C gun foam	109,111
1C gun foam	109,111
1C liquid plastic.....	27-28
1C liquid plastic fleece inlay	29
1C liquid plastic primer.....	28
1C special adhesive primer.....	98
1C well foam.....	112-113
1-component bitumen-latex thick coating.....	29
1-component cold wood glue.....	169
1-component combination foam.....	112-113
1-component container lacquer	450
1-component engine sealing compound.....	75
1-component flat roof seal	27-28
1-component flat roof seal fleece inlay.....	29
1-component flat roof seal fleece inlay, roll	29
1-component painting lacquer.....	452
1-component polyurethane foam	112
1-component PURlogic assembly foam	110-111
1-component PURlogic gun foam.....	109,111
1-component synthetic resin paint.....	449-450
1-component synthetic resin primer.....	449
1-component thick-film lacquer.....	451
1-component universal primer	448
1-ear clamp.....	708
1-ear clamp with insert ring.....	708
1-ear continuously adjustable clamp	708
1-inch power socket wrench insert	1521-1522
24V commercial vehicle bulb.....	3005,3007-3011
2A assembly cleaner	239-240
2-component adhesive	127-130,141
2-component bitumen-latex thick coating.....	30
2-component casting and adhesive resin	100-101
2-component cement-based sealing.....	31
2-component grounding contact coupling	2700
2-component grounding contact plug.....	2702-2703
2-component HS clear varnish.....	457
2-component HS hardener for top coats	457
2-component HS top coat	455

2-component liquid metal filler	126
2-component Multi-Fill	367-368
2-component primer filler	453
2-component primer hardener.....	455
2-component PURlogic cartridge foam	114-115
2-component PURlogic foam gun.....	1816
2-component PURlogic frame foam	114-115
2-component repair	382
2-component structural adhesive.....	127
2-component thick-film lacquer.....	456
2-stroke special fuel	336
2-way compressed air blow-out gun	1822-1823
2-way tap	2895-2896
3/4 inch cardan joint	1514-1515
3/4-inch extension	1514-1515
3/4-inch power socket wrench insert.....	1520-1521
3/4-inch socket wrench assortment.....	1482,1514-1515
3/4-inch socket wrench assortment, bi-hexagon	1515
3/4-inch socket wrench insert, POWERDRIV	1512-1515
3/4-inch T-handle.....	1514-1515
3/8 inch cardan joint.....	1450,1470,1475,1481-1484,1486
3/8 inch socket wrench set.....	1449-1450
3/8-inch extension	1450,1469,1476,1481-1484,1486
3/8-inch pass-through ratchet adapter.....	1471
3/8-inch pass-through ratchet adapter.....	1472
3/8-inch socket wrench	1469,1476-1486
3/8-inch socket wrench assortment	1481,1483-1486
3/8-inch socket wrench insert.....	1478-1481,1484-1486
360° spray bottle	388
3-component screwdriver set	1632
3-component screwdriver with recessed head (PH). 1630-1631	
3-component screwdriver with recessed head (PZ)	1631
3-component Torx screwdriver	1632
3D cloth.....	272
45° angled washer.....	556-557,564
45° angled washer, round hole	556
7-pin connector 12V	2982
7-pin connector 24V	2983
7-pin socket 12V	2982
7-pin socket 24V.....	2983
90° threaded elbow for aluminium pipe alu-thread WES. 2579	

A

Abrasive block.....	1270,2939
Abrasive cloth.....	1257-1258
Abrasive cloth dispenser system	1258
Abrasive flap roller.....	1260-1261,1305
Abrasive fleece.....	1289,1320-1322
Abrasive fleece disc	1282-1283,1317-1319
Abrasive fleece roller.....	1304
Abrasive fleece roller, folded ring	1304
Abrasive mesh	1314
Abrasive pad	1320
Abrasives.....	1241-1242,1251-1252,1273,1278-1279,1284-1286,1294-1296,1312,1316
ABS	2321
ABS sockets.....	2985-2986
ABS/EBS repair connector.....	2986
ABS/EBS repair socket	2985
Accessories, angle grinder, electric	2013-2014
Accessories, cable duct.....	2608
Accessories, cable feed system push rod	2602-2603
Accessories, cable feeder	2598-2600
Accessories, cables and conductors . 2504-2505,2509-2513,2515-2516,2965-2966	
Accessories, deburrer.....	1142-1143
Accessories, hand tool.....	1448,1450-1451,1462,1464-1468,1470-1472,1481,1483,1485-1486,1502-1508,1510,1614,1616,2207-2208
Accessories, hose and fitting.....	2894

Accessories, measuring instrument, electrical variables	2631,2978
Accessories, multi-cutter	1426-1432
Accessories, parallel vice	2192
Accessories, rivet nut	1736-1738
Accessories, roller	1578-1580
Accessories, scraper	1887
Accessories, sealant	12-14,156,1813-1815
Accessories, soldering	1234
Accessories, soldering tool	1213,1219,1222,1225,1233
Accessories, spring strut compressor	2905
Accessories, two-handed angle grinder	2013
Accessories, vehicle air conditioning technology	3108-3110
Accessories, vehicle number plates	3151,3163-3164
Accessories, wall duct	2606,2608
Accessories, welding torch	1231-1232
Accessories, windowsill duct	2607-2608
Accessories, wiring duct	2530
Accessory set for push rods	2603
Acetone cleaner	424
Acoustic construction fasteners	2614
Acrylic filler	454
Acrylic sealant	17-21
Activator	141,164
Active Clean	419
Active cleaner	157
Active foam	389-390,393-394
Active foam wash	393-394
Active fragrant foam wash for car washes	394
Active glass cleaner	400
Active wash	393
Active wash for car washes	394-395
Adapter	1409,1439,2322
Adapter	2741,2743
Adapter assortment	1502-1503
Adapter case	2902
Adapter for bag goods	156,1813
Adapter for brake resetter	2904-2905
Adapter for diamond cup wheel M14/22,23	1394
Adapter for drill bit 1100,1120-1121,1423-1425,1433-1434	
Adapter for high-pressure service connection	3110
Adapter for hoses and accessories	1972,3110
Adapter for impact sockets	1503,1603,1607,1624-1625
Adapter for plug-in tool	1118
Adapter for ratchet tool, 3/8 inch	1616
Adapter for screwing tool	2867-2868
Adapter for vehicle air conditioning technology	3110
Adapter plate	1102,2054-2055
Adapter with threaded fitting	769-770
Adapter, brass	2743
Adapter, CEE	2699
Adapter, trailer coupling	2981
Adapters	156,254,768-770,1121,1718,1972,2904-2905,3084-3085,3124
AdBlue diesel additive	248
AdBlue diesel additive	248
Additional calculation	3185
Additional handle	1101
Additional print costs for advertising plate	3167
Additional print costs for Klapp-Fixx NPH	3151
Additional print costs for NPH Clipster	3153
Additional print costs for promotion	3170-3171
Additional print costs for Twin-Fixx NPH	3155
Additional print costs of NPH Classic/Circo/motorcycle plates	3147-3149,3157
Adhesion agent	123,126,155-158,164,357,367
Adhesion agent, plastic	367
Adhesion and sealing	118-123,125,127,136-137,147-149
Adhesive50-52,64,93,118-123,125,127,129-130,132-144,147-149,151,153-156,158-174,2428	
Adhesive anchor	842-843,850
Adhesive and sealing compound	72
Adhesive cable label	2639
Adhesive disc, sanding disc	1255-1256
Adhesive disc, Velcro disc	1955
Adhesive film for steering wheel protection	3064
Adhesive for insulating material	2714
Adhesive for insulation boards	175-176
Adhesive for plastic	64,135,138-140,151
Adhesive for roof protection film	50-51,2428
Adhesive for rubber insulating material, high temperature	2714
Adhesive for securing screws and bearings	78-81
Adhesive frame	2182
Adhesive gun	166
Adhesive label	2638-2639
Adhesive label, write-on	2638-2639
Adhesive lubricant	294,301-304
Adhesive lubricant pre-cleaner	305
Adhesive lubricant, HHS	301-304
Adhesive mount, cable tie	2513,2515
Adhesive nail	1935-1936
Adhesive packing tape	213-214
Adhesive plaster	2292,2294,2296
Adhesive primer	96-97
Adhesive sealant	118-123,125,127,134,136-137,146-149
Adhesive strip	2160
Adhesive tape	2160
Adhesive tape	45-47,52-57,59-64,177-189,212-214,217-225,227-231,2728-2729,2734-2735,2961
Adhesive tape dispenser	214
Adhesive tape, cover	177-180,183-188,192-195
Adhesive tape, EURASOL	181,218-223
Adhesive tape, HVAC	227,2728-2729,2735
Adhesive tape, insulation	230-231,2735
Adhesive tape, linen	212
Adhesive tape, mirror	182-183
Adhesive tape, sealing/assembly	45-47,52-57,59-63,180-183,189,217-225,231,2728-2729,2734
Adhesive trowel	1539
Adhesive weight	2922-2924,2929
Adhesive, bodywork	133-134
Adhesive, interior fittings and façade	87-92,94,105-106,175-176
Adhesive, Stamcoll	2427-2428
Adhesive, window	153-156
Adjustable tap wrench	1191,2067
Adjustable tap wrench	1191,2067
Adjusting tool for torque wrench	1529
ADR cable connecting socket	2986-2987
Advertisement frame	2182
Advertising materials	3170-3171,3177-3180
Advertising products, unprinted	3178-3180
Advertising sign for quick-mount number plate holder	3166-3167
Advertising stand	3185
Aerated concrete anchor	795,897-898
Aerated concrete dowel	795
Aerated concrete hooked nails	2610
Aerated concrete saw	1401
Aeration roller	1567
Agitator	1965-1966
Agitator	1965-1966
Agitator, electric	1965-1966
Aid for securing loads	2370
Air bubble film	215
Air conditioning disinfectant spray	3081
Air conditioning technology vehicle adapter	3110
Air conditioning technology, vehicle, accessories	3108-3110
Air conditioning technology, vehicle, O-ring	3111-3115
Air duct clamp	2825-2826
Air duct mount	2876
Air duct mounting bracket	2826-2828,2876
Air-conditioning cleaning agent	3075
Air-conditioning compressor oil	3082
Air-conditioning digital thermometer, LED	3108
Air-conditioning leak detection additive	3079-3080

Air-conditioning leakage stop.....	3076-3077	Angle grinder accessories.....	2013-2014
Air-conditioning leakage stop additive.....	3076	Angle grinder, brush.....	1329-1330
Air-conditioning leakage stop plus.....	3077	Angle grinder, cordless.....	2004
Air-conditioning range.....	3078-3079	Angle grinder, electric.....	2012-2015, 2018-2020
Air-conditioning refrigerant.....	3078-3079	Angle grinder, pneumatic.....	1963
Air-conditioning seal.....	3076-3077	Angle seat valve.....	2891
Air-conditioning service product.....	264,3076-3082	Angle washer.....	556-557,564
Air-conditioning system flushing/cleaning.....	264,3075	Angled extension, socket wrench 1/2 inch.....	1491,1509-1510
Air-conditioning system odour eliminator.....	421	Angled extension, socket wrench 1/4 inch.....	1461-1462,1464,2916
Air-conditioning technology, vehicle.....	3108-3115	Angled extension, socket wrench 3/8 inch.....	1482-1483
Alkaline battery.....	2824	Angled gear.....	1670
Air-tight and windproof system .50-51,217-218,220-221,2398-2399,2401-2403,2408-2413,2416-2420		Angled magnet.....	1235-1236
Airtight systems.....	2421-2422	Angle-shaped iron 2438,2443,2457-2458,2460-2464,2466	
Allen key.....	1680-1684,1687,1833-1834	Annular cutter.....	1102-1103,1120,1122-1127
Allen key (TX ball head).....	1686	Anti-corrosion varnish.....	359,450-451,456
Allen key (TX).....	1685-1686	Anti-corrosive agent.....	356-358,366-367,369-370
Allen key folding set (TX).....	1685	Anti-fatigue mat.....	2347-2350
Allen key set (hexagon socket).....	1683-1684	Anti-freeze tester.....	2967,3085
Allen key set (hexagonal socket ball head).....	1683-1684	Antifreeze tester for coolant.....	3085
Allen key set (TX ball head).....	1686	Anti-hologram polish.....	427
Allen key set (TX).....	1685-1686	AP damp-room button.....	2489
Allen key, hexagonal socket 1680-1681,1684,1687,1833-1834		AP damp-room grounding contact socket.....	2491-2492
Allen key, hexagonal socket ball head.....	1682-1684	AP damp-room intermediate switch.....	2490
All-round paint gun.....	1817-1819	AP damp-room switch range.....	2488-2494
All-round paint spray gun.....	1817-1819	AP damp-room universal switch.....	2488-2489
All-steel screw clamp.....	1800-1801	AP damp-room universal switch/socket, vertical.....	2490-2491
Alpha square.....	1703-1704	AP moisture-prone switch series, ELMO.....	2488-2494
Aluminium adhesive.....	129-130	Appliance angle seat valve.....	2891
Aluminium adhesive tape.....	227-228	Appliance angle seat valve 1/2 inch with pipe ventilator.....	2891
Aluminium box.....	2033-2038,2040,2165	Appliance connecting valve.....	2891
Aluminium cleaner.....	152	Appliance connecting valve, 3/8 inch.....	2891
Aluminium clip.....	2614	Appliance connection box.....	2497
Aluminium drill bit.....	1015-1016	Appliance socket.....	2495,2497-2498
Aluminium folding trolley.....	2152	Appliance valve, sanitation.....	2891
Aluminium handle.....	410-411	Application gun.....	131,141,866-868,1812-1813,1815-1817,2027-2029
Aluminium ladder.....	2125-2128,2136-2137,2144	Application gun.....	113,131,141,166,1812-1813,1815-1816
Aluminium paste.....	305	Application gun for cavity/underbody.....	369
Aluminium pipe.....	2571-2572,2575	Application nozzle.....	155-156,1813-1815
Aluminium polish.....	428	Application tool, lubricant.....	315,317,2028,3074-3075
Aluminium profile.....	211	Application tool, sealant.....	1812-1813,1815-1817,2027-2028
Aluminium ratchets.....	2148-2149	Apron for welder.....	2307-2308
Aluminium rim cleaner.....	403-405	Arm guard.....	2228-2229
Aluminium screw tap.....	1149-1150,1171,1181	Arm support.....	2123
Aluminium spray.....	360	Armoured pipe.....	2572,2574-2576
Aluminium step ladder.....	2127-2128	Arrester system.....	2311,2315,2326-2327
Aluminium tape.....	227-228	Asbestos disposal.....	2157
Aluminium tar spreader.....	1545	Asbestos sheeting sack.....	2157
Aluminium telescopic handle.....	410-411	Ash handle.....	1748,1751-1752
Aluminium valve.....	2934	Asphalt covering.....	31-32
Amo Max hole saw mount.....	767	Asphalt screw anchor.....	833-834,890
Amo Max impact sleeve.....	767	Assembly adhesive.....	142-144
Amo Max setting mandrel.....	767	Assembly adhesive, solvent-free.....	143-144
Amo Max tool assortment.....	767	Assembly aid.....	197,2139,2745
AMO screw.....	768,796-810	Assembly and parts cleaner.....	238-240,277,296
AMO-Max plastic sleeve.....	766	Assembly block.....	42-44
AMO-Max spacer.....	765	Assembly block set.....	44
AMO-Max spacer disc.....	766-767	Assembly cleaner.....	238-240,277,296
AMO-Therm.....	768-770	Assembly console, adjustable, window installation.....	611-612,614-615
Anchor.....	559,605-610,891,2437-2438,2454-2456	Assembly drill bit.....	985,993-997,1002-1007,1013-1014,1094
Anchor nail.....	2440-2441	Assembly drill bit assortment.....	985,1006-1007,1013-1014
Anchor point.....	2319-2326,2331-2332	Assembly fluid.....	3121
Anchor point set.....	2326-2329	Assembly foam.....	109-115
Anchor rod.....	642-643,652-653,844-846,850-851,855-856	Assembly glove.....	2237-2239,2248-2252
Anchor rod by the meter.....	853-854	Assembly mortar.....	106
Anchor rod, compound anchor.....	832-834,836-841,843-851,853-857,866-872	Assembly paste.....	71,307-308,326
Angle connector.....	2443,2460-2464,2466,2849-2850	Assembly platform.....	2142
Angle drill.....	1929	Assembly power cleaner.....	239-240,277,296
Angle fix.....	1705-1706	Assembly rail window installation.....	613-615,2839-2840
Angle grinder.....	2012,2014-2017,2020	Assembly stool.....	2118

Assembly suction lifter	3127-3130	Ball-head ratchet, 1/4 inch	1464
Assembly support	197	Ballpoint pen	3177
Assembly tape	180-182,190,224-225,2611,2613	Bandage	2292-2293
Assembly trestle	2139	Bandsaw	1993
Assembly trolley	2068-2069,2115-2118	Bandsaw blade	1159,1397
Assembly wedge	3137	Bandsaw blade, structural steel	1397
Assembly wedge set	3137-3138	Banner	1587
Assembly workbench	2068-2069,2206	Bar spade	1692
Assembly workstation	2113-2114	Barcode strip	2159-2160
Assortment	938-939,958-960,988,1094-1095	Barrier post	2375-2376
Assortment case	425,767,801,869,985,1006-1007,1010,1195,1218-1219,1439-1440,1833,1836,2046-2052,2055-2065,2068,2159,2507-2508,2537,2737-2738,3055	Base	2880
Assortment case, equipped	425,767,801,869,985,1006-1007,1010,1195,1218-1219,1439-1440,1833,1836,2046-2052,2055-2065,2068,2159,2507-2508,2537,2737-2738,3055	Base plate	1102
Assortment case, ORSY100	2061	Base plate for number plate holder	3147-3149,3152-3157,3160-3161,3163,3179
Assortment for workshop trolleys	3090-3091	Base plate, pipe installation	2853
Assortment of axle boots	2921	Base shell	1545-1546
Assortment of pass-through socket wrenches	1471-1473	Basic cleaner	157
Assortment of wire end ferrules	2536	Basic engine oil	334-335
Assortment, bits	1604,1611	Basic safety harness for scaffolding	2326
Assortment, circlip pliers	2216	Basic vehicle cleaner	391-392
Assortment, combination wrenches	2213	Bath tub installation box	2762-2767
Assortment, double open-end wrenches	2207	Bathroom earth terminal	2562
Assortment, double-end box wrenches	2207-2208,2216	Bathroom earthing rail	2563
Assortment, files	2214,2216	Battery	2385,2669-2671
Assortment, hand tools	1669,1823-1827,1830-1836,1849,1857,2207-2208,3090-3091	Battery charger	2671-2673
Assortment, pliers	2213	Battery charger, commercial vehicle	2945-2946
Assortment, ratchet combination wrenches	2211,2217	Battery starter, mobile	2955-2956,2958-2959
Assortment, scrapers	2216	Battery terminal clamp, vehicle	2988
Assortment, screwdrivers	2212-2213,2215	Battery terminal grease	252-253
Assortment, socket wrenches	2209-2212	Battery terminal grease	252-253
Assortment, striking tools	2214	Battery terminal protector	252-253
Assortment, thread cutters	2065-2068	Battery, electric, vehicles	2988
Assortment, tools ... 1832-1836,1857,2199-2200,2207-2208,3090-3091		Battery-powered angle grinder	2004
ASSY accessories	555-558,564-565,732,2475	Battery-powered application gun	867-868,1816
ASSY screw	562-563	Battery-powered blind riveter	1969
Atomiser	3071-3072	Battery-powered hand-held circular saw	1983-1984
Attachment components for C-profile	2829,2831-2833,2835-2837,2846-2848,2850	Battery-powered impact drill driver	1919

Cable tie, standard, with plastic closure 2504-2505,2507-2508		Cavity wall installation	2495,2497
Cable tie, UV-resistant, with metal closure	2510	Cavity wax	365-366
Cable ties	709-710,2504-2506,2509-2513,2965-2966	CEE adapter	2699
Cable unwinder	2593-2596	CEE coupling	2695-2696
Cable, mast securing	2311,2315,2326-2327	CEE distributor connector	2690-2691
Cable, tarpaulin fastener	2371	CEE extension cable	2689
Cable/pipe mounting	2608-2611	CEE phase inverter	2697
Cable-tie fix device	2513	CEE plugs	2697-2698
Calcification protection	255	CEE reducer plug adapter	2699
Calliper	1698-1699	CEE socket and coupling	2695-2698
Callipers	1699	CEE socket with phase inverter	2697
Camping lamp	3178	CEE wall box	2698
Canister	2391,3072-3073	Ceiling hook	730-732,738-739
Canister, accessories	237,437,3066,3073	Ceiling mounting	775-776,778-784,899
Car and commercial vehicle washing brush	408-412	Ceiling nail	775-776
Car and window chamois	433	Ceiling paint brush	1566
Car care products	422	Cellular concrete saw	1401
Car lighting	3011-3020	Cellular rubber EPDM sealing tape	61-62
Car shampoo	389-390,397	Cement board screw	592-593
Car sponge	275-276,408	Cement filter bag	1973
Car tester	2977-2978	Cement-based sealing, 2C	31
Car tool	2969	Cemented carbide hole saw	1423-1425,1433-1434
Carabiner hook	2316,2318	Central lubrication unit grease	313-314
Carbide scribe	1763	Central lubrication unit, commercial vehicle fitting ... 2937-2938	
Carburettor cleaner	246-247	Centre drill bit	1121
Cardan joint insert, 3/8 inch	1478-1479	Centre drill bit, drill bit	1120-1121
Cardan joint, impact socket wrench, 1/2 inch	1518	Centre drill HSCO for bi-metal cylinder saw	1433
Cardan joint, socket wrench, 1/2 inch	1451,1490,1504-1507,1509-1510	Centre drill, cylinder saw	1411
Cardan joint, socket wrench, 1/4 inch	1448,1453-1454,1461-1462,1464-1469	Centre drill, metal	1099-1100
Cardan joint, socket wrench, 3/4 inch	1514-1515	Centre punch	1762,1835
Cardan joint, socket wrench, 3/8 inch	1450,1470,1475,1478-1479,1481-1484,1486	Centrifugal brush, power drill	1327-1328
Care and lubricant spray	312	Centring angle	1703
Care product	416,422	CERAFix inner corner	103
Care product for rubber seals	422	CERAFix joint mortar	100
Carpenter's hammer, French-type	1835-1836	CERAFix joint-sealing tape	104-105
Carpenter's bag	1839	CERAFix outer corner	104
Carpenter's case	1835-1837	CERAFix primer	96-97
Carpenter's hammer	1835-1836	CERAFix sealing compound	102
Carpenter's pencil	1764-1765	CERAFix sealing strip	103-104
Carpenter's square measuring tool	1703-1704	CERAFix sealing tape	103-104
Carpenter's tool case	1835-1836	CERAFix slurry-type seal coating	101-102
Carpet knife	1835,1879-1882	CERAFix tile adhesive	87-89,92,94
Carpet nozzle	1977	Chain	2376
Carriage	1102	Chain grease	312-313
Carrying straps	2365-2368	Chain link	733-734
Cart	2068-2069,2166-2167,2170	Chain pipe cutter	1903
Cart type	2115-2118,2150,2166-2167	Chain saw oil	327-328
Carton	215	Chain securing part	2618
		Chair and cabinet bracket	2457-2458
		Chalk	1764

Chalk holder	1764	Clay polish and cleaner	427
Chalk line	1765-1766	Clay series	429-431
Chalk line reel	1765-1766	Cleaner	131, 141, 234-235, 397-398, 401-402, 423
Chalk line reel with gear ratio	1765	Cleaner A/C	3076
Chamfer flush cutter	1141-1142	Cleaner additive, spray-injector system	246
Chamois	433	Cleaner for production shops and machinery	236
Channel nut, pipe installation	2845-2846, 2858-2861	Cleaner, bond seal	127, 135
Channel nut, VARIFIX	2854-2856, 2858-2861, 2878-2879	Cleaning agent	234-236, 238, 261, 278, 397-398, 401-402, 407, 413-414, 1226, 3076
Charger	2671-2673, 3057	Cleaning agent for FSK system adhesive	141
Charging cabinet for batteries	2095	Cleaning agent for vehicle air-conditioning system	3075
Charging cable	3058	Cleaning agent, A/C	264, 3081
Chassis clamp	2966	Cleaning and polishing cloth	271, 432-434
Chassis tie	2965-2966	Cleaning and washing device	278, 386-387
Chassis tool	2905	Cleaning and washing device spare part	387
Check list, service reception	3185	Cleaning brush for grinders	1248-1249
Check valve	1216	Cleaning brush for masonry	871-872
Chemical additive product	242-251	Cleaning bucket with wringer roller	1532
Chemical and wet protective glove	2231	Cleaning cloth	260, 266-272, 432-435, 461, 2287
Chemical bearing fastening	80-81	Cleaning cloth, glasses	2287
Chemical injection mortar	832-835, 838-841, 844-846	Cleaning cloth, moist	260, 268-269, 271, 2287
Chemical mounting system	832-841, 843-857, 866-872	Cleaning cloths	266
Chemical products, soldering	365, 1214-1215, 1219, 1234	Cleaning concentrate	392-395
Chemical products, welding	1224, 1226	Cleaning concentrate, car-washing	392-395
Chemical protective glove	2229-2232, 2241-2242	Cleaning concentrate, vehicle/commercial vehicle	391-395
Chemical protective glove, butyl	2232	Cleaning device	278, 386-387
Chemical protective glove, neoprene	2231	Cleaning device, high pressure	1979-1980
Chemical protective glove, nitrile	2241-2242	Cleaning device, Parts Cleaner	278
Chemical protective glove, nitrile, heavy-duty	2242	Cleaning foam for glass	400
Chemical screw retainer	78-80	Cleaning glove	431, 435
Chipping hammer	1924-1926	Cleaning gun	386-387
Chipping hammer, compressed air	1941	Cleaning gun, compressed air	386-387
Chipping hammer, electric	1115, 1921-1922, 1924-1926	Cleaning gun, drinking water	2897
Chisel with SDS-plus drive arbor	1111-1112, 1114-1116	Cleaning gun, Top Gun	386
Chisels	1760-1762, 1835	Cleaning liquid	277, 296
Chisels	1111-1114, 1755-1756, 1835	Cleaning mop	271
Chop saw, electric	1417-1419, 1986	Cleaning pad	429
Chuck for hand-held rivet pliers	1733	Cleaning paper	267-268, 273
Circlip	749-750	Cleaning paper floor stand	273-274
Circlip pliers	1875-1879	Cleaning paper roll dispenser stand	273-274
Circlip pliers assortment	2216	Cleaning paper roll holder	273-274
Circlips	749	Cleaning solution, welding, set	1226
Circular plug sleeve	2064, 2567	Cleaning sponge	275-276, 408, 430
Circular saw	1417-1418, 1992	Cleaning spray	408
Circular saw blade	1409-1410, 1417-1419, 1422-1425, 1433-1434	Cleaning table	278
Circular saw blade for metal mitre saw	1417-1419	Clear pocket	2182
Cladding film for doors	3142	Clear varnish	444, 456-457, 459-460, 466
Clamp	727-728, 2587, 2618-2619, 3095-3096	Clearing hoe	1691
Clamp	2545	Cleat	2441
Clamp	1797-1802, 1804-1805, 1835	Climate control membrane	2400
Clamp locking pliers	1902-1903	Climbing section extension	2142
Clamp, batteries	2988	Climbing technology accessories	2132
Clamp, chassis	2966	Clip	41
Clamping bar, load-securing devices	2370	Clip	706, 2614
Clamping beam	2360, 2365-2366	Clip fastening belt	2177-2178
Clamping element	2317	Clipboard	3183-3184
Clamping flange	2852	Clip-in profile	201
Clamping flange for C-mounting rail	2852	Clip-in profile with fabric	200-201
Clamping mandrel for abrasive fleece disc	1317-1319	Clip-in step	2132
Clamping mandrel for brush	1331-1332	Clip-on ammeter, digital	2629
Clamping mandrel for cutting and rough grinding discs	1362-1363	Clips and clamps	714-720, 3096-3100
Clamping plate III	2905	Closing cylinder spray	310
Clamping plate V	2905	Closing loop	710-711
Clamping ring	717-718	Cloth	273
Clamping tool	1798, 1800-1805, 2191-2192	Clothing, noise protection	3141
Clamping-lock lashing belt	2353-2355, 2362	Coarse cleaning abrasive fleece	1317-1319
Clamps and hose clamps	705-706, 709	Coarse-knit glove	2235
Claw coupling	2895-2896	Coating film	3118
Claw for wood connection	610	Coating thickness gauge	3140
Claw gripper	3091	Coaxial stripping tool	1874
Clay polish and cleaner	427	Cockpit care	418-419
		Cockpit cleaner	415

Cockpit cleaning and care spray	415	Concrete screws (hex.)	882
Cold pipe clamp	2780-2783	Concrete screws (PH)	885
Cold pipe, air conditioning	2730-2732	Concrete screws (SK)	883-884
Cold rubber	2707-2713	Concrete spreader	1544
Cold rubber, FLEXEN	2707-2713	Concrete stud screw	887
Cold water high pressure cleaner	1979-1980	Conduit mounting part	2615-2616
Cold wood glue	167-170	Conduit, electric	2569-2576, 2962-2964
Cold-shrink tape	2735	Conduit, electrical accessories 727-728, 2576-2581, 2614, 2618-2619, 2964-2965	
Collecting bottle for brake fluid	2902	Conical brush for angle grinder	1331
Collection device for used oil	2164-2165	Conical countersink	1127-1128, 1130-1132, 1649-1650
Collection tray	1585-1586	Conical countersink cassette	1127-1128, 1132
Colour card	12	Connecting membrane	2401
Colour chart	12	Connecting plates, metal	565-566
Colour marking	371-373	Connecting sleeve for aluminium pipe Alu-Steck-WES	2578
Colour sample card	12	Connecting sleeve for electrical conduit	2579-2580
Comb nail	2440-2441	Connecting sleeve for flexible plastic electrical conduit	2576
Comb nail / anchor nail	2440-2441	Connecting sleeve for steel-armoured pipe Stap- Steck-WESV	2577
Combination corner valve 1/2 inch, self-sealing	2889	Connecting sleeve, casting resin	2641
Combination corner valve, 1/2 inch	2888-2890	Connecting valve	2891
Combination corner valve, 1/2 inch with pipe ventilator ..	2890	Connection box	2499
Combination corner valve, 1/2 inch with pipe ventilator, self-sealing	2890	Connection bracket for C-assembly rail	2829-2833, 2835
Combination joist hanger	2434-2435	Connection clamp	2545, 2551-2554
Combination locking claw	2796	Connection nut	722-723
Combination partition	2724-2725	Connection plates, terrace construction	565
Combination pliers 1833-1835, 1847, 1852-1853, 1856-1858, 1864-1865		Connection seal for pressure reducer	1215
Combination pliers, VDE ... 1833-1834, 1852-1853, 1856-1858		Connection sleeve	2548-2549
Combination sponge	275	Connection sleeve for heat-shrinking technology	2641-2642
Combination workbench	3134	Connection sleeves	722-723
Combination wrench	931, 1769-1785, 2916	Connection terminal, screwless	2551-2555
Combination wrench	931, 1769-1770, 1775-1785, 2916	Connection/branch sleeve, gel	2640
Combination wrench assortment .. 1771-1773, 1775, 1777, 2213		Connector 1/2 inch	1490, 1503, 1896
Combination wrench set, Mercedes-Benz	1773	Connector 1/4 inch	1454-1455, 1503
Combination wrench set, offset	1770-1773	Connector 3/4 inch	1503, 1514
Combination wrench, angled 931, 1769-1770, 1774-1777, 2916		Connector 3/8 inch	1475-1476, 1503
Combination wrench, short ... 931, 1769-1770, 1774-1775, 2916		Connector DIN 7427	1503, 1603, 1607, 1625
Combination wrench, ultra slim	1775-1776	Connector DIN 7428	1607, 1624-1625
Combined sanding fleece/linen matting body (ceramic abrasive grain)	1268-1269	Connector DIN 7428 with SDS-plus mount	1624
Combined spreader	2426-2427	Connector with energy absorber	2315
Commercial vehicle car-wash brush	408-412	Connector with energy absorber and pipe carabiner	2315
Commercial vehicle high-performance lubricating grease ..	322	Connector with fall arrestor belt for scaffolding 2315, 2326-2327	
Commercial vehicle low-viscosity grease	313-314	Connector, cable	2064, 3036-3037
Compact fleece disc	1253-1254	Connector, CEE	2695-2699
Compact pipe cutter	1904	Connector, fall arrestor	2315, 2326-2327
Compartment separator set	2103	Connector, grounding contact	2699-2702
Compasses	1315, 1835	Connector, impact socket wrench 1/2 inch	1518, 1520
Composite mortar ... 832-841, 843-851, 853-857, 866-872, 890		Connector, socket wrench 1/2 inch	1490, 1503
Compound anchor	842-843, 850	Connector, socket wrench 3/4 inch	1503, 1514
Compound anchor cartridge system	842-843, 850-852	Connector, socket wrench 3/8 inch	1454-1455, 1461-1462, 1464-1469, 1471, 1503
Compound anchor mortar cartridge	842-843	Construction and industrial hose	2894
Compressed air depth cutter	1959	Construction foam	109-115
Compressed air depth grinder	1959	Construction foam cleaner	116
Compressed air grinding file	1958	Construction foam pistol	113, 1816
Compressed air machine	1734, 1939-1951, 1954-1963	Construction foil	2389
Compressed air spray	277	Construction hose	2894
Compressed air technology	108, 388, 1967	Construction joint seal	104-105
Compressed-air drum pump	352	Construction lamp	2652, 2655
Compression cable lug	2549-2550	Construction primer	95-97, 105
Compressor	2008	Construction screw	887-888
Compressor oil	327	Construction sealing strip	103-104
Concave cutter	1141-1142	Construction site distribution board	2694
Concealed beam connector	2440	Construction site helmet	2298
Concealed screws assortment	605	Construction site lamp	2384-2385, 2652, 2655
Concrete angle	2438	Construction site safety barrier	2377-2378
Concrete contact	95-96	Construction site sealant	33, 203, 1586
Concrete drill bit	916-922	Construction site spotlight	2384, 2664-2667
Concrete scraper	1546	Construction spotlight	2384, 2652-2653, 2993
Concrete screw	776-777, 882-885, 887-888	Contact adhesive	144, 158-159, 166
Concrete screw anchor, stair bolt, long	841	Contact assignment	2979, 2981-2982, 2984-2985
Concrete screw, stair bolt, long	841	Contact cleaner	251-252

Head lamp, battery-powered	2668	High-pressure hose	1212
Head protection	2266,2299,2302	High-pressure hose line	1222
Hearing protection	2262-2265	High-pressure sprayer.....	108,388-389,1966-1967
Heater.....	2392	High-profile nut.....	722-723
Heating element	2392	High-speed drill bit.....	965-968
Heating seal assortment.....	2737-2738	High-speed drill bit assortment	967-968
Heat-shrink connection set	2641-2642	High-strength spray adhesive	165
Heat-shrink crimp branch connector	3023	High-temperature lubricant paste.....	306,326
Heat-shrink crimp connector	2064,3020-3022,3024-3025,3029	High-temperature protective blanket	2303-2304
Heat-shrink crimp Y-branch connector	3023	High-temperature silicone	24,72
Heat-shrink end cap	2641	High-vis vest.....	2335,3173-3174
Heat-shrink end connector	3027	Hinge connector.....	2847-2848
Heat-shrink hose.....	2063,2642-2648	Hinged pipe clamp	2777-2780
Heat-shrink hose, butt connector	3026,3028	Hip batten bracket	2424-2425
Heat-shrink hose, medium-walled.....	2644	Hip nail.....	2425
Heat-shrink hose, thick-walled	2643	Hip roll	2406-2407
Heat-shrink hose, thin-walled	2063	HM cutter	2939
Heat-shrink hose, thin-walled assortment	2063	Hoe	1690-1691
Heat-shrink solder connector	3027,3029	Holder.....	1713,2176-2178,3164
Heat-shrink tape	229,2735	Holder for dies.....	1192,2067
Heat-shrink tubing	2063,2642-2648,2966-2967	Holder for Ø 2.6 mm and Ø 3.2 mm blades.....	1143
Heat-shrinking solution.....	2063,2641-2642,2645-2648,2966-2967	Holder for perforated plate system	2175
Heavy-duty anchor.....	842-843,850,873-875,894-895,903-904,907-908,910-911	Holder for screwdriver.....	1660,2190
Heavy-duty anchor, non-cracked concrete.....	910-911	Holder for square shank	1191,2067
Heavy-duty attachment.....	833-834,854-855,873-876,878-885,887-888,890-891,893-908,910-912	Holder for wrench assortment.....	1788-1789
Heavy-duty flat connector.....	2439	Holder, cable ties	2515-2516
Heavy-duty magnet	2178	Holder, cleaning paper	273-274
Heavy-duty side cutters, VDE.....	1852,1858	Holder, wire cable.....	725-727
Heavy-duty side-cutters.....	1846,1866	Hole and circular saw.....	1411,1421,1435-1436,1438-1440
Heavy-load shelf.....	2110	Hole circle saw	1435-1440
Hedge shears.....	1696	Hole mounting for cable tie fix device.....	2514
Height adjuster piece, pipe installation	2877	Hole puncher	931
Height adjuster, pipe installation	2877	Hole saw 1124-1127,1409-1411,1420-1421,1423-1425,1433-1440	
Helmet	2297,2299	Hole saw with countersink bit.....	1421
Helmet	2266,2297-2299	Hollow ceiling anchor	899
Helmet, welding.....	2306	Hollow drill bit	1107-1108
Hemp sealant, sanitation	2738-2739,2744	Hollow gouging chisel	1111-1112,1114-1115
HES 412 hand-held rivet setting pliers assortment	1735	Hollow pipe clamp.....	727-728
Hexagon nut with clamping piece.....	641	Hollow punch.....	1650
Hexagon nut, type B/A4	881-882	Hollow section fastener	735-737,786-790,2062
Hexagon socket bit.....	1447-1448,1461,1463,1466,1468,1470,1472,1599-1600,1603,1605,1610,1613,1615,1617	Holstein sand shovel	1543
Hexagon socket socket wrench insert.....	1459,1462,1465	Holzfix	159
Hexagon socket wrench.....	1459,1462,1465	Honeycomb structure.....	272
Hexagonal nut.....	640-641,722-723	Hook.....	730-732,2174,2371
Hexagonal threaded sleeves.....	722-723	Hook nail.....	2610
Hexagonal wood screw	596-604	Hook screw	738
HHS Clean.....	305	Hook with wood thread.....	730-732
HHS Product	301-305	Hook-and-loop fastener strap.....	231-232
High-end power LED pocket torch.....	2676-2678,3091	Hooked blade.....	1884-1885
High-gloss polish.....	426	Hook-in basket.....	2166
Highly flexible line.....	3054	Horizontal securing system	2319
High-performance anchor with countersunk head screw.....	895,897	Hose.....	1976,2893-2894
High-performance anchor with hexagonal bolt	894,896	Hose bandage.....	2894
High-performance anchor with threaded bolt.....	893,895-896	Hose clamp.....	699-708,2737-2738,2895-2896,2921
High-performance anchor, cracked concrete	893-897	Hose clamp set	700-701
High-performance annular cutter	1412-1413	Hose clamp with clamping jaw.....	707
High-performance die	1206	Hose clamp with corrugated spring.....	702-703
High-performance drill bit.....	938,957-958,1069-1093	Hose clamping tongs, radiator	3086,3091
High-performance gas device	1932-1934	Hose clamps and clips.....	699-710,2738
High-performance grease.....	305,308	Hose connector, plastic, vehicle	3100-3101
High-performance lubricating grease, commercial vehicles.....	322	Hose coupling.....	2895-2896

Hose pack for pressure-testing valve	3110
Hose patches	2909,2939
Hose pinch-off pliers set	3091
Hose sleeve	2894
Hose, construction and industry	2894
Hose, vacuum	3103-3104
Hot glue gun	2029
Hot melt adhesive	172-173
Hot-melt adhesive	172-173
Hot-melt edge adhesive	172-173
Hot-melt edge adhesive cartridge	172-173
Hot-melt edge adhesive pellets	172
House connection	2649
Household glove	2229
Housing sealing compound	73-74
HSCO conical countersink with cross hole	1128
HSS blade for internal/external burrs	1143
HSS blade for steel and aluminium	1143
HSS blade for straight edges	1143
HSS blades for brass and cast iron	1142-1143
HSS cutter	2939
HSS die	1206
HSS drill bit	999-1002,1019-1022
HVAC fishplate bolt	2836
HVAC mounting accessories	725,2845-2846,2858-2859
HW cylinder saw	1411
HW hole saw	1420-1421
Hybrid ladder	2128-2130
Hydraulic oil	331-332
Hydraulic oil, bio-degradable	331
Hydraulic oil, HEES 46	331
Hydraulic safety nozzle	317
Hydraulic seal	75-76
Hydraulic sealant	75-76
Hydraulic transmission jack	2161
Hydraulic trolley jack	2163-2164
Hydro sponge	276
Hygiene products	275,285
Hygienic operating cleaner	395

Protective jaw for vice.....	2192
Protective lacquer.....	428
Protective membrane	1586
Protective paper/covers for construction and bodywork parts	3119
Protective plate.....	2390-2391
Protective screen, mobile.....	2304
Protective soldering blanket.....	2303-2304
Protective suit	2333
Protective suit, disposable	2333-2334
Protective wax	366,428
Protector, steering wheel	3064-3065
Protector, vehicle	3062-3065
Protractors.....	1700-1701
Pruner.....	1695
Pry bar.....	2910,2912,3126
Prybar.....	1752
PTFE dry lubricant spray.....	307
PTFE spray	307
PU foam	109-115
PU foam cleaner	116
PU foam cleaner	116
PU foam gun	113
Pulaski hoe axe.....	1691
Pull cup	1533
Puller	1809-1811
Pulling handle	3130
Pulling tabs for dent repair system	3084-3085,3124
Pump	872,2393-2395
Pump spray bottle.....	242,3070-3071
Punched mounting strip with marginal perforations	2613
Punched mounting strip, no marginal perforations....	2612-2613
PUR foam adhesive	171,174
PURlogic foam	109-115
PURlogic foam cleaner	116
PURlogic foam gun.....	113,1816
PURlogic foam gun.....	113
PURlogic PU foam cleaner	116
Push connector, heat shrink	3020

Push connector, insulated	2064,2565-2566
Push connector, uninsulated.....	3038-3040
Push rod	2603
Push rod guide head	2602-2603
Push terminal.....	2551-2554
Push trolley	2151
Push-button.....	2489
Push-fit clips.....	2581-2582,2586
Push-in quick-fit plug.....	2918-2919
Pushing slide	2878-2880
Push-on step	2132-2133
Push-through ratchet adapter.....	1471-1473
Push-through ratchet extension	1471-1472
Push-through reversible ratchet	1471-1472
Push-through socket wrench assortment	1471-1473
Push-through square for pass-through ratchet 1/2"	1896
Push-through square, 1/2-inch.....	1896
Putty, high temperature.....	24
Putty, polishing and cleaning	427
PVC sheathing system	2715-2716
PVC sheathing system, 90° bend.....	2715
PVC sheathing system, endless roll.....	2716
Pylon.....	2377-2378

Q

Quarter-rod cutter	1141
Quick deburrer	1848-1849
Quick Fresh Active.....	421
Quick hardening glue	169-170
Quick-acting clamp	1798-1799,1801
Quick-action ceiling anchor	776
Quick-action chain fastener	733-734
Quick-action chuck.....	1118-1119
Quick-action closure	704-705,733-734
Quick-action connector for pneumatic control line.....	2920
Quick-action paint tester	3140
Quick-action paint thickness tester.....	3140
Quick-action plug connectors for pneumatic brake system.....	2918-2920
Quick-change adapter for bi-metal cylinder saw	1422,1440
Quick-change adapter for cylinder saw	1422,1433,1440
Quick-change adapter for drill bit.....	1423-1425,1433-1434
Quick-clamping nut	2013
Quick-clamping nut for angle grinder	2013
Quick-connect nipple with hose.....	2911
Quick-fit coupling for steel-armoured pipe.....	2577
Quick-fit nipple	2911
Quick-mount NPH clip	3164
Quick-mount NPH screw	3163
Quick-mount number plate holder.....	3146-3164,3166-3167,3179
Quick-mounting clip for multiple cable holder	2592
Quick-release coupling.....	317
Quick-release service coupling for R134a air conditioning unit	3110

Rafter clamp	1805	Recoil-free hammer	1745-1747
Rafter nail	2454-2455	Recommended installation, plaster stop beads.....	205-206,210-211
Rafter-to-purlin connector	2455-2456	Recyclable material bag	2153,2155
Rail	2591-2592	Recycling system	2155
Rail connector, C-assembly rail.....	2835,2843-2845	Red brass extension	2747
Rail connector, VARIFIX	2844-2845,2850	Reducer plug adapter.....	2699
Rail connectors	2844-2845	Reducer plug adapter, CEE	2699
Rail end plugs	2834	Reducing nipple.....	2741,2743
Rail system, VARIFIX2620-2621,2798-2823,2826-2851,2853-2867,2870-2871,2874-2876,2878-2880		Reducing nipple for metric thread	2857-2858,2868
Rail/windowsill duct, device mounting box.....	2608	Reduction for cable gland.....	2522-2523
Railing duct accessories	2606,2608	Reduction, metric.....	2522-2523
Rain/light sensor pad	3122-3123	Reel holder ORSY10	1258
Rakes.....	1542,1692-1693	Reel star ORSY10	1258
RAI plane	1767	Reference book	2365
Random orbital sander, compressed air	1954	Refill	2636
Random orbital sander, electric.....	1997-2000	Refill kit for first aid bag	2291,3173-3174
Rapid repair tape	2734	Refill pack for first aid kit.....	2291
Rapid SML connector.....	2795-2796	Refill pack for plaster dispenser	2292
Rapid windscreen cleaner.....	437-438	Reflective tape	3002-3003
Rasp	1835	Reflective tape	2339,2343-2344,2375-2376,3003
Ratchet 1/2 inch	1488,1508	Reflective tape, commercial vehicle	3000-3004
Ratchet 1/2 inch with lever reverse	1488,1508-1509	Refrigerant.....	3078-3079
Ratchet 1/2 inch with rotary disc reverse	1450,1487,1503-1508	Refrigerator	2824
Ratchet 1/4 inch	1452,1462-1463,1526	Refuse bag	2153,2155-2157
Ratchet 1/4 inch with lever reverse.....	1451-1452,1461-1463	Reinforcement connectors	190
Ratchet 1/4 inch with rotary disc reverse	1448,1452,1466-1469	Reinforcement fabric	203
Ratchet 3/4 inch	1513-1515,1528	Reinforcement tape	141
Ratchet 3/8 inch.....	1474,1482-1483,1526-1527	Reinforcing filler compound	464
Ratchet 3/8 inch with lever reverse	1482	Release paste.....	305,326
Ratchet 3/8 inch with rotary disc reverse	1449,1469,1473,1481,1484-1485	Release tool.....	2968-2969
Ratchet bit assortment.....	1613-1614	Release tool with locking lug.....	2968-2969
Ratchet combination wrench.....	1778-1781,1783-1785	Releasing agent	107
Ratchet combination wrench (open side open).....	1782-1783	Remote control.....	1718
Ratchet combination wrench assortment.....	1779-1785	Removable adapter set for R1234YF air-conditioning unit	3109
Ratchet combination wrench set	1779-1785	Removable adapter set for R134a air-conditioning unit.....	3109
Ratchet combination wrench set (open end open)	1782-1783	Removable frame	2182
Ratchet combination wrench set, metric.....	1779	Remover of label.....	234-235
Ratchet combination wrench with swivel head	1783,1785	Rendering base.....	95
Ratchet combination wrench, metric	1778-1779	Renovation sander	1995
Ratchet cutter, one-hand	1860,1867	Renovation sander	1995
Ratchet double ring spanner	1471,1781-1782	Renovation strip	616-619
Ratchet double-end box wrench assortment.....	1470-1471	Re-openable cable tie.....	2511
Ratchet for 10 mm bit	1614	Repair asphalt.....	31-32
Ratchet for 10-mm bit	1614	Repair brush.....	1559
Ratchet for 10-mm bit.....	1614	Repair coating	369
Ratchet head 1 inch	1516	Repair filler	382
Ratchet lashing belt, two-part	2357	Repair hose line	3102-3105
Ratchet magazine screwdriver.....	1651,1654-1657,1836	Repair hose line FPM/ECO/AR/ECO.....	3102-3103
Ratchet screwdriver, compressed air.....	1960-1962	Repair hose line, NBR/CR.....	3104
Ratchet strap	2352-2357	Repair hose line, NBR/textile.....	3105
Ratchet strap accessories	2364	Repair kit	141,2600
Ratchet tool set.....	1779-1785	Repair kit for plastic.....	141
Ratchet wrench	1471,1781-1782,1786	Repair resin	464
Ratchet wrench for oil filters	3088	Repair screw	619,625-626
Ratchet, 1 inch	1516	Repair socket	2984-2986
Ratchet, 1/2 inch	1450,1487-1489,1503-1509,1896	Repair tape	2734
Ratchet, 1/2 inch	1450,1487-1489,1503-1509,1896	Repair wax	374-376
Ratchet, 1/4 inch	1448,1451-1453,1461-1464,1466-1469	Replacement application nozzle.....	155-156,1813-1815
Ratchet, 1/4 inch	1448,1452-1453,1462-1464,1466-1469	Replacement blade for plane.....	1767
Ratchet, 3/4 inch	1513-1515	Replacement bulb assortment.....	3006
Ratchet, 3/4 inch	1513-1515	Replacement cartridge for Turbojet soldering gun	1215
Ratchet, 3/8 inch	1449,1469,1473-1475,1481-1485	Replacement glass pane for welding face shield	2305-2306
Ratchet, 3/8 inch	1449,1469,1473-1475,1481,1483-1485	Replacement line	3052-3054
Reactive resin mortar	836-840	Replacement lock for cable tie fix device	2514
Receiver bracket.....	1718	Replacement loop for wheel/tyre tag.....	3182
Receiver, laser.....	1718,1720	Replacement nozzle.....	155-156,1813
Recessed-head wood screw	572-575,577-578,584-586	Replacement plane blade	1767
Rechargeable battery.....	1816,2669	Replacement plugs.....	2264
		Replacement rubber for windscreen wiper	3106
		Replacement rubber refills for flat blade technology	3106

Replacement rubber refills for frame windscreen wiper.....	3106	Roll-off unit for interior protection	2909
Replacement silicone hose for collection bottle	2909	Rollprofi	2593-2594
ReplastEasy	135,138-141,145	Rolls	1258
Resetttable fuse.....	3029,3032	Roof jointing elements	2424-2426
Resetting tool set for brake piston.....	2904-2905	Roof protection film	2401,2408-2413,2416
Resin.....	132-133,464	Roof sealing ..50-51,2398-2399,2401-2413,2416-2421,2428	
Resin remover.....	405-406	Roof ventilation	2422-2424,2430-2431
Retaining clip for C-assembly rail	2835-2836	Roofer trowel.....	1539
Retaining clip for welding cap	2307	Roofer's hammer.....	1753
Retaining pin	2173	Roofing ABC set.....	2327
Retaining system	2176	Roofing nail.....	728
Retaining system, universal.....	2176	Roofing screw with expanding spacer sleeve	633
Retouching	145,374-383	Rope, mast anchorage.....	2311,2315,2326-2327
Retouching paint box	374	Rope-operated ladder	2126
Retouching putty.....	145,382-383	Rosette	2891
Retouching stick	380-381	Rotary sander, electric	1997-1999
Retouching wax	377-379	Rotary table for vice	2192
Retouching wax, fusible.....	374-376	Rotating beacon	2996-2998
Retractable pencil	2636-2637	Rotating/flashing light 12 V/24 V	2996-2998
Retro-reflective tape for tarpaulins	3003	Rotation laser.....	1716-1719
Retro-reflective warning marking.....	3002-3003	Rough grinding disc	1352-1356,1360-1363,1365-1366
Reusable painting overall	2335	Round arch profile with fabric.....	199
Reversible blade	1651,1653	Round connector, insulated	2064,2567-2568
Reversible blade	1142	Round cord, butyl	47-48
Reversible blade RALI, chromium steel	1766	Round nut	723
Reversible blade, cemented carbide.....	1142,1767	Round pan rivets.....	712-713
Reversible blade, HSS	1767	Round plugs	2064,2567-2568
Reversible screwdriver assortment	1652	Round rod.....	746
Reversible tip accessories.....	1142	Round sling.....	2365
Reversible tip groove cutter	1142	Round/hexagonal sleeve.....	722-723
Reversing light.....	3004-3005	Routing cone	2377-2378
Reversing light, vehicle.....	3013,3019	Rubber adhesive.....	144
Revolving chair, workshop.....	2119-2121	Rubber backing for sanding belt	1334
Ribbed bracket	2467	Rubber base for socket	2988
Ribbon cable holder	2515	Rubber care.....	405,422
Ridge batten bracket.....	2424-2425	Rubber edge	3106
Ridge end disc	2405	Rubber Fit	422
Ridge nail	2425	Rubber hose line.....	3054-3055
Ridge seal.....	2405-2407	Rubber insulation, sanitation/heating.....	2707-2713
Ridge vent strip	2404	Rubber mallet.....	1753
Ridge/hip nail	2425	Rubber seal for 7-pin socket 12V	2988
Rigid aluminium pipe.....	2571-2572,2575	Rubber tensioner, tarpaulin fastener	2370
Rigid electrical conduit	2571-2576	Rubber wiper	411-412
Rigid steel-armoured pipe, galvanised	2572,2575-2576	Rubber wrapping tape.....	2728-2729
Rigid steel-armoured pipe, hot-dip galvanised	2574	Rubber/metal buffer.....	2868-2870
Rim brush	408-412	Rucksack.....	1840-1842,2326-2329
Ring cable lugs	2064,2564-2565	Rule	1704,1728-1729,3175-3177
Ring connector.....	2064,2564-2565,3022	Ruler	1701
Ring connector insulated	2064,2564-2565	Runged ladder.....	2129
Ring screw	732	Rust converter.....	358
Ring wedge	1749-1750	Rust loosener.....	294-296,398
Rinse aid	395-396	Rust off rust loosener	295
Rivet gun.....	1946,1969	Rust remover.....	294-295,358,398,428
Rivet nut accessories	1736-1738	Rust Stop primer.....	356-357
Rivet nut pliers	1736-1737,1739	Rust stop QUATTRO	357
Riveter	1734,1945-1946		
Riveter accessories	1733-1734		
Riveter, battery-powered	1969		
Riveter, compressed air.....	1734,1945		
Riveter, pneumatic	1734,1945		
Riveting technology.....	1732-1737,1739		
Rivets	712-713		
Rock wool fire protection	2722-2725		
Rock wool insulation, sanitation/heating	2722-2725		
Rod electrode	1227-1229		
Rod grinder, compressed air	1955-1957		
Rod tin solder	1233-1234		
Roll ridge	2406-2408		
Roller.....	1566-1577,1579,1806		
Roller stand	2139		
Roller-bearing grease	308		
Roll-head pry bar	2910

Staples for hand-held and hammer stapler	1743-1744	Straight connector, insertable	2938
Staples for hand-held stapler	1743-1744	Straight grinder	2000-2001
Starter	2955-2956, 2958-2959	Straight grinder, brush	1327-1328
Starter battery	2989-2993, 3058-3059	Straight grinder, electric	2000-2001
Starter battery, commercial vehicles	3058-3059	Straight passage connector	2920
Starter battery, vehicle	2989-2993	Straight plug connector	2918-2919
Starter cable	2959-2960	Straight shank	943-944
Starter cable, replacement line	3054	Straight-cutting shears	1907
Starting aid spray	253	Straight-edge	1712-1713
Starting aid, vehicle	2955-2956, 2958-2960	Straightening clamp, door case	1804
Start-Rapid	253	Straightening clamp, window	1802
Static mixer	150, 868-869	Strap clamp, earthing	2562
Static mixing tube	141, 150-152	Strap for axle boot	2568
Station staff	1715	Strap wrench	3088
Station staff tripod	1715	Strapping clip for Spannfix strapping system	1808
Stationary platform	2131	Strapping system	1807-1809
Steel adhesive weight	2922-2923, 2929	Strapping trolley	1807
Steel adhesive weight for vehicle aluminium rims	2922, 2931	Street broom	1547-1548
Steel bracket	2457-2458	Street rake	1542
Steel cabinet	2091-2094, 2171-2172	Stretch film	215
Steel drill bit	993-999, 1002-1015, 1017-1069, 1093-1094, 2067-2068	Striking tool assortment	2214
Steel flexible hose	2887	Strip	2160
Steel measuring tape	1730, 1833	Strip for number plate holder	3147-3150, 3152-3159
Steel packing tape	1586-1587	Stripping knife	1833-1834, 1869-1871, 1873-1875
Steel perforated strip	2612-2613	Stripping tool	1833-1834, 1868-1870, 1872-1875
Steel pipe	2572, 2574-2576	Structural adhesive	118-122, 127, 129-130, 136-137, 141-144, 158-159
Steel pipe cutter	1904-1905	Structural adhesive primer	123, 126
Steel rule	1700-1702	Strut extension	2131
Steel screw tap	1146-1147, 1159-1161, 1169-1170, 1179, 1185	Stud anchor	842
Steel sheet cable drum	2684-2685	Stud bolt	652-653
Steel strap shears	1834, 1912	Stud bolt extractor	3083-3084
Steels bands	1586-1587	Stud bolt extractor assortment	3084
Steel-tube trolleys	2146-2147	Stud bolts	2852
Step	2132-2133	Stud screw	2793-2794, 2867-2868
Step ladder	2126-2130, 2144	Stud screw, solar collector	2793-2794
Step ladder	2126-2128	Submersible pump	2393-2395
Step socket wrench 1/2 inch	2735	Suction brush, plug-in	1974
Step weld point drill bit	941-942	Suction cup	3137
Stepped drill bit	633, 1097	Suction unit, oil	2164-2165
Stepped drill bit, spiral	1096-1097	Summer windscreen cleaner additive	437-438
Sticker, speed restriction for winter wheels	3181	Sunscreen	288-289
Sticker, stone chip	3185	Sunscreen cream	288-289
Sticker, vehicle	3169	Super Clean	408
Stirrer accessories	2009	Super nippers	1866
Stone chisel	1755-1756	Super RTV silicone	72
Stone drill	916-922, 948, 950-951	Super-fast glue	141, 162-163
Stone impact and corrosion protection	363	Superglue	141, 159-164
Stone impact and underbody protection	363	Superglue activator	141, 160, 164
Stone impact protection	363, 3120-3121	Support pad	566
Stone impact protection, AQUA	363	Support pad for decking substructure	566
Stone or bricklayer's chisel	1756	Support plate	1247, 1319
Stool	2118	Support plate, vulcanised fibre disc	1249-1252
Stool	2118-2123	Support sleeve, brass	2918
Stop bit	779	Surface brush for drill	1331-1332
Stop clamp	2332	Surface brush with shank	1331
Stop end	2738, 2744	Surface cleaner	1980
Storage and transport pallet	332-333	Surface cleaner	127, 131, 135, 141, 152, 238, 241, 263, 423-424, 428
Storage box	2275, 2336	Surface cloth	203-205
Storage box	2043-2044, 2168-2170, 2172	Surface coating	428
Storage box for personal protective equipment	2287, 2336	Surface coating building	27-31, 33, 101-104, 203
Storage compartment	2184	Surface improver	145, 382-383
Storage management	2054-2055	Surface pre-treatment agent, replacement glazing	155-158
Storage pallet	332-333	Surface protection	358, 407, 426, 428
Storage rack	2109-2110, 2170	Surface repair	145, 374-383, 428, 456-457
Storage system	2184	Surface repair kit	374, 425
Storage system	1258, 2043-2044, 2061, 2068-2069, 2091-2094, 2096-2100, 2103-2104, 2168-2172	Surface repair kit, set 1	374
Storage tray	2184	Surface rust remover	428
Storage clip	2425-2426	Surface sealant	82-84
Storz coupling	2894	Surface sealant, low-viscosity	84
Stowaway ladder	2136	Surface sealing	27-31, 33, 101-102

Surface spatula	384-385

Twist drill bit box, HSCO DIN 338	987
Twist drill bit for metal	934-935,961-987,989-990,993-999,1002-1022,1094,2067-2068
Twist drill bit for steel.....	1019-1022
Twist drill bit for wood.....	939-940,955-956,1022
Twist drill bit, DIN 1869	961,993-997
Twist drill bit, DIN 1897	964-965
Twist drill bit, DIN 338	969-981,986-987,1002-1016,1094,2067-2068
Twist drill bit, DIN 340	982-983,1017-1019
Twist drill bit, DIN 345.....	983-985
Twist drill bit, HSCO DIN 1869 R2	962
Twist drill bit, HSCO DIN 1869 R3.....	963
Twist drill bit, HSS DIN 1897	997-999
Twist wood drill bit.....	939-940
Two-hand angle grinder	2018-2020
Two-pin voltage tester.....	2623-2624
Two-stroke engine oil	336
Two-stroke mixture.....	336
Tying rope	2396-2397
Tyre assembly paste.....	325-326
Tyre bag	2909
Tyre foam.....	405
Tyre inflator	2906-2909
Tyre inflator accessories	2911-2912
Tyre iron.....	2910,2912

Tyre lever	1752
Tyre mounting paste	325-326
Tyre mounting range, vehicles.....	2935
Tyre pressure gauge	2907
Tyre pressure monitoring system	2915-2916,2940-2944
Tyre pressure monitoring system, special tool for rubber seal	2916
Tyre pressure monitoring system, tool set.....	2915-2916
Tyre profile depth gauge	2931
Tyre profile depth gauge	2931
Tyre rack.....	2112-2113
Tyre repair cutter	2939
Tyre repair press-on roller.....	2939
Tyre repair sanding block.....	2939
Tyre repair, Pneusil	2939
Tyre repair, vehicle/commercial vehicle	2909,2939
Tyre storage and accessories.....	3180-3182
Tyre tag.....	2937
Tyre valve extension	2936-2937
Tyre valve insert	2937
Tyre valve, accessory.....	2936-2937
Tyre valve, vehicle	2932-2934
Tyre valve, vehicle, universal.....	2933-2934
Tyre/wheel ID sticker	3181

U

U-bolt clamp	3095-3096
U-holder	2175
Ulm hoe	1690
Umbrella.....	3177-3178
UNC threaded bushing.....	1196
Underbody seal.....	363-366
Underbody seal cup gun	369
Underbody seal gun	369
Undercounter cabinet	2099-2100
Underlay membrane and roof protection film	2409-2413
Underlay membrane and roof protection film WÜTOP	2408,2416
Underlay membrane film	2411-2413,2416
Underlay non-breathable membrane	2416
Underseal cup gun	369
Uni marker set	2636
Union nipple.....	2742
Union nut	2742
Universal adapter.....	1718
Universal adhesive tape	228-229
Universal air-conditioning valve	3109
Universal anchor	605
Universal axle boot installation set, short	2921
Universal bit holder	1603,1610,1620-1624
Universal brush	1566
Universal burner	33
Universal cleaner.....	237-238,391,407-408
Universal cleaner, vehicle.....	237
Universal control cabinet key	1688
Universal cover fleece.....	2388
Universal cube.....	2868
Universal cube, pipe installation.....	2857-2858,2868
Universal dispenser system.....	1258-1259
Universal glider	2317
Universal glove.....	2252
Universal holder with SDS-plus mounting.....	1621-1622
Universal hose clip	2921
Universal knife	1835,1879-1883,1887
Universal lever	3126
Universal load dolly.....	2145
Universal marker	2637
Universal mounting brace.....	197
Universal paste	105-106
Universal primer	448,453

Universal puller.....	1809-1810
Universal puller set.....	1810
Universal retaining system.....	2176
Universal screw tap.....	1166-1167,1172-1173,1176-1177
Universal scribe.....	1764
Universal switch.....	2488-2491
Universal tape.....	2568
Universal tensioning strap.....	703
Universal thinner.....	459
Universal undercoat.....	96-97
Universal valve.....	3109,3115
Universal valve assortment.....	3109
Unprinted ice scraper with handle.....	3179
Upholstery cleaning device.....	386
Upholstery clip.....	720
Upright distributor.....	2694
Used oil collection device.....	2164-2165
Useit abrasive.....	1299
Useit sanding disc.....	1290-1291
Utensils basket.....	2166
Utility knife.....	1835,1879-1882,1887
UV adhesive tape.....	2735
UV fold masker.....	193-195
UV leak detection additive, basic.....	3080
UV leak detection additive, premium.....	3080

V

Vacuum and pressure injector.....	3074-3075
Vacuum cleaner.....	1970-1972,1975,1978

The processing data are recommendations based on our tests and experience; prior to each application, own tests must be carried out. Due to the multitude of applications as well as storage and processing conditions, we do not assume any warranty for a certain processing result. Insofar as our free customer service provides technical information or acts in an advisory capacity, this is done to the exclusion of any liability, unless the advice or information is part of our owed, contractually agreed scope of services or the advisor acted intentionally. We guarantee constant quality of our products, we reserve the right to make technical changes and further developments. Please note the technical data sheet!

Neutral silicone Perfect

Low-emission, highly adhesive and versatile sealant for expansion joints in indoor and outdoor areas. Specially designed for window glazing and sanitary applications

- The silicone sealant is MEKO-free and is therefore classified as low-emission and environmentally friendly and has been awarded the EMICODE EC1 Plus label
- Meets the requirements for window glazing in accordance with DIN 18545, Part 2, Sealant Group E
- Excellent adhesion to wood, metals and many plastics

Meets the requirements of DIN EN 15651 Parts 1/2/3 Sealants for façade elements/glazing/sanitary joints

- Fire behaviour: Class E
- Stability under load: < 3 mm
- Volume loss: < 10%
- Adhesion/expansion under pre-stress after being immersed in water: Passed
- Adhesion/expansion on exposure to heat, water and artificial light: Passed
- Elastic recovery: ≥ 70%
- Tensile stress value for tensile behaviour: < 0.4 MPa

Chemical basis	Neutral crosslinked silicones, oxime-based
Min. skin-formation time	10 min
Continuous motion absorption	25 %
Shore A hardness	28
Ultraviolet resistance	Yes
Min./max. temperature resistance	-40 to 180 °C
Min./max. processing temperature	5 to 40 °C

Full curing speed/conditions	2 mm/d/23 °C and 50% relative humidity
Shelf life from production	18 Month

Neutral silicone

For floor and wall joints subject to medium stresses

- Adhesion to all building-related surfaces
- Resistant to ageing, weathering and UV
- Permanently elastic
- Compatible with paint

Chemical basis	Neutral crosslinked silicones, oxime-based
Min. skin-formation time	5 min
Continuous motion absorption	25 %
Min./max. skin-formation time/ conditions	5-8 min/at 23 °C and 50% relative humidity
Ultraviolet resistance	Yes
Min./max. temperature resistance	-40 to 150 °C
Min./max. processing temperature	5 to 40 °C
Full curing speed/conditions	2 mm/d/23 °C and 50% relative humidity
Shelf life from production	12 Month

Continuation **Neutral silicone**

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 15651 Part 1 INT

- Fire behaviour: Class E
- Stability under load: < 3 mm
- Volume loss: < 20%
- Adhesion/expansion under pre-stress after immersion in water: Passed
- Adhesion/expansion at different temperatures: Passed
- Adhesion/expansion after exposure to heat, water and artificial light: Passed
- Tensile behaviour: Breaking elongation at 23 °C: > 25%

The colour display is for guidance only. For an exact colour selection, please use our colour sample cards.

Neutral silicone is not suitable for adhesive bonding or filling hollow spaces. Complies with building material class B2 in accordance with DIN 4102. Due to the large number of varnish and glazing formulations available, especially on alkyd resin paints and powder-coated aluminium, always carry out your own tests on the area first. Risk of yellowing on contact with white alkyd resin paints cannot be excluded. When hardening, neutral silicone gives off an odour typical of silicone. This odour can no longer be smelled once the hardening process is complete.

For materials and substances that come into contact with the sealant after processing, the user must ensure that their content or fumes cannot cause any impairment or alteration (e.g. discolouration) of the sealant joint. To determine the precise colour, use sample card art. no. 5995000402

No bag tips, art. no. 0891601001, are provided with the 600 ml bags. These must be ordered separately.

Silicone acetate

For tile joints with medium stresses, for indoor and outdoor use.

Broad range of uses

Excellent adhesion to a broad range of substrates, especially also on glazed surfaces

Highly resistant

Resistant to ageing, weathering and UV

Permanently elastic

Can be painted

Chemical basis	Sauer silicones (acetate systems)
Continuous motion absorption	12.5 %

Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-40 to 120 °C
Min./max. full curing speed/conditions	2-3 mm/d/23°C and 50% relative humidity

Container	Contents	Colour	Art. no.	P. Qty.

Cartridge	310 ml	Transparent	0892 570 1	24
Cartridge	310 ml	White	0892 570 2	24

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 15651 Part 1

- Fire behaviour: Class E
- Stability under load: ≤ 3 mm
- Volume loss: $\leq 2.5\%$
- Tensile behaviour under pre-stress and immersion in water: NF
- Durability: Passed

The colour display is for guidance only. For an exact colour selection, please use our colour sample cards.

Silicone acetate is not suitable for bonding or filling cavities. Due to the large number of varnish and glazing formulations available, especially on alkyd resin paints and powder-coated aluminium, always carry out your own tests on the area first. Risk of yellowing on contact with white alkyd resin paints cannot be excluded. Risk of corrosion when used on bare iron and non-ferrous metals.

For materials and substances that come into contact with the sealant after processing, the user must ensure that their content or fumes cannot cause any impairment or alteration (e.g. discolouration) of the sealant joint. To determine the precise colour, use sample card art. no. 5995000406

No bag tips, art. no. 0891601001, are provided with the 600-ml bags. These must be ordered separately.

High-temperature silicone

Special sealant for joints subject to high temperatures

- Temperature resistant up to +250°C, short term (max. 1.5 h) up to +300°C
- High resistance to large number of chemicals
- Resistant to ageing and UV

Contents	310 ml
Container	Cartridge
Colour	Red brown
Chemical basis	Sauer silicones (acetate systems)
Continuous motion absorption	20 %
Min. breaking elongation	350 %
Min./max. temperature resistance	-50 to 250 °C

Continuation **High-temperature silicone**

Max. short-term temperature resistance	300 °C
Min./max. processing temperature	5 to 40 °C

Art. no. 0892 330

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Classified in accordance with DIN 4102 B2 - normal flammability (in cured state).

Colour silicone

High-quality multifunctional sealant in individual RAL colours

- Available in individual RAL colour tones
- Suitable for sanitation applications
- Large adhesive spectrum
- No plasticisers, therefore compatible with natural stone
- Permanently elastic
- UV-resistant
- Can be painted
- Weather-resistant
- Building material class B2 to DIN 4102

Contents	310 ml
Container	Cartridge
Chemical basis	Neutral crosslinked silicones, oxime-based
Continuous motion absorption	25 %
Min./max. skin-formation time/conditions	10-15 min/at 23 °C and 50% relative humidity
Min. processing temperature	5 °C
Max. processing temperature	40 °C

Art. no. 0892 580 0

P. Qty.: 12

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with DIN EN 15651 Part 1/Part 3

- Fire behaviour: Class E
- Stability under load: ≤ 3 mm
- Volume loss: $\leq 10\%$
- Adhesion/expansion under pre-stress after being immersed in water: no performance requirement specified
- Tensile behaviour for use in cold climatic zones at -30°C : ≤ 0.9 MPa
- Tensile behaviour in cold climatic zones: no performance requirement specified
- Durability: Passed
- Microbiological growth: 2

Colour options:

All RAL colours in accordance with the RAL colour card, art. no. 0705 800 010, are available. All neon and metallic colours are excluded. Attention! Colour silicone is a special product tailored for customers. For production reasons, minor fluctuations in the colour may occur. This is not a product defect. It is not possible to exchange the products. Carry out colour matching with existing material prior to application.

Your procedure for obtaining individually produced special silicone colours:

1. Record the article number 08925800.
2. Select the desired RAL colour based on the RAL colour card (art. no. 0705 800 010) and specify the RAL number. Colour specification in the system is always carried out with the RAL no. in the order-related text.

Attention: Neon and metallic colours cannot be produced for technical reasons (RAL no.: 1026, 2005, 2007, 3024, 3026)

3. Specify the quantity. This must always be a multiple of the packing unit 12.
4. Order is sent and conveyed to Production.
5. Production of the customised colour silicone in the desired RAL colour for the customer. Colour silicone is a special product tailored for customers. For production reasons, minor fluctuations in the colour may occur. This is not a product defect. It is not possible to exchange the products. Carry out colour matching with existing material prior to application.
6. You receive your colour silicone produced in your customised colour after 10 working days

*The adequacy of the sealant in sanitation applications depends on the moisture load and the ventilation properties.

Cannot be painted or plastered. Not suitable for use underwater or in aquariums. Does not adhere to PP, PE, PTFE or bitumen. Colour silicone is not suitable for bonding or filling cavities. Due to the large number of existing paint and glazing formulas, especially on alkyd resin paints and powder-coated aluminium, it is necessary to perform your own tests to check adhesion. Risk of yellowing on contact with white alkyd resin paints cannot be excluded

Silicone acetate bathroom unit

Special sealant for tiling and wet rooms

- Excellent adhesion to tiles
- Permanently elastic
- Building material class B2 according to DIN 4102
- Fungicidal. Sealant protects itself against mould and algae

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 15651 Parts 1, 2, 3

- Fire behaviour: Class E
- Stability under load: < 2 mm
- Resetting properties: > 70%
- Volume loss: < 10%, for art. no. 0892 215: < 20%
- Adhesion/expansion on exposure to heat, water and artificial light: Passed
- Durability: Passed
- Tensile properties at -30°C: < 0.9 MPa
- Tensile behaviour under pre-stress at -30°C: Passed

The colour display is for guidance only. For an exact colour selection, please use our colour sample cards.

Silicone acetate for wet rooms is not suitable for adhesive bonding or filling cavities. Complies with building material class B2 in accordance with DIN 4102. Can be used around swimming pools, but not in swimming pools.

Due to the large number of existing paint systems, you should conduct your own tests to check compatibility with paint. Risk of yellowing on contact with white alkyd resin paints cannot be excluded. Risk of corrosion when used on bare iron and non-ferrous metals.

For materials and substances that come into contact with the sealant after processing, the user must ensure that their content or fumes cannot cause any impairment or alteration (e.g. discolouration) of the sealant joint. To determine the precise colour, use sample card art. no. 5995000405

Silicone has a tendency to discolour in dark areas where there is no UV exposure. Avoid contact with VKP tape.

- ¹⁾ Functionality in sanitation applications depends on the moisture load and the ventilation properties.
- ²⁾ The ten-year warranty applies exclusively to product properties relating to weathering, UV and ageing resistance, and colour fastness. Functionality cannot be guaranteed as this is dependent on proper application.
- ³⁾ Different polycarbonate types require adhesion and compatibility tests prior to application. Stress cracks can appear in particular when applying on cutting edge.

Food-grade silicone acetate

Special, high-quality sealant for sealing in food processing and drinking water sector, as well as for aquarium construction

- Meets the requirements of NSF/ANSI Standard 61
- Adhesion to a range of substrates present in the food processing sector
- Good smoothing properties
- High degree of resistance to chemicals
- Building material class B2 according to DIN 4102

Container	Cartridge
Contents	310 ml
Chemical basis	Sauer silicones (acetate systems)

Continuous motion absorption	25 %
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-40 to 180 °C
Min./max. full curing speed/conditions	2-3 mm/d/23°C and 50% relative humidity

Colour	Art. no.	P. Qty.
Gold, Copper coloured	0892 550 3	1/12
Silver coloured, Stainless steel coloured	0892 550 4	1/12
Transparent	0892 550 1	1/12
White	0892 550 2	1/12

Please consider the legal instruction at the beginning of this chapter.

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Due to the large number of existing paint systems, you should conduct your own tests to check compatibility with paint. Risk of yellowing on contact with white alkyd resin paints cannot be excluded. Not suitable for non-ferrous metals and metals without corrosion protection. Food-grade silicone acetate is not suitable for bonding or filling cavities.

Silicone has a tendency to discolour in dark areas where there is no UV exposure.

Due to various colour definitions, we recommend using the colour chart, art. no. 5995000406, to ensure precise colour-matching.

*This 10-year warranty applies exclusively to product properties relating to weathering, UV and ageing resistance and colour fastness. Functionality cannot be guaranteed as this is dependent on proper application.

**Due to the various types of stainless steel, we recommend you carry out preliminary testing.

Silicone acetate, crystal clear

Crystal-clear sealant for joints in glass, display window and display case construction

- Highly transparent
- Permanently elastic

Container	Cartridge
Contents	310 ml
Chemical basis	Sauer silicones (acetate systems)
Colour	Crystal clear
Continuous motion absorption	12.5 %
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-40 to 150 °C
Min./max. full curing speed/conditions	2-3 mm/d/23°C and 50% relative humidity

Continuation **Silicone acetate, crystal clear**

Art. no. 0892 215

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Use of a smoothing agent may cause the silicone to become cloudy.

For further information regarding application, please refer to the Würth Online Catalogue under „General notes on processing sealants“

Colour chart, sealants

True colour chart for shade selection

Color chart for	Silicone acetate bathroom unit
Length	21 cm
Height	30 cm

Art. no. 5995 000 405

P. Qty.: 1

Silicone residue remover

For removing cured and fresh silicone sealants

- Extremely thorough for completely silicone-free surfaces
- Can be removed very quickly and conveniently
- Neutral odour
- Excellent material compatibility

Contents	300 ml
Container	Cartridge
Smell/fragrance	Characteristic
Chemical basis	Mix of organic solvents
Shelf life from production	24 Month

Art. no. 0890 500

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Not suitable for use with façade and natural stone sealant, or with acrylic and PU sealants. Do not bring into contact with polyamide (nylon) or natural stone. Preliminary tests required on paintwork and porous substrates.

Silicone primer

Universal primer for improving adhesion of silicone sealants on absorbent and non-absorbent surfaces

Chemical basis	2-propanol
Density	0.81 g/cm ³
Colour	Colourless
Smell/fragrance	Alcohol
Container	Can
Contents	250 ml
Viscosity/consistency	Liquid
Min. flash-off time	30 min
Shelf life from production	12 Month

Art. no. 0892 170

P. Qty.: 1/6

- Apply a thin coat of the silicone primer and allow it to flash off for 30–45 minutes.
- With absorbent surfaces, the surface should be pre-primed in an additional 1 or 2 steps.
- Not suitable for underwater use.

Sealant smoothing agent

Universal smoothing agent suitable for all types of sealants

- Easy to apply from the aerosol can
- Uniform cross-linking of surface hardens the sealant joint quicker
- By moistening the sealant and then scraping the joint, the joint surface becomes more flexible and smoother.

Chemical basis	Anionic tenside
Density	1 g/cm ³
Silicone-free	Yes
Min./max. processing temperature	0 to 40 °C

Colour	Smell/fragrance	Contents	Container	Shelf life from production	Art. no.	P. Qty.
Colourless	Odourless	5 l	Canister	24 Month	0893 3	1
Light yellow	Faint odour	400 ml	Can	18 Month	0893 003	1/12

Please consider the legal instruction at the beginning of this chapter.

Joining steel parts can lead to corrosion if the sealant smoothing agent is used.

Caution: Discoloured edges or surfaces may begin to show on absorbent surfaces. To prevent streaking, remove excess smoothing agent from the glass shortly after application. When applying to natural stone, excess smoothing agent should be rinsed away with clean water before drying to avoid stains forming.

Hold the can at an angle during application to ensure that the riser tube is below the surface of the liquid. Holding the can level for too long will result in the can only half emptying.

Joint smoother

Geometric shape with angled edges

Material	Plastic
Colour	White
Length	80 mm
Width	10 mm

Art. no. 0891 181

P. Qty.: 5

Joint smoother Uni

Slim shape and high flexibility

- Broad range of applications
- Flexible working
- Precise application in a variety of usages

Material	Plastic
Colour	Red
Length	95 mm
Width	5 mm

Included in delivery (Lieferumfang)	Design	Art. no.	P. Qty.
Angle 5 6 8 10 90°; radius 3	Angular	0891 184 003	1/12
Radii 4 6 8 10 12 14	Round	0891 184 004	1/12

Joint smoother Plus

Can be used in six different ways for any jointing task

Fits perfectly in your hand

Comfortable size makes it easy to use. In addition, no bead forms while scraping, allowing seamless scraping.

Material	Plastic
Colour	White
Length	70 mm
Width	5 mm

Art. no. 0891 182

P. Qty.: 1

SMP sealant

Special sealant for sealing self-cleaning glass

- Tested safety for window glazing
- Approval for self-cleaning glass
- Suitable for double glazing of insulating and laminated safety glass panes
- Can be painted/compatible with paint
- UV and weathering resistant
- Odourless
- Silicone-free
- Building material class B2 to DIN 4102

Chemical basis	MS polymer
Continuous motion absorption	25 %
Contents	290 ml
Container	Cartridge
Smell/fragrance	Neutral
Full curing speed	2 mm/d
Fully hardening/curing conditions	23°C and 50% relative humidity
Min./max. skin-formation time	10-15 min
Conditions for skin-formation time	at 23°C and 50% relative humidity
Min./max. temperature resistance	-40 to 90 °C
Silicone-free	Yes
Ultraviolet resistance	Yes
Recoatable/Can be painted over	Yes
Building material class	B2 - Normally inflammable
Building material class conditions	in accordance with DIN 4102

Colour	Art. no.	P. Qty.
Black	0893 350 803	1/12
White	0893 350 801	1/12

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with DIN EN 15651 Part 1/Part 2

- Fire behaviour: Class E
- Stability under load: ≤ 3 mm
- Volume loss: $\leq 10\%$
- Adhesion/expansion under pre-stress after immersion in water: No failure
- Elastic recovery: $\geq 60\%$
- Tensile behaviour under pre-stress at -30°C: No failure

Ventilation duct sealant

Odourless, elastic and ecologically safe special sealant

- Odourless
No unpleasant odours for users and the environment.
- Elastic
Absorbs material stretching over the long term, thereby preventing joint cracks effectively.
- Ageing and weather-resistant

Contents	310 ml
Container	Cartridge
Colour	Grey
Chemical basis	Acrylic resin dispersion
Continuous motion absorption	10 %
Full curing speed	3 mm/d
Fully hardening/curing conditions	23 °C and 50% relative humidity
Min. skin-formation time	10 min
Conditions for skin-formation time	at 23 °C and 50% relative humidity
Min. temperature resistance	-40 °C
Max. temperature resistance	80 °C
Min. processing temperature	5 °C
Max. processing temperature	50 °C
Resistance against	Aging, Citric acid (10%), Disinfectants, Chlorine solution (5%), Acetic acid (5%), Formaldehyde (30%), Isopropyl alcohol, Saline solution, Caustic soda, Soapsuds (20%), Water, Hydrogen peroxide (10%), Weather

Art. no. 0892 325 1

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Ventilation duct sealant Hybrid

Ready-to-use, hybrid polymer-based single-component sealant

- Quick to harden
- Metallic surface effect
- Quick and simple to use
- Silicone-free, UV-resistant, age-resistant and weather-resistant
- Does not contain any substances that impair paint adhesion
- No primer required
- Short-term temperature resistance max. +100 °C to max. 1 h

Contents	310 ml
Container	Cartridge

Colour	Grey
Chemical basis	Hybrid polymer
Continuous motion absorption	20 %
Full curing speed	2.5 mm/d
Fully hardening/curing conditions	23 °C and 50% relative humidity
Min. skin-formation time	10 min
Conditions for skin-formation time	at 23 °C and 50% relative humidity
Min. temperature resistance	-40 °C
Max. temperature resistance	80 °C
Max. short-term temperature resistance	100 °C
Min. processing temperature	5 °C
Max. processing temperature	40 °C
Resistance against	Aging, Weather, Water, Formaldehyde (30%), Acetic acid (5%), Isopropyl alcohol, Chlorine solution (5%), Hydrogen peroxide (10%), Soapsuds (20%), Disinfectants, Caustic soda (50%), Citric acid (10%), Formic acid (25%), Ethyl alcohol, Washing-up liquid, Saline solution (25%), Laundry detergent, Methanol, Edible fats, Lactic acid

Art. no. 0892 325 3

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Resistant to various substances on request. Please observe the „General Notes on Application for Sealants“ overview sheet.

The sealant must not be continually exposed to fluid media. The persistent accumulation of fluid substances above the joint must be prevented in the system construction.

Acrylic sealant

For sealing indoor joints with low absorption of movements.

- Can be coated/plastered over with commercially available paints/plasters applied to sealant
- Wide range of applications for joints indoors subject to less stretching.
- Silicone-free
- Resistant to ageing, weathering and UV

Colour	White
Chemical basis	Acrylic resin dispersion
Continuous motion absorption	5 %
Min. skin-formation time	10 min
Conditions for skin-formation time	at 23 °C and 50% relative humidity
Silicone-free	Yes
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-20 to 80 °C
Recoatable/Can be painted over	Yes

Continuation **Acrylic sealant**

Contents	Container	Art. no.	P. Qty.
310 ml	Cartridge	0892 165	1/24
600 ml	Bag	0892 169 1	20

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 15651 Part 1

- Fire behaviour: Class E
- Stability under load: $\leq 5\%$
- Volume loss: $\leq 45\%$
- Tensile behaviour after immersion in water (at 23°C), ductile: $\geq 25\%$
- Durability: Passed

Building material class B2 in accordance with DIN 4102

Due to the wide variety of paint and lacquer formulas available, we recommend that you always carry out preliminary testing in order to rule out any interactions. Caution: Sealant joints that have been fully painted over tend to crack when movement occurs in the joint, as the applied paint is generally less elastic than the sealant.

The 600 ml bags are packed with 6 bag tips, art. no. 0891601001.

Acrylic

Special acrylic sealant that minimises formation of cracks and discolouration of emulsion paints at the joint.

- Can be plastered/painted over with high-quality emulsion paints in just a few hours
- Minimises the risk of crack formation and discolouration of the applied emulsion paint
- Age, weather, and UV-resistant
- Plastoelastic
- Silicone-free, solvent-free, and phthalate-free

Chemical basis	Polyacrylic dispersion
Colour	White
Continuous motion absorption	7.5 %
Smell/fragrance	Odourless
Min. skin-formation time	10 min
Min./max. processing temperature	5 to 40 °C
Recoatable/Can be painted over	After completely through drying

Container	Contents	Art. no.	P. Qty.
Bag	600 ml	0892 161 002	20
Cartridge	310 ml	0892 161 001	1/24

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 15651 Part 1

- Fire behaviour: Class E
- Release of chemicals hazardous to health or the environment: See safety data sheet
- Stability under load: $\leq 3\text{mm}$
- Volume loss: $\leq 25\%$
- Adhesion/expansion under pre-stress after being immersed in water: $\geq 25\%$
- Durability: Passed

The setting speed depends on the processing temperature, the weather conditions and the surface moisture. The speed is greatly delayed in cold, damp weather. The joint must be protected at least 5 hours before rain. Not suitable for PE, PP, PMMA, PTFE, neoprene and bitumen substrates.

Parquet acrylic

For sealing indoor parquet joints

Flexibility

High absorption of movements.

Sanding

During subsequent sanding work on parquet, parquet acrylic can be sanded without damaging the sealant.

Painting over

Once hardened, can be treated and painted with commercially available parquet sealing products (preliminary testing is required).

Silicone-free

Contents	310 ml
Container	Cartridge
Continuous motion absorption	10 %
Min. skin-formation time	10 min
Min./max. temperature resistance	-25 to 80 °C
Min./max. processing temperature	5 to 40 °C
Min. final strength	28 d
Can be sanded after	10 d

Colour	Art. no.	P. Qty.
Ash, bright	0892 171 2	1/12
Beech, light	0892 171 1	1/12
Maple, Birch	0892 171 0	1/12
Oak	0892 171 3	1/12
Walnut	0892 171 6	1/12

Please consider the legal instruction at the beginning of this chapter.

The colour display is for guidance only. For an exact colour selection, please use our colour sample cards.

Textured acrylic

Particularly suitable for repairing cracks and damage in structured or textured plaster, both indoors and outdoors

- Fine-grained structure
- Can be painted over with emulsion paints
- Resistant to UV and ageing

Container	Cartridge
Contents	310 ml
Chemical basis	Acrylate dispersion
Colour	White
Continuous motion absorption	5 %
Smell/fragrance	Odourless
Min. skin-formation time	5 min
Min./max. processing temperature	5 to 40 °C
Recoatible/Can be painted over	Yes

Art. no. 0892 160 500

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 15651 Part 1

- Fire behaviour: Class E
- Stability under load: ≤ 3 mm
- Volume loss: $\leq 25\%$
- Tensile behaviour after immersion in water at 23 °C (ductile): $\geq 25\%$
- Durability: Passed

Attention:

Due to the wide variety of paint and lacquer formulas available, we recommend that you always carry out preliminary testing in order to rule out any interactions. Caution: Sealant joints that have been fully painted over tend to crack when movement occurs in the joint, as the applied paint is generally less elastic than the sealant.

Not suitable for bitumen, civil engineering and underwater joining, on silicate substrates or joints that can be walked or driven on.

Painter's acrylic

High-quality acrylic sealant for window sealing inside and other internal and external expansion joints

- Can be painted/plastered
- Highly elastic
- Resistant to ageing, weathering and UV

Chemical basis	Acrylic resin dispersion
Continuous motion absorption	20 %
Smell/fragrance	Characteristic
Min. skin-formation time	10 min
Min./max. processing temperature	5 to 40 °C
Recoatable/Can be painted over	Yes

Container	Contents	Colour	Art. no.	P. Qty.
Bag	300 ml	White	0892 162 1	20
Bag	600 ml	White	0892 163 1	20
Cartridge	310 ml	Black	0892 161 4	1/24
Cartridge	310 ml	Brown	0892 161 2	1/24
Cartridge	310 ml	Grey	0892 161 3	1/24
Cartridge	310 ml	White	0892 161 1	1/24

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 15651 Part 1

- Fire behaviour: Class E
- Stability under load: ≤ 3 mm
- Volume loss: $\leq 25\%$
- Tensile behaviour after immersion in water (at 23 °C), ductile: $\geq 100\%$
- Durability: Passed

The setting speed depends on the processing temperature, the weather conditions, the depth and width of the joint, and the substrate moisture. Drying mostly occurs from the surface into the depth of the joint, and is slower with increasing joint depth. The speed is greatly delayed in cold, damp weather. In warmer weather, in which the relative humidity can reach 100%, no skin formation or hardening occurs. This is because in acrylates, a concentration gradient must be specified as a prerequisite. Standing water should be prevented in the acrylic joint as this can lead to erosion. For vertical joints, please observe the run-off behaviour of the sealant. For vertical joints, please observe the run-off behaviour of the sealant.

Do not use on corrosion-sensitive substrates.

The 600 ml bags are packed with 6 bag tips, art. no. 0891601001.

Floor joint sealant

Single-component, solvent-free PU sealant for high-stress joints, both indoors and outdoors. Hazard label not required.

Approved for use with foodstuffs (ISEGA certificate)

Elastic

- Compensates different material expansions
- Dampens vibrations and noise

Colour	Grey
Contents	600 ml
Chemical basis	Single component polyurethane
Continuous motion absorption	20 %
Min. processing temperature	5 °C
Max. processing temperature	40 °C
Min. skin-formation time	65 min
Conditions for skin-formation time	at 23°C and 50% relative humidity

Art. no. 0892 351 200

P. Qty.: 20

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 15651 Part 4

- Fire behaviour: Class E
- Resistance to tearing: Passed
- Volume loss: ≤ 10%
- Tensile behaviour under pre-stress: Passed

Adhesion/expansion after being immersed in water for 28 days:

- Passed
- Adhesion/expansion after being immersed in salt water for 28 days: Passed
- Tensile behaviour under pre-stress at -30 °C: Passed
- Durability: Passed

Window and façade-tight

Sealing of connection and expansion joints indoors and outdoors

- Good adhesion even without primer on most surfaces even if damp
- Non-corrosive, suitable for many alkaline and metallic surfaces
- Free of isocyanates, solvents, phthalates, tin and silicone

Chemical basis	Silane modified polymer
Continuous motion absorption	25 %
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-40 to 90 °C
Ultraviolet resistance	Yes

Recoatble/Can be painted over	Yes
Shelf life from production	18 Month

Contents	Colour	Art. no.	P. Qty.

600 ml	Light grey	0892 320 022	20

Please consider the legal instruction at the beginning of this chapter.

- DIN EN 15651 – 1/4 Sealants for façade elements/pedestrian walkways
- GEV-EMICODE EC 1 PLUS

The sealant should be painted over within the first 3 days after sufficient skin formation. Subsequent application of paint may cause adhesion problems. Due to the large number of paint systems, preliminary tests are required before painting over. Paints often have a lower elasticity than sealants, which can lead to cracking. Alkyd resin paints can cause drying problems. Risk of yellowing on contact with white alkyd resin paints cannot be excluded. As a general rule, in line with DIN 52452 Part 4, sealants should not be painted over. Preliminary tests are required, especially with easily damageable natural stone, such as Jura and Carrara marble. Remove excess smoothing agent from surfaces. Not suitable for use in floor joints for traffic routes. Pre-treat surfaces if necessary.

Natural stone sealant 4 in 1

Versatile, natural stone-compatible silicone sealant for indoors and outdoors, even in food-related areas

- **Low emission and odour, therefore MEKO-free**
- Permanently elastic once hardened
- Very good processability and smoothing
- Suitable for many alkaline and metallic surfaces as not corrosive

Contents	310 ml
Chemical basis	Oxime-curing sealant
Continuous motion absorption	25 %
Min./max. processing temperature	+5 to +40 °C
Min./max. temperature resistance	-40 to +220 °C

Colour	Art. no.	P. Qty.
Transparent	0893 351 000	1/24
White	0893 351 001	1/24

Please consider the legal instruction at the beginning of this chapter.

- Fire behaviour in accordance with DIN EN 13501: Class E
- DIN EN 15651 - 1/2/3/4 Sealants for façade elements/glazing/sanitary joints/pedestrian walkways
- GEV-EMICODE EC 1 PLUS
- VDI 6022 „Room ventilation, room air quality“
- ISEGA tested for food preparation areas

Avoid contact with bitumen, tar or plasticiser-emitting materials (EPDM, APTK, NEOPRENE, butyl, insulating coatings and foams) as this may cause incompatibilities.

Furnace putty 1000

Solvent-free 1-component sealing compound with optimum heat resistance, high degree of strength and excellent adhesion to metal surfaces.

- Ready to use, can be pressed out easily with a cartridge gun
- Storage temperature below 0 °C (approx. -5 °C) possible
- Silicone-free

Chemical basis	Water glass luting with mineral fillers
Contents	310 ml
Container	Cartridge
Max. temperature resistance	1000 °C
Density	2.21 g/cm³
Colour	Cast grey
Smell/fragrance	Neutral
Viscosity/consistency	Pasty
Long-term elasticity	Virtually no elasticity
Shrinkage	Minimal
Full curing speed	1 mm/d
Water-soluble	Not readily soluble in water
Min./max. temperature resistance	-5 to 1000 °C
Min./max. processing temperature	5 to 30 °C
Resistance against	Fats, Household cleaning products, Oil, Flue gases and their condensates
Shelf life from production	12 Month
Conditions to maintain shelf life from production	in sealed cartridge, max. 30 °C

Art. no. 0893 290 0

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

The putty is not elastic once it has dried.

Sealant RKD-Flex

Duroplastic sealant for sealing cable and pipe openings in areas in contact with the ground.

- Ready to apply
- Permanently plastic
- Pasty consistency
- Good adhesion to dry and damp surfaces

Contents	310 ml
Chemical basis	Polyolefin
Colour	Grey
Viscosity/consistency	Pasty
Min./max. processing temperature	5 to 35 °C
Max. temperature resistance	50 °C

Art. no. 0892 350 310

P. Qty.: 6

Please consider the legal instruction at the beginning of this chapter.

The ratio of the sealant to the diameter ratio of the opening should not fall below 1.5 to 1. The maximum opening diameter should not exceed 300 mm. Consumption is approx. 1.6 kg/l cavity. Surfaces can be dry, damp or wet, but must be free from grease, tar and oil.

Sealant Seal Flex

High-quality sealant for sealing in sloped and flat roof areas

- Excellent adhesion to bitumen strips
- Can be used on damp surfaces
- Suitable for virtually all heavily loaded joints in the roof area
- Can be painted over

Contents	310 ml
Container	Cartridge
Chemical basis	Synthetic rubber
Smell/fragrance	Characteristic
Continuous motion absorption	25 %
Resistance against	Aging, Weather
Min./max. skin-formation time	3-8 min
Conditions for skin-formation time	at 23 °C and 50% relative humidity
Min. processing temperature	5 °C
Max. processing temperature	40 °C
Silicone-free	Yes

Colour	Art. no.	P. Qty.
Black	0892 322 5	1/24
Grey	0892 322 3	1/24
Transparent	0892 322 1	1/24
White	0892 322 2	1/24

Please consider the legal instruction at the beginning of this chapter.

Continuation **Sealant Seal Flex**

- 1. To achieve sufficient adhesion on anodised aluminium, prime the surface using AdhesionPlus primer for plastic/wood/stone or a silicon primer. Adhesion to aluminium is only achieved once the Seal Flex is completely cured. Depending on the thickness applied, this can take several days up to 2 weeks.
- 2. When sealing the transparent, white and grey colour versions in contact with bitumen, prime the surface using AdhesionPlus primer for plastic/wood/stone.
- 3. To improve adhesion and avoid clouding on polycarbonate glass/Plexiglas, we recommend using silicone primer.

Full adhesion is only achieved once the Seal Flex is completely cured. Adhesion may be reduced when the product is used in standing water. Not suitable for sealing glass.

Bitumen sealant

For sealing joints between bitumen strips

Excellent adhesion to bitumen strips

Very secure sealing of roof sheeting and roofing cardboard

Good adhesion to damp substrates

- Use largely unaffected by the weather
- Suitable for emergency repairs

Contents	310 ml
Container	Cartridge
Chemical basis	Bitumen
Colour	Black
Continuous motion absorption	10 %
Min. skin-formation time	30 min
Conditions for skin-formation time	at 23°C and 50% relative humidity
Min. processing temperature	1 °C
Max. processing temperature	30 °C

Art. no. 0890 103 100

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Repairs performed in damp conditions must be checked when dry

1C liquid plastic Easy

Fibre-reinforced, solvent-free liquid sealing for hard-to-reach areas

- Single-component liquid plastic is ready for application immediately after mixing
- This eliminates the need to incorporate the fleece inlay and enables fast, safe processing
- Partial amounts can be removed so that remaining material does not need to be disposed of

Weight of content	7 kg
Chemical basis	Polyurethane
Colour	Grey
Suitable for further processing up to	24 h
Min./max. processing temperature	5 to 35 °C
Able to withstand rain after	60 min
Max. temperature resistance	80 °C
Shelf life from production	12 Month

Art. no. 0838 892 500

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Application only by consultation and agreement with building owner. The product should be considered only as a special solution. The certification in accordance with ETAG 005 and the general construction test certificates are not available for 1C liquid plastic Easy.

1C liquid plastic Pro

Single-component solvent-free liquid plastic for standard sealing for use in odour-sensitive areas

- Solvent and isocyanate-free
- UV-resistant
- Rainproof after approx. 60 min

Fire protection

- $B_{ROOF}(t1)$; $B_{ROOF}(t2)$; $B_{ROOF}(t3)$; $B_{ROOF}(t4)$ to DIN EN 13501-5
- Class E to DIN EN 13501-1

Chemical basis	Polyurethane
Suitable for further processing up to	24 h
Min./max. processing temperature	5 to 35 °C
Able to withstand rain after	60 min
Max. temperature resistance	80 °C
Shelf life from production	12 Month

Continuation 1C liquid plastic Pro

Weight of content	Colour	Art. no.	P. Qty.

14 kg	Traffic grey B RAL 7043	0838 892 554	1

Please consider the legal instruction at the beginning of this chapter.

- ETAG 005: ETA – 17/0284. Guideline for the European Technical Approval for liquid roof seals
- General test certificates from construction authorities for sealing buildings indoors and outdoors as well as for use on surfaces inclined at up to 90°.
- DIN 18531 Sealing of roofs and balconies
- DIN 18532 Sealing of traffic areas
- DIN 18533 Sealing of components in contact with the ground
- DIN 18535 Sealing of containers and basins

Can be used on almost all surfaces without primer – even on wet concrete no primer is required (see substrate table, technical data sheet)

Authoritative directive in Germany

- Building Regulation List A, Part 2, No. 2.52, unused roof surfaces. The minimum layer thickness of 1.8 mm according to abP must be strictly adhered to.
- In accordance with the Building Regulation List, for roofs with a pitch less than 2% a minimum layer thickness of 2.0 mm must be adhered to.
- For processing 1C LIQUID PLASTIC Pro, it is also necessary to use the WÜRTH fleece (110 g/m²).

1C liquid plastic primer Special

Solvent-based 1-component primer for FPO, TPO and EPDM roof membranes

- Short drying time

Contents	400 ml
Chemical basis	Polyolefin
Viscosity/consistency	Liquid
Solvent-free	No
Min./max. processing temperature	5 to 35 °C
Min/max. application quantity in weight/area	40-80 g/m²
Can be further processed after min.	20 min
Further processing conditions	at 20°C

Art. no. 0838 892 557

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

The ventilation time is delayed for temperatures below 20°C.

1C flat roof seal fleece inlay, roll

For processing the 1C flat roof seal Pro.

Material	Polyester fibre
Coating weight per m ²	110 g

Width	Length	Art. no.	P. Qty.
15 cm	50 m	0838 892 580	1
20 cm	50 m	0838 892 581	1
26.25 cm	5 m	0838 892 579	1
26.25 cm	50 m	0838 892 582	1
35 cm	50 m	0838 892 583	1
52.5 cm	50 m	0838 892 584	1
70 cm	50 m	0838 892 585	1

1-component bitumen-latex thick coating

Polystyrene-filled, plastic-modified, one-component bitumen-latex thick coating

- Good for bridging cracks
- Brush on, spray or use a spatula
- Ready for use
- The hardened coating will not rot and is resistant to all common chemicals in the soil.
- Solvent-free

Weight of content	21 kg
Chemical basis	Polystyrene- and plastic-filled bituminous emulsion
Colour	Black
Min./max. processing temperature	5 to 35 °C
Min./max. surface processing temperature	5 to 30 °C
Max. temperature resistance	70 °C
Building material class	B2 - Normally inflammable
Shelf life from production	6 Month

Art. no. 0893 212 115

P. Qty.: 6/8/10/18

Please consider the legal instruction at the beginning of this chapter.

The minimum processing temperature is +5°C. It is essential that the effects of rain and frost and water stresses are prevented until both coats have completely dried. Direct sunlight should be avoided. Ideally, surfaces not to be coated (e.g. in an area to be subsequently plastered) should be covered, as the bitumen compound cannot be removed without leaving residue. During application, it is recommended that you wear personal protective equipment (safety goggles, art. no. 0892 102 ff./gloves, art. no. 0899 435 ff.).

2-component bitumen-latex thick coating

Polystyrene-free, rubber-modified, fibre-reinforced, two-component bitumen-latex thick coating

- Meets the slot pressure test criteria
- Applied layer thickness is permanent and cannot be as strongly compressed as polystyrene-filled systems
- Permanently elastic, durable in crack-prone areas
- Suitable for bonding wall insulation panels, even in areas in contact with the ground
- Quickly becomes rainproof, quick setting
- Brush on, spray or use a spatula
- Solvent-free
- Radon-proof

Weight of content	28 kg
Chemical basis	Natural rubber-modified bituminous emulsion with reactive powder
Colour	Black
Max. working life	60 min
Min. curing time	24 h
Max. curing time	72 h
Min./max. processing temperature	5 to 35 °C
Min./max. surface processing temperature	5 to 30 °C
Max. temperature resistance	70 °C
Building material class	B2 - Normally inflammable
Shelf life from production	6 Month

Art. no. 0893 212 120

P. Qty.: 6/8/10/18

Please consider the legal instruction at the beginning of this chapter.

Radon-proof according to Radio Ökologisches Institut Keller

2-component cement-based sealing

Polystyrene-free, bitumen-free, two-component cement/plastic-based surface sealing.

- Solid surface, resulting in mechanical and chemical protection of walkable concrete surfaces
- Quick and definite to set, resulting in fast progress of work
- No blistering on warm surfaces
- Excellent friction adhesion to mineral surfaces, high degree of functionality
- Bitumen-free and polystyrene-free
- Remains permanently flexible and bridges cracks, thereby guaranteeing a high degree of functionality
- Resistant to all standard chemically aggressive substances found in floors, as well as diluted acids and caustics that attack concrete
- Solvent-free

Weight of content	26.4 kg
Chemical basis	Mineral mixture with polymers added
Colour	Light beige
Max. working life	2 h
Min./max. processing temperature	5 to 35 °C
Min./max. surface processing temperature	5 to 30 °C
Shelf life from production	12 Month

Art. no. 0893 212 125

P. Qty.: 6/18

Please consider the legal instruction at the beginning of this chapter.

Certified radon-proof by Radio Ökologisches Institut Keller

The minimum application temperature is +5°C. It is essential that the effects of rain and frost and water stresses are prevented until both coats have completely dried. In the event of prolonged exposure to sunlight, discolouration cannot be ruled out and should therefore be avoided. Not for use in horizontal silos, biogas plants and similar systems. Not suitable for sealing against backwards flowing water and for sealing roofs. During application, it is recommended that you wear personal protective equipment (safety goggles, art. no. 0892 102 ff./gloves, art. no. 0899 435 ff.). The powder component contains cement; therefore avoid contact with skin.

Repair asphalt Premium

For permanent repairs of potholes and damaged areas on roads of all stress classes

Quick application

- No priming necessary
- Direct application possible
- Immediate traffic approval
- Can be covered with hot tarmac
- Suitable for water protection zones 2 + 3

Continuation **Repair asphalt Premium**

Weight of content	25 kg
Chemical basis	Bitumen
Colour	Black
Min./max. processing temperature	10 to 20 °C
Min./max. ambient processing temperature	-20 to 40 °C
Shelf life from production	12 Month

Grid size	Min./max. material thickness	Art. no.	P. Qty.
0-5	15-35 mm	0890 368	1
0-3	10-25 mm	0890 360 000	1

Please consider the legal instruction at the beginning of this chapter.

Observe the minimum thickness depending on the grain size. Not suitable for asphalt work over large areas. Premium repair asphalt is slow-hardening and dependent on the ambient temperature and degree of compaction.

Repair layer

For simple repairs to small and large surfaces, both indoors and out

Silicone-based

- Retains long-term elasticity even in extreme weather conditions and does not become brittle
- UV and weathering resistant
- Solvent-free

Crack-bridging

Easy to process and clean

Bitumen-compatible

Chemical basis	Neutral silicones, water-based
Colour	Grey
Min. skin-formation time	30 min
Full curing speed	2 mm/d
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-50 to 150 °C
Min./max. application quantity in volume/area	1-3 l/m²
Shelf life from production	18 Month

Contents	Art. no.	P. Qty.
0.75 l	0893 350 810	1/8
4 l	0893 350 820	2

Please consider the legal instruction at the beginning of this chapter.

Not suitable for area continuously exposed to water (e.g. fountains, cisterns).

Waterproofing system primer coat

Surface pre-treatment under bituminous and cement-based building waterproofing systems

- Can be used on saline and problematic surfaces
- Can be used on surfaces in old and new buildings
- Penetrates surfaces well
- Ready for use, fast-drying
- Solvent-free

Contents	10 l
Chemical basis	Polymer/silicate
Min./max. surface processing temperature	5 to 30 °C
Min./max. processing temperature	5 to 30 °C
Application quantity in weight/area	0.13 kg/m ²
Application quantity in weight/area/conditions	0.13 kg/m ² /with absorbent surfaces, e.g. aerated concrete: double coat
Shelf life from production/conditions	12 Month/cool and frost-free storage
Colour	Transparent, whitish
Container	Canister
Product weight (per item)	10457 g

Art. no. 0893 212 100

P. Qty.: 1/60

Please consider the legal instruction at the beginning of this chapter.

Glass surfaces (windows or similar) must be protected from contact with the building waterproofing system primer coat, as contact may cause discolouration. During application, we recommend using personal protective equipment (protective goggles/gloves) occupational safety reasons. Clean with water immediately after use.

Multi-purpose torch

Including torch attachment for clean and residue-free combustion

- Excellent price-performance ratio
- Maintenance-free and space-saving
- 360° swivel without affecting function
- Flame temperature up to approx. 1000°C

Contents	300 ml
Min. processing temperature	-10 °C
Max. processing temperature	50 °C

Art. no. 0984 900 600

P. Qty.: 4

Avoid localised overheating. Adjust torch distance to the respective application.

Lining tape

For glazing on windows, doors and fixed glazing

- Compressible
- Prevents three-point adhesion
- Fills glazing rebates and reduces sealant consumption
- Acts as motion-damping section when subject to strong winds

Chemical basis	Closed-cell polyethylene foam
----------------	-------------------------------

Without cover film

Block trowel

Facilitates lifting and alignment of glazing units

Length x width x height (L x B x H)	265 x 70 x 20 mm
Colour	Red
Material	Plastic

Art. no. 0875 400

P. Qty.: 1

Glazing block

With anti-slip protection for long-lasting, professional block setting of glazing units

- Material: Polypropylene
- Ageing-resistant
- Temperature-resistant
- Optimised rib system for high load-bearing capacity
- Verified compatibility with conventional glazing sealants (based on polysulphide, polyurethane and silicone)
- An injected spring element prevents the vertical sides of the window element from slipping after block setting

Length	100 mm
Material	PP - Polypropylene

Thickness	Width	Colour	Art. no.	P. Qty.
1 mm	24 mm	White	0875 424 1	1000
2 mm	24 mm	Blue	0875 424 2	1000

8 mm	24 mm	Grey	0875 424 8	500

Glazing packers verified as compatible with cured sealants of double glazing edge bond

- Test report 607 41481/4
- Tests carried out in line with IfT Rosenheim guideline VE 05/01 „Verified compatibility of glazing packers“ in conjunction with conventional sealants used for double glazing edge bonds based on polysulphide, polyurethane, silicone, Würth Natural Stone Sealant and Würth Glass Active Sealing Compound.

Notes on application

Glazing must be set in such a way that the glass edges are not overstrained. The glass edges must not touch the frame at any point. The installation position and number of glazing blocks should comply with glazing trade technical guideline no. 3 „Packing glazing units“.

Glazing block

For long-lasting, professional frame blocking of glazing units

- Material: Polypropylene
- Ageing-resistant
- Temperature-resistant
- Optimised rib system for high load-bearing capacity
- Verified compatibility with conventional glazing sealants (based on polysulphide, polyurethane and silicone)
- Ventilation channel for vapour pressure compensation (from 32 mm block width and 2 mm thickness upwards)

Length	100 mm
Material	PP - Polypropylene

Continuation **Glazing block**

Glazing blocks verified as compatible with cured sealants of double glazing edge bond

- Test report 607 41481/4
- Tests carried out in line with IFT Rosenheim guideline VE 05/01 „Verified compatibility of glazing blocks“ in conjunction with conventional sealants used for double glazing edge bonds based on polysulphide, polyurethane, silicone, Würth Natural Stone Sealant and Würth Glass Active Sealing Compound.

Continuation **Glazing block**

Notes on application

Glazing must be set in such a way that the glass edges are not overstrained. The glass edges must not touch the frame at any point. The installation position and number of glazing blocks should comply with glazing trade technical guideline no. 3 „Packing glazing units“.

Glazing packer assortment

For long-lasting, professional frame packing of glazing units

- Material: Polypropylene
- Ageing-resistant
- Temperature-resistant
- Optimised rib system for high load-bearing capacity
- Verified compatibility with conventional glazing sealants (based on polysulphide, polyurethane and silicone)
- Ventilation channel for vapour pressure compensation (from 32 mm packer width and 2 mm thickness upwards)

Colour may vary.

Grid wedge

Professional, versatile assembly aids for packing, levelling, aligning and much more.

- Sawtooth-like surface allows accurate and non-slip alignment in 0.5 mm increments (1 sawtooth = 0.5 mm)
- Extremely high loads, up to 6750 kg in a single load
- Proven footfall sound insulation
- Suitable for universal use: Problem-free cutting, drilling, nailing, bolting etc.
- Rot-proof, moisture-repellent, tested service life up to 100 years
- Free of plasticisers
- Guarantees cost-effective work thanks to enormous time savings
- No need to waste time cutting wedges to length
- Time-saving processing in a matter of seconds, since precise adjustments of the correct base thickness are possible with a single movement

Continuation **Grid wedge**

Length x width x height	Colour	Art. no.	P. Qty.
80 x 30 x 10 mm	Green	0875 605 005	400
80 x 40 x 8 mm	Orange	0875 605 004	400

Installation spacer clip

Professional, versatile assembly aids for packing, levelling, aligning and much more.

- Exact, millimetre-precise and efficient installation.
- Separate shims can be combined as required using corner connectors as shown in Fig. 1.
- Clip easily into place for quick, economical work.
- The special clip rib allows the installation spacer clips to be easily pushed over screws and nails while guaranteeing a perfect seat during installation (fig. 2).

Thickness	Colour	Art. no.	P. Qty.
1 mm	Blue	0875 605 021	500
2 mm	Black	0875 605 022	500

Mounting clip AMO® clip assortment

Universally usable mounting clip with fixing strip.

Ideal for professional block setting during window installation and an ideal helper for many installation and fixing tasks as a practical mix.

400-piece assortment

- Ideal as an underlay and to even out for a variety of installation and fixing tasks
- For professional load transfer and block setting during window installation
- Simple application thanks to the securing tang, fixing strip and lead-in chamfer

Number of pieces in assortment/set	400 PCS
------------------------------------	---------

Art. no. 0875 604 500

P. Qty.: 1

Spacer block assortment

Professional, versatile assembly aids for packing, levelling, aligning and much more.

- Universal processing: Easy to cut, drill, nail, staple etc.
- Contents: 520 pcs., sorted, height 1-5 mm. Contains 50 mm and 100 mm versions of every height (52 pieces per size)
- Supplied in a practical, reusable plastic box

Included in delivery (Lieferumfang)	Spacer blocks, sorted from 1-5 mm (52 per size): blue (LxWxH:50x22 x1)-(LxWxH:100x22 x1), black (LxWxH:50x22 x2)-(LxWxH:100x22 x2), red (LxWxH:50x22 x3)-(LxWxH:100x22 x3), white (LxWxH:50x22 x4)-(LxWxH:100x22 x4), yellow (LxWxH:50x22 x5)-(LxWxH:100x22 x5)
Number of pieces in assortment/set	520 PCS

Art. no. 0875 605 030

P. Qty.: 1

Mounting block

Universal assembly aids for aligning, levelling or use as shims. Particularly suitable for ensuring correct load transfer when installing windows.

- Many applications
- Variable height
- Extremely resilient

Length	40 mm
Width	60 mm
Material	PP - Polypropylene

Thickness	Colour	Art. no.	P. Qty.
1 mm	Beige	0875 604 010	500
1.5 mm	White	0875 604 015	500
2 mm	Blue	0875 604 020	500
3 mm	Red	0875 604 030	500
4 mm	Yellow	0875 604 040	500
5 mm	Green	0875 604 050	500
10 mm	Brown	0875 604 100	250

The load-bearing strength of the substrate in question is critical for calculating the compressive strength, as well as the load-bearing strength of the block.

XL mounting block

Versatile, large-scale mounting block for alignment and support with many additional features

- Ideal for support and alignment in structural wood construction and with the assembly of lift-and-slide elements or other large-scale structural elements
- With many useful additional features

Width	60 mm
Material	PP - Polypropylene

Length	Thickness	Colour	Art. no.	P. Qty.
100 mm	1.5 mm	Beige	0875 601 001	250
100 mm	3 mm	Claret	0875 601 003	250
100 mm	5 mm	Olive green	0875 601 005	250
100 mm	10 mm	Brown	0875 601 010	250
120 mm	1.5 mm	Beige	0875 601 201	250
120 mm	3 mm	Claret	0875 601 203	250

200 mm	10 mm	Brown	0875 602 010	150

The XL mounting blocks are made of polypropylene (PP) and are not permanently UV-stable. Protect from permanent, direct sunlight. The XL mounting blocks are not suitable for permanent load removal in static-bearing systems.

Grid spacer block

Large, universal assembly aids for aligning and laying formwork elements, pre-fabricated concrete and wood parts, lift-sliding doors etc.

- Material: Plastic, PP/polypropylene
- Stackable with anti-slip protection
- Pressure test up to 8 tonnes (from 5 mm)
- For aligning timber frame walls

Length	160 mm
Width	75 mm
Material	PP - Polypropylene

Thickness	Colour	Art. no.	P. Qty.
2 mm	Blue	0875 605 202	250
3 mm	Red	0875 605 203	250
5 mm	Green	0875 605 205	250
7 mm	Brown	0875 605 207	250

Continuation **Grid spacer block**

Thickness	Colour	Art. no.	P. Qty.
10 mm	White	0875 605 210	100
15 mm	Green	0875 605 215	100
20 mm	Black	0875 605 220	100

The compressive strength is determined by the load-bearing capacity both of the substrate in question and of the block. Not for long-term outdoor use; avoid direct exposure to UV radiation.

Mounting block set

Handy assortment of universal assembly aids for aligning, levelling or use as shims. Particularly suitable for ensuring correct load transfer when installing windows.

- Broad range of uses
To ensure correct load transfer when installing windows and doors or for levelling and aligning interior fittings and drywall elements. Würth mounting blocks are a universal aide for spacing and levelling work.
- Heavy-duty solid cast blocks made from polypropylene (PP)

Number of pieces in assortment/set	400 PCS
------------------------------------	---------

Art. no. 0875 604 000

P. Qty.: 1

Contents for art. no. 0875 604 000		
Designation	Art. no.	Quantity
Mounting block Thickness 1.5 mm	0875 604 015	100
Mounting block Thickness 3.0 mm	0875 604 030	100
Mounting block Thickness 5.0 mm	0875 604 050	100
Mounting block Thickness 10.0 mm	0875 604 100	100

Block assortment 137 pieces

The large, universal assembly aids for aligning and laying formwork elements, pre-fabricated concrete and wood parts, lift-sliding doors, etc... Handy assortment.

Number of pieces in assortment/set	137 PCS
------------------------------------	---------

Art. no. 0875 605 200

P. Qty.: 1

The compressive strength is determined by the load-bearing capacity both of the substrate in question and of the block. Not for long-term outdoor use; avoid direct exposure to UV radiation.

Partition wall tape B1

One-sided self-adhesive PE foam for preventing noise bridges when installing partition walls

Easy to use

- Simple, quick and clean to apply
- Compensates any uneven areas

Long service life

- Resistant to UV, ageing and weathering
- Moisture-repellent

Colour	Anthracite
Building material class	B1 - Of low flammability
Acoustic insulation for joints	58 dB
Length of roll	30 m

Width	Art. no.	P. Qty.
30 mm	0875 303 30	1/15
50 mm	0875 303 50	1/10
70 mm	0875 303 70	1/7
95 mm	0875 303 95	1/5

Please consider the legal instruction at the beginning of this chapter.

Building material class B1 in line with DIN 4102

Tested by the Leipzig Institute for Materials Research and Testing (MPFA), test certificate no. ÜB III/B-01-001

Bitumen tape with lamination

Self-adhesive and cold-processing bitumen-based sealing tape.

- Excellent adhesion
- Good resistance to UV, weather and water
- Bitumen compound is protected by siliconised PE film
- Compatible with Plexiglas and Makrolon

Chemical basis	Bitumen sealing compound
Design	With lamination
Backing material	Aluminium composite foil
Colour	Aluminium (base material)
Length	10 m
Total thickness	1.5 mm
Building material class	B2 - Normally inflammable
Min./max. processing temperature	5 to 45 °C
Min./max. temperature resistance	-40 to 80 °C
Shelf life from production/conditions	24 Month/cool and dry storage area, no exposure to sunlight and weather conditions

Continuation **Bitumen tape with lamination**

Width	Art. no.	P. Qty.
50 mm	0875 610 50	1/6
75 mm	0875 610 75	1/4
100 mm	0875 610 100	1/3
150 mm	0875 610 150	2

Please consider the legal instruction at the beginning of this chapter.

The bitumen tape is not suitable for use on surfaces that can be walked or driven on!

Butyl tape with aluminium lamination

Self-adhesive butyl rubber assembly and sealing tape with permanently anchored aluminium lamination

Excellent resistance to UV, weathering and water

- The butyl tape can also be used outdoors and withstands rain and any other weather influences (not suitable for use under water).
- Non-corrosive

High adhesion to absorbent and non-absorbent surfaces

Can be used on all the surfaces in the construction sector, e.g. steel, aluminium, glass, plastic, wood, concrete, masonry, bitumen etc.

Chemical basis	Butyl natural rubber
Design	With aluminium lamination
Colour	Black
Length	20 m
Total thickness	1.5 mm
Min./max. processing temperature	10 to 30 °C
Min./max. temperature resistance	-40 to 90 °C

Width	Art. no.	P. Qty.
35 mm	0875 620 35	1/8
40 mm	0875 620 40	1/8
45 mm	0875 620 45	1/6
50 mm	0875 620 50	1/6
60 mm	0875 620 60	1/6
80 mm	0875 620 80	1/4
100 mm	0875 620 100	1/4

Please consider the legal instruction at the beginning of this chapter.

- Complies with IVD technical data sheets no. 5, 19-1, 19-2, 25, 29, 31, 35
- Compatibility with bitumen according to DIN EN 1548

Complies with VOC requirements according to:

- EMICODE EC 1 Plus
- AgBB scheme
- French VOC Class A+ and „KMR ordinance“

- Screwing in/penetrating the butyl tape must be avoided
- Butyl cannot be secured mechanically!

Butyl tape

Highly adhesive, double-sided sealing tape made from butyl rubber for overlapping sealing.

- Excellent compatibility with a range of surfaces
- Excellent resistance to UV, weathering and water
- Self-fusing

Chemical basis	Butyl natural rubber
Colour	Black
Sealing-tape thickness	2 mm
Length	15 m
Min./max. temperature resistance	-40 to 100 °C
Min./max. processing temperature	5 to 30 °C

Width	Art. no.	P. Qty.
12 mm	0894 700 122	1
20 mm	0894 700 202	1

Please consider the legal instruction at the beginning of this chapter.

Butyl flexible tape EURASOL®

Very flexible sealing tape for airtight, windproof and raintight sealing of indoor and outdoor openings.

- Suitable for virtually all types of openings
- Retrospective application possible if pipes and cables have already been laid
- Can be stretched in all directions, thereby providing excellent three-dimensional deformation around the joints
- Reliably compensates for component movement
- High adhesive strength
- Excellent material compatibility
- Quick to apply thanks to protruding separating paper (lifts up with finger) with central division

Adhesive base	Synthetic natural rubber
Colour	Grey
Length	20 m
Width	80 mm
Total thickness	2 mm
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-40 to 90 °C

Art. no. 0875 635 080

P. Qty.: 2

Please consider the legal instruction at the beginning of this chapter.

EURASOL butyl flexible tape is ideally suited for WÜTOP vapour barriers, vapour seals and joist protection films. We therefore recommend using these films.

Butyl round cord

Highly adhesive, double-sided sealing tape made from butyl rubber for overlapping sealing.

- Excellent compatibility with all common surfaces
- Good resistance to UV, weather and water
- Impervious to vapour diffusion
- Self-fusing
- Compatible with Plexiglas and Makrolon

Chemical basis	Butyl natural rubber
Colour	Black
Outer diameter	3 mm
Length of roll	16 m
Number of cords	5 PCS
Length	80 m
Min./max. processing temperature	5 to 30 °C
Min./max. temperature resistance	-40 to 100 °C

Art. no. 0894 700 380

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Primer Butyl primer

Improved adhesion on rough, porous and absorbent surfaces. Also suitable for bitumen tapes.

Ultimate adhesion to a wide variety of surfaces

Easy to use

Apply butyl primer to the surface being treated with a brush and let the surface flash off until the primer stiffens and exhibits a strong surface adhesiveness.

Chemical basis	Solvent-containing synthetic natural rubber
Colour	Transparent, yellowish
Min./max. application quantity in volume/area/conditions	150-250 ml/m ² /depending on the absorbency of the surface
Min. flash-off time	10 min
Min./max. processing temperature	5 to 30 °C
Flash-off time conditions	at 20°C

Contents	Art. no.	P. Qty.
750 ml	0892 875	1/6
5 l	0892 876	1

Please consider the legal instruction at the beginning of this chapter.

Primer spray

Spray adhesion promoter for applying butyl and bitumen tapes to porous and absorbent surfaces.

Improves adhesive strength

- Significantly improves the reliability of the bond by forming a stable film on the surface
- Rough and porous substrates are consolidated

Simple spray-action application

- Fast application
- Spray head can be turned to spray horizontally or vertically

Flash-off time:

- At +5°C – approx. 20 min.
- At 0°C – approx. 30 min.
- At -5°C – approx. 40 min.

Chemical basis	Solvent-containing synthetic natural rubber
Colour	Transparent
Contents	500 ml
Min. flash-off time	10 min
Min./max. processing temperature	-5 to 35 °C
Flash-off time conditions	at 20°C
Coverage distance	50 m
Conditions for coverage distance	with 4-cm spray width

Art. no. 0893 876 002

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Not compatible with paint. Paints, lacquers and plastics may be softened. Compatibility with adjacent materials must be tested.

Compression band clamp

The fastening at the end of the tape prevents swelling of compressed sealing tape

Started rolls of joint sealing tape are temporarily held together by the staple

Min./max. clamping range	Art. no.	P. Qty.
0-32 mm	0875 600 32	1
32-95 mm	0875 632 95	1

Adhesive WÜTOP® WRD

For wind-proof and rain-proof bonding of roof protection films and for sealing nails

- Guarantees rain-proof seal
- Complies with the requirements of EnEV 2016
- Adhesive foams easily to reliably seal nail and tack sites

Contents	310 ml
Chemical basis	Single component polyurethane
Colour	Black
Min./max. surface processing temperature	-5 to 40 °C
Min./max. processing temperature	7 to 40 °C
Min./max. temperature resistance	-40 to +120 °C
Shelf life from production	12 Month

Art. no. 0893 700 115

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

- Please refer to the processing instructions of the system warranty.
- The viscosity of WÜTOP® WRD is around twice as high at +15°C than at +25°C.
- WÜTOP® WRD foams easily during bonding; excess adhesive can be removed in a fresh state with cleaner type 60 (item no.: 0892 130 030/0892 130 031).

Film adhesive WÜTOP®

Tested system adhesive for permanent sealing of vapour retarders/barriers without a clamping batten in accordance with DIN 4108-7/SIA 180.

- For bonding of all Würth vapour retarders and vapour barriers as well as sealing films on construction surfaces
- Air and wind tightness tests performed by the Institute for Building Physics in Stuttgart in combination with WÜRTH vapour retarders/barriers are available.
- Can also be applied at external and surface temperatures down to -5°C . Adhesive temperature from +10°C.

Chemical basis	Acrylic copolymers
Colour	Light yellow
Min./max. curing time	2-3 d
Min./max. surface processing temperature	-5 to 40 °C
Min./max. processing temperature	10 to 35 °C
Shelf life from production	12 Month

Contents	Min./max. temperature resistance	Art. no.	P. Qty.
310 ml	-30 to +60 °C	0893 700 100	1/15
600 ml	-30 to 60 °C	0893 700 110	20

Please consider the legal instruction at the beginning of this chapter.

German Energy Saving Ordinance (EnEV)

- Please refer to the processing instructions of the system warranty
- Detached bonds can be joined together once again due to the self-adhesive properties of the adhesive film.
- When working at temperatures below +15°C, you are advised to work with professional glue gun art. no.: 0891 300 310.
- The hardened WÜTOP® adhesive film is largely highly water resistant, however you should avoid working with it in places where humidity levels are always high, e.g. swimming pools or other wet areas.

Flexible tape adhesive

Special adhesive for secure and long-term bonding of Würth SK and Vario active flexible tape

- Excellent adhesive properties
- Even adheres to slightly damp (but not wet) surfaces
- Can be plastered and painted-over

Chemical basis	Polyurethane
Colour	Sand beige
Full curing speed	3 mm/d
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-40 to +80 °C
Shelf life from production/conditions	12 Month/at 20°C

Container	Contents	Art. no.	P. Qty.
Bag	600 ml	0893 710 001	20
Cartridge	310 ml	0893 710 000	1/12

Please consider the legal instruction at the beginning of this chapter.

Joint sealing connection systems according to ift certification program QM360: 2014, Reg. no. 188 7050098

- Flexible tape adhesive, flexible tape adhesive plus and EPDM sealing tape adhesive may not come into contact with each other while wet.
- Do not use on surfaces pre-treated with butyl and bitumen primer and do not bring into contact with butyl strips.
- The hardening time is heavily dependent on the ambient temperature, material temperature and ambient humidity.

Flexible tape adhesive plus

Special adhesive for secure and long-term bonding of Würth SK and Vario active flexible tape

- Very low emissions
- Excellent adhesive and processing properties
- High adhesive strength after full curing time
- Thixotropic properties
- Permanently elastic and moisture-resistant
- Solvent and silicone-free

Chemical basis	Acrylate polymer dispersion
Colour	Saffron yellow
Full curing speed	1 mm/d
Min./max. processing temperature	-5 to 40 °C
Min./max. processing temperature for cartridge	5 to 35 °C
Min./max. temperature resistance	-30 to +80 °C
Shelf life from production/conditions	12 Month/at 20°C

Container	Contents	Art. no.	P. Qty.
Bag	600 ml	0893 710 011	20
Cartridge	310 ml	0893 710 010	1/12

Please consider the legal instruction at the beginning of this chapter.

Structure adhesive systems according to ift certification program QM360: 2014, Reg. no. 188 7050098

Do not use on surfaces pre-treated with butyl and bitumen primer (art. no. 0982 875/876) and do not bring into contact with butyl strips.

Sealing tape VKP® BASIC

Waterproofed, pre-compressed BG2 sealing tape with tested resistance to driving rain up to 300 Pascal.

- Tested tape quality in line with DIN 18542-BG2
- In addition to BG2: tested direct resistance to weathering and UV
- Large tolerance range of the tapes
- Time-saving application as no pre-treatment with primer necessary
- Pre-compressed and self-adhesive for secure and permanent sealing

Chemical basis	Fine open-cell polyurethane foam
Min. resistance against driving rain (pressure)/conditions	300 Pa/in accordance with DIN 18542-BG2
Building material class/conditions	B2 - Normally inflammable/in accordance with DIN 4102
Ultraviolet resistance	Yes, when installed to be resistant to driving rain

Shelf life from production	18 Month
Conditions to maintain shelf life from production	at 5°C to 25°C

Colour	Width	Min./max. joint width for watertightness in driving rain	Length of roll	Art. no.	P. Qty.
Black	10 mm	2-4 mm	12.5 m	0875 110 004	30
Black	15 mm	2-4 mm	12.5 m	0875 115 004	20
Black	15 mm	3-6 mm	10 m	0875 115 006	20
Black	15 mm	4-8 mm	8 m	0875 115 008	20
Black	15 mm	6-10 mm	5.6 m	0875 115 010	20
Black	20 mm	8-14 mm	4.3 m	0875 120 014	15
Black	20 mm	12-20 mm	6.5 m	0875 120 018	15
Grey	15 mm	6-10 mm	5.6 m	0875 115 011	20
Grey	20 mm	8-14 mm	4.3 m	0875 120 015	15
Grey	20 mm	12-20 mm	6.5 m	0875 120 019	15

Please consider the legal instruction at the beginning of this chapter.

Select the correct tape size:

1. Define the joint widths from the structure and classify in the „resistance to driving rain“ scale
2. Then select the required tape size
3. Select the art. no. according to the tape colour
4. Define the roll quantity

The expansion speed of VKP Basic depends on the temperature. The tape's expansion behaviour is not subject to any particular specification and is based only on empirical values. The tape's reset time depends on the storage and processing temperature. The following applies: The longer the storage times and the lower the processing temperature, the longer the reset times.

In high temperatures, store the tape in a cool location; in low temperatures, store in a warm location.

** Only for installation resistant to driving rain.

Sealing tape VKP® MAX

Impregnated and pre-compressed sealing tape in line with BG1 for compensating joint tolerances.

- Tape is excellent at adapting to surrounding area
- Tested sealing properties over 600 Pa
- Water-repellent but permeable to water vapour
- Excellent weather resistance

Colour	Black
Chemical basis	Impregnated polyurethane foam
Min. resistance against driving rain (pressure)/conditions	600 Pa/in accordance with DIN 18542-BG1
Min./max. processing temperature	5 to 25 °C
Min./max. temperature resistance	-30 to 80 °C
Building material class/conditions	B1 - Of low flammability/in accordance with DIN 4102
Ultraviolet resistance	Yes, when installed to be resistant to driving rain
Shelf life from production/conditions	18 Month/at 20°C

Continuation **Sealing tape VKP® MAX**

Width	Min./max. joint width for watertightness in driving rain	Length of roll	Art. no.	P. Qty.

Please consider the legal instruction at the beginning of this chapter.

The expansion speed of VKP MAX depends on the temperature. In high temperatures, store the tape in a cool location; in low temperatures, store in a warm location. Compatibility when coating with paints and sealants must be tested. The tape must not come into contact or be cleaned with chemicals containing solvents or aggressive chemicals.

Sealing tape VKP® PLUS

High-quality, waterproofed, pre-compressed BG1 sealing tape for secure and permanent joint sealing up to over 600 Pa

- Tested sealing properties over 600 Pa, BG1 and BGR in accordance with DIN 18542:2020-04
- Bridging of large joint differences that will withstand driving rain
- Water-repellent, yet permeable to water vapour

Joint sealing connection systems according to ift certification program
QM360: 2014, reg. no. 188 7050098

Chemical basis	Fine open-cell polyurethane foam
Min. resistance against driving rain (pressure)/conditions	600 Pa/in accordance with DIN 18542-BG1
Building material class/conditions	B1 - Of low flammability/in accordance with DIN 4102
Max. water-vapour diffusion resistance factor value μ	100
Ultraviolet resistance	Yes, when installed to be resistant to driving rain
Shelf life from production	24 Month
Conditions to maintain shelf life from production	at 5°C to 25°C

Continuation **Sealing tape VKP® PLUS**

Sealing tape VKP®TRIO

Joint sealing tape for simultaneous internal and external sealing and insulation of window and door joints

- Complete sealing and insulation in a single step
- Suitable for quality-controlled installation in accordance with RAL-Gütegemeinschaft für Fenster und Haustüren (RAL Quality Association for Windows and Doors) requirements
- The product provides completely secure sealing in virtually any kind of weather

Colour	Black
Chemical basis	Impregnated polyurethane foam
Water-vapour diffusion resistance (description)	Inside more impermeable than outside
Min. resistance against driving rain (pressure)/conditions	600 Pa/in accordance with DIN 18542-BG1
Min./max. processing temperature	5 to 25 °C
Min./max. temperature resistance	-30 to 80 °C
Building material class/conditions	B1 - Of low flammability/in accordance with DIN 4102 according to construction permit Z-56.212-3607
Stress group	MF1
Ultraviolet resistance	Yes, when compressed to be resistant to driving rain, outdoor weathering
Shelf life from production/conditions	12 Month/at 20 °C

Width	Min./max. joint width for watertightness in driving rain	Length of roll	Art. no.	P. Qty.

Please consider the legal instruction at the beginning of this chapter.

The expansion speed of VKP Trio depends on the temperature. In high temperatures, store the tape in a cool location; in low temperatures, store in a warm location.

Please use VKP Plus for joints between solid components. In the bottom joint area, we recommend flex tape or EPDM outdoor sealing tape.

For tapes with a joint width of 12–20 mm and 20–30 mm, the tape has two layers, and the self-adhesive area is located on the wavy side (for technical reasons).

Carry out sufficient tests of your own for paints and sealants. No interactions with commercially available grout. The window is secured as a spaced installation. Façade joints under a heavy load must be sealed with VKP Plus.

Sealing tape VKP® Trio 1050 Butterfly

Premium dual-purpose tape for the highest requirements when sealing window and door joints

- Complete sealing and insulation in a single step
- For separating internal and external components

Two foam components for the best possible impermeability

- Red, closed-cell soft foam is attached to the window frame and masonry and, in conjunction with the barrier layer, ensures the air tightness of the joint.
- Grey, impregnated and pre-compressed foam for easy installation.
- Air and smoke-tightness provides a high level of safety in blower door tests

Colour	Anthracite, Red
Backing material	PUR foam
Adhesive base	Acrylate dispersion
Width	82 mm

Continuation **Sealing tape VKP® Trio 1050 Butterfly**

Min./max. joint width for water-tightness in driving rain	6-15 mm
Length of roll	12 m
Min. resistance against driving rain (pressure)/conditions	1050 Pa/in accordance with DIN 18542-BG1
Min./max. processing temperature	+5 to +25 °C
Min./max. temperature resistance	-30 to +80 °C
Building material class/conditions	B2 - Normally inflammable/in accordance with DIN 4102-1
Stress group	BG 1 and BG R
Ultraviolet resistance	Yes, when compressed to be resistant to driving rain, outdoor weathering
Shelf life from production/conditions	12 Month/at 1 °C to 20 °C

Art. no. 0875 478 206

P. Qty.: 5

Please consider the legal instruction at the beginning of this chapter.

The expansion speed of VKP® Trio 1050 Butterfly depends on the temperature. In high temperatures, store the tape in a cool location; in low temperatures, store in a warm location. Please use VKP® Plus for joints between solid components. In the bottom joint area, we recommend flex tape or external EPDM sealing tape. Carry out sufficient tests of your own for paints and sealants. No interactions with commercially available grout. The window is secured as a spaced installation. Façade joints under a heavy load must be sealed off with VKP® Plus.

Sealing tape VKP Trio 750 High Performance

Premium multifunctional sealing tape with polymer film and water barrier for completely sealing window and door joints.

- Quick and easy window sealing in only one work step
- Water barrier on outer side
- Polymer film technology on inside

Colour	Anthracite
Backing material	PUR foam
Min./max. processing temperature	5 to 25 °C
Min./max. temperature resistance	-30 to 80 °C
Building material class/conditions	B1 - Of low flammability/in accordance with DIN 4102
Ultraviolet resistance	Yes, when installed to be resistant to driving rain
Shelf life from production/conditions	12 Month/at 1 °C to 20 °C

Please consider the legal instruction at the beginning of this chapter.

Take into account component movements and temporary changes in length of the existing joints when determining the appropriate tape dimension. The expansion speed of VKP® Trio 750 High Performance depends on the temperature. In high temperatures, store the tape in a cool location; in low temperatures, store in a warm location. Please use VKP® Plus for joints between solid components. In the bottom joint area, we recommend flex tape or EPDM outdoor sealing tape. Carry out sufficient tests of your own for paints and sealants. No interactions with commercially available grout. The window is secured as a spaced installation. Façade joints under a heavy load must be sealed with VKP® Plus.

Sealing tape VKP® Trio SF

Pre-compressed and impregnated joint sealing tape for simultaneously sealing indoor and outdoor window and door joints, particularly shallow joints

- Tested sealing properties over 600 Pa, complies with BG1 requirements in accordance with DIN 18542
- Tested air tightness properties ($\alpha < 0.1$) meet BGR requirements in accordance with DIN 18542
- Tested and assured sealing against driving rain

Colour	Anthracite
Backing material	PUR foam
Chemical basis	Impregnated polyurethane foam
Water-vapour diffusion resistance (description)	Inside more impermeable than outside
Min. resistance against driving rain (pressure)/conditions	600 Pa/in accordance with DIN 18542-BG1
Min./max. processing temperature	5 to 23 °C
Min./max. temperature resistance	-30 to 80 °C
Building material class/conditions	B2 - Normally inflammable/in accordance with DIN 4102
Ultraviolet resistance	Yes, when compressed to be resistant to driving rain, outdoor weathering
Shelf life from production/conditions	24 Month/at 1°C to 20°C

Width	Min./max. joint width for watertightness in driving rain	Length of roll	Art. no.	P. Qty.
30 mm	5-10 mm	10 m	0875 363 005	10

35 mm	10-20 mm	6.5 m	0875 363 510	6

Continuation **Sealing tape VKP® Trio SF**

Width	Min./max. joint width for watertightness in driving rain	Length of roll	Art. no.	P. Qty.
40 mm	5-10 mm	10 m	0875 364 005	7
40 mm	7-15 mm	8 m	0875 364 007	5
40 mm	10-20 mm	6.5 m	0875 364 010	5

Please consider the legal instruction at the beginning of this chapter.

The tape is resistant to driving rain, but must also be sealed with butyl tape with laminated foil for standing water (e.g. horizontal and above) or water pressing on the seal, if the joint is not immediately covered following mounting. A second level leading water away (tub-shaped sealing film) must be created in the lower connection area, so that the water is diverted away to the outside in a controlled manner. The expansion speed of VKP Trio SF depends on the temperature. In high temperatures, store the tape in a cool location; in low temperatures, store in a warm location.

Decoupling tape

Self-adhesive, dimensionally stable decoupling tape for minimising heat bridges in light metalworking according to Type 7 as per IFBS.

- Extremely high compression hardness
- Fulfils the guidelines of EnEV and German ordinance on thermal insulation
- Extremely high adhesive strength
- Excellent wear resistance

Material	Closed cell polyethylene foam
Adhesive base	Synthetic natural rubber
Colour	Grey
Total thickness	3 mm
Length of roll	30 m
Building material class	E - Normally inflammable
Building material class conditions	in accordance with DIN EN 13501-1
Compression strength	347 kPa
Compression strength conditions	at 10% compression
Volumetric weight	250 kg/m ³
Heat conductance λ	0.055 W/(m*K)

Width	Art. no.	P. Qty.
40 mm	0875 305 040	12
60 mm	0875 305 060	8
80 mm	0875 305 080	6

Please consider the legal instruction at the beginning of this chapter.

Self-adhesive action acts as temporary assembly aid; the tape must be fixed mechanically between the elements.

EPDM sealing tape Outdoors

Breathable, elastic and weather-resistant sealing tape.

- Watertight and breathable
- Extremely high elasticity
- Excellent resistance to weathering
- Reliable attachment on uneven substrates
- Good bitumen compatibility

Colour	Black
Backing material	EPDM
Design	Without self-adhesive strips
Chemical basis	Ethylene propylene diene natural rubber
Length of roll	20 m
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-30 to 120 °C
Building material class/conditions	B2 - Normally inflammable/in accordance with DIN 4102
Ultraviolet resistance	Yes

Width	Art. no.	P. Qty.
150 mm	0875 350 150	6
200 mm	0875 350 200	4
250 mm	0875 350 250	4
300 mm	0875 350 300	3
400 mm	0875 350 400	2
500 mm	0875 350 500	2

Please consider the legal instruction at the beginning of this chapter.

Not suitable for sealing in the areas in contact with the ground/not suitable for sealings according to DIN 18533.

Tape cannot be plastered over.

EPDM butyl outdoor sealing tape

Breathable, elastic and weather-resistant sealing tape

- Thanks to its high-quality and flexible material, the EPDM film remains permanently sealed and compensates particularly well for component movements
- Its high UV and weathering resistance make the EPDM film ideally suited for permanently secure sealing
- Reliable installation is also achieved on slightly uneven construction surfaces, when combined with EPDM sealing tape adhesive

Colour	Black
Adhesive base	Butyl
Design	With butyl adhesive strip
Chemical basis	Ethylene propylene diene natural rubber
Length of roll	20 m
Min./max. temperature resistance	-30 to 75 °C
Building material class/conditions	B2 - Normally inflammable/in accordance with DIN 4102
Ultraviolet resistance	Yes

Continuation **EPDM butyl outdoor sealing tape**

400 mm	0875 350 402	2
500 mm	0875 350 502	2

Please consider the legal instruction at the beginning of this chapter.

Not suitable for seals in accordance with the water influence classes W2.2-E (high exposure to pressurised water ≥ 3 m immersion depth), W3-E (non-pressurised water on ceilings covered with earth) according to DIN 18533, as well as seals against pressurised water according to DIN 18195-6.

Tape cannot be plastered over.

EPDM sealing tape Outdoors

Breathable, elastic and weather-resistant sealing tape with one-sided self-adhesive strips

- Waterproof and breathable
- Extremely high elasticity
- Excellent resistance to weathering
- Secure installation on uneven surfaces
- Good compatibility with bitumen

Colour	Black
Adhesive base	Acrylate
Design	With self-adhesive strips
Chemical basis	Ethylene propylene diene natural rubber
Length of roll	20 m
Min./max. temperature resistance	-30 to 75 °C
Building material class/conditions	B2 - Normally inflammable/in accordance with DIN 4102

400 mm	0875 350 403	2
500 mm	0875 350 503	2

Please consider the legal instruction at the beginning of this chapter.

Not suitable for seals in accordance with the water influence classes W2.2-E (high exposure to pressurised water ≥ 3 m immersion depth), W3-E (non-pressurised water on ceilings covered with earth) according to DIN 18533, as well as seals against pressurised water according to DIN 18195-6.

Tape cannot be plastered over.

EPDM sealing tape Outdoors full-surface SK

Strong self-adhesive, breathable and weather-resistant sealing tape.

- Full-surface, very strong self-adhesive
- Watertight and breathable
- Extremely high elasticity
- Excellent resistance to weathering
- Easier application through division of the separating paper 3 cm from the edge and in the centre (from width of 150 mm).

Colour	Black
Backing material	EPDM
Adhesive base	Acrylate

Continuation **EPDM sealing tape Outdoors full-surface SK**

Length of roll	20 m
Min./max. processing temperature	5 to 30 °C
Min./max. temperature resistance	-30 to 75 °C
Building material class/conditions	E - Normally inflammable/in accordance with DIN EN 13501
Ultraviolet resistance	Yes

Width	Art. no.	P. Qty.
70 mm	0875 350 076	12

400 mm	0875 350 406	2
500 mm	0875 350 506	2

Please consider the legal instruction at the beginning of this chapter.

For smoothing out unevenness, patching the film edge as protection from running, in corners or for joints, we recommend EPDM sealing tape adhesive. Additionally mount tape to element with a mechanical mounting, e.g. windowsill, clamping in the element, clamping batten, terminal block etc.

Not suitable for sealing against water under pressure. Tape cannot be plastered over.

EPDM sealing tape adhesive

Low-solvent special adhesive for reliable, long-term adhesive bonding of EPDM tapes

- Excellent material compatibility
- High elasticity: Building movements are optimally compensated
- Excellent stability
- Acid-, isocyanate- and silicone-free

Chemical basis	Hybrid polyurethane
Colour	Black
Full curing speed/conditions	2 mm/d/23°C and 50% relative humidity
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-30 to +70 °C
Shelf life from production/conditions	12 Month/at 20°C

Contents	Container	Art. no.	P. Qty.
300 ml	Cartridge	0893 700 153	1/12
600 ml	Bag	0893 700 150	20

Please consider the legal instruction at the beginning of this chapter.

- Store the original container tightly sealed in a dry place at temperatures between +5°C and +25°C without exposure to direct sunlight.
- EPDM sealing tape adhesive, Flexband adhesive and Flexband adhesive Plus must not come into contact in wet conditions.
- Do not use EPDM sealing tape adhesive on surfaces which have been pretreated with Butyl and Bitumen Primer (item no. 0982 875/876).
- We recommend performing preliminary tests on bitumen strips due to the large number of different systems.

EPDM sealing tape, internal

Vapour proof and flexible sealing tape.

Colour	Black
Backing material	EPDM
Chemical basis	Polyisobutylene natural rubber
Length of roll	20 m
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-30 to 120 °C
Building material class/conditions	B2 - Normally inflammable/in accordance with DIN 4102
Ultraviolet resistance	Yes

400 mm	0875 350 405	2
500 mm	0875 350 505	2

Please consider the legal instruction at the beginning of this chapter.

Not suitable for sealing against pressurized water. The tape cannot be plastered.

Universal window sealing tape Euraseal U-305

Very strong adhesive window sealing tape with active drying membrane for inner and outer joint sealing

- Very high adhesive strength due to special acrylate adhesive
- Very convenient to apply due to the high-quality, flexible fabric
- Suitable for quality-controlled installation in accordance with RAL-Gütegemeinschaft für Fenster und Haustüren (RAL Quality Association for Windows and Doors) requirements

Colour	White
Backing material	PET fleece
Min. resistance against driving rain (pressure)/conditions	900 Pa/in accordance with DIN EN 1027
Min./max. processing temperature	-5 to 30 °C

Continuation **Universal window sealing tape Euraseal U-305**

Min./max. temperature resistance	-30 to 100 °C
Building material class/conditions	E - Normally inflammable/in accordance with DIN EN 13501-1
Ultraviolet resistance	9 months
Max. outdoor exposure	3 Month
Shelf life from production/conditions	12 Month/at 15°C to 20°C

Width	Length of roll	Art. no.	P. Qty.
70 mm	40 m	0875 594 070	8
100 mm	40 m	0875 594 100	4
150 mm	40 m	0875 594 150	4
200 mm	20 m	0875 594 200	5
250 mm	20 m	0875 594 250	5

Please consider the legal instruction at the beginning of this chapter.

On mineral and highly absorbent surfaces, use primer spray or butyl/bitumen primer.

Window sealing tape Euraseal universal U-305 can be combined:

- Interior: Window sealing tape Euraseal universal U-305/exterior: VKP®Plus
- Interior: Perfect neutral silicone/outdoors: Window sealing tape Euraseal universal U-305

PE backfill sealant

Silicone-free and good joint filling strength

- Corresponds to DIN 18540
- Prevents three-edge adhesion and thus the formation of cracks
- Dispenser carton
- Suitable for universal use on plumbing, concrete and window connection joints

Chemical basis	Polyethylene
Colour	Grey
Min. temperature resistance	-40 °C
Max. temperature resistance	60 °C
CFC (fuel gas) free	Yes
Silicone-free	Yes
DIN	18540

Diameter (Ø)	Length	Art. no.	P. Qty.
6 mm	100 m	0875 806 100	100

Diameter (Ø)	Length	Art. no.	P. Qty.
40 mm	50 m	0875 840 100	50
50 mm	50 m	0875 850 100	50

Please consider the legal instruction at the beginning of this chapter.

Cellular rubber EPDM sealing tape

Particularly resistant to ageing and weathering; sealing tape for permanent sealing with increased requirements for indoor and outdoor use.

- Closed-cell foam for best possible impermeability
- High resilience and material flexibility
- Excellent resistance to weathering, ageing, UV and temperature
- Solvent-free for excellent material compatibility
- Excellent abrasion resistance

Backing material	Ethylene propylene diene natural rubber
Adhesive base	Acrylate dispersion
Width	30 mm
Length	10 m
Total thickness	3 mm
Min./max. temperature resistance	-30 to 100 °C
Ultraviolet resistance	Yes, with outdoor weathering

Art. no. 0875 850 330

P. Qty.: 10

Please consider the legal instruction at the beginning of this chapter.

Vehicle sealing tape

The vehicle sealing tape protects against vibrations and securely and permanently seals joints in a single step.

- Pre-compressed to 20%
- Self-adhesive on one side
- Temperature resistance: -30°C to +90°C
- Vapour-permeable, thereby preventing water build-up
- Once the compression is released, the sealing tape develops a reset force, which presses firmly against the joint edges and compensates for uneven areas.

Min./max. temperature resistance	-30 to 90 °C
----------------------------------	--------------

Continuation **Vehicle sealing tape**

Width	Sealing-tape thickness on delivery	Max. sealing-tape thickness after expansion	Length	Art. no.	P. Qty.
10 mm	2 mm	10 mm	12.5 m	0875 410 2	1/8
15 mm	3 mm	15 mm	10 m	0875 415 3	1/8
15 mm	4 mm	20 mm	8 m	0875 415 4	1/8
20 mm	2 mm	10 mm	12.5 m	0875 420 2	1/8

Please consider the legal instruction at the beginning of this chapter.

Bodywork sealing tape

Permanently plastic, self-adhesive sealing tape for sealing overlaps on bodywork

- Excellent adhesive property
- Good resistance to UV, weather and water
- Resistant to ageing and high temperatures
- Impervious to vapour diffusion
- Noise-damping and vibration-damping
- Self-fusing
- Solvent-free and silicone-free
- Immediate seal

Chemical basis	Butyl natural rubber
Colour	Grey
Width	20 mm
Sealing-tape thickness	2 mm
Length	26 m
Min./max. temperature resistance	-30 to 100 °C
Min./max. processing temperature	5 to 40 °C

Art. no. 0890 100 030

P. Qty.: 1/4

Please consider the legal instruction at the beginning of this chapter.

Round bodywork tape

Permanently plastic, self-adhesive round tape for sealing overlaps on bodywork

- Excellent adhesive property
- Good resistance to UV, weather and water
- Resistant to ageing and high temperatures
- Impervious to vapour diffusion
- Noise-damping and vibration-damping
- Self-fusing
- Solvent-free and silicone-free
- Immediate seal

Chemical basis	Butyl natural rubber
Colour	Black

Min./max. temperature resistance	-30 to 100 °C
Min./max. processing temperature	5 to 40 °C

Diameter (Ø)	Length	Art. no.	P. Qty.
8 mm	17.5 m	0890 100 033	1/4
10 mm	10 m	0890 100 032	1/4

Please consider the legal instruction at the beginning of this chapter.

Leak detector Plus

Testing foam for fast and safe location of leaking areas, micro-leaks and hairline cracks.

- Non-flammable
- Temperature application range (-15°C to +50°C), tested in accordance with DIN51421
- pH-neutral
- Non-corrosive

Contents	0.4 l
Colour	Clear
Smell/fragrance	Mild
Chemical basis	Water tenside
Shelf life from production	24 Month

Art. no. 0890 27

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Leak detector

Detects leaking areas in compressed air and gas systems

- Effortless, time-saving detection of pressurised, leaking areas with success guaranteed
- Non-flammable, therefore can also be used on systems, containers and pipes with flammable gases
- Processing temperature: +5°C to +50°C
- Freezes at 0°C

Colour	Colourless
Smell/fragrance	Product-typical
Chemical basis	Water, soap and glycol
Shelf life from production	24 Month

Contents	Art. no.	P. Qty.
0.4 l	0890 20	1/12
5 l	0890 201	1
20 l	0890 300 20	1

Please consider the legal instruction at the beginning of this chapter.

Continuation **Leak detector**

Is resistant to frost, can be applied again once thawed.

When using with systems containing oxygen, it must be ensured that these are constantly pressurised during testing. If not, low pressure could result in the leak-finding fluid entering the system and reacting with the oxygen. Rinse residual leak-finding fluid out with clear water immediately after testing.

Only spray suspected areas lightly; leaks are shown by foam forming

Fluid leak detector

Quick-drying powder spray for detecting leaks in systems carrying fluids

Grease and silicone-free

Contents	400 ml
Colour	White
Shelf life from production	24 Month

Art. no. 0890 200 400

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Only use in well-ventilated areas. Do not inhale aerosols, use a dust mask.

Sealant remover

Removes sealing materials, adhesives, paints, etc. in just minutes

Firm consistency

No dripping off vertical surfaces

Contents	300 ml
Smell/fragrance	Alcohol
Chemical basis	Mix of organic solvents
pH value	10.6-11.0

Art. no. 0893 100 0

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

- Protect painted surfaces
- Check compatibility prior to application
- Not suitable for sensitive plastics, PVC and synthetics

Exhaust assembly paste

Soft compound for quick, easy and completely gas-tight assembly of sleeve (pipe plug) and flange connectors in exhaust systems.

- No complicated welding required
- Becomes as hard as metal due to the heat from the exhaust
- Temperature resistant up to approx. 700°C
- Seals off permanently
- Resistant to impacts and vibration
- Not susceptible to rust – hence easy to dismantle

Weight of content	140 g
Colour	Grey
Smell/fragrance	Odourless
Chemical basis	Sodium silicate
Shelf life from production	12 Month

Art. no. 0890 100 045

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Exhaust putty

Small holes and cracks in the silencer system can be easily and permanently repaired so that they are gas-tight.

- Extremely heat-resistant
- Resistant to major temperature fluctuations
- No need to remove the silencer or carry out welding work

Weight of content	200 g
Colour	Grey
Smell/fragrance	Odourless
Shelf life from production	12 Month

Art. no. 0890 100 046

P. Qty.: 1/10

Please consider the legal instruction at the beginning of this chapter.

For quicker hardening, leave the engine to idle at low speed for around quarter of an hour.

Super RTV silicone adhesive and sealing compound

High-quality adhesive and sealing compound for use in industry and the automotive sector.

- Excellent chemical resistance
- Non-acidic hardening system
- Sealant in compressed-air can

Contents	200 ml
Chemical basis	Neutral crosslinked silicones, oxime-based

Colour	Min./max. temperature resistance	Max. short-term temperature resistance	Range of applications	Art. no.	P. Qty.
Black	-60 to 260 °C	300 °C	Water pumps, Oil pumps, Front cover, Camshaft bearing cover, Thermostat housing, Oil pans, Transmission cover, Sunroof, Doors	0893 331 1	1/12
Red	-60 to 315 °C	370 °C	Oil pumps, Front cover, Camshaft bearing cover, Oil pans, Transmission cover, Exhaust manifold, Exhaust flange, Cover and flange on engines, Intake area	0893 331 2	1/12
Blue	-60 to 260 °C	300 °C	Oil pans, Valve cover, Rear axle housing, Crankshaft housing, Differential housing, Camshaft bearing cover	0893 331 3	1/12
Transparent	-60 to 260 °C	300 °C	Sealing of accumulators, Sealing of halogen lamp, Sealing of vehicle body parts, Sealing of transformer	0893 331 4	1/12
Grey	-60 to 260 °C	300 °C	Water pumps, Oil pumps, Front cover, Camshaft bearing cover, Thermostat housing, Oil pans, Transmission cover, Intake area, Sealing of accumulators	0893 331 6	1/12

Please consider the legal instruction at the beginning of this chapter.

When sealing e.g. oil pans and gearboxes it is vital that no sealant gets into the interior. For this reason we recommend to apply the sealant on a joining part surface. Join both parts and then carefully press by hand and lightly slide against each other. Afterwards separate the parts again and then remove the sealant that has gone inside. Join the components again within a max. of 5 minutes and tighten firmly. Before commissioning, observe the hardening time (depending on the sealant thickness).

Engine and housing sealing compound DP 300

Permanently plastic engine and housing sealing compounds with high degree of temperature resistance

- Excellent sealing ability thanks to permanently plastic (non-hardening) properties
- Resistance to vibration guaranteed even after years of exposure
- Temperature-resistant from -50°C to +270°C; for brief periods up to +300°C

Weight of content	89.6 g
Chemical basis	Polyurethane
Colour	Red
Min./max. temperature resistance	-50 to 250 °C
Shelf life from production	60 Month

Art. no. 0890 100 048

P. Qty.: 1/10

Please consider the legal instruction at the beginning of this chapter.

NSF registered, class P1, reg. no. 151822

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Not suitable for sealing oil pans.

Material combinations:

1. Metal – metal
2. Metal – plastic
3. Plastic – plastic

Engine sealing compound Silicone Special 180

Permanently elastic silicone sealing compounds for engine and bodywork with excellent adhesion

- Cold-vulcanising silicone rubber
- Bridges larger unevenness
- Reliable at sealing, even after withstanding years of vibrations
- Does not run or pull threads
- Excellent adhesion and chemical resistance
- Skin formation after just a few minutes, vulcanisation rate approx. 1.5 mm/day

Contents	70 ml
Colour	Transparent
Min. skin-formation time	8 min
Max. skin-formation time	15 min

Continuation **Engine sealing compound Silicone Special 180**

Conditions for skin-formation time	at 23 °C and 50% relative humidity
Elongation at break	300 %
Continuous motion absorption (up to 150 °C)	25 %
Min./max. temperature resistance	-50 to 150 °C
Max. short-term temperature resistance	180 °C
Min./max. processing temperature	5 to 60 °C

Art. no. 0890 320

P. Qty.: 1/10

Please consider the legal instruction at the beginning of this chapter.

Engine sealing compound Silicone Special 250

Permanently elastic silicone sealing compounds for engine and bodywork, brief temperature resistance of 300 °C

- Seals reliably even after years of vibration
- Outstanding adhesion and chemical resistance
- Does not run or draw threads
- Forms a skin after a few minutes, vulcanisation time approx. 1.5 mm/day

Contents	70 ml
Min. skin-formation time	6 min
Max. skin-formation time	12 min
Conditions for skin-formation time	at 23 °C and 50% relative humidity
Elongation at break	300 %
Continuous motion absorption (up to 150 °C)	25 %
Min./max. temperature resistance	-50 to 250 °C
Max. short-term temperature resistance	300 °C
Min./max. processing temperature	5 to 40 °C

Colour	Art. no.	P. Qty.
Black	0890 323	1/10
Red	0890 321	1/10

Please consider the legal instruction at the beginning of this chapter.

1C engine sealant

Replacement for solid seals around the engine, on pressure tanks as well as on screw connections.

High temperature resistance

Compression-proof up to approx. 700 bar

Excellent bonding

100% seal is achieved even on uneven surfaces

Permanently elastic

Protects against corrosion

Weight of content	100 g
Chemical basis	Epoxy resin
Colour	Red
Min./max. skin-formation time	5-7 min
Min./max. temperature resistance	-50 to 280 °C
Shelf life from production	12 Month

Art. no. 0893 260 100

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Not suitable as a cylinder head gasket.

Resistance list: Engine sealant has a proven track record against the following media:

Engine oil, gearbox oil, hydraulic oil, diesel, heating oil, coolant, brake fluid, waste water, alkaline lye, formic acid, alcohols (methyl, ethyl etc.), ethyl acetate, acetone, chlorinated solution, phosphoric acid (10%).
Gases: Acetylene, carbon dioxide, propane, sulphur dioxide, nitrogen.

Hydraulic seal

For sealing pneumatic and hydraulic screw connections subject to high loads. With screw connections, up to the burst pressure of the pipe/hose

- Excellent resistance to all hydraulic fluids and fuels
- Quick to harden, even at low temperatures
- 100% sealing
- Resistant to a large number of alkaline solutions, gases, solvents, oils and fuels
- Silicone-free

Chemical basis	Methacrylic acid ether
Colour	Violet
Density	1.2 g/cm ³
Max. gap-filling ability	0.15 mm
Suitable for	Thread diameter max. R 3/4 inch
Min./max. initial strength	30-40 min
Min./max. functional strength	2-3 h
Min./max. final strength	12 h-24 h
Min./max. processing temperature	5 to 35 °C
Min./max. temperature conditions	-55 to 150 °C
Shelf life from production	12 Month

Continuation **Hydraulic seal**

Weight of content	Art. no.	P. Qty.
50 g	0893 545 050	1
250 g	0893 545 250	1

Please consider the legal instruction at the beginning of this chapter.

The following plastics can be affected in the event of prolonged exposure: ABS, celluloid, polystyrene, polycarbonate (Macrolon), PMMA (Plexiglas), polysulfone, SAN (Iurane, Tyril), Vinidur, vulcanised fibre and painted surfaces. We always recommend that you conduct your own tests.

Sealant Dichtfix

Sprayable, MS polymer-based sealant for restoring the original texture following accident repair work.

- Very broad adhesive range
- High Shore A hardness
- High tensile strength and elongation at tear

Contents	310 ml
Chemical basis	POP mixed polymer
Density/conditions	1.48 g/cm ³ /at 23 °C, 50% relative humidity
Min./max. processing temperature	5 to 30 °C
Min./max. temperature resistance	-40 to 80 °C
Shelf life from production	12 Month

Colour	Art. no.	P. Qty.
Black	0893 226	1/12
Grey	0893 228	1/12
White	0893 227	1/12

Please consider the legal instruction at the beginning of this chapter.

Do not allow Seal/Fix to come into contact with fresh PU materials (i.e. those that have not yet hardened). When painting over with metallic paints, a blocking primer should definitely be applied. Optimum adhesion between the paint and the Seal/Fix is achieved when the material is painted immediately following application.

The painting over should be done within 2 hours of application.

Paintable body sealant

Sealant for true-to-original reproduction of the brushed texture from the factory.

- Fast drying
- Can be painted over after one hour
- Silicone-free
- Permanently elastic
- Easy to spread
- Suitable for application with the brush
- Resistant to water and mineral oil
- Adheres well to bare, primed and painted metal
- Basis: Nitrile rubber

Colour	Light grey (bright grey)
Chemical basis	Nitrile natural rubber
Min./max. temperature resistance	-25 to 80 °C
Max. short-term temperature resistance	150 °C
Resistance against	Mineral oils, Water

Art. no. 0892 010

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

The product is not UV-resistant, but can be painted over for protection against UV radiation.

Sealing compound Modelling clay

Soft, permanently plastic sealing compound in original state

Can be moulded by hand

Can be pushed into the joint to be sealed etc.

Good adhesion

Does not shrink

Resistant to water

Colour	Dark grey
Min./max. temperature resistance	-30 to 100 °C
Max. short-term temperature resistance	150 °C
Resistance against	Water

Art. no. 0890 100 028

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Medium-strength screw retainer

Removable screw retainer and sealing compound – one-handed dispensing system

- Produces medium-strength connection
- Can also be applied to stainless steel and passivated surfaces
- Prevents detachment, e.g. through vibration and shock loads

NSF-tested in accordance with ANSI 61, DVGW (German association of gas and water) (DIN EN 751-1)

Chemical basis	Dimethacrylic acid ester
Colour	Blue fluorescent
Suitable for max. thread	M36
Max. gap-filling ability	0.25 mm
Min./max. initial strength	5-15 min
Min./max. functional strength	0.5-1 h
Min./max. final strength	1 h-3 h
Min./max. temperature conditions	-55 to 150 °C
Shelf life from production	12 Month

Weight of content	Art. no.	P. Qty.
25 g	0893 243 025	1
50 g	0893 243 050	1
250 g	0893 243 250	1

Please consider the legal instruction at the beginning of this chapter.

Movement detection paint

Solvent-free locking, marking and sealing lacquer with good adhesion to virtually all materials

- Suitable for outdoor use
- High insulation resistance
- High mechanical strength, but removable.
- No corrosion
- High resistance to water, limited resistance to oil, petrol and diesel
- Solvent and silicone-free

Practical accordion bottle

- Easy handling
- Better residue removal
- No clogging of the tip

Contents	50 ml
Min./max. processing temperature	5 to 30 °C
Min./max. temperature resistance	-40 to 145 °C
Min. initial strength	30 min
Min./max. final strength	12 h-24 h
Shelf life from production	24 Month

Colour	Art. no.	P. Qty.
Colza Yellow RAL 1021	0893 741 452	1/12
Flame red RAL 3000	0893 741 451	1/12
Light blue RAL 5012	0893 741 453	1/12
Pure green RAL 6037	0893 741 454	1/12

Please consider the legal instruction at the beginning of this chapter.

High-strength screw retainer

Tough removable screw retainer and sealing compound – single-handed dispensing system

- Ideal for screw connections exposed to high stresses
- 100% sealing – no additional fixings necessary
- Protects against corrosion due to friction, and against rust
- Excellent media and heat resistance
- Prevents removal e.g. due to vibrations and impacts
- Highly resistant
- Silicone-free

Chemical basis	Dimethacrylic acid ester
Colour	Green fluorescent
Suitable for max. thread	M25
Max. gap-filling ability	0.15 mm
Min./max. initial strength	5-15 min
Min./max. functional strength	1-3 h
Min./max. final strength	5 h-10 h
Min./max. temperature conditions	-55 to 150 °C
Shelf life from production	12 Month

Continuation **High-strength screw retainer**

Weight of content	Art. no.	P. Qty.
25 g	0893 270 025	1
50 g	0893 270 050	1
250 g	0893 270 250	1

Please consider the legal instruction at the beginning of this chapter.

NSF-tested in accordance with ANSI 61

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

The following plastics can be affected in the event of prolonged exposure: ABS, celluloid, polystyrene, polycarbonate (Makrolon), PMMA (Plexiglas), polysulfone, SAN (Luran, Tyril), Vinidur, vulcanised fibre and painted surfaces. We always recommend that you conduct your own tests.

Fügest heat-resistant

For fastening bushings and bearings exposed to high temperatures.

- Maximum joint filling capacity of 0.2 mm
- Prevents frictional corrosion
- Strength at 100°C still 85% of maximum strength
- Fast curing
- Resistant to a large number of bases, gases, solvents, oils and fuels
- Silicone and solvent-free

Colour	Green
Min./max. initial strength	30-40 min
Min./max. final strength	12 h-24 h
Min./max. processing temperature	5 to 35 °C
Suitable for max. thread	M36
Min./max. temperature conditions	-55 to 200 °C
Shelf life from production	12 Month

Weight of content	Chemical basis	Art. no.	P. Qty.
50 g	Dimethacrylic acid ester	0893 620 050	1
250 g	Dimethacrylic acid ether	0893 620 250	1

Please consider the legal instruction at the beginning of this chapter.

The following plastics can be affected in the event of prolonged exposure: ABS, celluloid, polystyrene, polycarbonate (Macrolon), PMMA (Plexiglas), polysulfone, SAN (lurane, Tyril), Vinidur, vulcanised fibre and painted surfaces. We always recommend that you conduct your own tests.

High-strength bearing locking

For high-strength connection of cylindrical parts subject to high loads

- Reliable hardening at low temperatures around 0 °C.
- Able to fill gaps of 0.15 mm
- Prevents frictional corrosion
- Resistant to a large number of bases, gases, solvents, oils and fuels

DOS system:

- Practical one-handed use thanks to the clever turn lock.
You always have one hand free.
- Infinitely adjustable dosing system enables dispensing to be adjusted to suit the application, and to keep consumption and costs to a minimum.
- No residue material in dispensing neck
Costs optimised thanks to emptying with virtually no remaining product

Chemical basis	Methacrylic acid ether
Colour	Green
Min./max. initial strength	5-10 min
Min./max. final strength	3 h-6 h
Min./max. processing temperature	5 to 35 °C
Suitable for max. thread	M12
Min./max. temperature conditions	-55 to 150 °C
Shelf life from production	12 Month

Weight of content	Art. no.	P. Qty.
25 g	0893 603 025	1
50 g	0893 603 050	1

Please consider the legal instruction at the beginning of this chapter.

NSF registered, class P1, reg. no. 151997

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Caution:

The following plastics can be affected in the event of prolonged exposure: ABS, celluloid, polystyrene, polycarbonate (Macrolon), PMMA (Plexiglas), polysulfone, SAN (Iurane, Tyril), Vinidur, vulcanised fibre and painted surfaces. We always recommend that you conduct your own tests.

Surface sealant Green

For sealing flanges and surfaces with minimum joints up to max. 0.3 mm. Replacement for solid seals.

- Low-strength
- 100% seal
- Resistant to a large number of bases, gases, solvents, oils and fuels
- Easy to drain residual product due to accordion bottle
- Silicone and solvent-free

Chemical basis	Dimethacrylic acid ester
Colour	Green fluorescent
Fully hardening/curing conditions	Exclusion of oxygen and contact with metal (copper or iron ions)
Density/conditions	1.05 g/cm ³ /in accordance with DIN EN ISO 2811-1
Min./max. initial strength	15-30 min
Min./max. functional strength	3-6 h
Min./max. final strength	6 h-24 h
Min./max. processing temperature	5 to 35 °C
Min./max. temperature conditions	-55 to 150 °C
Shelf life from production/conditions	18 Month/at room temperature

Weight of content	Art. no.	P. Qty.
50 g	0893 573 050	1
250 g	0893 573 250	1

Please consider the legal instruction at the beginning of this chapter.

NSF registered, class P1, reg. no. 151996

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

The following plastics can be affected in the event of prolonged exposure: ABS, celluloid, polystyrene, polycarbonate (Macrolon), PMMA (Plexiglas), polysulfone, SAN (Iurane, Tyril), Vinidur, vulcanised fibre and painted surfaces.

Surface sealant Orange

For sealing flanges and surfaces with minimum joints up to max. 0.5 mm. Replacement for solid seals.

Chemical basis	Dimethacrylic acid ester
Colour	Orange fluorescent
Fully hardening/curing conditions	Exclusion of oxygen and contact with metal (copper or iron ions)
Density/conditions	1.05 g/cm ³ /in accordance with DIN EN ISO 2811-1
Min./max. initial strength	10-20 min
Min./max. functional strength	3-6 h
Min./max. final strength	6 h-24 h
Min./max. processing temperature	5 to 35 °C
Min./max. temperature conditions	-55 to 150 °C
Shelf life from production/conditions	18 Month/at room temperature

Weight of content	Art. no.	P. Qty.
50 g	0893 574 050	1
250 g	0893 574 250	1

Please consider the legal instruction at the beginning of this chapter.

NSF registered, class P1, reg. no. 151995

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

The following plastics can be affected in the event of prolonged exposure: ABS, celluloid, polystyrene, polycarbonate (Macrolon), PMMA (Plexiglas), polysulfone, SAN (Iurane, Tyril), Vinidur, vulcanised fibre and painted surfaces.

Non-running surface sealant

For sealing flanges and surfaces with a large gap.

Viscous product.

- Viscous product
- 100% seal
- Slight flexibility up to 120 °C
- Seals immediately under low pressure
- Also suitable for passive metals
- Quick to harden
- Resistant to a large number of alkaline solutions, gases, solvents, oils and fuels

Chemical basis	Methacrylic acid ether
Colour	Red fluorescent
Fully hardening/curing conditions	Exclusion of oxygen and contact with metal (copper or iron ions)
Density/conditions	1.1 g/cm ³ /in accordance with DIN EN ISO 2811-1
Min./max. initial strength	30-60 min
Min./max. functional strength	1-3 h
Min./max. final strength	24 h-72 h
Min./max. processing temperature	5 to 35 °C
Min./max. temperature conditions	-55 to 150 °C
Shelf life from production/conditions	18 Month/at room temperature

Weight of content	Art. no.	P. Qty.
50 g	0893 518 050	1
250 g	0893 518 250	1

Please consider the legal instruction at the beginning of this chapter.

The following plastics can be affected in the event of prolonged exposure: ABS, celluloid, polystyrene, polycarbonate (Macrolon), PMMA (Plexiglas), polysulfone, SAN (Iurane, Tyril), Vinidur, vulcanised fibre and painted surfaces. We always recommend that you conduct your own tests.

Medium-strength pipe sealant

For sealing all metallic pipe couplings and fittings with conical/cylindrical threads in line with DIN 2999

- Firmly tightened connections can be immediately loaded up to approx. 5 bar after final curing up to the burst pressure of the pipes
- High media resistance to most industrial liquids and gases
- Sealing compound does not leak out of thread

Weight of content	50 g
Chemical basis	Dimethacrylic acid ester
Fully hardening/curing conditions	Exclusion of oxygen and contact with metal (copper or iron ions)
Colour	Yellow fluorescent
Max. gap-filling ability	0.5 mm
Min./max. initial strength	15-30 min
Min./max. functional strength	1-3 h

Max. final strength	6 h
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-55 to 150 °C
Suitable for	Thread diameter max. R 3 inch (M80)

Art. no. 0893 577 050

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Certified quality

- DVGW approval (Reg. No. NG-5146BM0336+0037), tested to DIN EN 751-1
- NSF-tested to NSF/ANSI 61

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

- Not suitable for screw connections containing copper (brass, bronze, red brass) that come into contact with water > 40°C. Not permitted for gas connections in buildings in Germany. In accordance with TRGI '86/96.
- The thread must be cut in accordance with the standard. During and once the product has hardened, the connections may not be rotated against each other, i.e. readjustment is not permitted.
- The following plastics can be affected in the event of prolonged exposure: ABS, celluloid, polystyrene, polycarbonate (Macrolon), PMMA (Plexiglas), polysulfone, SAN (Iurane, Tyril), Vinidur, vulcanised fibre and painted surfaces. We always recommend that you conduct your own tests
- The initial strength, final strength and functional strength depend on the material
- Not permitted for gas connections in buildings in Germany in accordance with TRGI '86/96.

Low-strength pipe sealant with PTFE

For sealing all metallic pipe couplings and fittings with conical/cylindrical threads in line with DIN 2999

- Low-strength – Easy to disassemble
- Immediate seal against pressures up to 5 bar
- Sealing compound does not leak out of thread
- Resistant to most gases and liquids, in accordance with DIN 2999

Weight of content	250 g
Chemical basis	Methacrylic acid ether
Fully hardening/curing conditions	Exclusion of oxygen and contact with metal (copper or iron ions)
Colour	White
Max. gap-filling ability	0.5 mm
Min./max. initial strength	10-20 min
Min./max. functional strength	1-3 h
Max. final strength	24 h
Min./max. processing temperature	5 to 35 °C

Continuation **Low-strength pipe sealant with PTFE**

Min./max. temperature resistance	-55 to 150 °C
Shelf life from production/conditions	18 Month/at room temperature
Suitable for	Thread diameter max. M80, Thread diameter max. R 3 inch

Art. no. 0893 511 250

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Certified quality

- DVGW approval (reg. no. NG-5146BM0338), tested to DIN EN 751-1
- NSF-tested to NSF/ANSI 61

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

- Not suitable for screw connections containing copper (brass, bronze, red brass) that come into contact with water > 40°C. Not permitted for gas connections in buildings in Germany. In accordance with TRGI '86/96.
- The thread must be cut in accordance with the standard. During and once the product has hardened, the connections may not be rotated against each other, i.e. readjustment is not permitted.
- The following plastics can be affected in the event of prolonged exposure: ABS, celluloid, polystyrene, polycarbonate (Macrolon), PMMA (Plexiglas), polysulfone, SAN (Iurane, Tyril), Vinidur, vulcanised fibre and painted surfaces. We always recommend that you conduct your own tests
- The initial strength, final strength and functional strength depend on the material

Tile adhesive Classic CERAFix® 402 C2 TE Flex

For all ceramic coverings in accordance with EN12004, C2 TE, for indoor and outdoor use

- Very good durability and high initial adhesion
- Long adhesive open and processing times
- Water-resistant and alternating frost/thaw-resistant
- Suitable for underfloor heating

Tested in accordance with EN 12004 C1

- Fire behaviour: A1R/A1
- Adhesive tensile strength after dry storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after wet storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after thermal storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after freeze/thaw alternating load: $\geq 1 \text{ N/mm}^2$

Weight of content	25 kg
Chemical basis	Cement, polymer modified additives
Standards	EN 12004
Colour	Grey
Processing time	2 h
Application conditions	at 20 °C and 65% relative humidity
May be walked on after max.	24 h
May be walked on in following conditions	at 20 °C and 65% relative humidity
Groutable after	24 h
Grouting condition	at 20 °C and 65% relative humidity

Continuation **Tile adhesive Classic CERAFix® 402 C2 TE Flex**

Full load capacity/conditions	28 d/at 20°C and 65% relative humidity
Min./max. processing temperature	5 to 25 °C
Shelf life from production/conditions	12 Month/cool and dry storage area

Art. no. 5875 100 402

P. Qty.: 24/42

Please consider the legal instruction at the beginning of this chapter.

Tile adhesive CERAFix® 402-2 C2 TE Flex

Hydraulically hardening, flexible thin bed and medium bed mortars in accordance with EN 12004 C2 TE

- Can be used on all common surfaces and all ceramic coverings
- Resistant to thawing/freezing alternations
- Suitable for underfloor heating

Weight of content	25 kg
Container	Paper bag
Chemical basis	Cement
Standards	EN 12004
Colour	Grey
Processing time	20 min
Min./max. open time/conditions	20-20 min/at 20°C
May be walked on after max.	12 h
May be walked on in following conditions	at 20°C and 50% relative humidity
Groutable after	12 h
Grouting condition	at 20°C and 50% relative humidity
Full load capacity/conditions	7 d/at 20°C and 50% relative humidity
Min./max. processing temperature	5 to 25 °C

Art. no. 5875 200 402

P. Qty.: 24/42

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 12004:2007+A1:2012 C2 TE

- Fire behaviour: A1/A1fl
- Adhesive tensile strength after dry storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after wet storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after thermal storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after freeze/thaw alternating load: $\geq 1 \text{ N/mm}^2$

For further information, please refer to the technical data sheet.

Light tile adhesive PLUS CERAfix® 403 C2 TE S1Flex/XL

Light tile adhesive that produces little dust for all ceramic coverings in accordance with EN 12004, C2 TE S1

Excellent stability and high degree of initial adhesion

- Prevents wall covering tiles from slipping
- Heavy and large tiles can be securely bonded

Long adhesive drying and processing times

- Corrections can be made long after tiles are laid
- Fast laying progress

Resistant to thawing/freezing alternations

- Suitable for indoor and outdoor use

Weight of content	15 kg
Container	Plastic sack
Chemical basis	Cement, polymer modified additives
Standards	EN 12004
Colour	Grey
Processing time	2 h
Application conditions	at 20 °C and 65% relative humidity
May be walked on after max.	24 h
May be walked on in following conditions	at 20 °C and 65% relative humidity
Groutable after	24 h
Grouting condition	at 20 °C and 65% relative humidity
Full load capacity/conditions	7 d/at 20 °C and 65% relative humidity
Min./max. processing temperature	5 to 25 °C
Shelf life from production/conditions	12 Month/cool and dry storage area

Art. no. 5875 100 403

P. Qty.: 24

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 12004 C2

- Fire behaviour: A1/A1fl
- Adhesive tensile strength after dry storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after wet storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after thermal storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after freeze/thaw exposure: $\geq 1 \text{ N/mm}^2$
- Slip size: $\geq 0.5 \text{ N/mm}^2$

Flexible mortar, EMICODE EC1 Plus

Higher temperatures and low relative humidity accelerate the film formation time; lower temperatures and higher relative humidity extend the hardening time.

Tile adhesive CERAfix® 403-2 C2 TE S1 Flex/XL

Hydraulically hardening, flexible, highly pourable thin bed and medium bed mortars in accordance with EN 12004 C2 TE S1

- Suitable for thin bed and medium bed mortars
- Can be used on all common surfaces and is resistant to water and alternating freezing/thawing
- Suitable for all ceramic coverings and underfloor heating

Weight of content	25 kg
Container	Paper bag
Chemical basis	Cement - DIN EN 197 Selected Aggregates - DIN EN 13139 additives and aggregates
Standards	EN 12004
Colour	Grey
Processing time	30 min
May be walked on after max.	12 h
May be walked on in following conditions	at 20°C and 50% relative humidity
Groutable after	12 h
Grouting condition	at 20°C and 50% relative humidity
Full load capacity/conditions	14 d/at 20°C and 50% relative humidity
Min./max. processing temperature	5 to 25 °C
Shelf life from production/conditions	12 Month/dry storage area

Art. no. 5875 200 403

P. Qty.: 24/42

Please consider the legal instruction at the beginning of this chapter.

Tested in line with EN 12004 C2 FE S1

- Fire behaviour: A1/A1fl
- Adhesive tensile strength after dry storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after wet storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after thermal storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after freeze/thaw exposure: $\geq 1 \text{ N/mm}^2$
- Slip size: $\geq 0.5 \text{ N/mm}^2$

For further information, please refer to the technical data sheet.

Tile adhesive CERAfix® 412-2 C2 TE Flex

White, hydraulically hardened, plastic-coated natural stone thin-bed mortar in accordance with EN 12004 C2 TE

- White tile adhesive, specifically for natural stone
- The positioned tiles adhere immediately, but can still be moved
- Resistant to water and alternating freezing/thawing and suitable for underfloor heating systems

Weight of content	25 kg
Container	Paper bag
Chemical basis	White cement - DIN EN 197 selected aggregates - DIN EN 12620 additives and admixtures
Standards	EN 12004
Colour	White
Processing time	20 min
May be walked on after max.	12 h
May be walked on in following conditions	at 20 °C and 50% relative humidity
Groutable after	24 h
Grouting condition	at 20 °C and 50% relative humidity
Full load capacity/conditions	14 d/at 20 °C and 50% relative humidity
Min./max. processing temperature	5 to 25 °C
Shelf life from production/conditions	12 Month/dry storage area

Art. no. 5875 200 412

P. Qty.: 24/42

Please consider the legal instruction at the beginning of this chapter.

Tested in line with EN 12004 C2 TE

- Fire behaviour: A1/A1fl
- Adhesive tensile strength after dry storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after immersion in water: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after heat storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after freeze/thaw alternating load: $\geq 1 \text{ N/mm}^2$

For further information, please refer to the technical data sheet.

Tile adhesive CERAfix® 404-2 C2 FT S1 Flex/XL

Fast bonding flexible mortar C2 FT S1 in accordance with DIN EN 12004

- Excellent adhesive strength of $\geq 1.0 \text{ N/mm}^2$ and high initial adhesion
- Very smooth and malleable application
- Resistant to thawing/freezing alternations

Weight of content	25 kg
Container	Sack
Chemical basis	Cement - DIN EN 197 Selected Aggregates - DIN EN 12620 additives and admixtures
Standards	EN 12004
Colour	Grey
Processing time	30 min
Application conditions	at 20°C and 65% relative humidity
Min./max. open time/conditions	20-20 min/at 20°C and 65% humidity
May be walked on after max.	3 h
May be walked on in following conditions	at 20°C and 65% relative humidity
Groutable after	4 h
Grouting condition	at 20°C and 65% relative humidity
Full load capacity/conditions	3 d/at 20°C and 65% relative humidity, by rain
Min./max. processing temperature	5 to 25 °C
Shelf life from production/conditions	9 Month/at room temperature

Art. no. 5875 200 404

P. Qty.: 24/42

Please consider the legal instruction at the beginning of this chapter.

Cement has an alkaline reaction with moisture or mixing water. Material that is already binding may not be subsequently diluted with water. For unusually absorbent, new, or unusual surfaces and laying materials, a test patch should be applied. This product is low in chromate in accordance with directive 2003/53/EC, Giscod ZP1

Tile adhesive PLUS CERAfix® 403 C2 TE S1Flex/XL

Extremely high stability and flexible tile adhesive for floors and walls according to EN 12004, C2 TE S1 for internal and external applications. Up to 35% higher yields.

- Suitable for thin and medium bed mortars
- Fulfils and exceeds class C2 in accordance with EN 12004
- Fulfils class S1 for pliable tile adhesive
- Excellent stability and high degree of initial adhesion
- Long adhesive drying and processing times
- Very smooth and malleable application

Weight of content	25 kg
Container	Plastic sack
Chemical basis	Cement, polymer modified additives
Standards	EN 12004
Colour	Cement grey
Processing time	2 h
Application conditions	at 23 °C and 50% relative humidity
May be walked on after max.	12 h
May be walked on in following conditions	at 23 °C and 50% relative humidity
Groutable after	12 h
Grouting condition	at 23 °C and 50% relative humidity
Full load capacity/conditions	7 d/at 23 °C and 50% relative humidity
Min./max. processing temperature	5 to 25 °C
Shelf life from production/conditions	12 Month/cool and dry storage area

Art. no. 5875 100 404

P. Qty.: 24/42

Please consider the legal instruction at the beginning of this chapter.

EMICODE EC1plus: Very low emission – the EMICODE classification system indicates the environmental and health compatibility of construction products. Low-emission products have the EC1plus label.

Chromate-reduced. For further information, please refer to the technical data sheet.

Tile adhesive PLUS CERAfix® 412 C2 FT Flex

**White, flexible, fast-hardening natural stone adhesive
in accordance with EN 12004, C2 FT**

- Quality tested according to EURO-NORM
- High degree of flexibility
- Quick to set
- Good stability and high degree of initial adhesion
- Water-resistant
- Suitable for underfloor heating
- Fast crystalline water binding

Weight of content	25 kg
Container	Sack
Chemical basis	White cement, sand, additives (polymer modified)
Standards	EN 12004
Colour	White
Processing time	1 h
Application conditions	at 20°C and 65% relative humidity
Min./max. open time/ conditions	15-20 min/at 20°C and 65% humidity
May be walked on after max.	4 h
May be walked on in following conditions	at 20°C and 65% relative humidity
Groutable after	4 h
Grouting condition	at 20°C and 65% relative humidity
Full load capacity/conditions	7 d/at 20°C and 65% relative humidity
Min./max. processing temperature	5 to 25 °C
Shelf life from production/ conditions	12 Month/dry storage area

Art. no. 5875 100 412

P. Qty.: 24

Please consider the legal instruction at the beginning of this chapter.

Tested in line with EN 12004 C2 FT

- Fire behaviour: A1/A1fl
- Adhesive tensile strength after dry storage for 24 hours: $\geq 0.5 \text{ N/mm}^2$
- Adhesive tensile strength after dry storage for 28 hours: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after wet storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after thermal storage: $\geq 1 \text{ N/mm}^2$
- Adhesive tensile strength after storage in alternating freezing/thawing conditions: $\geq 1 \text{ N/mm}^2$
- Slip size: $\geq 0.5 \text{ N/mm}^2$

Priming Rendering base

White-pigment, solvent-free special primer with quartz for optimum adhesion and grip for indoor and outdoor use

For wall and ceiling surfaces

Flexible application

- Apply with a paint roller, brush, paintbrush or suitable spray device
- With machine application, it is possible to obtain a spraying consistency by adding just a little water

Makes working practices easier

Weight of content	15 kg
Chemical basis	Acrylate dispersion
Colour	White
Drying time	8 h
Min. processing temperature	5 °C
Shelf life from production	24 Month

Art. no. 0890 545 15

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Do not work surfaces already coated with a rendering base must with gypsum or cement-based fillers. The object and ambient temperatures must not drop below 5°C.

40 items on one pallet

Priming Concrete contact

Ready-to-use etching primer containing quartz for smooth, mineral surfaces for indoor and outdoor applications

Application with a roller, brush or suitable spraying device

Improves the adhesion of gypsum, cement and lime-based fillers and plasters to smooth, non-absorbent or slightly absorbent mineral surfaces

Environmentally friendly

- Solvent-free
- Low emissions
- Highly resistant to alkali

Can be diluted with water for machine application

Weight of content	20 kg
Chemical basis	Acrylate polymer dispersion
Adhesive agent	Synthetic dispersion to DIN 55945
Colour	Reddish glaze
Drying time	24 h
Min. processing temperature	5 °C
Shelf life from production	60 Month

Continuation **Priming Concrete contact**

Art. no. 0890 545 20

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

32 pieces on one pallet

Avoid contact with skin and eyes. In case of contact, rinse immediately with water. Wear safety goggles when working overhead. Store the container in a cool, dry and frost-protected place. Keep the container tightly closed.

Deep-penetrating primer

Solvent-free, transparent primer for surface hardening and regulation of absorbency.

- High penetration due to fine-particle Hydrosol
- Excellent adhesive action
- Quick-drying
- Suitable for indoor and outdoor use
- Ready-to-use
- Alkali-resistant
- Minimised emissions and solvent-free

Contents	10 l
Chemical basis	Acrylic copolymer hydrosol
Colour	Transparent
Can be further processed after max.	8 h
Min./max. processing temperature	5 to 35 °C
Shelf life from production	12 Month

Art. no. 0890 545 10

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Tile dispersion primer CERAfix® 101

Solvent-free, ready-to-use, dispersion-based universal primer for indoor and outdoor use

Ready to use

- Can be used directly from the container
- No mixing required
- Fast application

Quick drying time

- Quick to build up layers (e.g. with subsequent sealing and laying work).
- Reduces downtimes

Colour	Light blue (bright blue)
Can be covered after min.	3 h

Min./max. processing temperature	5 to 30 °C
Min/max. application quantity in weight/area	180-200 g/m ²
Shelf life from production	15 Month
Drying time	3 h
Conditions for drying time	at 20°C and 65% relative humidity

Weight of content	Contents	Art. no.	P. Qty.
	10 l	5875 100 101	1
26125 g	25 l	5875 101 101	1

Please consider the legal instruction at the beginning of this chapter.

CERAFix 101 must be dry before the next coat is applied. Cover surfaces not to be treated (e.g. windows and doors) prior to application. Surface may not be sticky when further work is carried out! Do not work wet in wet. Protect from frost.

2-C special adhesive primer CERAFix® 103

Solvent-free 2-component special epoxy resin-based primer and sealant for indoor and outdoor applications

- For universal use
- Reduces substrate absorption
- Excellent adhesive bond
- Balanced mixture ratio
- Low viscosity setting for easy processing and pore sealing
- High material strength once fully cured
- Resistant to bases, acids, lubricants and fuels

Colour	Transparent, yellowish
Min./max. processing temperature	10 to 30 °C
Min/max. application quantity in weight/area	300-600 g/m ²
Shelf life from production	24 Month

Weight of content	Art. no.	P. Qty.
3 kg	5875 100 103	1
10 kg	5875 110 103	1

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 1504-2

- Capillary water absorption and water permeability: $w < 0.1 \text{ kg/m}^2 \times \text{h}^{0.5}$
- Penetration depth: Class I < 10 mm
- Steam permeability: Class II
- Pull-off test for adhesive strength: $\geq 1.5 (1.0) \text{ N/mm}^2$
- Fire behaviour: Class E
- Hazardous substances: Conformity with 5.3 (En 1504-2)

Continuation **2-C special adhesive primer CERAfix® 103**

CERAfix 103 must be fully cured before the next coat is applied. Cover surfaces not to be treated (e.g. windows and doors) prior to application. Do not work wet in wet. Protect from frost. Higher temperatures and low relative humidity accelerate the film formation time; lower temperatures and higher relative humidity extend the film formation time.

1-C special adhesive primer CERAfix® 104

Aqueous, solvent-free, fast-setting primer for absorbent and non-absorbent surfaces.

- Promotes adhesion
- Quick-drying even on smooth, non-absorbent surfaces (old tiling)
- Can be used either undiluted or diluted 1:1 with water
- Once dried, creates a non-slip surface for an optimum adhesive bond
- Suitable for underfloor heating

Colour	Blue-purple
Min./max. processing temperature	5 to 25 °C
Shelf life from production	18 Month
Drying time	60 min
Conditions for drying time	at 23°C and 50% relative humidity
Min./max. application quantity in volume/area	100-150 ml/m²

Weight of content	Contents	Art. no.	P. Qty.
1344 g	1 l	5875 200 104	1/6
6630 g	5 l	5875 210 104	1

Please consider the legal instruction at the beginning of this chapter.

For further information, please refer to the technical data sheet.

Floor levelling mass CERAfix® 201

Plastic-containing, self-spreading liquid cement filler for layer thicknesses from 3 to 30 mm

- Self-spreading
- Quick setting
- Suitable for underfloor heating and electric heating mats

Weight of content	25 kg
Colour	Grey
Processing time	30 min
May be walked on after max.	4 h
Can be covered after max.	16 h
Full resilience	7 d

Min./max. processing temperature	5 to 25 °C
Shelf life from production	9 Month

Art. no. 5875 100 201

P. Qty.: 24/42

Please consider the legal instruction at the beginning of this chapter.

Fire behaviour A2fl-s1

Tested to EN 13813

- Fire behaviour: A2fl-s1
- Release of corrosive substances: CT
- Compressive strength: C30
- Bending tensile strength: F7

Do not mix more CERAfix 201 than can be used within the processing time. Not suitable as a top surface without additional coverings or top surfaces. Refer to the primer table before use. From a layer thickness of 20 mm, epoxy primer CERAfix 103 must be applied; then dust with quartz sand 0.2 to 1.0 mm diameter in size.

Higher temperatures and low relative humidity accelerate the film formation time; lower temperatures and higher relative humidity extend the film formation time.

Floor levelling mass CERAfix® 201-2

Low-stress self-spreading liquid cement filler for layer thicknesses of 2–40 mm

- Reduces the amount of dust
- Good running properties
- Quick to be able to walk on and use
- Suitable for underfloor heating

Weight of content	25 kg
Chemical basis	Cement, mineral aggregates, high-quality additives (polymer-modified)
Colour	Grey
May be walked on after max.	3 h
Can be covered after max.	24 h
Full resilience	14 d
Min./max. processing temperature	5 to 25 °C
Shelf life from production	9 Month

Art. no. 5875 200 201

P. Qty.: 24/42

Please consider the legal instruction at the beginning of this chapter.

Tested in accordance with EN 13813

- Fire behaviour: A2 fl
- Release of corrosive substances: CT
- Compressive strength: C25
- Bending tensile strength: F5

Continuation **Floor levelling mass CERAfix® 201-2**

Joint mortar CERAfix® 505

For natural stone and ceramic floor and wall coverings from 2–25 mm

- Suitable for natural stone and ceramic coverings
- Can be used in underfloor and wall heating
- Resistant to water and alternating freezing/thawing

Max. working life	3 h
May be walked on after max.	7 h
Min./max. processing temperature	5 to 30 °C
Full resilience	48 h
Shelf life from production	18 Month

Weight of content	Colour	Art. no.	P. Qty.
5 kg	Anthracite	5875 107 505	1
5 kg	Bahama beige	5875 104 505	1
5 kg	Concrete grey	5875 105 505	1
5 kg	Edelweiss	5875 101 505	1
5 kg	Manhattan	5875 103 505	1
5 kg	Mouse grey	5875 108 505	1
5 kg	Sanitary grey	5875 106 505	1
5 kg	Silver grey	5875 102 505	1
15 kg	Concrete grey	5875 115 505	1
15 kg	Silver grey	5875 112 505	1

Please consider the legal instruction at the beginning of this chapter.

Colour deviations may occur due to temperature differences, structural conditions and different ceramics, natural stone coverings. We make no guarantee with regard to colour variations.

2-component casting and adhesive resin CERAfix® 203

2-component epoxy-based casting and adhesive resin for positive casting of cracks and joints in cement screed and concrete

- Portion bags to suit requirements make for easy, quick dispensing
- Easy to mix in the bag without the need for tools
- Excellent creep and penetration properties

Weight of content	2.5 kg
Colour	Transparent
Min./max. processing temperature	8 to 25 °C
Can be covered after max.	6 h
Shelf life from production	18 Month

Art. no. 5875 100 203

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Do not close cracks and dummy joints until the surface is ready to be covered. Higher temperatures shorten the application and hardening times (refer to technical data). Be careful, as the remaining material in the bag will get hot!

Sound and decoupling panel CERAfix® 206

For top coverings such as ceramics, natural stone, parquet and after spreading under carpets and plastic coverings as well

- Can be used on adhesion-friendly surfaces with a class C2 thin-bed adhesive
- Can be covered with conventional laying materials
- Suitable for underfloor heating
- High crack and compression resistance
- Low emissions

Material	Polyester fibre
Length	1 m
Conditions for sound-insulation performance	under tiles, DIN ISO 140-8
Width	60 cm

Total thickness	Coating weight per m²	Art. no.	P. Qty.
4 mm	3.8 kg	5875 101 206	15
9 mm	7.2 kg	5875 102 206	10
15 mm	12 kg	5875 103 206	5

Please consider the legal instruction at the beginning of this chapter.

Electrical underfloor heating is significantly more effective on CERAfix 206 due to its excellent heat insulation; the ideal addition under ceramic and natural stone coverings.

2-C slurry-type seal coating CERAfix® 301

Flexible, mineral 2-component slurry-type seal coating for indoor and outdoor use

- Tested quality
- Particularly high degree of flexibility
- Vapour-permeable
- High bond adhesion without priming
- Resistant to water and alternating freezing/thawing

Chemical basis	Cement, styrene-acrylate dispersion
Min./max. surface processing temperature	5 to 30 °C
Min./max. processing temperature	5 to 30 °C
May be walked on after max.	1 d

Continuation **2-C slurry-type seal coating CERAfix® 301**

May be walked on in following conditions	at 20°C and 65% relative humidity
Building material class/ conditions	E - Normally inflammable/in accordance with DIN EN 13501-1
Colour	Grey
Container	Bucket
Product weight (per item)	21 kg

Art. no. 5875 100 301

P. Qty.: 1/18

Please consider the legal instruction at the beginning of this chapter.

P-DD 4863/1/2008 Bauteist Dresden **Tested in accordance with EN 14891**

- Initial adhesion strength: $\geq 0.5 \text{ N/mm}^2$
- Adhesive tensile strength on contact with water: $\geq 0.5 \text{ N/mm}^2$
- Adhesive tensile strength after thermal ageing: $\geq 0.5 \text{ N/mm}^2$
- Adhesive tensile strength after alternating freezing/thawing stress: $\geq 0.5 \text{ N/mm}^2$
- Adhesive tensile strength on contact with lime water: $\geq 0.5 \text{ N/mm}^2$
- Impermeable to water: No penetration of water
- Crack bridging: $\geq 0.75 \text{ mm}$

Classification of fire behaviour in accordance with EN 13501-1 and EN ISO 11925-2
Tested for water impermeability in line with DIN 4030

CERAfix 301 is a hydraulically hardening sealing mortar that must be protected against water and frost until it has fully hardened; this process can take several days in the worst case scenario.

Liquid foil CERAfix® 302

Watertight, elastic, synthetic resin dispersion-based sealing compound

Ready to use

- Ready for use directly from the container
- No mixing necessary
- Quick to use

Quick drying time

- Quick to build up layers, e.g. with subsequent sealing and laying work
- Reduced downtimes

Chemical basis	Polymer dispersion with fillers
Min./max. processing temperature	5 to 30 °C
Building material class	E - Normally inflammable
Shelf life from production	15 Month

Weight of content	Colour	Art. no.	P. Qty.
12 kg	Ochre yellow RAL 1024	5875 101 302	1/40
20 kg	Grey	5875 100 302	1/32

Please consider the legal instruction at the beginning of this chapter.

Do not allow water to make contact with surface until fully hardened! Not suitable for underwater applications.

Sealing and isolation strip CERAfix® 305

Fleece-laminated, crack-bridging sealing strip for fast and secure sealing of floors and walls

- Can be used for moisture resistance classes A, B0
- Secure sealing with consistent layer thickness
- Support material made from polypropylene fleece, on top and underside

Material	Polyethylene film
Backing material	Polypropylene fleece
Thickness	0.51 mm
Length of roll	30 m
Roll width	1 m
Shelf life from production	24 Month

Art. no. 5875 100 305

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Inside corner CERAfix® 306

Inner corner for quick and secure sealing of corner formations in walls and floors

- Broad range of uses

For moisture resistance classes A, B0 and C

- Secure sealing with consistent layer thickness
- Support material made from polypropylene fleece, on top and underside

Material	Polypropylene fleece (top and bottom side)/polyethylene film (middle)
Limb length	120 mm
Thickness	0.42 mm
Shelf life from production	24 Month

Art. no. 5875 100 306

P. Qty.: 25

Please consider the legal instruction at the beginning of this chapter.

Continuation **Inside corner CERAfix® 306**

Same material as sealing strip CERAfix 305.

Outside corner CERAfix® 307

Outer corners for quick and secure sealing of corner formations in walls and floors

- For stress classes A, B0 and C
- Secure sealing with consistent layer thickness
- Excellent adhesive bond
- Highly elastic and water-resistant
- Temperature-resistant and resistant to ageing
- Easy and quick to apply

Material	Polypropylene fleece (top and bottom side)/polyethylene film (middle)
Limb length	120 mm
Thickness	0.42 mm
Shelf life from production	24 Month

Art. no. 5875 100 307

P. Qty.: 25

Please consider the legal instruction at the beginning of this chapter.

Same material as sealing strip CERAfix 305.

Edge insulating strips, self-adhesive foot and rising effect CERAfix 208

Ideal for renovation work that involves separating the floor and wall screeds

- Excellent acoustic insulation properties
- Fire behaviour Class E according to EN 13501-1/B2 according to DIN4102
- Prevents structure-borne sound paths caused by mortar

Length of roll	20 m
Height	50 mm
Thickness	5 mm
Material	PE - Polyethylene
Max. usage temperature	85 °C

Art. no. 5875 100 328

P. Qty.: 5

Please consider the legal instruction at the beginning of this chapter.

Insulating and sealing primer

High-quality insulating and sealing primer for indoor and outdoor applications

Excellent insulating and sealing effect

- Suitable for a range of critical surfaces
- Compatible for use with polystyrene
- Free from aromatic compounds

Saves time

- Quick-drying
- High coverage
- High yield

Chemical basis	Acrylic copolymers
Colour	White
Min./max. processing temperature	+8 to +30 °C
Shelf life from production	24 Month

Contents	Dust-drying time	Recoatable/ Can be painted over	Yield (area)	Art. no.	P. Qty.
400 ml	10 min	Yes, after 30 minutes	2 m ²	0890 540	1/6
2.5 l	20 min	Yes, after 2 hours	7 m ²	0890 540 1	1/6

Please consider the legal instruction at the beginning of this chapter.

Based on very mild, low-odour solvents. Can be painted with all emulsion paints, alkyd and all acrylic paints that can be diluted with water; however, it cannot be painted with two-component paints.

Universal glue

Secure adhesive strength for wallpapering devices, airless devices, brush application and wall adhesive technology

- Very strong adhesive strength with high degree of initial adhesion
- Optimum glue distribution
- Easy to correct
- Secure adhesion to edges
- Very high degree of resistance to moisture
- Excellent machine suitability
- Extra-transparent when drying
- Resistant to lime and cement
- Secure adhesive strength for virtually all carpets and wall coverings
- Universal use for all types of application

Continuation **Universal glue**

Weight of content	800 g
Chemical basis	Methyl cellulose, additive, synthetic resin powder
Min. processing temperature	5 °C
Paste swelling time	15 min
Application quantity in volume/area	200 ml/m ²
Shelf life from production	24 Month

Art. no. 0893 000 130

P. Qty.: 1/5

Please consider the legal instruction at the beginning of this chapter.

Store in a cool and dry place.

Repair cement

Quick-setting assembly cement

Quick installation with earlier load-bearing capacity

- Solidification finished after approx. 3 minutes
- Can be reworked after an hour (coating, plasters)
- Quickly reaches a high level of tensile bending and compressive strength

Chemical basis	Mix of Portland/alumina cement
Colour	Grey
Min./max. processing temperature	5 to 30 °C
Max. processing temperature	30 °C
Building material class	A1 - Non-flammable
Shelf life from production	12 Month

Weight of content	Art. no.	P. Qty.
5 kg	0890 350	1
15 kg	0890 351	1

Please consider the legal instruction at the beginning of this chapter.

Protect from frost!

All clean and load-bearing, solid, non-slip, mineral and permitted surfaces are classed as suitable surfaces. (Gypsum surfaces must be primed beforehand with CERAfix 101). Do not mix with other substances (such as gypsum). Do not over-water. Do not use in a pourable state. The processing time is based on an air and object temperature of +20°C. Do not mix with other materials (e.g. gypsum). It is essential that the repair cement is not over-watered. Repair cement must not be applied in a pourable state.

Concrete release agent

Universal concrete release agent for almost all absorbent and non-absorbent formwork types.

- Can be used on heated steel formwork up to +60°C
- Reduces the occurrence of rust stains
- Prevents embrittlement and swelling of raw timber formwork
- Neutral odour, residue-free
- Biodegradable

Min./max. temperature conditions	5 to 60 °C
Shelf life from production	24 Month

Contents	Product weight (per item)	Art. no.	P. Qty.
25 l	23.35 kg	0893 110 230	1
210 l	195.4 kg	0893 110 231	1

Please consider the legal instruction at the beginning of this chapter.

- Preliminary tests should be carried out
- Avoid puddling
- Cannot be diluted with water
- Excessive application may result in build-up and sanding down of the surface
- Heated formwork up to max. +60°C

Concrete release agent Plus

High-quality concrete release agent for manufacturing exposed concrete, finished parts and filigree elements.

- Can be used on heated steel formwork up to +60°C
- Reduces staining on exposed concrete

Min./max. temperature conditions	8 to 60 °C
Shelf life from production	12 Month

Contents	Product weight (per item)	Art. no.	P. Qty.
25 l	22350 g	0893 110 240	1
210 l	189.1 kg	0893 110 241	1

Please consider the legal instruction at the beginning of this chapter.

- Preliminary tests should be carried out
- Avoid puddling
- Cannot be diluted with water
- Excessive application may result in build-up and sanding down of the surface
- Heated formwork up to max. +60°C
- Fire, flying sparks and welding should be avoided in the vicinity of the freshly sprayed formwork

Formwork release oil sprayer

Corrosion-resistant, polyester-coated steel container

- Flexible, 2.5-m spiral hose with safety latch
- The brass spray pipe is rotatable by 360° and facilitates comfortable and effortless working by adjusting direction.
- The precision flat jet nozzle with fine nozzle distributes the formwork oil evenly and sparingly.
- Quick and convenient to refill
- Dirt-free
- Secure storage

Working pressure	6 bar
Flow capacity conditions	at 2 bar
Flow capacity	0.64 l/min
Max. operating temperature	40 °C
Recoil force	5 N
Material	Steel
Hose length	2.5 m

Liquid volume	Container capacity	Height x width	Product weight (per item)	Art. no.	P. Qty.
6 l	9 l	495 x 255 mm	4352 g	0651 150 209	1
10 l	13 l	650 x 255 mm	5138 g	0651 150 207	1

Spray pipe with nozzle

For formwork release oil sprayer

Product weight (per item)	91 g
---------------------------	------

Art. no. 0993 893 032

P. Qty.: 1

Formwork tape

Self-adhesive foam tape for temporary sealing of formwork joints

- The tape fills out the joint and prevents liquid concrete sludge from getting into the formwork joint.

Material	Foam material
Colour	White
Length	10 m
Width	19 mm
Thickness of adhesive tape	6 mm

Art. no. 0875 330 019

P. Qty.: 16

Please consider the legal instruction at the beginning of this chapter.

Not suitable for permanent sealing of joints. The surface must be dry and free from dust, oil and grease.

1-component gun foam PURLOGIC® Top

1-component gun foam for a variety of applications

- Small can with high foam output (40 litres)
- Can even be applied at surface and ambient temperatures down to -5°C
- Fine-celled and uniform foam structure

Structure adhesive systems according to ift certification program
QM360: 2014, Reg. no. 188 7050098

Contents	500 ml
Chemical basis	Single component polyurethane
Tack-free after	7 min
Can be cut after	40 min
Full resilience	12 h
Min./max. processing temperature	5 to 25 °C
Yield (volume) approx.	40 l
Building material class	B2 - Normally inflammable
Shelf life from production	12 Month

Colour	Art. no.	P. Qty.
Concrete grey	0892 142	15
Light ivory	0892 142 1	15

Please consider the legal instruction at the beginning of this chapter.

1-component expanding foam PURLOGIC® Easy

1-component assembly foam to insulate, fill and seal cavities

- Small box with high foam yield (up to 30 litres)
- Can also be applied at surface and ambient temperatures down to -5°C
- Fine-celled and uniform foam structure

Contents	500 ml
Cell structure	Medium - fine
Chemical basis	Single component polyurethane
Colour	Ice blue
Tack-free after	9 min
Can be cut after	15 min
Full resilience	12 h
Min./max. processing temperature for can	5 to 25 °C
Min./max. temperature resistance	-40 to 80 °C
Yield (volume) approx.	30 l
Building material class	B2 - Normally inflammable
Shelf life from production	12 Month

Art. no. 0892 143

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Primer should be applied to porous and absorbent surfaces.

Single-component expanding foam PURlogic® Easy white

Is a ready-to-use, single-component, self-expanding rigid polyurethane foam. With combination valve for use with our foam guns or the supplied angled adapter.

- For all common substrates such as concrete, masonry, stone, plaster and wood.
- With combination valve for processing using our foam guns or the supplied angled adapter
- Halogen-free, contains no halogenated flame retardants or halogenated propellants
- Does not contain TCEP, TCPP or chlorinated paraffins and is free from plasticisers

Contents	500 ml
Cell structure	Fine
Chemical basis	Polyurethane
Colour	White
Tack-free after	15 min
Can be cut after	60 min
Full resilience	24 h
Min./max. temperature resistance	-40 to 90 °C

Yield (volume) approx.	25 l
Building material class	B1 - Of low flammability
Shelf life from production	12 Month

Art. no. 0892 143 300

P. Qty.: 12

Please consider the legal instruction at the beginning of this chapter.

EMICODE EC1 Plus

- Not UV-resistant
- The single-component PURlogic® Easy white expanding foam can be used in the foam guns PURlogic Xpress (art. no. 08911524) and PURlogic COMBIpress (art. no. 08911526). Other guns are not compatible.

1-component gun foam PURLOGIC® Flex

1C premium foam for elastic joint insulation

- Extremely flexible, thereby significantly preventing the risk of a break in the foam bead. (approx. 3 times the flexibility of commercially available PU foams).
- Prevents heat bridges
- Down to -15°C surface and ambient temperature

Contents	500 ml
Chemical basis	Single component polyurethane
Colour	Pebble grey
Tack-free after	6 min
Can be cut after	20 min
Full resilience	12 h
Min./max. processing temperature	5 to 25 °C
Yield (volume) approx.	18 l
Building material class	B2 - Normally inflammable
Shelf life from production	12 Month

Art. no. 0892 142 8

P. Qty.: 1/15

Please consider the legal instruction at the beginning of this chapter.

Structure adhesive systems according to ift certification program QM360: 2014, Reg. no. 188 7050098

Adheres to concrete, stone, hard PVC, metal and wood. Does not adhere to polyethylene, silicone, PTFE and grease. PURLOGIC FLEX can be applied with PURLOGIC Xpress and PURLOGIC COMBIpress. Primer should be applied to porous and absorbent surfaces. Unhardened foam must not come into contact with wet adhesive.

Joint foam B1

1-component polyurethane foam for applications with building material class B1 requirements

For universal use

- Suitable for a range of indoor and outdoor applications
- Excellent adhesion on nearly all structural substrates
- Once hardened, can be plastered over, painted and glued
- Resistant to ageing, non-rotting, mould-resistant, but not UV-resistant

Contents	750 ml
Chemical basis	Polyurethane
Colour	Blue
Tack-free after	25 min
Can be cut after	30 min
Full resilience	24 h
Min./max. processing temperature	5 to 35 °C
Yield (volume) approx.	40 l
Building material class	B1 - Of low flammability
Shelf life from production	12 Month

Art. no. 0892 400 100

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

All common construction surfaces such as concrete, masonry, stone, plaster, wood, corrosion-protected metal, polystyrene, PIR/PUR hard foam, polyester and hard PVC. Does not adhere to PE, PP, PTFE and silicone.

1C well-drilling foam Combi

1-component special foam with safety combination valve for bonding and sealing components in civil engineering applications

- Combination valve technology enables use as gun and adapter foam
- Replaces labour and time-intensive mortaring
- Watertight bonding
- Suitable for a broad range of uses due to great durability
- Environmentally friendly

Contents	750 ml
Chemical basis	Single component polyurethane
Colour	Grey
Tack-free after	10 min
Can be cut after	60 min
Full resilience	24 h
Min./max. surface processing temperature	5 to 30 °C
Yield (volume) approx.	40 l
Yield with gun application	40 l

Building material class	B2 - Normally inflammable
Shelf life from production	12 Month

Art. no. 0892 400 9

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Store in a cool and dry place. Store the can upright to prevent damage to the valve.
Protect decorative surfaces from dirt; cover adjacent surfaces with adhesive tape/film.

1-component foam gun PURLOGIC® Xpress

For professional application of 1-component gun foams

- Foam dispensing quantity can be adjusted variably for a clean spraying pattern
- Easy to clean as foam accumulations are reduced thanks to the nano coating on the needle and cone

Material	Plastic
Colour	Red
Product weight (per item)	430 g

Art. no. 0891 152 4

P. Qty.: 1

A polyurethane foam can should always be screwed onto the PURLOGIC® guns. The gun should be cleaned with PURLOGIC® Clean at regular intervals. Please refer to the instructions for use

Can be used for all Würth 1-component gun foams.

When used with other polyurethane foam cans, the function should be tested beforehand

1-component foam gun PURLOGIC® Premiumpress

High-quality and ergonomically shaped foam gun for applying 1C PU foams

- Ergonomic grip with rubber trim
- Foam dispensing quantity can be adjusted variably for a clean spraying pattern
- Conical nozzle, ideally suited for extension tips for slim joints

Material	Fibre glass
Colour	Red, Black
Product weight (per item)	444 g
Length	350 mm

Art. no. 0891 152 600

P. Qty.: 1

2C frame foam PURLOGIC® Fast

2C cartridge foam for secure door frame installation

- Reduces expansion time to 15 minutes. This saves time and costs
- Good adhesion to virtually all surfaces found in construction
- Dimensionally stable foam

No pressure needed once spreading time is reached

Contents	400 ml
Chemical basis	Polyurethane prepolymer
Colour	Green
Tack-free after	5 min
Can be cut after	15 min
Full resilience	1 h
Min./max. processing temperature	10 to 25 °C
Yield (volume) approx.	10 l
Building material class	B2 - Normally inflammable
Shelf life from production	12 Month

Art. no. 0892 144

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Does not adhere to polyethylene, silicone, PTFE and grease.

Primer should be applied to porous and absorbent surfaces. When installing door frames, make sure that counter-wedges and bracing are used at the setting points. The despreding time can increase significantly with damp building surfaces. Moisture does not need to be added (wetting the adhesive surfaces) with 2-component foams. Max. joint width 20 mm in accordance with IfT directive.

*Measured at 23°C and 50% humidity

2-component cartridge foam PURLOGIC® Sprint

2C cartridge foam for fast and easy door frame installation, non-stick after just 3 minutes

Very quick to reach final strength

Reduces expansion time to 20 minutes. This saves time and costs

Adheres well to various wall joint and frame materials

Dimensionally stable foam

- No pressing during and after the hardening phase
- < 5% dimensional change, tested in accordance with ift directive from the ift Rosenheim Institute in Germany.

Contents	210 ml
Chemical basis	Mix of polyether polyols, diphenylmethane-4, 4'-diisocyanate
Colour	Sand beige
Tack-free after	3 min

Can be cut after	7 min
Full resilience	30 min
Min./max. processing temperature	10 to 25 °C
Yield (volume) approx.	5 l
Building material class	B2 - Normally inflammable
Shelf life from production	9 Month

Art. no. 0892 146

P. Qty.: 16

Please consider the legal instruction at the beginning of this chapter.

Does not adhere to polyethylene, silicone, PTFE and grease. Please refer to the operating instructions and the technical data sheet. Store upright cartridges in a cool, dry and frost-protected place. Protect from heating up to over +30°C.

2C frame foam PURLOGIC® Turbo

2-component cartridge foam for fast and easy door installation, non-stick after just 90 seconds

- Set to touch after just 90 seconds
- Reduces spreading time to 20 minutes, saving you time and money
- Good adhesive properties
- Stable foam structure
- General Building Inspectorate Test Certificate
- Even, fine-celled foam structure
- Empties fully
- Resistant to ageing

Contents	210 ml
Chemical basis	Mix of polyether polyols, diphenylmethane-4, 4'-diisocyanate
Colour	Light beige
Tack-free after	1.5 min
Can be cut after	8 min
Full resilience	20 min
Min./max. processing temperature	10 to 30 °C
Yield (volume) approx.	5.5 l
Building material class	B2 - Normally inflammable
Shelf life from production	9 Month

Art. no. 0892 147

P. Qty.: 16

Please consider the legal instruction at the beginning of this chapter.

- Does not adhere to polyethylene, silicone, PTFE and grease
 - Primer must be applied to porous and absorbent surfaces
- *Tested in accordance with the respective Würth testing methods

PURLOGIC® PU foam cleaner Clean

Quickly and simply removes fresh PU foam residue

500 ml can is adapted to PU foam guns

- It is particularly well suited for cleaning foam guns
- Contains an additional spray head for external cleaning of foam guns and other surfaces

Contents	150 ml
Chemical basis	Acetone
Colour	Transparent
Shelf life from production	12 Month

Art. no. 0892 16

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Can etch surfaces such as lacquer, paint and plastics. Can cause colour fading or dissolving in textiles. Hardened PU foam can only be removed with PURLOGIC foam cleaner, art. no. 0892 160 000, or mechanically.

PURLOGIC® PU foam cleaner Foam cleaner

Cleaning set for easy removal of hardened PU foam on a wide variety of surfaces.

- Easy removal of soiling with hardened PU foam
- Long-lasting cleaning agent
- Numerous application possibilities

Scope of delivery

- 1 can (150 ml) foam cleaner
- 1 bottle (250 ml) PVC protective polish
- 1 wooden spatula
- 1 cleaning cloth
- 1 information sheet

Chemical basis	Mix of organic solvents
Number of pieces in assortment/set	5 PCS
Shelf life from production	12 Month

Art. no. 0892 160 000

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Dispersion spray cork

Single-component, acrylic dispersion- and granulated cork-based insulation with no solvents

- Acoustic, damping and insulating effect
- Environmentally friendly
- Can be sanded and painted
- Tested product features

Contents	500 ml
Chemical basis	Natural cork/acrylate dispersion
Colour	Cork colour
Min./max. full curing speed	1-2 mm/d
Min./max. processing temperature	5 to 35 °C
Building material class	B2 - Normally inflammable
Shelf life from production	12 Month

Art. no. 0892 140

P. Qty.: 30

Please consider the legal instruction at the beginning of this chapter.

To improve adhesion to absorbent surfaces such as concrete, stone etc., pre-treatment of the adhesive surfaces with a primer is recommended. A 500-ml tubular bag is sufficient for approx. 5 running metre joint. (10x10 mm² joint cross-section)

Structural adhesive Bond+Seal

Elastic PU adhesive and sealant for a wide range of applications

- For universal use
- Approved for use with foodstuffs (ISEGA certificate)
- Highly elastic
- Long skin formation time enables complicated bonds and large-area bonds
- Can be sanded/painted
- Non-corrosive
- Virtually odourless
- Silicone-free

ISEGA:

Can be used where food is processed or stored, e.g. for bonding wall and floor areas in food processing companies.

Clearance certificate no.: 41958 U 16

Chemical basis	Single component polyurethane
Min./max. skin-formation time	45-60 min
Full curing speed/conditions	3 mm/d/23°C and 50% relative humidity, moisture curing
Min./max. processing temperature	5 to 35 °C
Shelf life from production/conditions	12 Month/at 10°C to 25°C

Container	Contents	Colour	Min./max. temperature resistance	Max. short-term temperature resistance	Art. no.	P. Qty.
Cartridge	300 ml	White	-40 to +90 °C	120	0890 100 1	1/12/24
Cartridge	300 ml	Grey	-40 to +90 °C	120	0890 100 2	1/12/24

Bag	600 ml	Black	-40 to 90 °C	120 °C	0890 100 183	20

Please consider the legal instruction at the beginning of this chapter.

Structural adhesive Bond + Seal Fast

Fast-acting, brushable PU sealant

- Highly adhesive, permanently elastic sealing compound
- Good stability
- Short skin formation time
- Can be painted over quickly
- Approved for use with foodstuffs (ISEGA certificate)
- Non-corrosive
- Low-odour
- Silicone-free

Container	Cartridge
Contents	300 ml
Chemical basis	Single component polyurethane
Min./max. skin-formation time	19-20 min
Full curing speed/conditions	3 mm/d/23 °C and 50% relative humidity, moisture curing
Min./max. processing temperature	5 to 35 °C
Shelf life from production/conditions	12 Month/at 10 °C to 25 °C

Colour	Min./max. temperature resistance	Max. short-term temperature resistance	Art. no.	P. Qty.
Black	-40 to 90 °C	120 °C	0890 100 730	1/12/24
Grey	-40 to 90 °C	120 °C	0890 100 720	1/12/24
White	-40 to +90 °C	120	0890 100 710	1/12/24

Please consider the legal instruction at the beginning of this chapter.

Continuation **Structural adhesive Bond + Seal Fast**

- Not suitable for glass groove sealing in areas in which UV back reflection can occur.
- Direct exposure to sunlight can result in slight surface yellowing.
- Following skin formation, can be mechanically machined and painted over without surface activation.
- Due to the multitude of different paints and coatings, preliminary tests must be performed to check compatibility.
- Do not allow this product to come into contact with alkyd-resin paint systems.
- Caution: In the case of high surface moisture, very wide adhesive bead application, and/or cavities/air pockets created, backfill foams in the application, there is a risk of bubble formation in the adhesive compound.

Structural adhesive Bond and Seal Power

Heavy-duty, elastic hybrid structural adhesive

Excellent adhesive range and high level of initial strength

- Very good adhesion to almost all surfaces
- Simple to attach components
- Can be painted over before and after skin formation with all commercially available paint systems (except alkyd resin paints).
- UV-resistant
- NSF (P1) registered (no.136996)

Container	Cartridge
Contents	300 ml
Chemical basis	Hybrid polymer
Min./max. skin-formation time	30-40 min
Full curing speed/conditions	3 mm/d/23°C and 50% relative humidity, moisture curing
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-40 to +90 °C
Shelf life from production/conditions	12 Month/at max. 25°C

Colour	Max. short-term temperature resistance	Art. no.	P. Qty.
Black	150	0893 235 3	1/12
Grey	150 °C	0893 235 2	1/12
White	150	0893 235 1	1/12

Please consider the legal instruction at the beginning of this chapter.

NSF-registered, Class P1, No. 136996

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

- In the case of B and S Power, an additional layer can be added within the skin-formation time. Due to the multitude of different paints and coatings, preliminary tests must be performed to check compatibility. 2C epoxy paints are compatible. Do not allow this product to come into contact with alkyd-resin paint systems.
- Since the elasticity of the paint is lower than that of the adhesive/sealant, cracks may form in the paint around the joint.

PU Marine adhesive sealant Multi

Versatile, elastic one-component PU adhesive and sealant for marine applications or caravan construction

- Flame-retardant
- Typical uses are sealing work in bathrooms, indoor and outdoor use, and also use when working with decorative panels.
- Can be sanded and painted over

Container	Cartridge
Contents	310 ml
Chemical basis	Moisture curing 1K polyurethane
Full curing speed/conditions	3 mm/d/23 °C and 50% relative humidity
Min./max. processing temperature	5 to 35 °C
Max. short-term temperature resistance	90 °C
Shelf life from production/conditions	12 Month/at max. 25 °C

Colour	Min./max. temperature resistance	Art. no.	P. Qty.
Black	-40 to 80 °C	0893 291 3	12
White	-40 to +80 °C	0893 291 1	12

Please consider the legal instruction at the beginning of this chapter.

EC type examination certificate: Approved for bonding in shipbuilding and boat building.

Do not allow this product to come into contact with alkyd-resin paint systems. When painting over the sealant, it must be taken into account that the thickness and hardness of the paint film may impair the adhesive's elasticity and thereby cause cracks.

Seam sealing Bond and Seal All-in-One

Hybrid-based sprayable and brushable seam sealant for restoring the original structure

- Sprayable and brushable
- Solvent-free
- Permanently elastic after hardening
- Can be painted over up to five days later
- UV-resistant
- Broad range of applications
- Isocyanate-free, PVC-free and silicone-free

Continuation **Seam sealing Bond and Seal All-in-One**

Contents	310 ml
Chemical basis	Hybrid polymer
Min./max. processing temperature	5 to 30 °C
Min./max. temperature resistance	-40 to +80 °C
Shelf life from production	15 Month

Colour	Art. no.	P. Qty.
Black	0893 236 130	1/12
Grey	0893 236 120	1/12
White	0893 236 110	1/12

Please consider the legal instruction at the beginning of this chapter.

Preliminary tests are required with critical surfaces such as PE, PP, PS, PC, PMMA and PTFE. The best adhesion between the paint and the sealant is achieved the sooner the material is painted following application.

Adhesive sealant PU Marine Power

Versatile, elastic one-component polyurethane adhesive for marine applications or caravan construction

- Flame-retardant
- For use on the deck, hull and keel. In the installation of structures, walls, vertically fitted panels, the railing etc.
- Can be sanded and painted over

Container	Cartridge
Contents	310 ml
Chemical basis	Moisture curing 1K polyurethane
Colour	White
Full curing speed/conditions	3 mm/d/23°C and 50% relative humidity
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-40 to +90 °C

Art. no. 0892 292 1

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

EC type examination certificate: Approved for bonding in shipbuilding and boat building.

Do not allow this product to come into contact with alkyd-resin paint systems. When painting over the sealant, it must be taken into account that the thickness and hardness of the paint film may impair the adhesive's elasticity and thereby cause cracks.

SMP adhesive sealant

Universal SMP-based elastic adhesive and sealant

Universal applications indoors and outdoors

- Very good, permanent adhesion to almost all surfaces
- Effective resistance to UV and weathering
- Not corrosive to metals
- Suitable for bonding and sealing in food processing plants (ISEGA)

Container	Cartridge
Contents	290 ml
Chemical basis	Silane modified polymer
Min./max. skin-formation time	15-20 min
Full curing speed/conditions	3 mm/d/23°C and 55% relative humidity
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-40 to +90 °C
Shelf life from production/conditions	18 Month/at 5°C to 25°C

Colour	Art. no.	P. Qty.
Black	0893 237 102	1/12
Grey	0893 237 101	1/12
White	0893 237 100	1/12

Please consider the legal instruction at the beginning of this chapter.

ISEGA:

Can be used where food is processed or stored, e.g. for bonding wall and floor areas in food processing companies. Clearance certificate no.: 42221 U16

- Once the adhesive is completely dry, it can be covered perfectly with water-based paint and two-component paint. We recommend that you perform a compatibility test beforehand. If the adhesive is to be painted over, it should be roughened with abrasive paper first.
- Not suitable for natural stone or mirrors.
- Not suitable for movement or glazing joints.

Surface bonding agent Primer for Metal

Surface optimisation of metallic surfaces

Contents	250 ml
Min. flash-off time	30 min

Art. no. 0890 100 61

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Primer for metal primer reacts with moisture. To retain the quality of the primer, seal the can with the inner plastic lid immediately after each use. When pre-treatment is finished, close the can with the screw lid.

Continuation **Surface bonding agent Primer for Metal**

Once opened, primer for metal primer should be used up within approx. one month if used on a regular basis. If the can is rarely opened, use the primer within 2 months. Discontinue use of primer for metal primer if it gels, is not homogeneous or is too viscous.

Do not dilute primer for metal primer or mix with other substances.

SMP adhesive HIGH TACK

Structural adhesive with extreme initial SMP-based bonding

Universal applications indoors and outdoors

- Adheres perfectly to most surfaces including wet surfaces, mainly without primer
- Good UV stability and weather-resistance outdoors
- Can be painted over perfectly once fully dry
- Not corrosive to metals

Container	Cartridge
Contents	290 ml
Chemical basis	Silane modified polymer
Colour	White
Full curing speed/conditions	3 mm/d/23°C and 55% relative humidity
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-40 to +90 °C
Shelf life from production/conditions	18 Month/at 5°C to 25°C

Art. no. 0893 237 140

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Surface bonding agent Adhesion Plus for plastic/wood/stone

Optimisation of plastic, wood, stone and concrete surfaces

The adhesion agent is used to improve the performance of the respective adhesive on hard-to-bond surfaces.

Contents	250 ml
Min. flash-off time	30 min

Art. no. 0890 100 62

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

- Primer for plastic/wood/stone reacts to moisture. To retain the quality of the primer, seal the can with the inner plastic lid immediately after each use. When pre-treatment is finished, close the can with the screw lid.
- Once opened, the primer should be used up within approx. one month if used on a regular basis. If the can is rarely opened, use the primer within 2 months. Discontinue use of the primer if it gels, is not homogeneous or is too viscous.
- Do not dilute the primer or mix with other substances.
- AdhesionPlus primer can lead to coloured residues on natural stone. Please refer to the surface table in the technical data sheet.

2-component liquid metal filler FLM 50

Fast-acting repair system for installers and workshops in the metalworking sector. Particularly suitable for filling moulds, and for sealing and covering leaking areas.

- Quick to harden
- Very high final strength
- Practical dual cartridge for an optimal mixing ratio

Contents	50 ml
Chemical basis	Epoxy
Colour	Grey
Min. functional strength	30 min
Min. final strength	24 h
Min./max. processing temperature	20 to 25 °C
Min./max. temperature resistance of the hardened material	-45 to 120 °C
Shelf life from production	24 Month

Art. no. 0893 680

P. Qty.: 1/10

Please consider the legal instruction at the beginning of this chapter.

The metals must be cleaned and degreased bare. The hardened liquid metal can be easily machined by lathing, milling, drilling etc.

Methyl methacrylate adhesive MAK 38

2-component structural adhesive for bonding metal, composite materials and various plastics to each other

- Wide adhesive range
- Primers are not required for many metal surfaces
- High strength
- Excellent resistance to media
- High temperature resistance up to 120°C

Container	Double cartridge
Chemical basis	Methyl methacrylate
Colour	Black
Min. press-setting time of glue	35 min
Min./max. working life	15-25 min
Min./max. processing temperature	20 to 25 °C
Shelf life from production/conditions	12 Month/cool and frost-free storage

Contents	Min./max. temperature resistance	Max. short-term temperature resistance	Art. no.	P. Qty.
38 ml	-40 to +125 °C	230	0893 580	1/10
250 ml	-40 to 125 °C	230 °C	0893 580 250	1

Please consider the legal instruction at the beginning of this chapter.

ISEGA:

Can be used in food-related areas, e.g. for bonding components made of plastic and metals in areas where food is processed or stored. Components manufactured with the adhesive may be used in direct contact with food, as far as the adhesive is concerned, as long as it has hardened sufficiently. Clearance certificate no.: 46630 U18

- Not suitable for permanent use in highly concentrated acids and bases or aggressive organic solutions, such as toluene, ketones and esters.
- Protect from frost.

Surface cleaner Activating Cleaner

Surface optimisation of non-porous surfaces

For cleaning and activating non-porous substrates such as metals, plastics, glazed ceramic and painted surfaces.

Contents	400 ml
Min. flash-off time	10 min

Art. no. 0890 100 60

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Suitable for aluminium (anodised), steel, high-grade steel (stainless), galvanised steel (hot-dipped or galvanic), 2-component top coat, (PU, epoxy), 2-component water-based primers and paints, cathodic dip painting, primers (EP/2-component), powder coatings, glass fibre-reinforced plastic (unsaturated polyester), laminate gelcoat or SMC, glass fibre-reinforced plastic (unsaturated polyester), laminate layup, ABS, hard PVC, glass (mineral) and glass ceramic. Not suitable for smoothing or removing adhesives/sealants.

2C plastic adhesive 210sec.

2-component adhesive for repairing plastic parts – for repairing cracks in plastic

- For repairing and bonding many types of plastic
- H351- (R40-) label required
- Coarse sanding dust
- Special shorter mixer nozzle for lower material consumption
- Can be sanded and painted over after a very short period of time
- High degree of flexibility: Absorbs movements optimally
- Solvent-free and silicone-free

Contents	50 ml
Container	Double cartridge
Chemical basis	Two-component polyurethane
Colour	Black
Processing time	3.5 min
Min./max. processing temperature	15 to 25 °C
Min./max. temperature resistance	-30 to +100 °C
Shelf life from production/conditions	24 Month/at 23°C and 50% relative humidity

Art. no. 0893 500 043

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Limited adhesion (no constructive adhesives) of PP and PE. Not suitable for PVC, PPS and PTFE. There may be adhesion problems in individual cases due to the coatings and release agents used in some cases in the plastic production process. Observe the work instructions when repairing PP/EPDM. Check material compatibility on a non-visible area if necessary. The product must be stored in a frost-free location.

2C plastic adhesive 25sec.

2-component adhesive for repairing plastic parts – for rapid attachment

- For repairing and bonding many types of plastic
- No H351- (R40-) label required
- Coarse sanding dust
- Special shorter mixer nozzle for lower material consumption
- Can be sanded and painted over after a very short period of time
- High degree of flexibility: Absorbs movements optimally
- Solvent-free and silicone-free

Contents	50 ml
Container	Double cartridge
Chemical basis	Two-component polyurethane
Colour	Black
Processing time	25 s
Min./max. processing temperature	15 to 25 °C
Min./max. temperature resistance	-30 to +100 °C
Shelf life from production/conditions	24 Month/at 23°C and 50% relative humidity

Art. no. 0893 500 041

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Limited adhesion (no constructive adhesives) of PP and PE. Not suitable for PVC, PPS and PTFE. There may be adhesion problems in individual cases due to the coatings and release agents used in some cases in the plastic production process. Observe the work instructions when repairing PP/EPDM. Check material compatibility on a non-visible area if necessary. The product must be stored in a frost-free location.

2C plastic adhesive 90sec.

2-component adhesive for repairing plastic parts – for repairing small holes

- For the repair and bonding of many types of plastic
- Can be sanded and painted over after a very short period of time
- High flexibility: Optimal cushioning of movement
- Solvent and silicone-free

Contents	50 ml
Container	Double cartridge
Chemical basis	Two-component polyurethane
Colour	Black
Processing time	1.5 min
Min./max. processing temperature	15 to 25 °C
Min./max. temperature resistance	-30 to +100 °C
Shelf life from production/conditions	24 Month/at 23 °C and 50% relative humidity

Art. no. 0893 500 042

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Limited adhesion (no constructive adhesives) of PP and PE. Not suitable for PVC, PPS and PTFE. There may be adhesion problems in individual cases due to the coatings and release agents used in some cases in the plastic production process. Observe the work instructions when repairing PP/EPDM. Check material compatibility on a non-visible area if necessary. The product must be stored in a frost-free location.

2-component adhesive AL-1

Low-emission adhesive for bonding angle brackets in aluminium windows, doors and façade construction

- Long-lasting application
- Can be painted over
- Easy application with manual gun or pneumatic gun
- Cartridge is highly impact-resistant and shock-resistant
- Highly temperature-resistant and weather-resistant
- Solvent-free and silicone-free

Weight of content	890 g
Chemical basis	Two-component epoxy reaction adhesive

Continuation **2-component adhesive AL-1**

Colour	Grey, similar to RAL 7042
Processing time	30 min
Working life	60 min
Min. processing temperature	5 °C
Min./max. temperature conditions	-30 to 120 °C
Shelf life from production	12 Month

Art. no. 0892 130 010

P. Qty.: 6

Please consider the legal instruction at the beginning of this chapter.

For safety reasons (due to cartridge filling technology), the first 20 g of mixed adhesive should not be used for bonding.

Unhardened adhesive impurities are cleaned using type 60 cleaner. Cleaning hardened adhesive can normally only be done mechanically.

2-component adhesive PUR

For structural bonding of angle brackets in aluminium windows, doors and façade construction

- Wide application range
- Can be painted over
- Easy application with manual gun or pneumatic gun
- Short, mixer nozzle specially designed for cartridge
- Cartridge is highly impact-resistant and shock-resistant
- The adhesive has a high degree of weather resistance once hardened
- Solvent-free and silicone-free

Chemical basis	Two-component PUR reaction adhesive
Colour	Ivory
Processing time	30 min
Working life	60 min
Min. processing temperature	7 °C
Shelf life from production	12 Month

Weight of content	Art. no.	P. Qty.
550 g	0892 135 1	1/6
900 g	0892 135	6

Please consider the legal instruction at the beginning of this chapter.

For safety reasons (due to cartridge filling technology), the first 20 g of mixed adhesive should not be used for bonding. Cleaning hardened adhesive can normally only be done mechanically. Cleaner type 60 is ideally suited for removing unhardened adhesive residues.

Anti-static plastic cleaner Type 20

Non-corrosive cleaning agent with antistatic agent for various plastics and powder-painted and metallic surfaces

- Anti-static – effectively prevents the rapid re-soiling of surfaces
- Quick-drying cleaner
- Free of chlorinated hydrocarbons and aromatic compounds

Contents	1000 ml
Container	Can
Smell/fragrance	Characteristic
Chemical basis	Mineral oil

Art. no. 0892 100 11

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Double cartridge gun

Plastic pistol for 38-ml and 50-ml double cartridges with a mixing ratio of 1:1, 4:1 and 10:1.

- Made of impact-resistant plastic
- Accurate and consistent dosage
- With integrated pressure relief

Material	Plastic impact-resistant
Included in delivery (Lieferumfang)	1:1 and 1:10 mixing adapter
Product weight (per item)	275 g

Art. no. 0891 893 486

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Double cartridge gun

Cartridge gun for 50 ml double cartridges with a 1:1 mixing ratio

- Made of sturdy metal
- Dosing, mixing and discharge of highly viscous two-component adhesives
- Accurate and consistent dosage

Material	Metal/Plastic
Product weight (per item)	474 g

Art. no. 0891 893 485

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

SMP EPDM sealing tape adhesive

Solvent-free SMP-based adhesive sealant for the reliable and permanent bonding of EPDM sealing tapes

- Can also be processed at cold temperatures down to -5°C
- Very low emissions
- Free from solvents, isocyanate and silicone

Chemical basis	Silane modified polymer
Colour	Black
Full curing speed/conditions	2 mm/d/23°C and 50% relative humidity
Min./max. processing temperature	-5 to 40 °C
Min./max. temperature resistance	-40 to 80 °C
Shelf life from production/conditions	12 Month/cool and dry storage area, 5°C to 25°C

Contents	Container	Art. no.	P. Qty.
290 ml	Cartridge	0893 700 155	1/12
600 ml	Bag	0893 700 154	20

Please consider the legal instruction at the beginning of this chapter.

- GEV: Classified as EMICODE class EC1^{PLUS} in accordance with GEV criteria
- General test certificate from construction authorities

Store original container tightly sealed in a dry place at temperatures between +5°C and +25°C without exposure to direct sunlight.

Fast-acting epoxy resin adhesive ESK-50

Solvent-free two-component adhesive

- Quick to harden
- Wide range of applications
- High tensile strength values
- Excellent chemical resistance
- Can be sanded when fully hardened
- High level of transparency
- Silicone-free and solvent-free

Contents	50 ml
Chemical basis	Epoxy resin
Colour	Clear, Light yellow
Min. open time	3.5 min
Min. processing time	4 min
Min. final strength	48 h
Min./max. temperature resistance	-60 to +100 °C
Shelf life from production	36 Month

Art. no. 0893 480 1

P. Qty.: 3

Please consider the legal instruction at the beginning of this chapter.

Discolouration due to UV influence is possible.

Liquid Metal Fe 1

Fast-acting repair system, ideal for installers and workshops in the metal processing sector.

- High-quality two-component reaction resin system that exhibits characteristics similar to metal due to its special formula
- The ideal mixing ratio of the components (A:B = 1:1, pressing out two strands of the same length from the tubes) makes it almost impossible to incorrectly mix the repair compound
- After hardening, Liquid Metal Fe1 can easily be processed via lathing, milling, drilling, filing or thread cutting, just like with metal

Weight of content	500 g
Colour	Grey
Min./max. temperature resistance of the hardened material	-60 to 120 °C
Shelf life from production	24 Month

Art. no. 0893 449

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Bodywork adhesive Powerbond

High-strength 2-component epoxy resin system for bodywork repairs

- Restores the original strength and rigidity
- Less spot welding
- Meets the requirements of automotive manufacturers
- Glass particle technology guarantees a layer thickness of 0.7-1.2 mm
- Excellent stability
- Excellent corrosion protection
- Weldable
- Can be sanded/painted
- Silicone-free and VOC-free

Chemical basis	Epoxy resin
Colour	Black
Min. tensile strength	30 N/mm ²
Working life	60 min
Curing time	4 h
Resistance against	Petrol, Diesel, Cooling liquid, Engine and gear oils
Shelf life from production	12 Month

Continuation **Bodywork adhesive Powerbond**

Min./max. temperature resistance	-30 to +120 °C
Min./max. processing temperature	15 to 25 °C

Container	Contents	Art. no.	P. Qty.
Cartridge	195 ml	0893 450 110	1/6
Double cartridge	225 ml	0893 450 100	1/6

Please consider the legal instruction at the beginning of this chapter.

Not suitable for load-bearing bodywork parts (e.g. A-pillars, longitudinal chassis beams etc.). If bodywork parts are only partially replaced, do not glue on visible surfaces as shadow seams may appear. Observe the repair instructions provided by the vehicle manufacturer.

Glass-clear adhesive sealant

Universal and elastic construction adhesive and sealant, clear as glass

- Ideal for visible seals/bonds
- Can be painted with emulsion paints
- Anti-fungal

Contents	290 ml
Chemical basis	Silane modified polymer
Colour	Transparent
Min. skin-formation time	10 min
Full curing speed	2 mm/d
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-40 to +90 °C
Shelf life from production	18 Month

Art. no. 0893 225 0

P. Qty.: 1/12

Tested in accordance with EN 15651-1, F-INT

With prolonged UV exposure, Würth glass-clear adhesive may yellow and become brittle, especially when used outdoors.

Not suitable for building construction expansion joints, glazing rebate seals, joints continuously exposed to water as well as heavily expanded perimeter joints.

Attention!

Not suitable for adhesion of PE, PP, PMMA, PTFE, silicon rubber and plasticized plastics.

Only for use on fully hardened paints. Not suitable for use on artificial resin surfaces (alkyd resin).

Plastic adhesive REPLAST® Easy Fast

For REPLAST® Easy plastic repair system

Fast curing

Further processing, such as sanding, possible after minimal time

Outstanding resistance to chemicals

Resistant to a range of liquids, such as petrol, many lubricating oils and ethyl acetate

Solvent-free

Contents	50 ml
Chemical basis	Two-component polyurethane
Colour	Black
Processing time	1.5 min
Min. initial strength	10 min
Min./max. processing temperature	15 to 25 °C
Min./max. temperature resistance	-30 to +100 °C

Art. no. 0893 500 3

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

There may be adhesion problems in individual cases due to the coatings and release agents used in some cases in the plastic production process. Not suitable for PE (polyethylene), PP (polypropylene) or PTFE (polytetrafluor ethylene) plastics. Check material compatibility on an invisible area if necessary.

Adhesive remover

For removing unhardened PU and hybrid adhesives/ sealants

Contents	400 ml
Min. flash-off time	0.01 s

Art. no. 0890 100 63

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Do not use on porous substrates.

Structural adhesive Multi-fibre adhesive

High-strength adhesive reinforced with fibreglass

- Tested water resistance level D4 in accordance with EN 204 (test number: 50533042/3)
- Thermal stability in accordance with EN 14257 - Watt 91 (test number: 505 33042/4)
- Fast reaction time with high initial strength after only approx. 15 minutes.

Container	Cartridge
Contents	310 ml
Chemical basis	Polyurethane
Colour	Transparent
Min. functional strength	20 min
Min. wet skin-formation time	3 min
Full curing speed/conditions	1 mm/d/Depending on the density of the substrate
Min./max. processing temperature	7 to 35 °C
Min./max. temperature resistance	-30 to +110 °C
Shelf life from production/conditions	24 Month/at 15°C to 25°C

Art. no. 0893 100 115

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

- ift Rosenheim: In the case of wood/wood gluing according to EN 204, achieves stress group D4, test report no.: 505 33042/3
- ift Rosenheim: In the case of wood/wood gluing according to DIN EN 14257 (WATT 91) achieves a heat resistance of 10.5 N/mm², test report no.: 505 33042/4
- French VOC emissions class A+
- The viscosity of 1-C-PUR adhesives when processed at +15°C is approximately double that when used at +25°C.
- Sunlight discolours the adhesive but does not affect the adhesive strength!
- Bonding aluminium, copper, brass: Only on chemically pre-treated or coated surfaces; these materials cannot be permanently bonded in an age-resistant manner without appropriate pre-treatment of the bonding surfaces.
- Powder-coated workpieces should always be cleaned with cleaner type 60 (art. no.: 0892 130 030/0892 130 031), powder coatings with PTFE content cannot be reliably bonded without pre-treatment (for example, plasma pre-treatment).
- Pressing force: for gluing surfaces $\geq 0.015 \text{ N/mm}^2$
- for gluing solid wood $\geq 1 \text{ N/mm}^2$
- For bonding gap thicknesses $\geq 2.0 \text{ mm}$, the bonding, pressing and hardening times are considerably longer, bonding gap thicknesses $\geq 3 \text{ mm}$ are not possible.
- If moisture is expected to have an impact, the bonding gaps/bonding surfaces must also be sealed/protected with a suitable sealing compound!
- When bonding metals to absorbent materials (e.g. wood, construction materials etc.), the moisture can be slowly transported through the bonding gap by the absorbent material onto the metal surface, where it can cause corrosion damage to the metal. The metallic bonding surface must therefore have suitable corrosion protection, e.g. paint or powder coating!
- When bonding different materials (with different expansion properties), the bonding gap dimensions must be adapted according to the long-term behaviour.
- The bonded workpieces should not be coated until after the adhesive is fully hardened; if they are coated too early, the formation of bubbles in the coating cannot be ruled out.
- Zinc-plated sheets should always be protected against the permanent influence of moisture. To prevent the formation of „white rust“, any moisture that arises must be prevented from coming into contact with the bonding surface!

- In the production and processing of stainless steel, auxiliary materials such as wax, oils, etc. are used. These materials cannot be simply wiped clean. It has been shown that after cleaning with solvents, grinding or (even better), sandblasting the surface, followed by repeated cleaning with solvents delivers considerably better bonding results.
- Bonding larch: 1-C-PUR adhesives must never be used for bonding larch surfaces in outdoor areas. The substance „arabinogalactan“ which is contained in the wood, or forms within it, considerably weakens the bonding strength! No problems have been identified with PVAC and EPOXI adhesives.
- When bonding solid wood, the adhesive should preferably be applied to both bonding surfaces.
- For bonding solid wood in outdoor applications, suitable tests should be performed to determine the optimum permanent bond depending on the type of wood, weather intensity, surface protection, and geometry of the bonding gap.
- The adhesive is mildly foaming and is therefore well-suited to be used on slightly uneven surfaces. The pressing time must be adjusted according to the thickness of the gluing joint.
- Skin-forming and joining times, as well as the respective pressing and processing times required, are influenced by criteria such as material, temperature, amount applied and air moisture, amongst others. As a result, they can only be precisely determined through independent tests. Corresponding safety margins for the specified reference values should be accounted for by the installer.

Structural adhesive PUR Rapid

Rapid PUR structural adhesive for high-strength bonded connections in trade and industry

- Proven water resistance D4 in accordance with DIN/EN 204 by ift Rosenheim
- Meets window construction requirements in accordance with WATT 91 DIN EN 14257 (WATT 91)
- The foaming of the adhesive makes it possible to fill the joints very well

Container	Cartridge
Contents	310 ml
Chemical basis	Polyurethane
Colour	Transparent, yellowish
Min. wet skin-formation time	5 min
Min./max. processing temperature	7 to 35 °C
Min./max. temperature resistance	-30 to +110 °C
Max. short-term temperature resistance	200 °C
Shelf life from production/conditions	15 Month/at 15 °C to 25 °C

Art. no. 0892 100 102

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Tested stress group D4 in accordance with DIN/EN 204 by ift Rosenheim. Test number: 555 25355/4

- The viscosity of 1-C-PUR adhesives when processed at +15 °C is approximately double that when used at +25 °C.
- Sunlight discolours the adhesive but does not affect the adhesive strength.
- Bonding aluminium, copper, brass: Only on chemically pre-treated or coated surfaces: these materials cannot be permanently bonded in an age-resistant manner without appropriate pre-treatment of the bonding surfaces.
- Powder-coated workpieces should always be cleaned with cleaner type 60 (art. no.: 0892 130 030/0892 130 031), powder coatings with PTFE content cannot be reliably bonded without pre-treatment (for example, plasma pre-treatment).
- Pressing force: for gluing surfaces $\geq 0.015 \text{ N/mm}^2$
- for gluing solid wood $\geq 1 \text{ N/mm}^2$

Continuation **Structural adhesive PUR Rapid**

- For bonding gap thicknesses ≥ 2.0 mm, the bonding, pressing and hardening times are considerably longer, bonding gap thicknesses ≥ 3 mm are not possible.
- If moisture is expected to have an impact, the bonding gaps/bonding surfaces must also be sealed/protected with a suitable sealing compound!
- When bonding metals to absorbent materials (e.g. wood, construction materials etc.), the moisture can be slowly transported through the bonding gap by the absorbent material onto the metal surface, where it can cause corrosion damage to the metal. The metallic bonding surface must therefore have suitable corrosion protection, e.g. paint or powder coating!
- When bonding different materials (with different expansion properties), the bonding gap dimensions must be adapted according to the long-term behaviour.
- The bonded workpieces should not be coated until after the adhesive is fully hardened; if they are coated too early, the formation of bubbles in the coating cannot be ruled out.
- In the production and processing of stainless steel, auxiliary materials such as wax, oils, etc. are used. These materials cannot be simply wiped clean. It has been shown that after cleaning with solvents, grinding or (even better), sandblasting the surface, followed by repeated cleaning with solvents delivers considerably better bonding results.
- Zinc-plated sheets should always be protected against the permanent influence of moisture. To prevent the formation of „white rust“, any moisture that arises must be prevented from coming into contact with the bonding surface!
- Bonding larch: 1-C-PUR adhesives must never be used for bonding larch surfaces in outdoor areas. The substance „arabinogalactan“ which is contained in the wood, or forms within it, considerably weakens the bonding strength! No problems have been identified with PVAC and EPOXI adhesives.
- When bonding solid wood, the adhesive should preferably be applied to both bonding surfaces.
- For bonding solid wood in outdoor applications, suitable tests should be performed to determine the optimum permanent bond depending on the type of wood, weather intensity, surface protection and geometry of the bonding gap.
- The adhesive is mildly foaming and is therefore well-suited to be used on slightly uneven surfaces. The pressing time must be adjusted according to the thickness of the gluing joint.
- Skin-forming and joining times, as well as the respective pressing and processing times required, are influenced by criteria such as material, temperature, amount applied and air moisture, amongst others. As a result, they can only be precisely determined through independent tests. Corresponding safety margins for the specified reference values should be accounted for by the installer.

Plastic adhesive REPLAST® Easy Superfast

For REPLAST® Easy plastic repair system

- An adhesive for virtually every type of plastic
- Special positive mixer for optimum mixing with low adhesive loss
- Rapid curing
- Excellent chemical resistance
- Free from solvents

Contents	50 ml
Chemical basis	Two-component polyurethane
Colour	Black
Processing time	30 s
Min./max. processing temperature	15 to 25 °C
Min./max. temperature resistance	-30 to +100 °C

Art. no. 0893 500 5

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

There may be adhesion problems in individual cases due to the coatings and release agents used in some cases in the plastic production process. Not suitable for PE (polyethylene), PP (polypropylene) or PTFE (polytetrafluor ethylene) plastics. Check material compatibility on an invisible area if necessary.

Plastic adhesive REPLAST® Easy, transparent

For colourless bonding of transparent or coloured plastic parts

- An adhesive for virtually every type of plastic
- Special positive mixer for optimum mixing with low adhesive loss
- Excellent chemical resistance
- Free from solvents

Contents	50 ml
Container	Cartridge
Chemical basis	Two-component polyurethane
Colour	Transparent
Processing time	3 min
Min./max. processing temperature	15 to 35 °C
Min./max. temperature resistance	-35 to +90 °C
Shelf life from production/conditions	12 Month/at 23°C and 50% relative humidity, no exposure to direct sunlight

Art. no. 0893 500 8

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

There may be adhesion problems in individual cases due to the coatings and release agents used in some cases in the plastic production process. Not suitable for PE (polyethylene), PP (polypropylene) or PTFE (polytetrafluoroethylene) plastics. Check material compatibility on an invisible area if necessary.

Plastic adhesive REPLAST® Easy Universal

For REPLAST® Easy plastic repair system

- An adhesive for virtually every type of plastic
- Special positive mixer for optimum mixing with low adhesive loss
- Rapid curing
- Excellent chemical resistance
- Free from solvents

Contents	50 ml
Chemical basis	Two-component polyurethane
Colour	Black
Processing time	3.5 min
Min. initial strength	30 min
Min./max. processing temperature	15 to 25 °C
Min./max. temperature resistance	-30 to +100 °C

Continuation **Plastic adhesive REPLAST® Easy Universal**

Art. no. 0893 500 4

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

There may be adhesion problems in individual cases due to the coatings and release agents used in some cases in the plastic production process. Not suitable for PE (polyethylene), PP (polypropylene) or PTFE (polytetrafluoroethylene) plastics. Check material compatibility on an invisible area if necessary.

Plastic adhesive Special

Quick-hardening adhesive for plastics, especially PP/PE

Excellent adhesion to plastics and metals

Secure and long-lasting bonding to the widest range of materials possible.

Rapid processing

No primer or activator necessary

Excellent resistance to moisture and media

Contents	37 ml
Container	Double cartridge
Chemical basis	Acrylate
Colour	Yellowish
Working life	5 min
Min. initial strength	2 h
Min./max. temperature resistance	-55 to +80 °C

Art. no. 0893 480 001

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

The adhesive is UV-resistant behind glass or plastics in internal areas. The adhesive may discolour and become brittle in direct sunlight or weather.

2-component plastic repair adhesive REPLAST®

38-piece assortment for repairing plastic parts, including all required accessory products in system case

- 2C adhesive for the repair and bonding of many types of plastic
- Fast curing
 - Can be sanded and painted over after a very short period of time
- High degree of flexibility of cured adhesive
 - Absorbs more movement and vibrations at the bumper

Shelf life from production/conditions	24 Month/at 23 °C and 50% relative humidity
Product weight (per item)	3280 g
Number of pieces in assortment/set	40 PCS
Min. processing temperature	15 °C

ORSY

Art. no. 5964 089 301

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Contents for art. no. 5964 089 301		
Designation	Art. no.	Quantity
Static mixing tube	0891 486	25
Double cartridge gun für 50 ml Kartuschen	0891 893 485	1
Superglue Super-fast glue	0893 090	1
Activator	0893 301 20	1
2C plastic adhesive 25sec.	0893 500 041	2

Contour film	0893 500 7	1

Plastic cleaner Type 10

Slightly softening cleaning agent for profiles in white rigid PVC in plastic window construction

- Fast flash-off time
- Free of chlorinated hydrocarbons and aromatic compounds

Contents	1000 ml
Container	Can
Smell/fragrance	Characteristic
Chemical basis	Monocarboxylic acid esters

Art. no. 0892 100 10

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Assembly adhesive

Assembly adhesive for fast and high-strength adhesive bonding for indoor and outdoor applications

- Resistant to weathering, ageing and UV
- Hardens quickly
- Can be used on a wide range of surfaces

Container	Cartridge
Contents	310 ml
Chemical basis	Styrene-butadiene natural rubber
Colour	Light beige
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-40 to +100 °C

Continuation **Assembly adhesive**

Art. no. 0892 100 100

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

The flash-off time for the solvent may be longer (ranging from days to weeks) on large bonded joints, at low temperatures and on strongly compressed constructions.

Solvent-free assembly adhesive

Solvent-free, acrylic dispersion-based adhesive with high initial strength for bonding a wide range of indoor materials

- Paint-compatible/can be painted over
- Resistant to ageing
- Silicone-free

Contents	310 ml
Chemical basis	Acrylate dispersion
Colour	Light beige
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-25 to +80 °C
Shelf life from production	12 Month

Art. no. 0893 100 100

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

The assembly adhesive should not be used in sanitary areas, on marble/natural stone, underground, on bituminous substrates, on untreated (non-primed) metal surfaces or on joints in constant contact with moisture (e.g. concrete surfaces in contact with the ground).

The setting speed is determined by the ambient temperature and quantity of adhesive applied. This increases with high amounts of adhesive and in cold and damp conditions.

Multi high-strength adhesive

Very fast, high-strength adhesive

- Very high adhesive strength
- Hardens quickly
- Very good adhesion to a wide range of substrates, such as marble, synthetic stone, etc.
- Resistant to weathering and ageing
- Tested adhesion for „stay-in-place formwork elements“* by MPA Braunschweig. Test number: 5131/2446-a
- Tested stress group D4 in accordance with DIN/EN 204 by ift Rosenheim. Test number: 55524676
- Tested heat resistance to WATT 91 by ift Rosenheim. Test number: 555 34457

*Stay-in-place formwork elements: The wood cement flat-pressed panels are used in building construction for ring beam formwork, ceiling edge formwork and lintel formwork. The formwork is encapsulated in concrete and remains in the element, giving the name „stay-in-place formwork“.

Contents	310 ml
Chemical basis	Polyurethane
Colour	Beige
Min. wet skin-formation time	2 min
Min. dry skin-formation time	5 min
Full curing speed/conditions	2.5 mm/d/20°C and 50% relative humidity
Min./max. processing temperature	7 to 30 °C

Continuation **Multi high-strength adhesive**

Min./max. temperature resistance	-30 to 110 °C
Shelf life from production	24 Month

Art. no. 0893 100 110

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Profile rubber adhesive

Contact adhesive for universal use

Good adhesion properties on a wide variety of substrates

- High initial adhesion
- Quick drying
- Ready to use
- Practical can with brush
- Easy to spread
- Resistant to the effects of water (including seawater), petrol, dilute acids and alkali solutions
- Resistant to ageing
- Cures to transparent
- Silicone-free

Contents	250 ml
Chemical basis	Polychloroprene
Colour	Amber
Min./max. flash-off time	10 min-90 min
Min./max. processing temperature	18 to 35 °C
Min./max. temperature resistance	-20 to +80 °C
Shelf life from production	24 Month

Art. no. 0890 100 014

P. Qty.: 1/22

Please consider the legal instruction at the beginning of this chapter.

Protect from exposure to direct sunlight and heat. The profile rubber cement should be kept cool and dry and stored at temperatures between +15°C and +25°C

Plastic primer REPLAST

Adhesive primer for most common plastics

The plastic primer improves the adhesion of REPLAST plastic adhesives on various plastic surfaces.

Contents	200 ml
----------	--------

Art. no. 0893 500 2

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Carry out preliminary tests to ensure surface compatibility.

Retouching putty Metal epoxy stick

2-component compound for quick and simple repairs of surface damage.

- No mixing necessary
- Excellent adhesion properties
- High temperature resistance
- Can be painted over

Chemical basis	Epoxy resin
Colour	Silver coloured
Length	175 mm
Diameter (Ø)	22 mm
Min./max. processing time	2-5 min
Can be further processed after min.	20 min
Min. final strength	3 h
Min./max. processing temperature	5 to 25 °C
Min./max. temperature resistance of the hardened material	-20 to 120 °C
Max. short-term temperature resistance	150 °C
Shelf life from production/conditions	24 Month/frost-free storage area, no exposure to sunlight

Art. no. 0893 449 011

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Protect from frost and direct sunlight when not applied. Gloves should be worn when applying the repair compound. Due to the different material densities, there are differences in the information regarding the weight of each stick type. For applications subject to high material stresses, the suitability of the repair compound must be checked with preliminary testing.

SMP adhesive sealant, 2-component

Fast curing 2-component adhesive sealant for controlled curing regardless of air humidity

Benefits of the 2 components

- Very safe due to controlled hardening
- Air humidity does not affect the process
- Also suitable for large surfaces

Container	Coaxial cartridge
Contents	195 ml
Chemical basis	Silane modified polymer
Colour	Grey
Min. functional strength	3.5 h
Min./max. processing temperature	7 to 30 °C
Min./max. temperature resistance	-40 to +100 °C
Max. short-term temperature resistance	200
Shelf life from production/conditions	15 Month/dry storage area, no exposure to direct sunlight, in sealed original containers, 5 °C to 25 °C

Art. no. 0893 237 170

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

- GEV: Classified as EMICODE class EC2 in accordance with GEV criteria
- ILAK, Institut für Lackprüfung: Salt spray test in accordance with DIN EN ISO 9227
- Test report no.: 9-5-18/4
- Application times are reduced to around half the time at +30°C and extend to around double the time at +10°C.
- The bonded workpieces should not be coated until after the adhesive is fully hardened; if they are coated too early, the formation of bubbles in the coating cannot be ruled out.
- The long-term behaviour of bonds between materials with different linear expansion rates must be evaluated, in particular when placed under load in areas with variable temperatures

Bonding metals

- No general statement can be made concerning the wettability or bonding ability of anodised surfaces due to the variety, age and potential additional treatments on these adhesive surfaces, such as oils or waxes.
- Due to aluminium surfaces and properties being difficult to define, we always recommend that you obtain sufficient information from the supplier to enable you to choose the optimum pre-treatments for your particular bonding application. Sufficient preliminary tests are necessary
- In the production and processing of stainless steel, auxiliary materials such as wax, oils etc. are frequently used. These materials cannot be simply wiped clean. It has been shown that cleaning with the universal cleaner type 60 (art. no. 0892 130 030, 0892 130 031), grinding or (preferably), sandblasting the surface, followed by repeated cleaning delivers considerably better bonding results.
- In principle, zinc-plated sheets must always be protected against ongoing ingress of moisture to prevent „white rust formation“. For bonding, this includes preventing any moisture that arises from coming into contact with the bonding surface.
- When bonding metals to absorbent materials (e.g. wood, construction materials etc.), the moisture can be slowly transported through the bonding gap by the absorbent material onto the metal surface, where it can cause corrosion damage to the metal. The metallic bonding surface must therefore have suitable corrosion protection, e.g. paint or powder coating.
- Powder coatings with PTFE components cannot be coated reliably without pre-treatment (e.g. plasma procedure).

SMP adhesive sealant METALLIC

Universal SMP-based elastic adhesive and sealant with a metallic appearance

- Ideal for bonding and sealing metal substrates
- Remains flexible and can therefore compensate for dynamic loads
- Resistant to ageing and odourless

Container	Cartridge
Contents	290 ml
Chemical basis	Silane modified polymer
Colour	Silver metallic
Full curing speed/conditions	2.5 mm/d/23 °C and 50% relative humidity
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-40 to +90 °C
Shelf life from production/conditions	18 Month/at 10 °C to 25 °C

Art. no. 0893 237 160

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

- The SMP metallic adhesive sealant may become yellow and possibly become brittle after long-term UV exposure, especially in outdoor applications.
- Not suitable for building construction expansion joints, glazing rebate seals, joints continuously exposed to water, or heavily expanded perimeter joints.
- Only for use on fully hardened paints. Not suitable for use on artificial resin surfaces (alkyd resin).

SMP adhesive sealant SPRINT

Rapid-curing, permanently elastic SMP-based adhesive and sealant with high temperature resistance

Excellent adhesive range

- Very good adhesion to almost all surfaces, mostly without primer
- Adheres to damp surfaces and underwater (for temporary repairs)
- Not corrosive to metals
- Compatible with natural stone - does not leave stains on porous surfaces

Can be sanded once cured

Container	Cartridge
Contents	290 ml
Chemical basis	Silane modified polymer
Min./max. skin-formation time	8-12 min
Min./max. processing temperature	0 to 40 °C
Shelf life from production/conditions	12 Month/at 5 °C to 25 °C

Continuation **SMP adhesive sealant SPRINT**

Colour	Full curing speed/conditions	Min./max. temperature resistance	Max. short-term temperature resistance	Art. no.	P. Qty.
Black	3.5 mm/d/20°C and 50% relative humidity	-40 to 100 °C	200 °C	0893 237 122	1/12
Grey	3.5 mm/d/20°C and 50% relative humidity	-40 to 100 °C	200 °C	0893 237 121	1/12
White	3.5 mm/d/23°C and 50% relative humidity	-40 to +100 °C	200	0893 237 120	1/12

Please consider the legal instruction at the beginning of this chapter.

- PMMA and polycarbonate must only be glued when not under tension; otherwise, stress cracks are likely to occur. In the case of polycarbonate, we always recommend preliminary tests.
- In general, for plastics, it must be ensured that the release agents used in production or the protective films used for transport are removed without residue before bonding, as these sometimes considerably worsen adhesion.
- For plastics containing softeners (e.g. soft PVC, butyl rubber, EPDM and APTK), incompatibilities such as discolouration and loss of adhesion can result. Suitability in this respect should be systematically tested.
- Although the SMP adhesive sealant SPRINT has excellent adhesion on aluminium and cement fibre panels, stated applications do not include bonding of facade panels.

SMP adhesive sealant XTREME

Elastic SMP-based adhesive and sealant for large bonded areas and with high temperature resistance

Many areas of application

- Good adhesion properties on a variety of surfaces
- Good UV stability and weather resistance outdoors
- Not corrosive to metals
- Suitable for bonding and sealing in food processing plants (ISEGA)
- Compatible with natural stone
- Can be sanded and painted after hardening
- Solvent and silicone-free
- Not suitable for permanent underwater use in swimming pools

Container	Cartridge
Contents	290 ml
Chemical basis	Silane modified polymer
Colour	White
Min./max. skin-formation time	20-25 min
Full curing speed/conditions	4 mm/d/20°C and 50% relative humidity
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-40 to +100 °C

Max. short-term temperature resistance	180
Shelf life from production/conditions	18 Month/at 15°C to 25°C

Art. no. 0893 237 130

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

ISEGA: Can be used where food is processed or stored, e.g. for bonding wall and floor areas in food processing companies. Clearance certificate no.: 42178 U16

GEV: Classified as EMICODE class EC1^{plus} in accordance with GEV criteria (Gemeinschaft Emissionskontrollierte Verlegewerkstoffe, Klebstoffe und Bauprodukte e. V. – German Association for the Control of Emissions in Products for Flooring Installation, Adhesives and Building Materials e. V.)

- Store original container tightly sealed in a dry place at temperatures between +15°C and +25°C without exposure to direct sunlight
- Polyolefins (among others PE, PP) cannot be bonded without pre-treatment e.g. plasma or corona procedures.
- When bonding to PVC, ABS, hard PS, concrete and powder-coated surfaces, priming with AdhesionPlus for plastic/wood/stone (art. no. 0890 100 62) is recommended.
- When joining non-absorbent materials (moisture content of material $\leq 8\%$), the adhesive must also be finely misted with water in order for the adhesive to fully cure.
- The bonded workpieces should not be coated until after the adhesive is fully hardened; if they are coated too early, the formation of bubbles in the coating cannot be ruled out.

The long-term behaviour of bonds between materials with different linear expansion rates must be evaluated, in particular when placed under load in areas with variable temperatures

- No general statement can be made concerning the wettability or bonding ability of anodised surfaces due to the variety, age and potential additional treatments on these adhesive surfaces, such as oils or waxes.
- Due to aluminium surfaces and properties being difficult to define, we always recommend that you obtain sufficient information from the supplier to enable you to choose the optimum pre-treatments for your particular bonding application. Sufficient preliminary tests are necessary.
- In the production and processing of stainless steel, auxiliary materials such as wax, oils etc. are frequently used. These materials usually cannot be simply wiped clean. It has been shown that cleaning with universal cleaner type 60 (art. no. 0892 130 030, 0892 130 031), grinding or (preferably) sand-blasting the surface, followed by repeated cleaning with solvent delivers considerably better bonding results.
- In principle, zinc-plated sheet metal must always be protected against ongoing ingress of moisture to prevent white rust formation. This includes preventing any moisture that arises from coming into contact with the bonding surface
- Powder coatings with PTFE components cannot be coated reliably without pre-treatment (e.g. plasma procedure).
- PMMA must only be glued when it is not under tension; otherwise, stress cracks are likely to occur
- The current version of the Technical Guidelines for the Glazing Industry No. 11 must be observed for mirror bonding.

Static mixing tube

For ESK-50 fast-acting epoxy resin adhesive, MAK-38 methyl methacrylate, Spezial plastic adhesive and FLM 50 2-component liquid metal filler

Art. no. 0891 481

P. Qty.: 3

Please consider the legal instruction at the beginning of this chapter.

Static mixing tube

For 2-component PUR adhesive

Short, static mixing tube specially designed for cartridges of 2-component PUR adhesive

- Quick dispensing
- Reduced adhesive consumption, as less residue is left in the mixer nozzle

Material	PP - Polypropylene
Colour	Yellow, White
Length	231 mm

Art. no. 0892 135 20

P. Qty.: 15

Please consider the legal instruction at the beginning of this chapter.

Static mixing tube

For Powerbond bodywork adhesive

Art. no. 0891 450 101

P. Qty.: 15

Please consider the legal instruction at the beginning of this chapter.

Static mixing tube

For 2C plastic adhesive

Material	PP - Polypropylene
Colour	Red
Length	74 mm

Art. no. 0891 486

P. Qty.: 25

Please consider the legal instruction at the beginning of this chapter.

FSK system adhesive

For cold-welding hard PVC in plastic window construction, plumbing, exhibition construction and sign construction.

- User-friendly
- Suitable for indoor and outdoor use
- Short curing time
- Excellent resistance to media
- Silicone-free

Contents	204.08 ml
Weight of content	200 g
Chemical basis	Vinyl chloride polymer
Min./max. functional strength	2-4 min
Curing time	24 h
Min. processing temperature	5 °C
Shelf life from production	24 Month

Colour	Min./max. temperature resistance	Art. no.	P. Qty.
Transparent	-40 to +130 °C	0892 100 09	1/30
White	-40 to 130 °C	0892 100 091	1/30

Please consider the legal instruction at the beginning of this chapter.

When bonding additional profiles to Renolit film surfaces, it must be ensured that the additional profiles lie flat on the window profile and no adhesive gets on the film surface. This could result in bubbles forming in the acrylic layer before the adhesive has hardened sufficiently when exposed to high temperatures.

Not to be used with pressure pipes.

The FSK System Adhesive can only bridge adhesive gaps < 0.1 mm permanently.

The adhesive quantity is to be selected depending on the material thickness; the adhesive can "snap through" or lead to the formation of predetermined breaking points.

Adhesive joint can take weight after 16 hrs, depending on situation, complete hardness may take up to 8 weeks to achieve.

Universal cleaner Type 60

Non-corrosive universal cleaning agent for various plastics and powder-painted and metallic surfaces

- Fast flash-off time
- Free of chlorinated hydrocarbons and aromatic compounds

Smell/fragrance	Characteristic
Chemical basis	Mineral oil

Contents	Container	Art. no.	P. Qty.
1 l	Can	0892 130 030	12
5 l	Canister	0892 130 031	1

Please consider the legal instruction at the beginning of this chapter.

Static mixing tube

For 2-component adhesive AL-1

Short, static mixing tube specially designed for cartridges of 2-component adhesive AL-1

- Quick dispensing
- Reduced adhesive consumption, as less residue is left in the mixer nozzle

Material	PP - Polypropylene
Colour	Green, White
Length	157 mm

Art. no. 0892 130 015

P. Qty.: 15

Please consider the legal instruction at the beginning of this chapter.

Static mixer for Klebfix 2C

Allows precise application

- Correct mixing ratio
- Easy application

Colour	Grey, Orange
--------	--------------

Material	Length	Art. no.	P. Qty.
Plastic	60 mm	0891 481 000	10
PP - Polypropylene	77 mm	0891 481 001	10

Mixer nozzle for MAK 38

For methyl methacrylate adhesive MAK 38 in a 250 ml container

Material	PP - Polypropylene
Colour	Green
Length	15.5 cm

Art. no. 0891 481 002

P. Qty.: 10

Windscreen/window adhesive Revolution

Isocyanate-free 1C PU hybrid window adhesive to be processed with clear primer

- Can be used for all common car and van types
- Prevents contact corrosion
- Ideal for use on aluminium, magnesium and hybrid bodywork
- Tested according to FMVSS208/212. Meets requirements of original equipment manufacturers (vehicle manufacturers). Manufactured in accordance with OEM standard ISO 9001

Contents	300 ml
Container	Cartridge
Chemical basis	1-component polyurethane hybrid adhesive
Min. skin-formation time	15 min
Min./max. processing temperature	5 to 35 °C
Shelf life from production/conditions	12 Month/below 25°C

Art. no. 0890 023 501

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

During surface preparation, it is recommended that the panel be cleaned with the abrasive cleaning cloth and Würth Active Cleaner. It is absolutely essential that Würth Contact Clean is used. The products must be checked to ensure that they have not expired before they are used. Observe the information regarding bead geometry provided by the vehicle manufacturer. The application and drive-away times must be observed.

Window adhesive Ultimate 600 ml pack set

High-quality 1-component window adhesive for all types of vehicles that can be used in almost any season

- High-modulus
- Suitable for aerals, non-conductive
- Prevents contact corrosion

Safety tested

- 1-hour drive-away time with airbag at an ambient temperature of -10°C to +35°C
- Drive-away time confirmed with crash test and TÜV certificate in accordance with FMVSS208/212!
- Meets requirements of original equipment manufacturers (vehicle manufacturers)

Contents	600 ml
Number of pieces in assortment/set	7 PCS
Drive-away time (with airbag)	1 h
Drive-away time (without airbag)	0.5 h
Min./max. processing temperature	-10 to 35 °C

Art. no. 0890 023 871

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

It is imperative that the Würth active cleaner and Würth Varioprimer are used when preparing surfaces. The products must be checked to ensure that they have not expired before they are used. Apply the adhesive with the gun perpendicular to the frame, starting from the centre of the bottom edge of the window. Do not park the vehicle on a lifting platform. Observe the information regarding bead geometry provided by the vehicle manufacturer. The application and drive-away times must be observed.

1-component window adhesive Ultimate

High-quality 1-component window adhesive for all types of vehicles that can be used in any season

- Highly modular vehicle-strengthening window adhesive
- Suitable for aerals, non-conductive
- Prevents contact corrosion, therefore ideal for use on aluminium, magnesium and hybrid bodywork

Chemical basis	Moisture curing 1K polyurethane
Max. open time/conditions	15 min/at 23°C and 50% humidity
Min./max. processing temperature	5 to 35 °C
Shelf life from production/conditions	12 Month/at 5°C to 25°C

Contents	Container	Art. no.	P. Qty.
310 ml	Cartridge	0890 023 801	1/12
400 ml	Bag	0890 023 831	15

Please consider the legal instruction at the beginning of this chapter.

Not suitable for bonding rear windows in convertibles with a fabric cover.

It is imperative that the Würth active cleaner and Würth Varioprimer are used when preparing surfaces. The products must be checked to ensure that they have not expired before they are used. Apply the adhesive with the gun perpendicular to the frame, starting from the centre of the bottom edge of the window. Do not park the vehicle on a lifting platform. Observe the information regarding bead geometry provided by the vehicle manufacturer. The application and drive-away times must be observed.

The application instructions are recommendations based on the tests we have conducted and on our experience; please carry out your own tests before each application. Due to the large number of applications and storage and processing conditions, we do not assume any liability for a specific application result. If our free customer service provides technical information or acts as an advisory service, no responsibility is assumed by this service except where the advice or information given falls within the scope of our specified, contractually agreed service or the advisor was acting deliberately. We guarantee the consistent quality of our products. We reserve the right to make technical changes and further develop products.

Window adhesive Ultimate 310 ml cartridge set

High-quality 1-component window adhesive for all types of vehicles that can be used in almost any season

- High-modulus
- Antenna-compatible, non-conducting
- Prevents contact corrosion

Tested safety

- 1 h drive-away time with air bag at an ambient temperature of -10°C to +35°C
- Drive-away time confirmed by crash test and TÜV certification according to FMVSS208/212!
- Meets requirements of original equipment manufacturers (vehicle manufacturers)

Contents	310 ml
Container	Cartridge
Number of pieces in assortment/set	5 PCS
Drive-away time (with airbag)	1 h
Drive-away time (without airbag)	30 min
Drive-away time conditions	at ambient temperature -10°C to 35°C
Min./max. processing temperature	5 to 35 °C
Max. open time/conditions	15 min/at 23°C and 50% humidity

Art. no. 0890 023 800

P. Qty.: 1/24

Please consider the legal instruction at the beginning of this chapter.

Contents for art. no. 0890 023 800		
Designation	Art. no.	Quantity
1-component window adhesive Ultimate	0890 023 801	1
Varioprimer safe + easy	0890 024 021	1
Primer brush	0891 650	1
Standard window application nozzle	0891 651	1

Window adhesive Ultimate 400 ml pack set

High-quality 1-component window adhesive for all types of vehicles that can be used in almost any season

- High-modulus
- Suitable for aerals, non-conductive
- Prevents contact corrosion

Safety tested

- 1-hour drive-away time with airbag at an ambient temperature of -10°C to +35°C
- Drive-away time confirmed with crash test and TÜV certificate in accordance with FMVSS208/212!
- Meets requirements of original equipment manufacturers (vehicle manufacturers)

Contents	400 ml
Container	Bag
Number of pieces in assortment/set	6 PCS
Drive-away time (with airbag)	1 h
Drive-away time (without airbag)	30 min
Drive-away time conditions	at ambient temperature -10°C to 35°C
Max. open time/conditions	15 min/at 23°C and 50% humidity

Art. no. 0890 023 830

P. Qty.: 1/24

Please consider the legal instruction at the beginning of this chapter.

Contents for art. no. 0890 023 830		
Designation	Art. no.	Quantity
1-component window adhesive Ultimate	0890 023 831	1
Varioprimer safe + easy	0890 024 021	1
Primer brush	0891 650	1
Standard window application nozzle	0891 651	1
Adapters	0891 651 10	1

Glass cleaner Active cleaner

Special cleaner for pre-treatment in window repair

For cleaning the entire pane of glass incl. ceramic screen printing, PVC or PUR-RIM resprayed surfaces.

Chemical basis	Aliphatic hydrocarbon
Contents	500 ml
Colour	Colourless
Smell/fragrance	Characteristic
pH value	9

Art. no. 0890 024 1

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Adhesion promoter Contact Clean

Transparent primer for Revolution window adhesive

- Transparent adhesion promoter for Revolution window adhesive
- Activator for trimming (remaining bead) and PU/PVC pre-coated windows

Colour	Transparent
Min. flash-off time	15 min
Flash-off time conditions	at 23 °C and 50% relative humidity
Min. processing temperature	5 °C
Max. processing temperature	25 °C

Container	Contents	Art. no.	P. Qty.
Can	20 ml	0890 024 5	1/24
Can	250 ml	0890 024 500	1/6
Pad	1.1 ml	0890 024 515	15

Please consider the legal instruction at the beginning of this chapter.

Product provides no UV protection. Please do not wipe off.

Shake the container well before opening.

Varioprimer safe + easy

Multi-purpose surface pre-treatment agent for all common substrates found in replacement glazing

4-in-1 system

- Adhesion agent
- Corrosion protection
- Activator
- Protects the adhesive from UV radiation

Colour	Black
Min. flash-off time	10 min
Max. flash-off time	24 h

Continuation **Varioprimer safe + easy**

Flash-off time conditions	at 23 °C and 50% relative humidity, as a primer, corrosion protection, activator
Min. processing temperature	10 °C
Max. processing temperature	35 °C

Container	Contents	Art. no.	P. Qty.
Can	20 ml	0890 024 021	1/24
Can	100 ml	0890 024 101	1/12
Stick	10 ml	0890 024 010	12

Please consider the legal instruction at the beginning of this chapter.

Shake the container before using the Varioprimer. Do not use the primer if it has gelled. Once opened, use as quickly as possible.

When used on translucent surfaces such as windscreens without screen print edge, UV protection for the adhesive surface (to protect the primer) is mandatory.

Sealant, removable

A versatile sealant that can be dabbed off, does not harden and cannot be painted over.

For sealing overlaps, joints, seams, fittings and under cover strips.

Can be used in caravan, motorhome, commercial vehicle, ship and equipment construction.

Remains permanently sticky, does not harden and does not run.

High degree of material compatibility

Chrome, paint and rubber are not affected

Chemical basis	Polyisobutylene
Resistance against	Water, Alkaline water

Colour	Min./max. temperature resistance	Art. no.	P. Qty.
Black	-30 to +100 °C	0890 100 043	1/12
Grey	-30 to 100 °C	0890 100 143	1/12

Please consider the legal instruction at the beginning of this chapter.

Not suitable for expansion joints.

Universal adhesive Extra

Neoprene-based contact adhesive

- Can be easily applied to the surface to be adhered with a brush and toothed spatula.
- Resistant to ageing
- Good elasticity
- Silicone-free

Chemical basis	Solvent neoprene
Colour	Brownish

Max. final strength	24 h
Min./max. processing temperature	15 to 25 °C
Shelf life from production	12 Month

Contents	Container	Min./max. temperature resistance	Art. no.	P. Qty.
65.5 ml	Tube	-20 to 125 °C	0893 100 021	1/12
185 ml	Tube	-20 to 125 °C	0893 100 022	1/12
730 ml	Can	-20 to +110 °C	0893 100 023	1/12
4600 ml	Canister	-20 to 125 °C	0893 100 024	1

Please consider the legal instruction at the beginning of this chapter.

Not to be used on polystyrene, soft PVC, PVC films, PE and PP. Smooth surfaces should be sanded.

Superglue Klebfix 4-in-1

Universal superglue specially designed for porous materials and uneven, rough components as well as for metal, plastic and rubber.

- Typical bonding applications include profile rubber for wood and plastic windows
- Adheres both smooth and absorbent surfaces
- The adhesive hardens extremely quickly

Weight of content	50 g
Chemical basis	Cyanoacrylate acidic ester
Colour	Transparent
Max. gluing gap size	0.25 mm
Min./max. hardening time/conditions	10-60 s/Depending on the material
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-30 to +80 °C
Shelf life from production/conditions	12 Month/at room temperature

Art. no. 0893 423

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

- It is advisable to wear safety gloves and safety goggles.
- If surfaces are too dry or acidic, this will delay or prevent hardening, while higher levels of moisture and alkaline surfaces will have an accelerating effect.
- Due to the vapour pressure of the liquid adhesive, slow curing excess product around the adhesive area may result in a white deposit (blooming effect). These are adhesive vapours that are hardening. These can be removed with e.g. isopropanol or acetone. However, it is important to note that the surfaces of the parts to be cleaned are also resistant to these solvents. Blooming can be prevented/reduced by using the adhesive economically and ensuring sufficient air humidity and ventilation in the work area.

Superglue Klebfix GEL

Run-proof superglue in gel form enables precise application, even on overhead or vertical surfaces.

- For bonding different materials to each other effectively
Aluminium, steel, iron, copper, brass, paint, wood, MDF, chipboard, decorative panels, cork, cardboard, felt, leather, porcelain, fibre glass, rubber, plastics (such as hard PVC, ABS, PMMA)
Not suitable for PP, PE, PTFE, silicone and bitumen.
- Fast-setting
- Solvent- and silicone-free

Chemical basis	Ethyl-2-cyanoacrylate monomer
Colour	Transparent
Max. gluing gap size	0.25 mm
Min./max. hardening time/conditions	20-100 s/Depending on the material
Min./max. processing temperature	5 to 20 °C
Shelf life from production/conditions	24 Month/cool and dry storage area

Weight of content	Min./max. temperature resistance	Art. no.	P. Qty.
3 g	-40 to 85 °C	0893 403	1/40
20 g	-40 to +85 °C	0893 403 1	1/10

Please consider the legal instruction at the beginning of this chapter.

- It is advisable to wear safety gloves and safety goggles.
- If surfaces are too dry or acidic, this will delay or prevent hardening, while higher levels of moisture and alkaline surfaces will have an accelerating effect.
- Due to the high vapour pressure and moisture on the surrounding surfaces, a white deposit may appear around the point of adhesion (blooming effect). These are adhesive vapours that are hardening. These can be removed with e.g. acetone. However, it is important to note that the surfaces of the parts to be cleaned are also resistant to acetone. Blooming can be prevented/reduced by using the adhesive economically and ensuring sufficient air humidity and ventilation in the work area.

Superglue Klebfix PLASTOBOND

For bonding hard-to-glue plastics quickly.

- For bonding plastics to each other
Like ABS, PVC, PMMA, PA, PBT, PET, PI, EPDM, filled elastomers and natural rubbers.
The primer also allows POM, TPE, TPO, PE, PP, PTFE and silicone rubber to be bonded.
- Solvent- and silicone-free

Weight of content	20 g
Chemical basis	Cyanoacrylate acidic ester
Colour	Transparent
Max. gluing gap size	0.15 mm
Min./max. processing temperature	5 to 35 °C

Min./max. temperature resistance	-55 to +105 °C
Shelf life from production/conditions	12 Month/at room temperature

Art. no. 0893 091

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

- It is advisable to wear safety gloves and safety goggles.
- If surfaces are too dry or acidic, this will delay or prevent hardening, while higher levels of moisture and alkaline surfaces will have an accelerating effect.
- Due to the vapour pressure of the liquid adhesive, slow curing excess product around the adhesive area may result in a white deposit (blooming effect). These are adhesive vapours that are hardening. These can be removed with e.g. isopropanol or acetone. However, it is important to note that the surfaces of the parts to be cleaned are also resistant to these solvents. Blooming can be prevented/reduced by using the adhesive economically and ensuring sufficient air humidity and ventilation in the work area.

Superglue KLEBFIX 4-in-1

Universal superglue with brush applicator for extremely thin, flat adhesive application.

- With application brush for bonding very thin and small surfaces
- „Overhead“ application even possible for extremely thin adhesive layers
- The adhesive hardens extremely quickly
- Bonds both smooth and porous substrates
- Solvent- and silicone-free

Weight of content	4 g
Chemical basis	Cyanoacrylate acidic ester
Colour	Transparent
Max. gluing gap size	0.25 mm
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-40 to +120 °C
Shelf life from production/conditions	12 Month/at room temperature

Art. no. 0893 094

P. Qty.: 1/25

Please consider the legal instruction at the beginning of this chapter.

- It is advisable to wear safety gloves and safety goggles.
- Due to the high vapour pressure and moisture on the surrounding surfaces, a white deposit may appear around the point of adhesion (blooming effect). These are adhesive vapours that are hardening. These can be removed with e.g. acetone. However, it is important to note that the surfaces of the parts to be cleaned are also resistant to acetone. Blooming can be prevented/reduced by using the adhesive economically and ensuring sufficient air humidity and ventilation in the work area.

Superglue Super-fast glue

For bonding metal, plastic and rubber parts with and to each other in a matter of seconds.

- Bonds metal, plastic and rubber parts to each other in seconds
- High level of resistance to ageing and climatic conditions
- Solvent- and silicone-free

Chemical basis	Cyanoacrylate acidic ester
Colour	Transparent
Max. gluing gap size	0.1 mm
Min./max. hardening time/conditions	2-90 s/Depending on the material
Min./max. processing temperature	5 to 35 °C
Shelf life from production/conditions	12 Month/at room temperature

Weight of content	Min./max. temperature resistance	Art. no.	P. Qty.
5 g	-30 to +80 °C	0893 090 0	1/25
50 g	-30 to 80 °C	0893 090	1

Please consider the legal instruction at the beginning of this chapter.

NSF registered, class P1, reg. no. 151993

NSF-tested in accordance with NSF/ANSI 61 for use in service water and drinking water

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

- It is advisable to wear safety gloves and safety goggles.
- If surfaces are too dry or acidic, this will delay or prevent hardening, while higher levels of moisture and alkaline surfaces will have an accelerating effect.
- Due to the vapour pressure of the liquid adhesive, slow curing excess product around the adhesive area may result in a white deposit (blooming effect). These are adhesive vapours that are hardening. These can be removed with e.g. isopropanol or acetone. However, it is important to note that the surfaces of the parts to be cleaned are also resistant to these solvents. Blooming can be prevented/reduced by using the adhesive economically and ensuring sufficient air humidity and ventilation in the work area.

Superglue Klebfix Easy Pen

For easy and effortless work. Very easy to use one-handed.

- Easy Pen design
Fits ergonomically in your hand
- Bonds in seconds
For bonding metal, plastic and rubber parts to each other
- Solvent- and silicone-free

Weight of content	30 g
Chemical basis	Cyanoacrylate acidic ester

Colour	Transparent
Max. gluing gap size	0.1 mm
Min./max. hardening time/ conditions	2-90 s/Depending on the material
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-30 to +80 °C
Shelf life from production/ conditions	12 Month/dry, at room temperature

Art. no. 0893 090 030

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

NSF-registered, class P1, reg. no. 151994

NSF-tested according to NSF/ANSI 61 for use with water for drinking and other domestic uses

NSF = international-
ally recognised
organisation for
the supervision
and registration
of products used
in the food pro-
cessing sector

- It is advisable to wear safety gloves and safety goggles.
- If surfaces are too dry or acidic, this will delay or prevent hardening, while higher levels of moisture and alkaline surfaces will have an accelerating effect.
- Due to the vapour pressure of the liquid adhesive, slow curing excess product around the adhesive area may result in a white deposit (blooming effect). These are adhesive vapours that are hardening. These can be removed with e.g. isopropanol or acetone. However, it is important to note that the surfaces of the parts to be cleaned are also resistant to these solvents. Blooming can be prevented/reduced by using the adhesive economically and ensuring sufficient air humidity and ventilation in the work area.

Superglue Klebfix FLEX

Tough yet flexible black superglue with excellent thermal resistance.

- Bonds metal, plastic and rubber parts to each other in seconds
- High thermal stability
- High degree of impact and peel resistance

Weight of content	20 g
Chemical basis	Cyanoacrylate acidic ester
Colour	Black
Max. gluing gap size	0.15 mm
Min./max. processing temperature	10 to 35 °C
Min./max. temperature resistance	-55 to +120 °C

Art. no. 0893 092

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Continuation **Superglue Klebfix FLEX**

- It is advisable to wear safety gloves and safety goggles.
- If surfaces are too dry or acidic, this will delay or prevent hardening, while higher levels of moisture and alkaline surfaces will have an accelerating effect.
- Due to the vapour pressure of the liquid adhesive, slow curing excess product around the adhesive area may result in a white deposit (blooming effect). These are adhesive vapours that are hardening. These can be removed with e.g. isopropanol or acetone. However, it is important to note that the surfaces of the parts to be cleaned are also resistant to these solvents. Blooming can be prevented/reduced by using the adhesive economically and ensuring sufficient air humidity and ventilation in the work area.

Activator

To accelerate the curing of superglues

Contents	150 ml
Chemical basis	Aliphatic hydrocarbon
Colour	Transparent
Min./max. flash-off time	2 min-10 min
Shelf life from production	24 Month

Art. no. 0893 301 20

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Using the activator may reduce the final strength of the adhesive used by about 20% compared to ideal values.

The activator is very compatible with common plastics. However, when used for the first time, it should be tested in an invisible location to check whether the plastic is resistant to the activator (as a precautionary measure).

Primer for superglues

For improving adhesion of hard-to-glue plastics

Contents	50 ml
Chemical basis	Aliphatic solvent
Colour	Transparent
Min. flash-off time	60 s
Min./max. processing temperature	5 to 35 °C
Shelf life from production	24 Month

Art. no. 0893 091 5

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Caution: For combination bonding with different materials, only the non-polar surface may be primed

High-strength spray adhesive Plus

Contact adhesive with high immediate adhesive strength and high heat resistance

- Excellent heat resistance up to 110°C
- Fast-drying
- Transparent hardening

Contents	400 ml
Chemical basis	Synthetic rubber
Colour	Transparent
Min./max. flash-off time	5 min-15 min
Min./max. processing temperature	0 to 30 °C
Min./max. temperature resistance	-20 to +110 °C
Shelf life from production	12 Month

Art. no. 0890 100 064

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Spray contact adhesive BOND 90

Spray adhesive for quick and reliable bond with high adhesive force and high temperature resistance

Versatile thanks to good material compatibility and high adhesive force

- Suitable for adhering high-quality and thicker coatings and laminates
- Adhesive does not show through – ideal for thin or reflective surface materials

Enables simple, quick working

- Mobile system, can be used directly from the pressure tank
- Tension-free bonds can be processed further directly after pressing
- No cleaning of the system is required

Supplied without application gun, nozzle and without connection hose

Contents	22.1 l
Chemical basis	Styrene-butadiene natural rubber
Colour	Transparent
Min./max. processing temperature	15 to 25 °C
Min./max. temperature resistance	-20 to +95 °C
Shelf life from production	15 Month

Art. no. 0893 100 014

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

- Supplied without application gun, nozzle and without connection hose
- Important: Only use original Würth accessories and spare parts.
- The hardened adhesive joint must not come into contact with solvents or harsh industrial cleaners.
- Do not store above +50°C and do not expose to direct sunlight.
- Disposal: Do not disconnect hose from the container unless it is depressurised and emptied, and the container valve is closed. Then open the valve completely and use a non-sparking tool to open the pre-punched rated breaking point on the unpressurised tank and dispose of the tank in accordance with local regulations.

Application gun Premium

For applying the contact adhesive BOND 90

- Easy and precise spray pattern adjustment
- Very homogeneous spray pattern
- Durable premium quality due to robust all-metal design

Material	Metal
Colour	Silver

Art. no. 0891 602 030

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Spray adhesive

Fast-drying contact and assembly adhesive for all lightweight materials

- Permanent firm hold for virtually all applications
- Fast-drying
- Adjustable spray nozzle
- Silicone-free

Contents	500 ml
Colour	Beige
Min./max. temperature resistance	-40 to +60 °C
Shelf life from production	12 Month

Art. no. 0890 100 055

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

- When bonding hard foam/Styrofoam, the adhesive must be applied to a small suitable area first to check compatibility, depending on the type of hard foam; wait for at least 60 minutes to check for any changes or cratering.
- Caution: Not suitable for bonding soft PVC, PVC films and particle board cutting edges. After use, turn the can on its head and spray until the valve is empty.

Cold wood glue D2

For gluing all types of wood. Complies with stress group D2 in accordance with DIN EN 204.

- Universal use
- Simple dispensing design
- High gluing quality
- Transparent when hardened

Chemical basis	Polyvinyl acetate dispersion
Container	Bucket
Min. film forming temperature	6 °C
Min./max. open time/conditions	6-7 min/at 20 °C and 150 g/m²
Max. temperature resistance of the hardened material	80 °C
Min. room temperature, material temperature and glue temperature	18 °C

Weight of content	Art. no.	P. Qty.
12 kg	0892 100	1
28 kg	0892 100 050	1

Please consider the legal instruction at the beginning of this chapter.

- In conjunction with the tannic acid in the wood, the impact of bare metal may result in blue discolouration, especially with oak, and in red discolouration with beech.
- At a pressing temperature above +50 °C, brown discolouration may occur with softwood veneers.
- Fresh splashes of glue can be removed with water. Older adhesive residues can be softened with nitro thinner or acetone and then rubbed off. Stir the contents thoroughly before application and always close the container tightly after use. Protect from frost.

Continuation Cold wood glue D2

- The processing time and the setting time are heavily dependent on the working conditions, e.g. the temperatures, moisture and absorption levels of the materials, application quantities and tensions in the material.

Würth white glues are not suitable for use in the static range. Specially approved adhesives must be used for this purpose. Würth glues may only be used for non-load-bearing applications.

Cold wood glue D3

For particularly demanding wood bonding in indoor and outdoor applications

- High level of resistance to water and heat
- Easy to pour with screw-on tap
- Transparent hardening

Chemical basis	Polyvinyl acetate dispersion
Colour after curing	Transparent
Min. film forming temperature	6 °C
Min./max. open time/conditions	8-10 min./at 20°C and 150 g/m ²
Max. temperature resistance of the hardened material	80 °C
Min. room temperature, material temperature and glue temperature	18 °C

Container	Weight of content	Art. no.	P. Qty.
Bottle	0.5 kg	0892 100 16	1/6
Bucket	12 kg	0892 100 14	1
Bucket	28 kg	0892 100 150	1

Please consider the legal instruction at the beginning of this chapter.

When gluing external joints (e.g. front door panels), the effects of heat (direct exposure to sunlight) can cause stresses in the wood and softening of glued joints. Duroplastic adhesives, such as PUR glue in the dispensing system, art. no. 0892100180 are suitable for this purpose. In conjunction with the tannic acid in the wood, the impact of bare metal may result in blue discolouration, especially with oak, and in red discolouration with beech. In isolated cases, substances contained in wood may result in unpredictable discolouration with various types of wood, e.g. beech, cherry, maple. At a pressing temperature above +50°C, brown discolouration may occur with softwood veneers. Fresh splashes of glue can be removed with water. Older adhesive residues can be softened with nitro thinner or acetone and then rubbed off. Stir the contents thoroughly before application and always close the bottle tightly after use. Protect from frost. The processing time and the setting time are heavily dependent on the working conditions, e.g. the temperatures, moisture and absorption levels of the materials, application quantities and tensions in the material.

Würth white glues are not suitable for use in the static range. Specially approved adhesives must be used for this purpose. Würth glues may only be used for non-load-bearing applications.

1-component cold wood glue D4

For gluing all types of wood. Fulfills stress group D4 in accordance with DIN EN 204 and the requirements of DIN EN14257 (WATT91).

- High level of heat and water resistance
- Easy to pour
- No need to mix with hardener
- No pot life limitation to be observed
- Transparent hardening

Chemical basis	Polyvinyl acetate dispersion
Colour after curing	Transparent
Min. film forming temperature	7 °C
Min./max. open time/conditions	8-10 min/at 20 °C and 150 g/m ²
Max. temperature resistance of the hardened material	80 °C
Min. room temperature, material temperature and glue temperature	18 °C

Container	Weight of content	Art. no.	P. Qty.
Bottle	0.5 kg	0892 100 221	1/6
Bucket	5 kg	0892 100 225	1
Bucket	12 kg	0892 100 222	1
Bucket	28 kg	0892 100 224	1

Please consider the legal instruction at the beginning of this chapter.

When gluing outdoor joints (such as front door gluing), the effects of heat (e.g. direct exposure to sunlight) may result in tension in the wood and glued joints softening. Thermoplastic adhesives as well as PUR glue in a dispensing system or PUR gun glue are not suitable for these kinds of applications. The processing time and setting time, as well as the pressing time, are affected by working conditions such as ambient temperature, surface temperature, air humidity or material moisture, absorption level of materials, application quantity and tensions in the material. The viscosity of the one-component D4 glues may increase while being stored. Stirring the glue without adding water makes it free-flowing again. The viscosity can thus be adjusted by stirring alone. Storage does not affect the gluing parameters. The glue container must always be stored firmly closed and in a frost-free environment.

Würth white glues are not suitable for use in the static range. Specially approved adhesives must be used for this purpose. Würth glues may only be used for non-load-bearing applications.

Quick hardening glue

Very quick hardening universal glue for gluing all types of wood

- Quick to set
- High degree of initial strength
- Transparent when dry
- Complies with stress group D2 in accordance with DIN/EN 204

Colour	White
Chemical basis	Polyvinyl acetate dispersion
pH value	5
Density	1.09 g/cm ³

Continuation **Quick hardening glue**

Min. proportion of solids	53 %
Min. film forming temperature	7 °C
Max. temperature resistance of the hardened material	70 °C
Min./max. room temperature, material temperature and glue temperature	15 to 20 °C
Min./max. wood moisture	8-12 %
Min. wood moisture	8 %
Max. wood moisture	12 %
Min./max. open time	5-10 min
Conditions for open time	at 20°C and 150 g/m ²
Max. pressing pressure	0.7 N/mm ²

Container	Weight of content	Art. no.	P. Qty.
Bottle	500 g	0892 100 111	1/12
Bucket	10 kg	0892 100 112	1

Please consider the legal instruction at the beginning of this chapter.

Application equipment should be made from stainless steel or plastic. Processing time depends on the material, humidity, temperature and application quantity. Please refer to the technical data sheet

Parquet glue

Single-component dispersion glue for bonding parquet/laminate for floating installation.

- High water resistance
- Special bottle and cap shape for clean application
- Fast adhesion
- Transparent when hardened
- Solvent-free

Chemical basis	Polyvinyl acetate dispersion
Container	Bottle
Weight of content	750 g
Density	1.09 g/cm ³
Colour	White
pH value	3
Min./max. processing temperature	15 to 25 °C
Max. temperature resistance	80 °C
Min./max. open time/conditions	9-10 min/at 20°C and 150 g/m ²
Max. final strength	48 h
Conditions for final strength	at 23°C
Application quantity per running metre	25 g/m
Max. temperature resistance of the hardened material	80 °C
Min. press-setting time of glue	30 min
Shelf life from production	12 Month

Art. no. 0892 100 040

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Transparent PUR glue

In dispensing system

- High water resistance
- High temperature resistance
- Special dispensing cap for clean working without blockage of the opening
- For practical construction of condensation-proof windows, gluing door frames and cartridges, stairs, handrails
- Foaming
- No discolouration

Weight of content	500 g
Container	Bottle
Chemical basis	Polyurethane
Colour	Transparent/slightly cloudy (hardened)
Min. film forming temperature	5 °C
Min./max. wood moisture	8-14 %
Conditions for open time	at 20 °C and 150 g/m ²
Min./max. temperature resistance of the hardened material	-30 to 100 °C
Min./max. processing temperature	10 to 20 °C
Max. application quantity in surface bonding	220 g/m ²

Art. no. 0892 100 180

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Preliminary tests should be carried out to ascertain that the appropriate adhesion properties are achieved for the relevant design and wood type.

For ash, we recommend a substrate pre-treatment with Adhesion Plus plastic/stone/wood (art. no. 089010062).

Oily woods should be glued immediately after processing in order to minimise the risk of formation of a separating layer.

Refer to the overview table for technical data

Hot-melt edge adhesive pellets

EVA-based hot-melt adhesive for universal use

Good running properties

- Low-viscosity adjustment
- Highly heat resistant
- Very good after-flow properties without threading

For universal use

- For use on all commercially available edge bonding machines
- Rollers and slot nozzles available on request

Easy refills

Keeps joints moist.

Silicone-free

Weight of content	25 kg
Chemical basis	Ethyl vinyl acetate
Softening point	90 °C
Min./max. processing temperature	190 to 210 °C
Min./max. temperature resistance	-25 to +85 °C
Shelf life from production	12 Month

Colour	Art. no.	P. Qty.
Natural	0892 100 035	1
White	0892 100 034	1

Please consider the legal instruction at the beginning of this chapter.

Adhesive residues can only be removed mechanically.

Hot-melt edge adhesive cartridge

EVA-based hot-melt adhesive for universal use

Good running properties

- Low-viscosity adjustment
- Highly heat resistant
- Very good after-flow properties without threading

For universal use

- For use on all commercially available edge bonding machines
- Rollers and slot nozzles available on request

Easy refills

Keeps joints moist.

Silicone-free

Weight of content	15.5 kg
Chemical basis	Ethyl vinyl acetate
Softening point	103 °C
Min./max. processing temperature	190 to 210 °C
Min./max. temperature resistance	-20 to +90 °C

Colour	Shelf life from production	Art. no.	P. Qty.
Natural	12 Month	0892 100 032	1
White	24 Month	0892 100 031	1

Please consider the legal instruction at the beginning of this chapter.

Adhesive residues can only be removed mechanically.

Veneer glue

Ready-to-use surface glue for veneer work

- Short pressing times for relatively long processing time
- Simple dispensing design
- No unpleasant odour
- Universal application
- High gluing quality
- Complies with stress group D2 in accordance with DIN/EN 204

Chemical basis	Polyvinyl acetate dispersion
Container	Bucket
Stress group	D2
EN standard	204
Colour	White
pH value	5
Min./max. processing temperature	18 to 20 °C
Min./max. open time/ conditions	10-14 min/at 20°C and 150 g/m ²
Min. film forming temperature	5 °C
Max. temperature resistance of the hardened material	80 °C

Weight of content	Art. no.	P. Qty.
12 kg	0892 100 038	1
28 kg	0892 100 046	1

Please consider the legal instruction at the beginning of this chapter.

With highly absorbent material and low pressing force, a relatively large quantity of glue must be applied. The higher the pressing force, the smaller the required application quantities. With large-pore veneer, a thin layer of glue must be applied to prevent the glue from bleeding through. Glue bleed-through may result in colour changes during staining, as the pores in the veneer are already filled with glue, thereby preventing the stain from penetrating the surface.

In conjunction with the tannic acid of the wood, the impact on bare metal may result in blue discolouration, especially with oak.

At a pressing temperature above +50°C, brown discolouration may occur with softwood veneers.

Fresh splashes of glue can be removed with water. Stir glue thoroughly before application and always close container tightly after use. Protect from frost.

The processing time and the setting time are highly dependent on the working conditions, e.g. the temperatures, moistures, absorption of the materials, application quantities and tensions in the material.

The adhesive can be defined as formaldehyde-free insofar as no formaldehyde is used during production. However, extremely small quantities may occur during polymerisation due to secondary reactions.

Würth white glues are not suitable for use in the static range. Specially approved adhesives must be used for this purpose. Würth glues may only be used for non-load-bearing applications.

PUR foam adhesive D4

Special, moisture-curing 1-component polyurethane foam in pressurised cans for the timber/construction sector.

- For structural gluing of stairs and for use in window and door production.
- Water-resistant, in accordance with DIN EN 204, D4 quality
- Can be painted over

Weight of content	744 g
Container	Aerosol can
Chemical basis	Modified polyurethane
Colour	Cream
Min. film forming temperature	5 °C
Min./max. wood moisture	12-16 %
Open time	8 min
Conditions for open time	at 23 °C and 50% humidity
Min./max. temperature resistance of the hardened material	-40 to 90 °C
Min./max. processing temperature	5 to 35 °C
Max. application quantity in surface bonding	200 g/m ²
Resilient after	24 h
Tensile strength	10 N/mm ²
Min./max. storage temperature	15 to 25 °C
Building material class	B2 - Normally inflammable

Art. no. 0892 100 174

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Smooth surfaces such as metals and PVC should be ground. To maintain the functionality, a foam can (even if empty) should be fastened to the foam/glue gun during storage.

The bonding should be protected from direct weathering (for example, by a canopy)

Glue roller

With polyurethane roller

- For quick and even application of glues
- For use with edge and surface adhesives
- Using the inner plastic roller removes the need to wipe glue at the edges
- Time saving compared to brush approx. 30%

Width	90 mm
Outer diameter	125 mm

Art. no. 0891 186

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

The supply reservoir should be cleaned with water during longer breaks in work.

Glue dispenser unit

For glue application

Art. no. 0892 100 0

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Façade adhesive

1C polyurethane foam for securing insulation panels to façades in accordance with DIN EN 13163

Tested product features

Building material class B1 test certificate in accordance with DIN 4102-1:1998-05, issued by MPA Hanover

- Time-consuming process of applying mortar no longer needed
- Enables additional heat insulation
- High initial adhesion, even at low temperatures

Contents	800 ml
Chemical basis	Single component polyurethane
Colour	Yellowish
Tack-free after	10 min
Curing time	2 h
Min./max. processing temperature	5 to 30 °C
Yield (volume) approx.	47 l
Yield (area)	10 m ²
Building material class	B1 - Of low flammability
Shelf life from production	12 Month

Art. no. 0892 400 10

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Additional fastening of insulation boards may be required depending on the quality of the construction surface. Anchoring is always required at the foot of the building, on old plaster, concrete and on non-load-bearing surfaces. In addition, mechanical fastenings should be used from a height of 5 m.

Perimeter adhesive

1-component polyurethane adhesive for bonding polystyrene hard foam boards in perimeter areas

- Quick to harden and good adhesive properties
- Very low post-expansion
- Simple handling and application method
- High yield (15 m²/can)
- High degree of material durability
- Environmentally friendly
- Free from HFCs and HCFCs

Contents	750 ml
Chemical basis	Single component polyurethane
Colour	Green
Tack-free after	8 min
Curing time	30 min
Full resilience	12 h
Min./max. processing temperature	15 to 25 °C
Yield (area)	15 m ²
Building material class	B3 - Of high flammability
Shelf life from production	12 Month

Art. no. 0892 400 5

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Not suitable for use with pressing water, and is not watertight. Not UV-resistant. Does not adhere to PE, PP, PTFE or silicone. An adhesive strand distance of approx. 25 cm should be maintained during application. Adhesive hardens by means of humidity at room temperature.

The perimeter adhesive is only an assembly aid for securing insulation boards. The final bonding strength is achieved by the contact pressure of the shaken soil, gravel etc. The shaking process must take place within 14 days of bonding.

Precision crepe tape

Special paper tape for stringent requirements during masking work in the automotive, metal and painting sectors

- Extremely thin, soft and high-quality special paper
- Special acrylate adhesive for particularly gentle bonding on delicate surfaces
- Excellent UV resistance for up to 6 months
- Heat resistant up to +100 °C

Adhesive base	Acrylate
Adhesive tape backing material	Japanese rice paper
Colour	Yellow (base material)
Length	50 m
Elongation at break	4 %
Min./max. processing temperature	5 to 40 °C
Max. temperature resistance	100 °C
Ultraviolet resistance	6 months, outdoor weathering

Width	Art. no.	P. Qty.
19 mm	0992 000 319	12/48
25 mm	0992 000 325	9/36
30 mm	0992 000 330	8/32

Continuation **Precision crepe tape**

Width	Art. no.	P. Qty.
38 mm	0992 000 338	6/24
50 mm	0992 000 350	6/24

Please consider the legal instruction at the beginning of this chapter.

Precision crepe tape strong

Fibre-reinforced special paper tape that meets the toughest requirements for masking in the painting, metalworking and automotive sectors.

- Reduced tearing due to reinforced fibres
- Suitable for both solvent- and water-based paint systems
- Heat resistant up to +100°C

Adhesive base	Acrylate
Adhesive tape backing material	Japanese rice paper
Backing material	Japanese rice paper
Colour	Orange
Length	50 m
Thickness	0.11 mm
Elongation at break	8 %
Min./max. processing temperature	5 to 40 °C
Max. temperature resistance	100 °C
Ultraviolet resistance	4 months, outdoor weathering

Width	Art. no.	P. Qty.
19 mm	0992 000 519	12/48
25 mm	0992 000 525	9/36
30 mm	0992 000 530	8/32
38 mm	0992 000 538	6/24
50 mm	0992 000 550	6/24

Please consider the legal instruction at the beginning of this chapter.

Not suitable for use on copper, zinc, galvanised surfaces, polycarbonate or natural stone (e.g. marble).
Tape must be pulled off when dry.

Exercise caution with paints containing zinc or zinc oxide, since residues may be left.

Precision crepe tape Light

Special paper tape for standard requirements during masking work in painting applications

- Particularly fine paint edges reduce running paint
- Good adhesion and residue-free removal on many substrates
- UV resistance of up to four weeks

Adhesive base	Acrylate
Adhesive tape backing material	Japanese rice paper
Backing material	Japanese rice paper

Colour	Salmon
Length	50 m
Elongation at break	4 %
Ultraviolet resistance	4 weeks

Width	Thickness	Max. temperature resistance	Art. no.	P. Qty.
25 mm	0.1 mm	100 °C	0992 000 725	9/36
30 mm	0.1 mm		0992 000 730	8/32
38 mm	0.1 mm		0992 000 738	6/24
50 cm	0.01 mm		0992 000 750	6/24

Please consider the legal instruction at the beginning of this chapter.

Not suitable for use on carbon, copper, zinc, lead (also lead-based paint), anodised metals and natural stone (e.g. marble). Tape must be pulled off when dry.

Crepe masking tape

Slightly crepe paper adhesive tape for general masking tasks.

- Heat-resistant up to +80°C
- Excellent adhesion to smooth and painted surfaces
- Moisture-resistant and solvent-resistant

Adhesive base	Natural rubber
Adhesive tape backing material	Paper
Backing material	Weak creped paper backing
Colour	Cream
Length	50 m
Thickness	130 µm
Elongation at break	10 %
Min./max. processing temperature	5 to 40 °C
Max. temperature resistance	80 °C
Ultraviolet resistance	No

Width	Art. no.	P. Qty.
15 mm	0992 001 5	20
19 mm	0992 001 9	16
25 mm	0992 002 5	12
30 mm	0992 003 0	10
38 mm	0992 003 8	8
50 mm	0992 005 0	6

Please consider the legal instruction at the beginning of this chapter.

To ensure residue-free removal, the tape must be removed immediately after the paint or varnish has dried. The adhesive tape is not UV-resistant and is therefore not suitable for outdoor applications.

Crepe masking tape

High-quality crepe adhesive tape for professional painting work.

- Heat resistant up to +110°C
- Excellent adhesive strength and adaptability
- Can be labelled

Backing material	Creped paper, latex impregnated
Thickness of adhesive tape	0.18 mm
Adhesive base	Rubber resin adhesive
Colour	Brown (base material)
Length	50 m
Dynamic peel strength at 25 mm	10.5 N
Min./max. temperature resistance	-20 to 110 °C
Min./max. processing temperature	15 to 40 °C
Moisture resistance	Yes
Shelf life from production/conditions	12 Month/at 20°C and 50% humidity

Width	Art. no.	P. Qty.
18 mm	0992 619	16
24 mm	0992 625	12
30 mm	0992 630	10
36 mm	0992 638	8
48 mm	0992 650	6

Please consider the legal instruction at the beginning of this chapter.

To ensure residue-free removal, the tape must be removed immediately after the paint or varnish has dried
The adhesive tape is not UV-resistant and is therefore not suitable for outdoor applications

Double-sided adhesive tape

Adhesive tape with special paper backing and acrylate adhesive.

- Excellent adhesion
- Can be removed by hand
- UV-resistant and moisture-resistant
- Ageing-resistant

Backing material	Special paper
Adhesive base	Acrylate
Colour	Transparent (base material)
Roll width	12 mm
Length of roll	25 m
Thickness	0.13 mm
Min./max. processing temperature	15 to 30 °C
Min./max. temperature resistance	-30 to 120 °C
Ultraviolet resistance	Yes

Moisture resistance	Yes
Shelf life from production/conditions	12 Month/at 20 °C and 50% humidity

Art. no. 0894 500 4

P. Qty.: 3

Please consider the legal instruction at the beginning of this chapter.

The surfaces to be adhered must be dry and free from dust, grease and silicone. To ensure proper adhesion, the tape must be sufficiently pressed onto the material to be glued. Optimum final strength is achieved after 24 hours. Please carry out preliminary tests on sensitive surfaces (e.g. PP, PE, rubber) and porous surfaces (e.g. wood, stone). In cases where plastics containing softener additives are to be adhered, the softener may change the adhesive coating. This will impair the strength of the adhesive.

Double-sided adhesive sealing tape WÜTOP® Filmfix Plus

Quick and easy-to-apply adhesive film or airtight and windproof connection bonding for indoor and outdoor use.

- Very strong initial and final adhesion on many typical construction surfaces
- Simple, quick and clean to apply
- Complies with EnEV 2016, DIN 4108-7

Adhesive base	Thermoplastic elastomer
Length of roll	16 m
Thickness	2.5 mm
Min. processing temperature	5 °C
Max. processing temperature	35 °C
Ultraviolet resistance	No

Art. no. 0992 820 012

P. Qty.: 8

Please consider the legal instruction at the beginning of this chapter.

We recommend using WÜTOP vapour barriers or vapour retarders for optimum results.

Cannot be used in swimming pool areas.

Permanently set after 24 hours.

During seasonally high temperatures $\geq +70^{\circ}\text{C}$ without a roof covering, additional mechanical fixing is required.

Mounting tape Power

Gluing instead of welding, drilling or riveting.

Highly-adhesive, double-sided adhesive tape for indoor and outdoor use

Extremely high and long-lasting adhesive strength

Per running metre, holds up to:

- 8 kg/25 mm width
- 6 kg/19 mm width
- 4 kg/12 mm width

Adhesive base	Acrylate
Length of roll	10 m
Min./max. processing temperature	15 to 40 °C
Min./max. temperature resistance	-15 to 90 °C
Max. short-term temperature resistance	150 °C
Min. final strength	72 h

Colour	Roll width	Thickness	Shelf life from production/conditions	Art. no.	P. Qty.
Grey	25 mm	1.2 mm	12 Month/at 20°C and 50% humidity	0894 909 003	1
Transparent	19 mm	1 mm		0894 909 004	1
Transparent	25 mm	1 mm		0894 909 005	1

Please consider the legal instruction at the beginning of this chapter.

Use is not recommended on low-energy materials such as PE or PP and hard-to-stick surfaces such as, for example, PA, rubber, silicone, soft PVC, EPDM or powder-coated aluminium. Adhesion may be impaired on painted surfaces. Final adhesive strength is achieved after approx. 72 hrs at room temperature.

Please familiarise yourself with the applicable building regulations, which may differ from region to region, before using the adhesion solutions presented and ensure you comply with them when designing and executing your application. We recommend that you always use a mechanical safeguard for adhesive bonding above head level at 1.80 m.

Mirror adhesive tape

Double-sided adhesive tape with polyethylene backing and acrylate adhesive

- Excellent compatibility with a range of common surfaces
- High degree of initial tackiness
- UV- and moisture-resistant

Adhesive base	Acrylate
Backing material	Polyethylene foam
Length	25 m
Min./max. temperature resistance	-40 to 95 °C
Shelf life from production	24 Month

Colour	Thickness	Width	Art. no.	P. Qty.
Black	1.6 mm	12 mm	0894 919	1
White	1 mm	19 mm	0894 918 0	1
White	1 mm	25 mm	0894 918	1

Please consider the legal instruction at the beginning of this chapter.

- The surfaces to be adhered must be smooth, dry and free from dust, grease and silicone. We recommend IPA cleaner for pre-cleaning.
- To ensure proper adhesion, the tape must be sufficiently pressed onto the material to be glued.
- Optimum final strength is achieved after 24 hours.
- Please conduct preliminary tests on sensitive surfaces (e.g. PP, PE, rubber) and rough or porous surfaces (e.g. wood, stone).
- If plastics containing plasticising additives are to be adhered, the plasticisers may change the adhesive layer. This will impair the strength of the adhesive.
- For safety mirrors (identifiable by a blue or green film on the back of the mirror), mirror manufacturers generally recommend using an additional mechanical fastening.
- With safety mirrors (identifiable by a blue or green film), there may be adhesive problems with the tape due to the reciprocal action between the film used and the adhesive. Adhesion is particularly poor on PE/PP-based films. Preliminary testing must therefore be conducted in all cases. As a variety of different films can be used for safety mirrors, the use of additional mechanical fastenings is strongly recommended.

Please observe the assembly instructions.

Long-life fabric masking tape

PR-coated fabric masking tape for long-term covering work indoors or outdoors.

- UV filter as intermediate layer
- UV-resistant rubber adhesive
- High-quality rubber adhesive with high initial adhesion
- Can be removed by hand
- Dimensionally stable

Backing material	PE-coated fabric
Adhesive base	Natural rubber adhesive
Colour	Black/white (base material)
Length	25 m
Thickness of adhesive tape	0.31 mm
Moisture resistance	Yes
Ultraviolet resistance	Yes
Max. usage duration	4 Weeks
Min./max. processing temperature	-5 to 35 °C
Min./max. temperature resistance	-15 to 50 °C
Shelf life from production/conditions	12 Month/at 20 °C and 50% humidity

Width	Art. no.	P. Qty.
38 mm	0992 400 038	1/32
50 mm	0992 400 050	1/24

Please consider the legal instruction at the beginning of this chapter.

To ensure residue-free removal, the maximum duration of use should not exceed 4 weeks.

Continuation **Long-life fabric masking tape**

Plastic surfaces with softening agents and nitrocellulose varnishes and precious metals may lead to residues. In these cases, a test application for 48 hours is recommended. Not suitable for porous and absorbent substrates, e.g. porous natural stone, marble, granite, concrete and wood (non-varnished). It may cause discolouration.

Painter's fabric tape

Strong fabric tape for indoor and outdoor medium-term masking work

- Very high-quality and strong special fabric
- Highly weather-resistant thanks to its PE coating and UV-stabilised rubber adhesive
- Very high degree of initial and final adhesion

Backing material	PE-coated fabric
Adhesive base	Natural rubber adhesive
Colour	Blue (base material)
Length	25 m
Thickness of adhesive tape	0.3 mm
Moisture resistance	Yes
Ultraviolet resistance	3 weeks, outdoor weathering
Max. usage duration	3 Weeks
Min./max. processing temperature	-5 to 35 °C
Min./max. temperature resistance	-15 to 50 °C
Shelf life from production/conditions	12 Month/at 20°C and 50% humidity

Width	Art. no.	P. Qty.
38 mm	0992 400 338	32
50 mm	0992 400 350	24

Please consider the legal instruction at the beginning of this chapter.

To ensure residue-free removal, the maximum duration of use should not exceed 3 weeks. The maximum adhesion time can vary, depending on sunshine and season. The surfaces to be adhered must be fully dry and free from dust, grease and oil. With sensitive surfaces containing softeners (e.g. PVC) and porous surfaces (e.g. wood), we recommend carrying out an adhesion test for 48 hours. Not recommended for marble or natural stone.

Precision fabric tape

Robust special fabric tape for highest requirements in protective masking

- Improved adhesive strength outdoors
- Maximum reliability outdoors due to waterproof layer
- Protects the surface optimally due to sturdy and abrasion-resistant fabric

Backing material	PE-coated fabric
Adhesive base	Acrylate
Colour	White

Width	50 mm
Length	33 m
Moisture resistance	Conditionally
Ultraviolet resistance	2 months, inside/outside use (Western Europe)
Max. usage duration	8 Weeks
Min./max. processing temperature	0 to 80 °C
Shelf life from production/conditions	12 Month/at 15 °C to 25 °C and max. 60% relative humidity

Art. no. 0992 460 050

P. Qty.: 6/24

Please consider the legal instruction at the beginning of this chapter.

Not suitable for use on copper, zinc, zinc-plated surfaces, polycarbonate or natural stone (e.g. marble). Tape must be pulled off when dry.

Exercise caution with paints containing zinc or zinc oxide, since residues may be left.

Painter's crepe tape

High-resistance flat crepe tape for indoor painting tasks

- Heat resistant up to +80 °C
- Excellent adhesion, even on slightly uneven surfaces
- Highly resistant to commercially available paint and varnish systems

Adhesive base	Modified natural rubber
Adhesive tape backing material	Paper
Backing material	Paper
Colour	White
Length	50 m
Elongation at break	8 %
Min./max. processing temperature	5 to 40 °C
Max. temperature resistance	80 °C
Ultraviolet resistance	No

Width	Art. no.	P. Qty.
19 mm	0992 340 19	16/96
25 mm	0992 340 25	12/72
30 mm	0992 340 30	10/60
38 mm	0992 340 38	8/48
50 mm	0992 340 50	6/36

Please consider the legal instruction at the beginning of this chapter.

To ensure residue-free removal, the tape must be removed immediately after the paint or varnish has dried. The adhesive tape is not UV-resistant and is therefore not suitable for outdoor applications.

Smooth PVC plaster tape

Masking tape for protecting smooth surfaces during painting, plastering and varnishing both indoors and outdoors.

- Smooth, rugged backing
- Selected natural rubber adhesive
- Strong connection between adhesive and carrier tape

Adhesive base	Natural rubber
Colour	White
Length	33 m
Thickness of adhesive tape	0.13 mm
Elongation at break	150 %
Shelf life from production/conditions	24 Month/dry and dust-free storage area, 20°C and 50% relative humidity

Width	Art. no.	P. Qty.
30 mm	0992 402 30	60
50 mm	0992 402 50	36

Please consider the legal instruction at the beginning of this chapter.

The surface to be covered must be fully dry and free from dust, grease and oil. After use (max. adhesion period: 6 weeks), the tape should be removed at room temperature (+5°C to +40°C) by being pulled off at a 45° angle to the edge of the paint or to the plaster in a slow, smooth manner.

Never expose the adhesive side to direct sunlight! Not suitable for oven drying!

Ribbed PVC plaster tape

Masking tape for protecting smooth surfaces during painting, plastering and varnishing both indoors and outdoors.

Crosswise grooves in adhesive tape

The tape can be ripped easily and with a perfect edge at a 90° angle

Select natural rubber adhesive

Excellent adhesion, even on slightly uneven surfaces

Strong connection between adhesive and carrier tape

This enables residue-free removal

Adhesive base	Natural rubber
Length	33 m
Thickness of adhesive tape	0.15 mm
Elongation at break	120 %
Shelf life from production/conditions	24 Month/dry and dust-free storage area, 20°C and 50% relative humidity

Colour	Width	Art. no.	P. Qty.
White	50 mm	0992 401 150	36
Yellow	30 mm	0992 401 30	60
Yellow	50 mm	0992 401 50	36

Please consider the legal instruction at the beginning of this chapter.

The surface to be covered must be fully dry and free from dust, grease and oil. After use (max. adhesion period: 6 weeks), the tape should be removed at room temperature (+5°C to +40°C) by being pulled off at a 45° angle to the edge of the paint or to the plaster in a slow, smooth manner. On natural stone, particularly marble, can lead to discolouration. Never expose the adhesive side to direct sunlight. Not suitable for oven drying.

Plaster tape Soft

Masking tape for protecting smooth surfaces during painting, plastering and varnishing both indoors and outdoors.

Especially soft adhesive

- Tape is very easy to pull off the roll and is highly dimensionally stable
- Particularly soft; moulds to the surface very well

Easy application and secure adhesion on surfaces, even at low temperatures from 0°C

Highly weather-resistant

Tape can be removed from many surfaces after 4 weeks (orange) or 2 weeks (white) without leaving residue behind

Adhesive base	Natural rubber
Width	50 mm
Length	33 m
Thickness of adhesive tape	0.13 mm
Elongation at break	180 %
Shelf life from production/conditions	12 Month/at 20°C and 50% humidity

Colour	Art. no.	P. Qty.
Orange	0992 401 650	36
White	0992 401 750	36

Please consider the legal instruction at the beginning of this chapter.

The surface to be covered must be fully dry and free from dust, grease and oil. After use (max. adhesion period: 6 weeks), the tape should be removed at room temperature (+5°C to +40°C) by being pulled off at a 45° angle to the edge of the paint or to the plaster in a slow, smooth manner. On natural stone, particularly marble, can lead to discolouration. Never expose the adhesive side to direct sunlight. Not suitable for oven drying.

Double-sided protective tape Duoband

Double-sided protective tape with a full-surface coated adhesive side and one side with adhesive-free edge

Good UV resistance of up to 6 weeks

One fully-coated adhesive side, while one side has an adhesive-free edge

- Solid backing paper enables easy, manual working
- Adhesive-free edge ensures easy removal of the silicone-coated cover film and prevents separated adhesive residue from ending up in the varnish or paint

Backing material	PVC
Adhesive base	Acrylate

Continuation **Double-sided protective tape Duoband**

Colour	White, Green
Length	25 m
Min. temperature resistance	-10 °C
Max. temperature resistance	70 °C
Max. usage duration	6 Weeks

Width	Art. no.	P. Qty.
25 mm	0992 404 25	48
35 mm	0992 404 35	48

Please consider the legal instruction at the beginning of this chapter.

- Never expose the adhesive side to direct sunlight
- Not suitable for oven drying
- Limited suitability for porous, sanded and rough surfaces that would absorb the adhesive on the tape or physically attack it, e.g. sanded metals. When used on water-based acrylate coatings, nitrocellulose paints with a high proportion of thinner, other chemically aggressive substances and all non-ferrous metals, e.g. copper and aluminium and eloxal and powder-coating, preliminary testing is absolutely required. Otherwise there is the possibility that residues will be left
- Not suitable for any surface with insufficient internal stability, such as poorly adhering varnish or weathered wood

Masking tape Easy Masking Tape

Multi-part special tape for difficult masking work on vehicles

- Two-part plastic lip for simple insertion into a variety of seal depths
- Perforated tape for easy removal and masking curves
- Heat-resistant up to +150°C
- No masking materials containing silicone
- Resistant to water-based paint

Adhesive base	Modified natural rubber
Adhesive tape backing material	Special paper with two-part slide-bar of PES
Backing material	Special paper
Colour	Beige (base material)
Width	50 mm
Length	10 m
Min./max. processing temperature	5 to 40 °C
Max. temperature resistance	150 °C
Ultraviolet resistance	No

Art. no. 0992 050 010

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Decorative trim adhesive tape

Double-sided adhesive tape that can withstand high loads, with polyethylene backing and acrylate adhesive

- Excellent adhesion
- Vibration-damping
- Compensates the various expansion behaviours of different materials
- High degree of resistance to temperatures, UV and weathering

Adhesive base	Acrylate
Backing material	Polyethylene foam
Colour	Anthracite (base material)
Thickness	0.8 mm
Length	10 m
Min./max. temperature resistance	-40 to 95 °C
Shelf life from production	24 Month

Width	Art. no.	P. Qty.
4 mm	0894 910 4	1
12 mm	0894 910	1
19 mm	0894 910 0	1
24 mm	0894 910 1	1

Please consider the legal instruction at the beginning of this chapter.

Dividing strip

Closed-cell, white PE foam with one-sided 12-mm adhesive strip for dry construction and plastering

- Insulation and sealing material for facing joints
- Prevents tension and cracks with plaster connections in conjunction with suspended ceilings and partition walls
- Reliable sealing against capillary effects
- Prevents cold bridges
- The protruding part of the tape can be easily and cleanly cut off at the edge of the plaster or the gypsum plasterboard

Colour	White
Width	35 mm
Length of roll	25 m

Art. no. 0992 500 020

P. Qty.: 10

Please consider the legal instruction at the beginning of this chapter.

Fibreglass reinforcement strip

For filling plasterboard and for bridging holes and cracks

Material	Fibre glass
Colour	White
Width	48 mm
Length	90 m

Art. no. 0992 500 001

P. Qty.: 1/24

Please consider the legal instruction at the beginning of this chapter.

Glass fibre fleece joint strip

For filling and restoring cracks in indoor plaster and gypsum plasterboard panels

- Filling and sanding operations are reduced
- Breathable and water-permeable
- Low moisture absorption

Width	50 mm
Thickness	0.34 mm
Length	25 m

Art. no. 0992 500 005

P. Qty.: 40

Please consider the legal instruction at the beginning of this chapter.

Cover film

Rolled LDPE cover film for large-scale covering during renovation or painting tasks

Advantage of LDPE quality

LDPE (low-density polyethylene) films are softer and more supple than HDPE films. On account of their increased flexibility/elasticity, LDPE films have greater tear resistance.

Width	2 m
-------	-----

Area	Length	Foil thickness	Art. no.	P. Qty.
100 m ²	50 m	16 µm	0818 001 110	800
100 m ²	50 m	40 µm	0818 001 120	100
200 m ²	100 m	16 µm	0818 001 210	200/800

Please consider the legal instruction at the beginning of this chapter.

Cover film

Rolled HDPE cover film

Advantage of HDPE quality

- The high density of HDPE films adds increased rigidity and has a higher melting temperature (130–135°C).

Therefore, HDPE has greater temperature resistance and chemical resistance than LDPE films.

- Polyethylene films protect against all standard types of paint and varnish. However, the solvents contained migrate through the film after prolonged exposure.

However, the mechanical characteristics are barely affected by this migration.

- HDPE films of the same thickness are more resistant to paints and varnishes and have greater migration resistance than LDPE films.

Width	2 m
Width (folded)	0.5 m
Foil thickness	6 µm

Area	Length	Art. no.	P. Qty.
100 m ²	50 m	0818 001 100	2000
200 m ²	100 m	0818 001 200	200/2000

Please consider the legal instruction at the beginning of this chapter.

The film is not resistant to UV, which means that the film must be protected from UV radiation. If exposed to UV light, the product loses its mechanical properties in as little as approx. 1–2 months.

Paint tarpaulin

In HDPE quality

Advantages of HDPE quality:

- The high density of HDPE films adds increased rigidity and has a higher melting temperature (130–135°C).

Therefore, HDPE has greater temperature resistance and chemical resistance than LDPE films.

- Polyethylene films protect against all standard types of paint and varnish. However, the solvents contained migrate through the film after prolonged exposure.

However, the mechanical characteristics are barely affected by this migration.

- HDPE films of the same thickness are more resistant to paints and varnishes and have greater migration resistance than LDPE films.

Width	4 m
Length (folded)	25 cm
Width (folded)	21 cm
Foil thickness	6 µm

Continuation **Paint tarpaulin**

Area	Length	Art. no.	P. Qty.
20 m ²	5 m	0818 000 020	30
50 m ²	12.5 m	0818 000 050	15

Please consider the legal instruction at the beginning of this chapter.

The film is not resistant to UV, which means that the film must be protected from UV radiation. If exposed to UV light, the product loses its mechanical properties in as little as approx. 1–2 months.

Paint tarpaulin

In LDPE quality

Advantage of LDPE quality:

- The melting point of LDPE films is between 105–118 °C.
- Polyethylene films protect against all standard types of paint and varnish, however the solvents contained migrate through the film after prolonged exposure.
However, the mechanical characteristics are barely affected by this migration.

Area	20 m ²
Length	5 m
Width	4 m

Foil thickness	Art. no.	P. Qty.
10 µm	0818 000 120	20
16 µm	0818 000 220	20

Please consider the legal instruction at the beginning of this chapter.

The film is not resistant to UV, which means that the film must be protected from UV radiation. If exposed to UV light, the product loses its mechanical properties in as little as approx. 1–2 months.

HDPE UV fold masker

Statically charged, pre-folded cover film with a UV-resistant PE-coated fabric masking tape for indoor and outdoor use.

- UV-resistant
- The paint will not run thanks to the embossed film

Edge-adhering HDPE film

- Pre-folded
- Lightly embossed
- Charged with static electricity

Adhesive tape backing material	PE-coated fabric
Foil backing material	Polyethylene
Foil thickness	0.01 mm
Adhesive base	Natural rubber
Colour	Blue (base material), Transparent (film material)
Min./max. processing temperature	5 to 40 °C

Min./max. temperature resistance	-10 to 50 °C
Max. usage duration	3 Weeks
Moisture resistance	Yes
Ultraviolet resistance	Yes
Shelf life from production/conditions	12 Month/at 20 °C and 50% humidity

Length of roll	Width (opened out)	Art. no.	P. Qty.
17 m	266 cm	0992 406 266	1/30
20 m	55 cm	0992 406 055	1/60
20 m	140 cm	0992 406 140	1/30

Please consider the legal instruction at the beginning of this chapter.

- Adhesive edge not suitable for use on coated glass (e.g. tinted glass/self-tinting glass).
- Plastic surfaces with plasticisers and nitrate varnishes and precious metals may lead to residues. In these cases, a test application of 48 hours is recommended. Not suitable for porous or absorbent surfaces, e.g. porous natural stone, marble, granite, concrete and wood (non-painted). Discolouration may occur on these surfaces.

UV HDPE precision folding masker

Pre-folded cover film with a very thin and supple special paper tape for demanding indoor and outdoor masking work

- Very thin and supple tear-off paper
- Special acrylate adhesive for especially gentle bonds on delicate surfaces
- Outstanding UV resistance of up to 6 months

Adhesive tape backing material	Tear paper
Foil backing material	Polyethylene
Foil thickness	9 µm
Adhesive base	Acrylate
Min./max. processing temperature	5 to 40 °C
Max. usage duration	4 Month
Moisture resistance	Yes
Ultraviolet resistance	4 months, outdoor weathering

Colour	Length of roll	Width (opened out)	Shelf life from production/conditions	Art. no.	P. Qty.
Transparent (film material), Yellow (base material)	20 m	270 cm		0992 409 270	5/35
Transparent (film material), Yellow (base material)	33 m	110 cm		0992 409 110	5/40
Yellow (base material), Transparent (film material)	20 m	180 cm	24 Month/at 20 °C and 50% relative humidity	0992 409 180	5/30

Continuation **UV HDPE precision folding masker**

Colour	Length of roll	Width (opened out)	Shelf life from production/conditions	Art. no.	P. Qty.
Yellow (base material), Transparent (film material)	33 m	55 cm		0992 409 055	5/60
Yellow (base material), Transparent (film material)	33 m	140 cm	24 Month/at 20 °C and 50% relative humidity	0992 409 140	5/40

Please consider the legal instruction at the beginning of this chapter.

- The tape must be pulled off when dry
- Exercise caution with paints containing zinc or zinc oxide, since residues may be left

HDPE fold masker

Statically charged, pre-folded cover film with a crepe masking tape for indoor use

Edge-adhering HDPE film

- Pre-folded
- Lightly embossed
- Charged with static electricity

Highly adhesive on paint

The paint will not run thanks to the embossed film.

Adhesive tape backing material	Impregnated paper
Foil backing material	Polyethylene
Foil thickness	0.01 mm
Adhesive base	Natural rubber
Colour	Transparent (film material), Chamois (base material)
Min./max. processing temperature	10 to 40 °C
Min. temperature resistance	0 °C
Max. temperature resistance	50 °C
Max. usage duration	2 d
Moisture resistance	Yes

Width (opened out)	Length of roll	Art. no.	P. Qty.
55 cm	33 m	0992 405 055	1/60
140 cm	33 m	0992 405 140	1/20
266 cm	20 m	0992 405 266	1/20

Please consider the legal instruction at the beginning of this chapter.

To ensure residue-free removal, the tape must be removed immediately after the paint or varnish has dried. The adhesive tape is not UV-resistant and is therefore not suitable for outdoor applications.

LDPE fold masker

High tear-resistant, pre-folded cover film with UV-resistant PE-coated fabric cover tape for indoor and outdoor applications.

UV-resistant

Can be removed residue-free within up to three weeks

- Long-term fabric adhesive with thick natural rubber adhesive
- Good water and solvent resistance

Adhesive tape backing material	PE-coated fabric
Foil backing material	Polyethylene
Foil thickness	0.05 mm
Adhesive base	Natural rubber
Colour	Blue (base material), Transparent (film material)
Min./max. processing temperature	5 to 40 °C
Min./max. temperature resistance	-10 to 50 °C
Length of roll	15 m
Max. usage duration	3 Weeks
Moisture resistance	Yes
Ultraviolet resistance	Yes
Shelf life from production/conditions	12 Month/at 20 °C and 50% humidity

Width (opened out)	Art. no.	P. Qty.
60 cm	0992 416 060	1/24
160 cm	0992 416 160	1/12

Please consider the legal instruction at the beginning of this chapter.

- Adhesive edge not suitable for use on glass e.g. tinted glass/self-tint glass).
- Certain plastic surfaces (certain types of PVC) and cellulose nitrate varnishes and precious metals may cause residues. In these cases a test application for 48 hours is recommended. Not suitable for porous or absorbent surfaces, e.g. porous natural stone, marble, granite, concrete and untreated wood. Discolouration may occur on these surfaces.

Dust protection door

Resealable doorway made of dustproof special fleece with zip, fastened with double-sided adhesive tape (included)

Special dustproof but air-permeable fleece

- Protects adjacent rooms from dust whilst renovations are carried out
- Also screens the site and protects against unauthorised access to the room
- Air-permeable material allows for fresh air supply
- Easy to fit and remove

Material	Polypropylene fleece
Adhesive base	Acrylate dispersion
Height	2.1 m

Continuation **Dust protection door**

Width	1.1 m
Passageway height	1.9 m
Passageway width	0.7 m
Length of adhesive tape	7 m
Width of adhesive tape	38 mm
Max. usage duration	7 d
Min. processing temperature	15 °C

Art. no. 0992 419 990

P. Qty.: 1/5

Adhesive tape must not be exposed to direct sunlight once applied. The surface must be dry and free from dust or grease. Paint or varnish must be completely cured. Do not use on marble or granite surfaces, very absorbent surfaces or surfaces with insufficient inner stability, such as poorly adhering paint. We recommend performing an adhesion test in an inconspicuous area.

Dust protection wall

Resealable access for larger room partitions, made of dustproof special fleece with three zips, fastened with double-sided adhesive tape (included)

- Special dustproof but air-permeable fleece
- High-quality zip fastening
- Versatile use
- Easy to remove from majority of surfaces
- Reusable

Material	Polypropylene fleece
Adhesive base	Acrylate dispersion
Height	3.2 m
Width	3.3 m
Passageway height	3.2 m
Passageway width	1.1 m
Length of adhesive tape	7 m
Width of adhesive tape	38 mm
Max. usage duration	7 d
Min. processing temperature	15 °C

Art. no. 0992 419 992

P. Qty.: 1/3

Please consider the legal instruction at the beginning of this chapter.

Universal assembly support

Universal mounting aid that can be used even in instances where a single person is performing the installation work, and goes a long way to making work easier.

- Easy to use
- Extremely safe
- Robust design
- One-handed operation
- Continuously adjustable
- Automatic feed
- Ball joints and slip-proof rubber plates allow angled settings for up to 50° roof inclines

Load capacity	60 kg
Min./max. length	145-290 cm
Max. roof slope	50 Degree
Product weight (per item)	1870 g

Art. no. 0962 980 850

P. Qty.: 1

Corner angle with fabric

For reinforcement of external 90° corners in ETICS

High tear resistance

Profile with continuous fabric

Material of the profile	PVC-U, impact resistant
Side dimension of profile	21 x 21 mm
Material of the mesh	Fibre glass
Length	2.5 m

Side dimension of fabric	Art. no.	P. Qty.
8 x 12 cm	0519 520 012	125
10 x 15 cm	0519 520 015	125

Corner angle with fabric Flexible

For reinforcement of external 50° to 180° corners in ETICS

Universal application for edges from 50° to 180°

Bendable

Retains shape even after bending

Firmly attached legs, midsection not in plasticised PVC

High degree of tear resistance

Continuous fabric on profile

Material of the profile	PVC-U, impact resistant
Side dimension of profile	23 x 23 mm

Continuation **Corner angle with fabric Flexible**

Material of the mesh	Fibre glass
Length	2.5 m

Side dimension of fabric	Art. no.	P. Qty.
8 x 12 cm	0519 520 112	125
10 x 15 cm	0519 520 115	125

Corner angle with fabric Endless

Continuous product, for reinforcement of external 50° to 180° corners in ETICS

Universal application for edges from 50° to 180°

Bendable

Retains shape even after bending

Firmly attached legs, midsection not in plasticised PVC

No waste

- Continuous product
- Simply cut off the required lengths using scissors

Space-saving in vehicles and stockrooms, product is permanently protected

Handy dispenser box

High tear resistance

Continuous fabric on profile

Material of the profile	PVC-U, impact resistant
Side dimension of profile	23 x 23 mm
Material of the mesh	Fibre glass
Length of roll	50 m

Side dimension of fabric	Art. no.	P. Qty.
8 x 12 cm	0519 520 212	50
10 x 15 cm	0519 520 215	50

Corner angle with fabric with smoothing edge

For simple reinforcement of external 90° corners in ETICS

- Easier smoothing, defined plaster thickness
- Permanent bond between profile/fabric, high tear resistance
- Includes plug connector

Material of the profile	PVC-U, impact resistant
Side dimension of profile	28 x 28 mm
Material of the mesh	Fibre glass
Length	2.5 m

Side dimension of fabric	Art. no.	P. Qty.
8 x 12 cm	0519 520 312	60
10 x 15 cm	0519 520 315	60

Round arch profile with fabric

For curved plaster edges

High degree of tear resistance

Continuous fabric on profile

Material of the profile	PVC-U, impact resistant
Material of the mesh	Fibre glass
Side dimension of fabric	10 x 15 cm
Length	2.5 m

Art. no. 0519 522 001

P. Qty.: 60

Pre-cut mesh patch

For reinforcing surfaces in ETICS

Non-slip

Material	Fibre glass, shift resistant
Coating weight per m ²	160 g
Mesh size	4 x 4 mm
Colour	White

Roll width x roll length	Art. no.	P. Qty.
0.33 x 100 m	0519 520 005	33
0.5 x 100 m	0519 520 006	50

ETAG-tested

Sheet metal end profile Professional

For compensating, flexible connections between plaster connections in ETICS and sheet metal flashing or roller shutter casing connections

Includes plug-in connector

Material	Polyvinyl chloride - PVC hard, impact resistant
Material of the mesh	Fibre glass
Length	2 m

Art. no. 0519 522 052

P. Qty.: 50

Attic profile Professional

For clean connections to attic covers

Prevents damage caused by water saturation from rear

Precise edge formation

Easier smoothing, defined plaster thickness

Smoothing edge

Material	Polyvinyl chloride - PVC hard, impact resistant
Material of the mesh	Fibre glass
Plaster thickness	5.9 mm
Length	2 m

Art. no. 0519 522 150

P. Qty.: 50

Basic skirting profile Uni

For the skirting finish

Material of the profile	PVC-U, impact resistant
-------------------------	-------------------------

Profile width	Suitable for insulation thickness (D)	Length	Art. no.	P. Qty.
100 mm	100 - 180 mm	2 m	0519 524 101	30
160 mm	160 - 240 mm	2 m	0519 524 161	20

Skirting profile, aluminium

To finish bottom of façade insulation

- Good dripping properties
- Fast economical application

Material	Aluminium
Length	2.5 m

Profile width	Material thickness	Art. no.	P. Qty.
40 mm	1 mm	0519 526 040	25
50 mm	1 mm	0519 526 050	25
60 mm	1 mm	0519 526 060	25
80 mm	1 mm	0519 526 080	25
100 mm	1 mm	0519 526 100	25
120 mm	1.2 mm	0519 526 120	15
140 mm	1.2 mm	0519 526 140	15
160 mm	1.2 mm	0519 526 160	15
180 mm	1.2 mm	0519 526 180	15
200 mm	1.2 mm	0519 526 200	15

Clip-in profile

For aluminium skirting profile

Material	Polyvinyl chloride - PVC hard
Material of the mesh	Fibre glass
Length	2.5 m

Art. no. 0519 528 001

P. Qty.: 50

Expansion joint profile With type E smoothing edge

For expansion joints between building surfaces

Soft and weather-resistant

Loop made of plasticised PVC

Permanent bond between profile/fabric

Co-extrusion

Type description	Type E (surface)
Material of the profile	Plastic
Material of the mesh	Fibre glass
Plaster thickness	5 mm
Length	2 m

Art. no. 0519 522 021

P. Qty.: 50

Movement joint profile

For movement joints, flush-mounted or as internal corner

Permanent bond between profile/fabric

Co-extrusion

Material	Polyvinyl chloride - PVC hard, impact resistant
Material of the mesh	Fibre glass
Plaster thickness	6 mm
Length	2 m

Art. no. 0519 522 031

P. Qty.: 50

Bridges component movements up to max. 5 mm. Not suitable for building expansion joints or horizontal applications. After applying the final coat, the protective tape is to be removed.

Window-sill connection strip Professional

For connecting the second sealant layer of windowsill to the ETICS system

Rainwater is channelled away by the second layer of sealant

5° incline prescribed by profile geometry

Avoids dirtying façades

With drip edge

Includes plug-in connector

Material of the profile	PVC-U, impact resistant
Material of the mesh	Fibre glass
Length	2.5 m

Art. no. 0519 522 061

P. Qty.: 25

Fabric lintel corner edge

Prefabricated ETICS fabric corner edge with diagonal reinforcement

High rigidity, excellent application

Material	Fibre glass, shift resistant
Coating weight of mesh per m ²	160 g
Mesh size	4 x 4 mm
Colour	White

Reveal depth	Art. no.	P. Qty.
10 cm	0519 519 010	25
20 cm	0519 519 020	25

ETAG-tested

Roller shutter connection profile 3D Plus

Ideal profile for sealing roller shutter profile joints against driving rain

Very high 3D movement absorption

- High-quality TPE membrane
- Suitable for large-scale glazing up to 10 m²

Secure and long-lasting integration of fabric

Coextruded fabric

Material of the profile	PVC-U, impact resistant
Material of the foam	Closed-cell PE foam
Width	11 mm
Motion absorption capacity compression	2.2 mm
Motion absorption capacity elongation	5 mm

Length	Art. no.	P. Qty.
1.4 m	0519 556 111	35
2.4 m	0519 556 112	60

Please note the assembly instructions for this product.

Reinforcement fabric

For reinforcing bituminous and cement-based surface seals

- Required for seals in line with DIN 18533
- Extremely tear-resistant
- Free from plasticisers and non-rotting
- Alkali-resistant
- Unlimited shelf life

Material	Glass fibre
Roll width x roll length	1 x 100 m
Coating weight per m ²	75 g
Mesh size	5 x 5 mm
Colour	White
DIN	18533

Art. no. 0893 212 105

P. Qty.: 100/2400

Please consider the legal instruction at the beginning of this chapter.

EIFS material 160 G, 4 x 4

For reinforcing surfaces in ETICS with rigid foam insulation materials

Non-slip

Material	Fibre glass, shift resistant
Roll width x roll length	1 x 50 m
Coating weight per m ²	160 g
Mesh size	4 x 4 mm

Colour	Art. no.	P. Qty.
White	0519 530 001	50
Yellow	0519 530 002	50

ETAG-tested

EIFS material 200 G, 7 x 7

For reinforcing surfaces in ETICS with mineral wool insulation materials

Non-slip

Material	Fibre glass, shift resistant
Roll width x roll length	1 x 50 m
Coating weight per m ²	200 g
Mesh size	7 x 7 mm
Colour	White

Art. no. 0519 530 010

P. Qty.: 50

ETAG-tested

EIFS material, 310 G 8.5 x 6.5

Reinforcement fabric for high loads for reinforcing surfaces inside and outside

- The material is non-slip and alkali-resistant
- Withstands high shock loads

Material	Fibre glass, shift resistant
Roll width x roll length	1 x 50 m
Coating weight per m ²	310 g
Mesh size	8,5 x 6,5 mm
Colour	White

Art. no. 0519 530 011

P. Qty.: 50

Exterior rendering fabric

For reinforcing surfaces in exterior rendering

Anti-slip

Material	Fibre glass, shift resistant
Roll width x roll length	1 x 100 m
Coating weight per m ²	145 g
Mesh size	10 x 10 mm
Colour	Blue

Art. no. 0519 530 020

P. Qty.: 100

ETAG-tested

Interior plaster fabric

For reinforcing surfaces in interior plaster

Non-slip

Material	Fibre glass, shift resistant
Roll width x roll length	1 x 100 m
Coating weight per m ²	75 g
Mesh size	5 x 5 mm
Colour	White

Art. no. 0519 530 030

P. Qty.: 100

ETAG-tested

Plastering border with shadow gap and fabric

One piece

Absorption of movements >2 mm

Shadow gab

- Neat finish (only approx. 1 mm visible white edge)
- Protects the foam tape

Coextruded fabric

Secure and long-lasting integration of fabric

Supported removal tab

Keeps profiles upright

Two smoothing edges (with 9 mm width)

- Simplifies smoothing the reinforcement and plaster layer
- Reinforcement fabric positioned in upper third of reinforcement adhesive

Material of the profile	PVC-U, impact resistant
Material of the foam	Closed-cell PE foam
Min. motion absorption	2 mm
Length	2.4 m

Width	Art. no.	P. Qty.
6 mm	0519 550 624	72
9 mm	0519 550 924	72

Plaster stop bead Standard with fabric

Standard plaster stop bead with fabric, for sealing window and door joints in ETICS against driving rain

Absorption of movements >2 mm

Secure and long-lasting integration of fabric

Coextruded fabric

Simplifies smoothing the fabric and plaster coat

- Two smoothing edges (with 9 mm width)
- Reinforcement fabric positioned in upper third of reinforcement adhesive

Material of the profile	PVC-U, impact resistant
Material of the foam	Closed-cell PE foam
Min. motion absorption	2 mm

Width	Length	Art. no.	P. Qty.
6 mm	1.4 m	0519 552 614	42
6 mm	2.4 m	0519 552 624	72
9 mm	1.4 m	0519 552 914	42
9 mm	2.4 m	0519 552 924	72

Please note the assembly instructions for this product.

Drip edge, UP

For horizontal plaster edges on overhanging façades

Permanent bond between profile/fabric, high tear resistance

Co-extrusion

Better plaster adhesion

Profiled surface

Includes plug-in connector

Material of the profile	PVC-U, impact resistant
Material of the mesh	Fibre glass
Min./max. plaster thickness	5-6 mm
Length	2 m

Art. no. 0519 522 005

P. Qty.: 50

Skirting plug-in profile Uni with mesh

For insertion between façade and perimeter insulation

Insulation thicknesses of up to 240 mm are possible in combination with Uni skirting plug-in profile

One product for multiple insulation thicknesses

Easy flush alignment

Smoothly adjustable

Can be shortened to 80 mm overhang

With breakage point

Easier smoothing, defined plaster thickness

With smoothing edge

With drip edge

Includes plug-in connector

Material of the profile	PVC-U, impact resistant
Material of the mesh	Fibre glass
Length	2 m

Art. no. 0519 522 110

P. Qty.: 50

We recommend using a compressed sealing tape between skirting insulation and profile.

Expansion joint profile With type V smoothing edge

For expansion joints between building corners

Soft and weather-resistant

Loop made of plasticised PVC

Permanent bond between profile/fabric

Co-extrusion

Type description	Type V (corner)
Material of the profile	Plastic
Material of the mesh	Fibre glass
Plaster thickness	5 mm
Length	2 m

Art. no. 0519 522 020

P. Qty.: 50

Sealing plaster stop bead 3D Plus with mesh

Sealing plaster stop bead with high 3D movement absorption for sealing window and door joints against driving rain

Suitable for large-scale glazing up to 10 m²

- High 3D movement absorption
- High-quality TPE membrane

Secure and long-lasting integration of fabric

Coextruded fabric

Keeps profiles upright

Supported removal tab

Material of the profile	PVC-U, impact resistant
Material of the foam	Closed-cell PE foam
Width	19 mm
Motion absorption capacity compression	2.1 mm

Length	Art. no.	P. Qty.
1.4 m	0519 553 191	35
2.4 m	0519 553 192	60

Please note the assembly instructions for this product.

Sealing plaster stop bead 3D Reno with mesh

Narrow sealing plaster stop bead for sealing window and door joints against driving rain

Suitable for large-scale glazing up to 10 m²

- Very high 3D movement absorption
- High-quality TPE membrane

Ideally suited for use in renovations

Secure and long-lasting integration of fabric

Coextruded fabric

Keeps profiles upright

Supported removal tab

Material of the profile	PVC-U, impact resistant
Material of the foam	Closed-cell PE foam
Width	6 mm
Motion absorption capacity compression	2 mm

Length	Art. no.	P. Qty.
1.4 m	0519 554 061	35
2.4 m	0519 554 062	60

Should only be used in renovation projects or in exceptional cases in new builds, where there is not enough space for conventional sealing plaster stop beads.

Please note the assembly instructions for this product.

Sealing plaster stop bead 3D Premium with mesh

Premium sealing plaster stop bead with very high 3D movement absorption for sealing window and door joints against driving rain

Very high 3D movement absorption

- High-quality TPE membrane
- Suitable for large-scale glazing up to 10 m²

Secure and long-lasting integration of fabric

Coextruded fabric

Keeps profiles upright

Supported removal tab

Material of the profile	PVC-U, impact resistant
Material of the foam	Closed-cell PE foam
Motion absorption capacity compression	2.2 mm

Width	Length	Art. no.	P. Qty.
10 mm	1.4 m	0519 555 101	35
10 mm	2.4 m	0519 555 102	60
17 mm	1.4 m	0519 555 171	35
17 mm	2.4 m	0519 555 172	60

Please note the assembly instructions for this product.

Sealing plaster stop bead 3D aluminium with mesh

Ideal profile for sealing window and door joints with aluminium facings against driving rain

Very high 3D movement absorption

Secure and long-lasting integration of fabric

Coextruded fabric

Can be used with facings of 5–25 mm

Keeps profiles upright

Supported removal tab

Material of the profile	PVC-U, impact resistant
Material of the foam	Closed-cell PE foam
Width	19 mm
Motion absorption capacity compression	2.2 mm

Length	Art. no.	P. Qty.
1.4 m	0519 558 191	28
2.4 m	0519 558 192	48

Please note the assembly instructions for this product.

Plaster stop bead Standard

For sealing connection joints on windows and doors

Absorption of movements >2 mm

Material	Polyvinyl chloride - PVC hard, impact resistant
Adhesive system	Self-adhesive

Width	Length	Art. no.	P. Qty.
6 mm	1.4 m	0519 542 614	84
6 mm	2.4 m	0519 542 624	144
9 mm	1.4 m	0519 542 914	42
9 mm	2.4 m	0519 542 924	72
15 mm	2.4 m	0519 542 152	72

Please note the assembly instructions for this product.

Sealing plaster stop bead 3D Smart

Sealing plaster stop bead with high 3D movement absorption. For sealing window and door joints against driving rain in both inner and outer plastering systems

High 3D movement absorption

- High-quality TPE membrane
- Suitable for large-scale glazing up to 10 m²

Ideal plaster connection through perforated and angled plaster-in bracket

Material	Polyvinyl chloride - PVC hard, impact resistant
Width	12 mm
Adhesive system	Self-adhesive

Length	Art. no.	P. Qty.
1.4 m	0519 543 121	42
2.4 m	0519 543 122	72

Please note the assembly instructions for this product.

Corner profile, aluminium, 90°

High-quality aluminium ensures exceptional protection on edges and corners

Strong triangular box

Improved protection of goods against transport damage

Material	Aluminium
Material thickness	0.4 mm
Side dimension of profile	25 x 25 mm
Design	Perforated

Length	Art. no.	P. Qty.
2.5 m	0519 400 025	250
3 m	0519 400 030	300

Aluminium end profile

Göppinger profile

Strong triangular box

Improved protection of goods against transport damage

Material	Aluminium
Material thickness	0.4 mm
Side dimension of profile	13.5 x 23 mm
Design	Nonperforated/perforated

Length	Art. no.	P. Qty.
2.5 m	0519 400 225	250
3 m	0519 400 230	300

Plastic 90° corner profile

Impact-resistant

No impact damage, so less susceptible to transport damage

Arms 0.6 mm

For thin skim coats

Material	Polyvinyl chloride - PVC hard, impact resistant
Min./max. material thickness	0.6-1 mm
Side dimension of profile	25 x 25 mm
Design	Perforated

Continuation **Plastic 90° corner profile**

Length	Art. no.	P. Qty.
2.5 m	0519 402 025	125
3 m	0519 402 030	150

Bordering strip Professional

Unequal legs

Foam adhesive tape

Flexible join, prevents separation

Shadow gab

Neat join

Material	Polyvinyl chloride - PVC hard, impact resistant
Material thickness	0.8 mm
Suitable for plate thickness	12.5 mm
Length	2.5 m

Art. no. 0519 402 625

P. Qty.: 100

Linen adhesive tape

Universal fabric adhesive tape

High-quality spun rayon fabric base

The tape is particularly tear-resistant and is therefore suitable for strengthening and protecting a range of objects.

Extremely strong rubber adhesive

Excellent adhesion even on uneven, rough and fibrous surfaces.

Can be written on

The tape is ideally suited for marking.

Adhesive base	Natural rubber
Backing material	Rayon fabric
Thickness	0.29 mm
Length	50 m
Min./max. temperature resistance	-40 to 190 °C

Colour	Width	Art. no.	P. Qty.
Black	19 mm	0992 383	1/8
Black	50 mm	0992 382	1/3
Grey	19 mm	0992 385	1/8
Grey	50 mm	0992 384	1/3

Please consider the legal instruction at the beginning of this chapter.

The linen adhesive tape is not resistant to UV; therefore, it should not be exposed to direct sunlight.

The surfaces to be adhered must be dry and free from dust, grease and silicone.

To ensure proper adhesion, the tape must be sufficiently pressed onto the material to be glued.

Special PP packing tape

Very strong and tear-proof backing film

- High-quality packing tape
- The highest tear resistance in longitudinal and cross direction
- High initial adhesive strength allows optimum and secure sealing, even with poor grades of cardboard packaging.

Backing material	PP foil
Adhesive base	Acrylate
Colour	Transparent
Width	50 mm
Thickness	62 µm
Length	66 m

Art. no. 0985 050 5

P. Qty.: 6

Please consider the legal instruction at the beginning of this chapter.

PP packing tape

Universal use for sealing shipping boxes made of cardboard, solid board and corrugated cardboard

- High tear resistance
- Solvent-free

Backing material	PP foil
Adhesive base	Acrylate
Width	50 mm
Length	66 m

Colour	Thickness	Art. no.	P. Qty.
Brown	0.052 mm	0985 050 2	6
Transparent	0.05 mm	0985 050 4	6

Please consider the legal instruction at the beginning of this chapter.

PVC packing tape

High degree of longitudinal tear resistance and lateral flexibility

- Can be unrolled quietly
- Protects against wet and damage
- Slightly textured
- High degree of adhesion

Backing material	PVC film
Adhesive base	Natural rubber
Width	50 mm
Thickness	0.055 mm
Length	66 m

Continuation **PVC packing tape**

Colour	Art. no.	P. Qty.
Brown	0985 050 001	6
Transparent	0985 050	6

Please consider the legal instruction at the beginning of this chapter.

Paper packing tape

Easy to tear off by hand

- With reinforced stretching
- Solvent-free
- Environmentally friendly alternative

Backing material	Paper
Adhesive base	Synthetic natural rubber
Colour	Brown
Width	50 mm
Thickness	0.107 mm
Length	50 m

Art. no. 0985 050 1

P. Qty.: 6

Please consider the legal instruction at the beginning of this chapter.

Packing tape dispenser

Universal use for all commercially available packing tape dispensers up to 50 mm tape width. With protective cover.

- Retractable blade with protective cover protects against injuries
- Ergonomic soft grip for user-friendly and easy handling
- Adjustable roller brake for simple application

Width of band	50 mm
---------------	-------

Art. no. 0985 052 005

P. Qty.: 1

Shipping box

High-quality box for shipping or storing products

- Sturdy structure with high-quality corrugation protects products against damage or loss
- Cardboard box can be set up quickly

Design	External length	External width	External height	Internal length	Art. no.	P. Qty.
Folding carton	580 mm	352 mm	295 mm	574 mm	0992 905 040	10
Tuck-end, auto-bottom folding carton	287 mm	188 mm	100 mm	278 mm	0992 905 010	15
Tuck-end, auto-bottom folding carton	287 mm	188 mm	200 mm	280 mm	0992 905 020	20
Tuck-end, auto-bottom folding carton	393 mm	289 mm	205 mm	390 mm	0992 905 030	14

Air bubble film

High-quality air bubble film in a practical dispenser box for surface protection, as padding to protect delicate products and for filling in cavities.

- Film with barrier layer material made of environmentally friendly LDPE
- Storage and transport volume reduced by up to 40%
- Film can be torn off easily, cleanly and straight to the desired length

Material	LDPE - Low density polyethylene
Colour	Transparent
Width	300 mm
Length	75 m
Bubble diameter	10 mm

Art. no. 0992 900 280

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Packfix packing film

For fast packing without cutting or adhesive residues

- No adhesive residues
- Good moulding capability
- Quick tear-off
- Recyclable PE film

Material	PE - Polyethylene
----------	-------------------

Colour	Width	Length	Foil thickness	Art. no.	P. Qty.
Black	500 mm	270 m	20 µm	0992 900 220	6
Transparent	100 mm	150 m	23 µm	0992 900 1	10
Transparent	500 mm	270 m	20 µm	0992 900 2	6

A different handle must be used for the 500 mm film than for the 100 mm film.

Handle for packaging film Packfix

For 100 mm film width

Type	Film dispenser
Suitable for	100 mm foil width

Art. no. 0992 901

P. Qty.: 3

Packaging film Pre-stretched Packfix

For optimum securing of load units with low consumption

- Film already pre-stretched due to special production process
- Reduced slipping of goods on pallets
- Doubled edges prevent tearing and provide additional safety

Material	PE - Polyethylene
Colour	Transparent
Width	430 mm
Length	600 m
Foil thickness	8 µm

Art. no. 0992 900 210

P. Qty.: 6

Please consider the legal instruction at the beginning of this chapter.

Transport pad

Slightly adhesive foam pads for secure transport of surfaces requiring protection

- Secure transport protection
- No adhesive residue
- Clean surfaces

Length	40 mm
Width	40 mm
Min. processing temperature	-20 °C
Max. processing temperature	80 °C
Shelf life from production/conditions	24 Month/cool and dry storage area, no exposure to sunlight, 15°C to 25°C

Design	Colour	Length x width x height (L x B x H)	Art. no.	P. Qty.
Hard	Black	40 x 40 x 10 mm	0875 850 112	3000
Hard	Black	40 x 40 x 25 mm	0875 850 113	1500
Soft	White	40 x 40 x 10 mm	0875 850 110	3000
Soft	White	40 x 40 x 25 mm	0875 850 111	1500

Please consider the legal instruction at the beginning of this chapter.

If stored in a cool, dry place (+15°C to +25°C, no sunlight), the pads maintain optimum adhesion for a period of 24 months. Please observe the labelling on the carton.

Adhesive sealing tape EURASOL®

Extremely adhesive and versatile adhesive tape for airtight and windproof bonding

- Tested resistance to ageing, protects against moisture and mould growth in the insulation
- Quick, easy and safe application thanks to excellent initial and final adhesion
- Solvent-free
- Certified for thermal ageing resistance and moisture resistance by the University of Kassel
- Proof of airtight seal from the Fraunhofer Institute for Building Physics in Stuttgart based on DIN 18055/DIN EN 42 and DIN V 4108-7/prEN 12114
- ENeV

Backing material	PE film with mesh
Adhesive base	Acrylate dispersion
Colour	White (base material)
Width	60 mm
Length	25 m
Min./max. processing temperature	0 to 50 °C
Min./max. temperature resistance	-40 to 100 °C
Ultraviolet resistance	3 months
Solvent-free	Yes

Continuation **Adhesive sealing tape EURASOL®**

Art. no. 0992 700 050

P. Qty.: 6/22

Please consider the legal instruction at the beginning of this chapter.

Adhesive sealing tape EURASOL® MAX

Particularly adhesive, UV-resistant and weather-resistant adhesive tape for airtight and windproof bonding both outdoors and indoors

Extremely high resistance to UV and weathering thanks to black special film

- Maximum protection in rain and wind, especially for outdoor adhesive bonds
- Permanently protects against building damage and energy loss in insulation

Contains especially strong and high-quality adhesive film

- Extremely strong adhesion on a range of surfaces
- Safe bonding even at low temperatures down to -10 °C

Backing material	PE film with mesh
Adhesive base	Acrylate dispersion
Colour	Black
Length	25 m
Min./max. processing temperature	-10 to 50 °C
Min./max. temperature resistance	-40 to 100 °C
Ultraviolet resistance	12 months
Solvent-free	Yes

Width	Sloting	Art. no.	P. Qty.
60 mm		0992 710 160	6
100 mm		0992 710 162	2
190 mm	95/95 mm	0992 710 161	2

Please consider the legal instruction at the beginning of this chapter.

Eurasol Max is ideal for bonding WÜTOP roof protection films, WÜTOP vapour barriers and WÜTOP vapour retarders and has been tested on these films. We therefore recommend the use of these WÜTOP films.

Adhesive sealing tape Eurasol® Thermo HT

Adhesive tape with extremely high adhesive force for demanding air-tight and wind-tight bonds both indoors and outdoors.

- Extremely powerful initial and permanent adhesive force on many surfaces, in particular Wütop Thermo films
- Secure bonding from as low as -10 °C
- High-quality special film with excellent adhesive strength and temperature resistance (up to +120 °C)
- Scrim protects against overstretching
- Solvent-free

Backing material	Special film
Adhesive base	Polyacrylate
Colour	White
Length	25 m
Min./max. processing temperature	-10 to 40 °C
Min./max. temperature resistance	-30 to 120 °C
Ultraviolet resistance	12 months, sunlight, Central Europe
Solvent-free	Yes

Width	Slotting	Art. no.	P. Qty.
60 mm		0992 720 060	10
100 mm	50/50 mm	0992 720 100	6
150 mm	75/75 mm	0992 720 150	4

Please consider the legal instruction at the beginning of this chapter.

Eurasol Thermo HT is ideal for bonding WÜTOP roof protection films, WÜTOP vapour barriers and WÜTOP vapour retarders and has been tested on these films. For this reason, we recommend using WÜTOP films to achieve optimum results. The application surface must be dry and free from grease, chips and dust. Ensure that no standing water can build up within the bonded area. Do not subject the adhered tape to long-term tension.

Adhesive tape STAMISOL

The colour-coordinated adhesive tape for STAMISOL
Color façade membrane provides long-lasting secure bonding

- Permanent, secure bonding on Stamisol façade membranes
- Very good UV, heat and moisture resistance
- Bond fits in well in appearance

Backing material	Polyester
Adhesive base	Acrylate dispersion
Width	80 mm
Length	25 m

Continuation **Adhesive tape STAMISOL**

Min./max. processing temperature	5 to 30 °C
Ultraviolet resistance	Excellent
Solvent-free	Yes

Colour	Art. no.	P. Qty.
Black	0992 712 153	3
Blue	0992 712 178	3
Claret	0992 712 176	3
Green	0992 712 177	3
Ivory	0992 712 174	3
Lemon yellow	0992 712 175	3

Please consider the legal instruction at the beginning of this chapter.

Adhesive sealing tape EURASOL® P

High-quality, paper-based adhesive tape for use indoors

Tested resistance to ageing

- Ensures permanent airtight bonding
- Maximum safety with blower door tests
- Protects against moisture and mould growth in the insulation

Backing material	Synthesis paper
Adhesive base	Acrylate dispersion
Colour	White (base material)
Length	25 m
Min./max. processing temperature	0 to 50 °C
Min./max. temperature resistance	-40 to 100 °C
Solvent-free	Yes

Width	Art. no.	P. Qty.
60 mm	0992 810 060	6
190 mm	0992 810 190	2

Please consider the legal instruction at the beginning of this chapter.

- Certified for thermal ageing and moisture resistance by the University of Kassel.
- Proof of airtight seal from the Fraunhofer Institute for Building Physics in Stuttgart based on DIN 18055 / DIN EN 42 and DIN V 4108-7 / prEN 12114
- ENeV

- The application surface must be dry and free from grease, chips and dust. Ensure that no standing water can build up in bonded areas.

- Please observe our building-related warranty conditions.
- The product is suitable only for indoor use.

Adhesive sealing tape EURASOL® PLUS

Special adhesive tape for corner bonding and edge bonding

- Protects against damp and mould in insulation
- Excellent initial and end adhesion
- Flexible carrier material
- Divided release paper
- Solvent-free

Backing material	PE film with mesh
Adhesive base	Acrylate dispersion
Colour	White
Width	60 mm
Sloting	30/30 mm
Length	25 m
Min./max. processing temperature	0 to 50 °C
Min./max. temperature resistance	-40 to 100 °C
Ultraviolet resistance	3 months
Solvent-free	Yes

Art. no. 0992 710 060

P. Qty.: 6

Please consider the legal instruction at the beginning of this chapter.

- Certified for thermal ageing resistance and moisture resistance by the University of Kassel
- Proof of airtight seal from the Fraunhofer Institute for Building Physics in Stuttgart based on DIN 18055/DIN EN 42 and DIN V 4108-7/prEN 12114
- ENeV

The application surface must be dry and free from grease, chips and dust. Ensure that no standing water can build up in bonded areas.

10-year system warranty applies where used indoors under air-tight conditions.

Adhesive sealing tape EURASOL® DUS

Special adhesive tape for windproof bonding of sarking membrane and roof protection films.

- Fleece overlay protects against weather influences
Ideally suited for outdoor use
- Vapour-permeable membrane backing material
Maximum protection against formation of condensation water
- Excellent initial and final adhesion
Permanently ensures windproof bonding

Continuation **Adhesive sealing tape EURASOL® DUS**

Backing material	Vapour permeable roof underlay
Adhesive base	Modified acrylate
Width	60 mm
Length	25 m
Min./max. processing temperature	0 to 50 °C
Min./max. temperature resistance	-40 to 90 °C

Art. no. 0992 750 050

P. Qty.: 6

Please consider the legal instruction at the beginning of this chapter.

German Energy Saving Ordinance (EnEV)

Eurasol® DUS is ideal for bonding Wütop® roof protection film and has been tested on these films. For this reason, we recommend using Wütop® films to achieve optimum results.

Please observe our building-related warranty conditions.

EURASOL® nail sealing tape

Tested sealing tape for reliably sealing off nail, staple gun and screw penetration points on underlay membranes and roof protection films as well as vapour barriers and vapour retarders.

- Satisfies the requirements of the ZVDH Directive
- Closed-cell soft foam offers maximum reliability
- High adhesive power
- Solvent-free for excellent material compatibility
- High temperature resistance
- Resistant to penetration of water

Material	PE - Polyethylene
Adhesive base	Acrylate dispersion
Colour	Anthracite
Total thickness	3 mm
Length	10 m

Width	Art. no.	P. Qty.
45 mm	0875 850 145	6
60 mm	0875 850 160	5

Please consider the legal instruction at the beginning of this chapter.

EURASOL nail sealing tape is ideally suited for use with WÜTOP Trio/SK and WÜTOP®Trio Plus. We therefore recommend using these underlay membranes to achieve optimum results with the Würth wind and air sealing system, and to take advantage of 10-year system warranty*.

* Please observe our building-specific warranty conditions.

PE nail sealing tape EURASOL®

Tested, one-sided adhesive sealing tape for rainproof sealing of nail and screw penetration points on underlay membranes and roof protection films.

High adhesive strength

Good adhesion on underlay membranes and wood.

Very good material compatibility

Material	PE - Polyethylene
Adhesive base	Synthetic natural rubber
Colour	Red
Total thickness	3 mm
Length	30 m

Width	Art. no.	P. Qty.
45 mm	0875 851 145	7
60 mm	0875 851 160	5

Please consider the legal instruction at the beginning of this chapter.

Satisfies the requirements of the ZVDH Directive

Nail seals are required for temporary covers and if the standard roof pitch is underrun. EURASOL nail sealing tape protects against water penetration, and therefore meets the requirements of the ZVDH.

Maximum reliability with proof of testing

Tested for driving rain resistance by the Fraunhofer Institute for Building Physics in Stuttgart up to 600 Pascal (meets wind strength 11–12).

Tested for driving rain resistance by the Fraunhofer Institute for Building Physics in Stuttgart.

Roof protection film fastening tape EURADOP®

Double-sided adhesive tape for permanent bonding for indoor and outdoor use

- Double-sided adhesive tape
- Tested airtight seal and resistance to ageing
- Many different applications
- Solvent-free
- ENeV
- Certified for thermal ageing resistance and moisture resistance by the University of Kassel

Backing material	PES with mesh
Adhesive base	Modified acrylate
Width	19 mm
Length of roll	50 m
Thickness	0.2 mm
Min. temperature resistance	-40 °C
Max. temperature resistance	90 °C
Min. processing temperature	0 °C
Max. processing temperature	50 °C
Ultraviolet resistance	8 weeks
Full resilience	6 h

Continuation **Roof protection film fastening tape EURADOP®**

Art. no. 0992 700 119

P. Qty.: 18

Please consider the legal instruction at the beginning of this chapter.

Evidence of airtight seal with EURADOP, EURASOL, EURASOL P, EURASOL Plus by Fraunhofer Institute for Building Physics in Stuttgart in accordance with DIN 18055/DIN EN 42 and DIN V 4108-7/prEN 12114

The application surface must be dry and free from grease, chips and dust. Ensure that no standing water can build up within the bonded area. Do not subject the adhered tape to long-term tension.

Exhibition stand construction adhesive tape

Double-sided fabric adhesive tape with a highly adhesive and a less-adhesive side.

- No adhesive residue
- Excellent adhesion of the covered side
- Can be removed by hand

Backing material	Rayon fabric
Adhesive base	Acrylate
Colour	White (base material)
Roll width	50 mm
Length of roll	25 m
Thickness	0.22 mm
Min./max. processing temperature	15 to 30 °C
Min./max. temperature resistance	-30 to 110 °C
Max. usage duration	3 Weeks
Ultraviolet resistance	Yes
Moisture resistance	Yes
Shelf life from production/conditions	12 Month/at 20°C and 50% humidity

Art. no. 0894 605

P. Qty.: 5

Please consider the legal instruction at the beginning of this chapter.

With surfaces and plastics to be bonded that contain softeners, the softeners may alter the adhesive coat. This will impair the strength of the adhesive.

Mounting tape Universal

Versatile adhesive tape for simple applications

- Excellent adaptation of the adhesive tape to smooth coverings and floors
- Excellent adhesion, even to delicate surfaces such as PE and PP
- Good humidity resistance

Backing material	PP foil
Adhesive base	Natural rubber
Colour	White (base material)
Roll width	50 mm
Length of roll	25 m
Thickness	0.225 mm
Min./max. processing temperature	15 to 30 °C
Min./max. temperature resistance	-10 to 50 °C
Ultraviolet resistance	Limited
Moisture resistance	Yes
Shelf life from production/ conditions	12 Month/dry and dust free storage area

Art. no. 0894 600

P. Qty.: 5

Please consider the legal instruction at the beginning of this chapter.

The universal assembly adhesive tape is not resistant to UV; it should therefore not be exposed to direct sunlight

On plastics containing softener additives to be bonded, the softeners may change the adhesive coat, which may compromise the adhesive strength

Assembly tape Special

Highly adhesive tape with fabric backing

- Excellent adhesion, even on rough surfaces
- The tape adapts very well to the surface, even uneven surfaces.

Backing material	Rayon fabric
Adhesive base	Synthetic natural rubber
Colour	White (base material)
Roll width	50 mm
Length of roll	25 m
Thickness	0.335 mm
Min./max. processing temperature	15 to 30 °C
Min./max. temperature resistance	-10 to 50 °C
Ultraviolet resistance	Limited
Moisture resistance	Yes
Shelf life from production/ conditions	12 Month/dry and dust free storage area

Art. no. 0894 601

P. Qty.: 5

Please consider the legal instruction at the beginning of this chapter.

The assembly adhesive tape in particular is not resistant to UV; it should therefore not be exposed to direct sunlight

On plastics to be bonded which contain softener additives, the softeners may change the adhesive layer. This may compromise the adhesive strength

Fabric adhesive tape

Plastic-coated universal adhesive tape

- Extremely high initial adhesive strength
- Can be torn off by hand

Backing material	Coated polyester fibre
Width	50 mm
Length	50 m
Min./max. temperature resistance	-10 to 60 °C

Colour	Art. no.	P. Qty.
Silver coloured	0874 100 200	1/12
Black	0874 100 202	1/12
Red	0874 100 204	1/12

Adhesive tape

For adhering pipe insulation cut surfaces. For bundling and protecting.

Backing material	PVC
Length	20 m
Min./max. temperature resistance	-18 to 90 °C

Colour	Width	Art. no.	P. Qty.
Isogene grey	30 mm	0874 100 011	1/20
Red	50 mm	0874 100 040	1/20

Adhesive tape

For adhering pipe insulation cut surfaces. For sealing ventilation ducts and air-conditioning ducts. For bundling and protecting.

Backing material	PVC
Width	50 mm
Length	20 m
Min./max. temperature resistance	-5 to 60 °C

Colour	Art. no.	P. Qty.
Black	0874 100 060	1/20
Silver coloured	0874 100 050	1

Pure aluminium adhesive tape

With PE film as release layer

- Building material class A2, non-flammable (on metallic surfaces)
- Building material class B1, flame retardant (on flame-retardant, aluminium-laminated mineral fibre products)
- Easy to remove the separating layer from the bonding surface
- Can be torn off by hand
- Heat-resistant
- UV-resistant

Backing material	Aluminium foil
Barrier layer	PE film
Colour	Silver coloured
Length	50 m
Min./max. temperature resistance	-40 to 140 °C

Width	Art. no.	P. Qty.
50 mm	0874 100 340	1
75 mm	0874 100 341	1
100 mm	0874 100 342	1

Pure aluminium adhesive tape

With paper as release layer

- Building material class B1, flame retardant
- Easy to tear off by hand

Backing material	Aluminium foil
Barrier layer	Paper
Colour	Silver coloured
Length	50 m
Min./max. temperature resistance	-25 to 70 °C

Width	Art. no.	P. Qty.
50 mm	0874 100 320	1
75 mm	0874 100 321	1
100 mm	0874 100 322	1

Aluminium adhesive tape

Aluminium-metallised polypropylene, no release layer

- No separating layer
- Tear-proof

Backing material	Aluminium-coated polypropylene
Colour	Silver coloured
Length	100 m
Min./max. temperature resistance	-20 to 70 °C

Width	Art. no.	P. Qty.
50 mm	0874 100 330	1
75 mm	0874 100 331	1
100 mm	0874 100 332	1

Universal adhesive tape

Plastic-coated fabric adhesive tape

- Excellent adhesion even on rough and fibrous surfaces
- The tape is impermeable to water and vapour diffusion, is not sensitive to moisture and can be written on
- Can be torn off by hand

Backing material	Plastic-coated rayon fabric
Adhesive base	Natural rubber
Length	50 m
Thickness	0.3 mm
Dynamic peel strength at 25 mm	9.8 N
Elongation at break	11 %
Min./max. processing temperature	10 to 40 °C

Min./max. temperature resistance	-10 to 70 °C
Moisture resistance	Yes
Shelf life from production/conditions	12 Month/dry, lying and dust-free storage area, protected from UV rays, 20°C and 50% humidity

Colour	Width	Art. no.	P. Qty.
Black	19 mm	0992 381 19	1
Black	38 mm	0992 381 38	1
Black	50 mm	0992 381 50	1
Silver coloured	38 mm	0992 380	1

Please consider the legal instruction at the beginning of this chapter.

The universal adhesive tape is not resistant to UV so should not be exposed to direct sunlight. The surfaces to be adhered must be dry and free from dust, grease and silicone. To ensure proper adhesion, the tape must be pressed on to the material being bonded with sufficient force

Self-fusing shrink tape

Enables waterproof and water-impermeable sealing of a variety of materials.

- High dielectric strength
- Highly compatible with PE, PVC, butyl, neoprene etc.
- Highly elastic

Backing material	Polyisobutylene
Colour	Black (base material)
Length	10 m
Total thickness	0.5 mm
Min./max. processing temperature	5 to 35 °C
Min./max. temperature resistance	-40 to 90 °C
Ultraviolet resistance	Limited
Moisture resistance	Yes
Shelf life from production/conditions	36 Month/dry, lying and dust-free storage area, 20°C and 50% humidity

Width	Product weight (per item)	Art. no.	P. Qty.
19 mm	111.5 g	0985 077 1	1
38 mm	216 g	0985 077 2	1

Please consider the legal instruction at the beginning of this chapter.

- The surfaces to be sealed must be dry and free from dust and grease.
- To achieve perfect adhesion and a waterproof seal, wrap the tape tightly around the material to be processed and then overlap.
- The shrink tape is only UV-resistant in certain cases and should therefore be protected from direct sunlight.

Electrical insulating tape

Safe insulation and labelling during electrical installation

DE-tested in line with DIN EN 60454-3-1 Type 5

- Safe thanks to tested properties
- Up to 9 kV dielectric strength
- Flame-retardant

Chemical basis	Acrylate, soft PVC foil
----------------	-------------------------

Colour	Width	Length	Art. no.	P. Qty.
Black	15 mm	10 m	0985 101	10
Black	30 mm	25 m	0985 101 1	5
Blue	15 mm	10 m	0985 105	10
Brown	15 mm	10 m	0985 104	10
Green	15 mm	10 m	0985 109 2	10
Grey	15 mm	10 m	0985 109 1	10
Red	15 mm	10 m	0985 103	10
White	15 mm	10 m	0985 102	10
Yellow	15 mm	10 m	0985 107	10
Yellow-green	15 mm	10 m	0985 109	10

Please consider the legal instruction at the beginning of this chapter.

Protect tape from exposure to direct sunlight.

Electrical insulating tape set

10 pieces Contains all relevant colours for safe insulation and labelling during electrical installation.

- VDE-tested in line with DIN EN 60454-3-1 Type 5
- Tear-proof and resistant to ageing
- Lasting material properties even with changing temperatures

Number of pieces in assortment/set	10 PCS
Min./max. temperature resistance	0 to 90 °C
Shelf life from production	24 Month

Art. no. 0985 100

P. Qty.: 10

Please consider the legal instruction at the beginning of this chapter.

Contents for art. no. 0985 100		
Designation	Art. no.	Quantity
Electrical insulating tape Black	0985 101	2
Electrical insulating tape White	0985 102	2
Electrical insulating tape Red	0985 103	1

Electrical insulating tape Grey	0985 109 1	1

Self-adhesive hook and loop fastener tape

For simple fastening of product samples, components, panels and for door, case and cover locks and similar products

- Closure thickness:
Based on DIN 53.370 with a closing pressure of $0.14 \pm 0.04 \text{ N/cm}^2 = 2.0\text{--}4.0 \text{ mm}$
- Temperature resistance:
 -30°C to $+85^\circ\text{C}$
- Adhesive type:
Hot melt pressure sensitive adhesive based on rubber

Adhesive base	Natural rubber
Material	PA - Polyamide
Type of adhesive	Hot melt pressure sensitive adhesive
Length	10 m
Width	20 mm
Min./max. sealing thickness	2-4 mm
Min./max. temperature resistance	-30 to 85°C
Max. temperature resistance	85°C

Design	Colour	Art. no.	P. Qty.
With eyelet	Black	0894 821	1
With eyelet	White	0894 820	1
With hook	Black	0894 811	1
With hook	White	0894 810	1

Please consider the legal instruction at the beginning of this chapter.

Closing strengths

Peel and shear strength tested in line with DIN 3415 Part 2 Figure 5.2 and 5.3 average values (minimum values in brackets).

The hook and loop fastener tape is not suitable for surfaces that contain softeners (e.g. soft PVC).

Velcro cable tape

Re-sealable Velcro tape for quick bundling of cables

- Very high-quality, dense hook and loop material
- Can be opened and closed repeatedly
- Easy to remove cable ties from the roll by hand
- Gentle on the surface

Material	Polypropylene/velour
Colour	Black
Width	20 mm
Thickness	1.35 mm

Continuation **Velcro cable tape**

Length	Art. no.	P. Qty.
200 mm	0894 850 020	100
330 mm	0894 850 021	75

Please consider the legal instruction at the beginning of this chapter.

The tape is not suitable for securing items during transport.

Hook and loop strap

Re-sealable strap with closure for fixing and bundling

- Very high-quality, dense hook and loop material for strong bonds
- Can be opened and closed repeatedly
- Quick to close and easy to loosen
- Surfaces are not damaged

Material	PA - Polyamide
Colour	Black, Red
Width	25 mm
Thickness	2.35 mm

Length	Art. no.	P. Qty.
360 mm	0894 850 030	10
480 mm	0894 850 031	10

Please consider the legal instruction at the beginning of this chapter.

The tape is not suitable for securing items during transport.

Double-sided hook and loop fastener strip

Versatile, re-sealable adhesive tape with hooks on the front and velour on the back

- Very high-quality, dense hook and loop material
- Can be opened and closed repeatedly
- Flexible application
- Easy to remove and gentle on surfaces

Material	Polypropylene/velour
Colour	Black
Length	25 m
Width	20 mm
Thickness	1.35 mm

Art. no. 0894 850 010

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

The tape is not suitable for securing items during transport.

Magnetic tape

Permanently magnetic, flexible plastic tape for universal mounting options

- Strong magnetisation for optimal support
- Reusable
- Does not scratch or leave behind adhesive residue

Thickness	1.2 mm
Width	19 mm
Length	10 m

Art. no. 0894 10

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

- Do not use as a primer for magnets.
- Do not bring into contact with food items.

NSF = internationally recognised organisation
for the supervision and registration of products
used in the food processing sector

Cleaner Industry Clean

High-quality special cleaner for removing adhesive tape residue, labels and film stickers as well as stubborn dirt. NSF-certified.

- Easy removal of adhesive residues, labels and adhesive tapes
- Stubborn dirt such as wax, rubber abrasion, silicone residues, permanent marker, oil and grease are loosened
- Gentle on materials
- Acetone-, silicone- and AOX-free

NSF registered, class K3, reg. no. 149620, 149621

Colour	Transparent
Chemical basis	Special benzine with D-limonene
Smell/fragrance	Characteristic
Shelf life from production/ conditions	24 Month/below 25°C

Contents	Art. no.	P. Qty.
5 l	0893 140 05	1
500 ml	0893 140	1/12

Please consider the legal instruction at the beginning of this chapter.

Industry Clean Refillomat

High-quality special cleaner for industry and craft trades

- Simple removal of adhesive residue, labels and adhesive tape
- Dissolves stubborn dirt such as wax, rubber marks, silicone residue, permanent marker, oil and grease
- Gentle on materials
- Acetone-free, silicone-free and AOX-free

Contents	20 l
Colour	Colourless
Smell/fragrance	Characteristic
Viscosity/consistency	Liquid

Art. no. 0893 140 520

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Prior to treatment, check rubber and plastic parts for compatibility in an invisible location. Paints may be attacked.

Sticker-Ex

Gel-form cleaner with citrus fragrance

- Straightforward removal of adhesive residues, labels and adhesive tape
- The adhesive effect of the gel allows a significantly longer application time for the solvent, resulting in improved cleaning performance compared to liquid cleaners

Contents	500 ml
Colour	Colourless
Chemical basis	Aliphatic hydrocarbon
Smell/fragrance	Citrus
Viscosity/consistency	Gel
Shelf life from production/conditions	24 Month/frost-free storage area

Art. no. 0893 140 505

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Prior to treatment, check rubber and plastic parts for compatibility in an invisible location. Paints may be attacked.

Workshop cleaner

Powerful, environmentally friendly cleaner in the neutral pH range with extremely high dirt removal power for floors, machinery and plants.

- Dirt is penetrated
- Environmentally friendly
- Especially gentle on the skin
- AOX and silicone-free

Colour	Green
Shelf life from production	24 Month
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes

Contents	Container	Art. no.	P. Qty.
5 l	Canister	0893 124	1
20 l	Canister	0893 124 1	1
60 l	Plastic barrel	0893 124 2	1

Please consider the legal instruction at the beginning of this chapter.

Workshop cleaner BMF

Environmentally friendly cleaning agent for workshops, machinery and vehicles

- Can be used mechanically, manually or in high-pressure devices
- Powerful at dissolving greases, yet mild and gentle on materials
- Does not attack paints, rubber or plastics

Colour	Luminous yellow
Shelf life from production	24 Month
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes

Contents	Container	Art. no.	P. Qty.
5 l	Canister	0893 118 2	1
20 l	Canister	0893 118 3	1
60 l	Plastic barrel	0893 118 4	1
200 l	Plastic barrel	0893 118 501	1

Please consider the legal instruction at the beginning of this chapter.

Tap

Tap for 5 L plastic canister

Material	Plastic
Product weight (per item)	30.9 g

Art. no. 0891 302 01

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Universal cleaner R1

Universal, environmentally friendly cleaner for vehicles, workshops, offices, interiors, carpets, upholstery and all water-resistant surfaces

Mild and gentle on materials. Does not attack paint, rubber or plastics.

High cleaning performance

Even stubborn stains are removed quickly and thoroughly

Smell/fragrance	Lemon
Colour	Orange
pH value/conditions	9.4/in concentrate
Density/conditions	1.04 g/cm³/at 20°C
AOX-free	Yes
Silicone-free	Yes
Phosphate-free	Yes
Bio-degradable	Yes

Contents	Container	Art. no.	P. Qty.
5 l	Canister	0893 125 005	1
20 l	Canister	0893 125 020	1
60 l	Barrel	0893 125 060	1

Please consider the legal instruction at the beginning of this chapter.

Hot water increases the cleaning effect

IPA isopropanol cleaner

For universal use

- Gentle and effective cleaning
- Removes both greasy and water-soluble dirt
- Leaves no stains or streaks on bare metal or glass surfaces

Colour	Transparent
Chemical basis	Isopropanol

Contents	Container	Art. no.	P. Qty.
5 l	Canister	0893 223 505	1
500 ml	Aerosol can	0893 223 500	1/12

Please consider the legal instruction at the beginning of this chapter.

Check whether delicate plastics or surfaces are compatible with the cleaner prior to treating by testing on an area that is not visible.

Assembly power cleaner

Highly-effective special cleaner containing solvents. NSF-certified.

- Ideally suited for removing oily, greasy, sooty and slightly resinified dirt
- Short flash-off time
- Good material compatibility

Colour	Transparent
--------	-------------

Contents	Chemical basis	Art. no.	P. Qty.
0.5 l	Naphtha	0890 107	1/24
5 l	Aliphatic hydrocarbon	0890 107 05	1
20 l	Aliphatic hydrocarbon	0890 107 20	1
60 l	Aliphatic hydrocarbon	0890 107 60	1

Please consider the legal instruction at the beginning of this chapter.

NSF K1 registered (no.: 150705, 150706), complies with requirements of USDA K1.

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Prior to application, check the compatibility of rubber, plastic parts and painted surfaces on an invisible area.

1A assembly cleaner

Highly active and safe assembly and parts cleaner

- TÜV-tested explosion and fire behaviour according to test method no. PPP 53285:2006
 - Excellent cleaning performance
 - AOX and aromatic compound-free
 - Silicone-free
 - Significantly reduces the risk potential in the workplace
- Spray can contains non-combustible propellant

Colour	Colourless
Chemical basis	2-propanol, white spirit, ketone
Shelf life from production/conditions	24 Month/at room temperature

Contents	Art. no.	P. Qty.
20 l	0890 106 520	1
60 l	0890 106 560	1
500 ml	0890 106 500	1/24

Please consider the legal instruction at the beginning of this chapter.

Do not spray on hot parts. Check compatibility with plastic and rubber parts and painted surfaces on an invisible area prior to application.

A2 assembly and parts cleaner

Workshop-friendly and safe special cold cleaner with high degree of safety

- Complies with the recommendation of the relevant professional association in Germany
- Protects against electrostatic discharge
- Reduces potential risks in the workplace and the need for hazard labelling
- High cleaning performance
- Acetone-free, AOX-free and silicone-free

Contents	600 ml
Colour	Transparent
Chemical basis	Aliphatic hydrocarbon

Continuation **A2 assembly and parts cleaner**

Art. no. 0890 109 4

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Prior to application, check the compatibility of rubber, plastic parts and painted surfaces on an invisible area.

Brake cleaner

For cleaning and degreasing during maintenance and repair work

Fast flash-off behaviour and excellent cleaning performance

- Fast and effective removal of soot, grease, brake dust and oily residues
- Residue-free cleaning

Chemical basis	Naphtha
Shelf life from production	24 Month

Contents	Container	Smell/fragrance	Art. no.	P. Qty.
500 ml	Aerosol can	Solvent-like	0890 108 7	1/24
5 l	Canister	Characteristic	0890 108 715	1
20 l	Canister	Characteristic	0890 108 716	1
20 l	Canister	Characteristic	0890 108 720	1
60 l	Barrel	Characteristic	0890 108 760	1

Please consider the legal instruction at the beginning of this chapter.

Product-specific pump spray bottle Unfilled

Refillable empty pump spray bottle for easy application of products from canisters or drums

- Break-proof, empty 1 litre container
- Easy opening owing to surface feel elements

Contents	1 l
----------	-----

Suitable for active ingredient	Art. no.	P. Qty.
	0891 503 001	1
Assembly cleaner 1A	0891 503 006	1
Brake cleaner	0891 503 002	1
Cleaner for wheel	0891 503 003	1
Wheel rim cleaner premium	0891 503 004	1
Cleaner for workshop	0891 503 007	1
BMF cleaner	0891 503 008	1

Diesel performance improver

For lubricating passenger car and truck diesel systems.

Prevents deposits from building up in the combustion chamber and injection system

- Extends the storage stability of bio-diesel fuels

Ensures precise diesel injection

Free from sulphur, phosphorous, metals and acids

Economical

Contents	300 ml
Colour	Brown
Smell/fragrance	Characteristic
Chemical basis	Combination of additives
Shelf life from production	24 Month

Art. no. 5861 001 301

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Diesel injection cleaner

For cleaning all common passenger car and truck diesel engines.

- For cleaning the injection pump and nozzle
- Neutralises and binds acid condensation water
- Improves the cetane number
- Synthetic-based active agent concentrate

Colour	Brown
Smell/fragrance	Characteristic
Chemical basis	Hydrocarbon
Shelf life from production	24 Month

Contents	Art. no.	P. Qty.
300 ml	5861 011 300	1/12
1000 ml	5861 011 001	1/12

Please consider the legal instruction at the beginning of this chapter.

Winter diesel performance improver

To improve the filterability and the cloud point of diesel fuel

- Prevents the fuel line and filter from becoming clogged
- Improves filtration ability and the pour point of the diesel fuel
- Compatible with all conventional diesel fuels, however ineffective with pure organic diesel
- Improvement of up to -10°C at max. -31°C depending on the fuel quality

Colour	Transparent, translucent, opaque
Smell/fragrance	Characteristic
Chemical basis	Combination of additives
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.
150 ml	5861 002 150	1/12
300 ml	5861 002 300	1/12
1000 ml	5861 002 001	1/12

Please consider the legal instruction at the beginning of this chapter.

The additive must be added before the first flocculation; any flocculation that has already occurred cannot be dissolved by the product. Ideally, the additive should be at room temperature and the diesel fuel being treated should not be below 0°C. The additive should ideally be added just before the fuelling process.

Diesel particulate filter cleaner

Cleaner for removing carbon and ash deposits from diesel particulate filters

Loosens and removes carbon deposits from the particulate filter

DPF can be cleaned without needing to remove it

Saves money as it may eliminate the need to fit a new particulate filter (depending on the condition of the particulate filter)

Non-flammable

Neutral, ash-free and metal-free recipe

Evaporation without residue

Contents	400 ml
Colour	Rosy
Smell/fragrance	Aminic
Chemical basis	Water
Shelf life from production	15 Month

Art. no. 5861 014 500

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

This information is intended to advise you, to the best of our knowledge, based on our tests and experience. Preliminary testing required! For more information, please refer to the technical data sheet.

Brake paste

Highly pressure-resistant, very adhesive lubricant in display box

Contents	5.5 ml
Weight of content	5.86 g
Colour	Silver coloured
Smell/fragrance	Oil
Chemical basis	Aluminium-copper
Shelf life from production	24 Month

Art. no. 0893 110 5

P. Qty.: 100

Please consider the legal instruction at the beginning of this chapter.

Application temperature as grease paste: -20°C to +160°C

Petrol performance improver

For all petrol engines with and without a catalytic converter.

Cleans the fuel system

Reduces fuel consumption thanks to exact fuel preparation

E10 suitability

- Protects from water occurring in fuel tank due to the hygroscopic property of E10 fuel
- Prevents corrosion
- Cleans deposits in the fuel system

Optimal combustion

Reduces the formation of harmful exhaust gases

Contents	300 ml
Colour	Colourless
Smell/fragrance	Solvent-like
Chemical basis	Hydrocarbon
Shelf life from production	24 Month

Art. no. 5861 101 300

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Petrol additive Octane booster

For boosting the octane number in lower-grade fuels.

- Prevents wear
- Improves vehicle performance
- Clean combustion
- Improves octane number
- Reduces harmful exhaust gases

Contents	300 ml
Colour	Brown
Smell/fragrance	Solvent-like
Chemical basis	Hydrocarbon
Shelf life from production	24 Month

Art. no. 5861 103 300

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Petrol injection system cleaner

Special cleaner for cleaning the injection system

- Binds and neutralises acidic condensation water
- Removes resin- and paint-like deposits in the micro range on injection valves and on the fuel distributor

Colour	Colourless
Smell/fragrance	Solvent-like
Chemical basis	Naphtha
Shelf life from production	24 Month

Contents	Art. no.	P. Qty.
150 ml	5861 111 153	1/12
300 ml	5861 111 303	1/12

Please consider the legal instruction at the beginning of this chapter.

Oil smoke stop

Reduces smoking of petrol and diesel engines

- Reduces oil consumption by stabilising the viscosity and compensates viscosity losses. Helps prevent blue exhaust smoke.
- The can contents of 300 ml are sufficient for 5 litres of oil

Contents	300 ml
Colour	Light brown
Smell/fragrance	Characteristic
Chemical basis	Combination of additives
Shelf life from production	60 Month

Art. no. 5861 301 300

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Not suitable for use in motorcycles or quad bikes with wet clutches.

Throttle valve cleaner

Special, highly active system cleaner for 2- and 4-stroke engines.

Cleaning without removal Overhead valve

Hard-to-reach areas can be easily accessed

Outstanding cleaning performance

- Optimum carburettor performance
- Perfect throttle valve function

Engine runs smoothly

Faults caused by dirty throttle valves or carburettors are rectified.

Contents	500 ml
Colour	Colourless

Smell/fragrance	Solvent-like
Chemical basis	Hydrocarbon
Shelf life from production	24 Month

Art. no. 5861 113 500

P. Qty.: 1/12/24

Please consider the legal instruction at the beginning of this chapter.

AdBlue®

For diesel engines with SCR exhaust gas aftertreatment

- 32.5% aqueous solution to reduce nitrogen oxide emissions
- Complies with ISO specification ISO 22241-1

Manufacturer approvals for art. no. 5861700001 (1.89 litre bottle)

- Mercedes Benz, A 000 583 0107
- BMW Group, 83190441139
- VW/Audi, G 052 910 A2
- Mazda, 0000-AD-002

Colour	Transparent
Smell/fragrance	Nearly odourless
Chemical basis	Urea in demineralised water
Shelf life from production	24 Month

Contents	Art. no.	P. Qty.
10 l	5861 700 002	2
210 l	5861 700 003	1
1000 l	5861 700 004	1

Please consider the legal instruction at the beginning of this chapter.

Engine flush and cleaner

For cleaning all petrol and diesel engines

- Cleans the inside of the engine and the oil supply system
- Does not attack seals
- Optimise exhaust gas emissions
- Compatible with catalytic converters

Contents	400 ml
Colour	Brown
Smell/fragrance	Characteristic
Chemical basis	Combination of additives
Shelf life from production	60 Month

Art. no. 5861 310 400

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Not suitable for use in motorcycles with oil bath clutch that share a joint oil circuit

Radiator anti-freeze Premium

Radiator anti-freeze concentrate for water-cooled vehicle engines

- Guarantees maintenance-free frost and corrosion protection for the entire service life of the engine
- Long-term protection against all types of corrosion
- The Würth radiator protection inhibitor package offers outstanding cavitation protection
- Environmentally friendly due to the absence of borates, nitrites, amines and phosphates
- Suitable for all engine metals, including aluminium and ferrous alloys
- For petrol and diesel engines
- Dilutes in water
- Meets the requirements of automotive manufacturers

Chemical basis	Ethylene glycol
----------------	-----------------

Type description	Colour	Contents	Art. no.	P. Qty.
W30 Premium radiator protection	Red violet	20 l	5861 500 303	1
W30 Premium radiator protection	Red violet	60 l	5861 500 304	1

W48 Premium radiator protection	Blue-green	20 l	5861 500 483	1

Continuation Radiator anti-freeze Premium

Type description	Colour	Contents	Art. no.	P. Qty.
W48 Premium radiator protection	Blue-green	60 l	5861 500 484	1
W48 Premium radiator protection	Blue-green	200 l	5861 500 485	1

Please consider the legal instruction at the beginning of this chapter.

Do not mix with other radiator coolants. Store in air-tight containers only.

Radiator anti-freeze Basic

Radiator anti-freeze concentrate for water-cooled vehicle engines

- Good environmental compatibility
- Ensures flawless engine operation
- Corrosion protection, including for non-ferrous base metals

Type description	W20 Basic radiator protection
Colour	Blue
Chemical basis	Ethylene glycol

Contents	Art. no.	P. Qty.
20 l	5861 500 203	1
60 l	5861 500 204	1
200 l	5861 500 205	1

Please consider the legal instruction at the beginning of this chapter.

Do not mix with other radiator coolants. Store in air-tight containers only.

Radiator cleaner

Suitable for all engines

- Removes deposits in the cooling circuit and cleans the cooling system of contamination
- Removes corrosion and sludge deposits in the cooling circuit
- Neutralises lime residues
- Compatible with anti-freeze

Colour	Yellow
Smell/fragrance	Mild
Chemical basis	Water
Shelf life from production	24 Month

Contents	Art. no.	P. Qty.
250 ml	5861 510 250	1/12
1000 ml	5861 510 001	1/12

Please consider the legal instruction at the beginning of this chapter.

The cleaner is not suitable for vehicle operation.

Radiator sealant

Radiator sealant for all engines with cooling systems without filter systems

Permanently seals hairline cracks and leaking areas

Secures the function of the cooling system against water loss.

Avoids loss of coolant

Protects the engine from being damaged.

Does not affect the materials used in the radiator construction

Does not attack rubber or plastic parts.

300 ml is sufficient for 10 litres of coolant

Contents	300 ml
Colour	Green, Blue
Smell/fragrance	Fruity
Chemical basis	Ethylene glycol
Shelf life from production	24 Month

Art. no. 5861 501 300

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Radiator sealant must not be used if the cooling system is equipped with a dirt strainer.

Contact spray SW

Special spray wash

- Cleaner for contacts and electrical components
- Does not attack plastics and standard materials

Contents	200 ml
Colour	Transparent
Smell/fragrance	Characteristic
Chemical basis	Mineral oil
Shelf life from production	24 Month

Art. no. 0893 65

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

SW contact spray must be completely dry before the electrical system is restarted!

Contact spray Oxidation solvent

Spray oxidation solvent

- Cleans all types of contacts
- Removes oxide and sulphide coatings, resin, oil and dirt
- Eliminates „bangs“ as well as impermissible high voltage resistances

Contents	200 ml
Colour	Red
Smell/fragrance	Characteristic
Chemical basis	Mineral oil
Shelf life from production	24 Month

Art. no. 0893 60

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Oxidation solvent contact spray must be completely flashed off before the electrical system is restarted!

Contact spray

Is quick and reliable at rectifying ignition problems

To be used as a preventative measure against ignition problems caused by moisture in vehicles and in other low-voltage ignition systems

Contents	300 ml
Colour	Light yellow
Smell/fragrance	Characteristic
Shelf life from production	24 Month
Chemical basis	Mineral oil

Art. no. 0890 100

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Battery terminal protector

Long-term and temperature-resistant protection for battery terminals

- Protects battery terminals, terminal posts and plug connections against corrosion, weathering and battery acids
- Prevents transition resistance and voltage loss, thus increasing battery life.

Caution: Do not spray on paint! Immediately remove residues from the lacquer with brake cleaner; otherwise spots may form.

Contents	150 ml
Colour	Blue
Smell/fragrance	Solvent-like
Chemical basis	Dimethacrylic acid ether
Shelf life from production	24 Month

Art. no. 0890 104

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Caution: Do not spray on paint! Immediately remove residues from the lacquer with brake cleaner; otherwise spots may form.

Battery terminal grease

Highly adhesive, water-resistant red paste provides long-term protection from oxidation for battery terminals and terminals.

Contents	100 ml
Colour	Red
Smell/fragrance	Hydrocarbon
Shelf life from production	36 Month

Art. no. 0890 104 1

P. Qty.: 1/10

Please consider the legal instruction at the beginning of this chapter.

Starting aid spray Start-Rapid

Rapid engine starting aid for cold starts which are gentle on the battery, with proven combination of active agents

- Helps with starting problems quickly and reliably, particularly in cold and damp weather
- For all 2-stroke and 4-stroke petrol and diesel engines, with and without catalytic converter

Contents	300 ml
Colour	Transparent
Smell/fragrance	Characteristic
Chemical basis	Diethyl ether
Shelf life from production	24 Month

Art. no. 0890 11

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

If the engine does not start after trying 2 or 3 times, check the engine's operational reliability!

Freezer spray

For universal use in repair and assembly work and for troubleshooting

- Spray produces localised cooling down to -50°C
- Non-flammable!
- Generates a targeted thermal overload

Contents	200 ml
Colour	Colourless
Shelf life from production	24 Month

Art. no. 0890 001 200

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Meets EU regulation (EU no. 517/2014)

Vessel filler

For supplementing the air cushion in membrane expansion vessels (MEV)

Prevents corrosion in the MEV

Container	Can
Contents	400 ml
Pressure	5.5 bar
Conditions for pressure	at 20°

Design	Art. no.	P. Qty.
Flammable	0890 20 501	1/12
Non-flammable	0890 20 502	1/12

Lime remover

Cleaner that dissolves lime, limescale and rust for water-conducting systems with colour indicator

- Colour indicator shows when the descaler is exhausted
- Can be used for all water-conducting systems
- Can also be used as lime remover immersion bath for parts

Contents	5 l
Smell/fragrance	Characteristic
Colour	Red
pH value	0.4
AOX-free	Yes
Silicone-free	Yes

Art. no. 0893 78

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

The lime remover must not directly enter the sewerage system or the ground. The system should be re-filled with water as quickly as possible to prevent atmospheric corrosion. Rinse well with water after use. Carry out preliminary tests on unfamiliar surfaces where necessary.

Calcification protection Limestop

For hot-water, high-pressure cleaners

- Reliably prevents lime deposits in parts conducting warm and hot water
- Tested and approved by Kärcher
- Economical (6 ml per °dH and m³)
- Separates easily
- Does not impair the efficiency of the cleaning agent being used
- Can be used at temperatures of up to 140°C

Contents	1 l
Smell/fragrance	Odourless
Colour	Brownish
pH value	4.3
Silicone-free	Yes
Phosphate-free	Yes

Art. no. 0893 030 0

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Store in a frost-free place

Silicone remover

For professional cleaning and degreasing before applying adhesives or painting

Product features high cleaning power and long flash-off time

Contents	600 ml
Container	Spray can
Smell/fragrance	Characteristic
Chemical basis	Naphtha
Shelf life from production	24 Month

Art. no. 0893 222 600

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Silicone remover

Professional cleaning and degreasing before applying adhesives or painting.

- High level of cleaning power and long flash-off time
- Ideal for cleaning plastic

Smell/fragrance	Mild
Chemical basis	Naphtha
Shelf life from production	24 Month

Contents	Container	Art. no.	P. Qty.
1 l	Can	0893 222	1/12
5 l	Plastic canister	0893 222 5	1
20 l	Tinplate canister	0893 222 20	1

Please consider the legal instruction at the beginning of this chapter.

Flammable liquids, Category 3; specific target organ toxicity – one-off exposure, Category 3, central nervous system; specific target organ toxicity – repeated exposure, Category 1, central nervous system; aspiration hazard, Category 1; chronic aquatic toxicity, Category 2

Silicone spray

Ensures long-lasting protection, preservation and insulation of vehicle exterior and interior plastic, rubber and metal parts; good lubricating properties

- Plastic parts retain a high-gloss finish and do not become brittle
- Rubber parts are protected, do not become brittle and do not freeze or stick
- Protects electrical contacts against moisture

Chemical basis	Mineral oil
Min./max. temperature conditions	-5 to 40 °C

Contents	Container	Shelf life from production	Density/conditions	Art. no.	P. Qty.
5 l	Canister	24 Month	0.74 g/cm ³ /at 20°C	0893 221 05	1
20 l	Canister	12 Month	0.735 g/cm ³ /at 20°C	0893 221 520	1
500 ml	Spray can	24 Month	0.61 g/cm ³ /at 20°C	0893 221	1/12/24

Please consider the legal instruction at the beginning of this chapter.

Silicone spray Silicon fluid

High-quality, physiologically safe anti-friction and release agent

Contains highly concentrated, high-quality silicone oils

- Optimum sliding and lubricating properties
- Prevents sticking and wear
- Eliminates unpleasant squeaking noises

Extremely high degree of temperature resistance from -50 °C to +250 °C

Contents	0.4 l
Chemical basis	Physiologically harmless synthetic oil
Shelf life from production	24 Month
Density/conditions	0.785 g/cm ³ /Active substance, 20 °C
Min./max. temperature conditions	-50 to 250 °C

Art. no. 0893 221 000

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

NSF H1-registered (no.: 135927), meets the requirements of USDA 1998 H1.

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

NSF H1

The product may come into contact with foodstuffs for technical reasons.

If used in areas in which food is processed or stored, only the minimum quantity technically required may be used. If the product is to be used as an anti-corrosive film, it must completely be removed before the device in question is used again.

Metal restorer

Powerful metal grinding paste for removing the most stubborn dirt on metal. NSF-certified.

- Contains activated citric acid
- Natural aluminium oxide is used as an abrasive substance
- Protective additives with moisturising properties

Contents	286 ml
Colour	White
pH value	1.6
Smell/fragrance	Characteristic
Shelf life from production	24 Month
Container	Plastic bottle

Continuation **Metal restorer**

AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes

Art. no. 0893 121 1

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

NSF A1-registered (no.: 135792), meets the requirements of USDA A1

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Avoid direct contact with food. Do not use on anodised aluminium, galvanised or painted surfaces.

Recommendation: Pre-clean using stainless steel power cleaner, art. no. 08931212. Stainless steel care oil, art. no. 08931210, optimises the cleaning and care effect, thereby providing a perfect surface finish.

Mohs scale of hardness:

- Talc 1
- Gypsum 2
- Apatite 5
- Quartz 7
- Aluminium oxide (abrasive) 8
- Sapphire 9
- Diamond 10

Stainless steel care oil

Quick visual enhancement of metallic surfaces

- Removes light soiling, dust, cleaning marks and greasy finger prints
- Produces an even glossy surface
- Water-repellent protective film prevents surface from becoming resoled

Chemical basis	Aliphatic hydrocarbon
Smell/fragrance	Characteristic
Colour	Grey
AOX-free	Yes
Silicone-free	Yes
Shelf life from production	24 Month
Contents	400 ml

Art. no. 0893 121 0

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

NSF A7 registered (no.: 152466), corresponds to A7 requirements.

Tested for use in areas where food is processed or stored. Avoid contact with food. Do not spray on hot surfaces or use in direct sunlight.

Stainless steel care spray

Cleaning care emulsion for metallic surfaces

Nurturing, creamy emulsion with cleaning effect

- Dirt, cleaning and wiping marks and greasy, oily finger prints are thoroughly removed
- Can be used on vertical surfaces

Chemical basis	Medic white oil with synthetic oils
Smell/fragrance	Characteristic
Colour	White
pH value	10.2
Bio-degradable	Yes
AOX-free	Yes
Silicone-free	Yes
Shelf life from production	24 Month
Contents	400 ml

Art. no. 0893 121

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Do not spray on hot surfaces or use in direct sunlight.

Stainless steel power cleaner

Special cleaning fluid for pre-cleaning metal surfaces. NSF-certified.

Powerful removal of oil and grease

- Dirt such drilling and cutting oils, dust and other machining residues are thoroughly removed
- Optimum preparation for further renovation, cleaning and care
- Long-lasting

Biodegradable > 95%

Chemical basis	Butoxyethanol
Smell/fragrance	Characteristic
Colour	Colourless
pH value	9.3
Density	1.01 g/cm ³
Shelf life from production	24 Month
AOX-free	Yes
Silicone-free	Yes

Continuation **Stainless steel power cleaner**

Contents	Container	Art. no.	P. Qty.
5 l	Canister	0893 121 205	1
500 ml	Spray bottle	0893 121 2	1/12

Please consider the legal instruction at the beginning of this chapter.

NSF A1-registered (no.: 135874), meets the requirements of USDA A1

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Avoid direct contact with food.

Stainless steel cleaning cloth

For simple, fast cleaning and polishing of metal surfaces. NSF-certified

- Effortlessly and gently removes stains, grease, fingerprints, deposits and heavy soiling
- Cleaning (coarse side) and polishing (soft side) in one product
- Prevents water stains and corrosion

Chemical basis	Aliphatic hydrocarbon
Smell/fragrance	Lemon
AOX-free	Yes
Shelf life from production	24 Month
Number of cloths	30 PCS
Width x length	27 cm x 32 cm

Art. no. 0893 121 30

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

NSF C1-registered (no. 150177), corresponds to C1 requirements.

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Glass cleaner

For streak-free, thorough cleaning.

- Environmentally friendly, awarded the European Ecolabel
- Gentle on materials
- Removes finger prints, dust, dirt from the road, nicotine stains and wax residue from car washes

Chemical basis	Water tenside
Smell/fragrance	Characteristic
Colour	Green
pH value/conditions	8/at 20°C
Density/conditions	0.982 g/cm ³ /at 20°C
Shelf life from production	60 Month
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes

Contents	Container	Art. no.	P. Qty.
500 ml	Spray bottle	0890 220 01	1/12
5000 ml	Canister	0890 220 02	1

Please consider the legal instruction at the beginning of this chapter.

Do not use on hot surfaces or in direct sunlight.

Graffiti remover

Graffiti-EX for smooth, non-absorbent outdoor surfaces

- The problem solver for heavy graffiti covering large areas, particularly on painted surfaces.
- Very high cleaning performance
- With special paint dissolvers
- Gentle on materials and surfaces

Contents	500 ml
Smell/fragrance	Fruity
Chemical basis	2-methoxy-1-methylethyl acetate

Art. no. 0893 135

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Prior to application, always check material compatibility and colour fading first in an invisible area, by applying graffiti remover with a cloth.

No façade cleaning (concrete/stone)

Graffiti remover

Graffiti-EX for smooth, non-absorbent indoor surfaces

- The problem solver for graffiti on sensitive surfaces.
- Very high cleaning performance
- With special colour dissolvers
- Gentle on materials and surfaces
- Wide application range
- AOX-free
- Silicone-free

Contents	500 ml
Smell/fragrance	Fruity
Chemical basis	Aliphatic hydrocarbon

Art. no. 0893 136

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Prior to application, always check material compatibility and colour fading first in an invisible area, by applying graffiti remover with a cloth.

No façade cleaning (concrete/stone)

Graffiti remover Graffiti-EX special

Graffiti and chewing gum remover for upholstery and textiles

- Effectively removes varnish, paint and felt-tip graffiti
- Protects materials and surfaces
- Short drying times on account of low residual moisture
- Ideal for gentle removal of chewing gum on a variety of surfaces
- AOX and silicon-free

Contents	500 ml
Smell/fragrance	Fruity
Chemical basis	Aliphatic hydrocarbon

Art. no. 0893 137

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Prior to application, always check material compatibility and colour fading first in an invisible area, by applying graffiti remover with a cloth.

Mould remover

For quick and thorough removal of mould, green coverings, mildew spots, bacteria and algae

- Immediate and sustained action of the active chlorine
- Hygienic has a disinfectant effect
- Removes mould permanently and works as preventative measure
- Versatile applications suitable for inside and outside

Contents	1 l
Chemical basis	Sodium hypochlorite
Colour	Transparent, yellowish
Smell/fragrance	Chlorine
Min. processing temperature	5 °C
Shelf life from production	60 Month

Art. no. 0890 970

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Do not use in combination with other products, as dangerous gases may be released. A slight chlorine odour is released during application. Due to the bleaching effect of active chlorine, sensitive and coloured surfaces (e.g. wallpaper, carpets, textiles, wood and metal) may lose their colour on the surface.

Take care when using biocidal products. Always read the label and product information before use.

Deodoriser Quick Fresh Turbo

For effectively controlling interior odours

Suitable for use in

- e.g. cars, HGVs, motorhomes/caravans, buses and trains, public areas such as fitness studios, hotel rooms and sanitary facilities etc.
- Also suitable for home and leisure
- One-shot application
- Chargeable unit – one can for one application

Contents	40 ml
Container	Aerosol can in a display box
Smell/fragrance	Fruity
Chemical basis	Perfume oil composition, ethanol, LPG
Shelf life from production	24 Month

Art. no. 0893 764 640

P. Qty.: 12

Please consider the legal instruction at the beginning of this chapter.

- All electrical devices must be switched off during application.
- Avoid ignition sources.
- Ventilate the area well for several minutes after use.
- Do not smoke inside the area straight after application.
- Use only one can per application.
- Preliminary tests are essential before use, particularly in the case of light surfaces.

Continuation **Deodoriser Quick Fresh Turbo** **Disinfectant surface cleaner**

Reliable at fighting microbes, bacteria, viruses and fungi

- Disinfects, cleans, protects
- No stains
- Silicone-free

Chemical basis	Water, ethanol and propanol
Smell/fragrance	Alcohol
Colour	Colourless
Silicone-free	Yes

Contents	Weight of content	Bio-degradable	Art. no.	P. Qty.
1 l	864.8 g		0893 764 01	1/12
5 l	4.5 kg	Yes	0893 764 05	1

Please consider the legal instruction at the beginning of this chapter.

Take care when using biocidal products. Always read the label and product information before use.

Oil binder Road

Non-slip granulate for mopping up oily and aqueous substances on solid substrates and road surfaces

Highly absorbent, quick-acting

- Less material is used, which means reduced disposal costs
- 1 kg of oil binder granulate binds approx. 1.01 litres of oil (Westinghouse)
- The fine capillary system of the granulate encapsulates the absorbed material and does not release it again

Universal use

- Suitable for all liquids, including leaks of acids, alkalis, AdBlue and water
- Suitable for indoor and outdoor use

Chemical basis	Diatomaceous earth (moler)
Oil absorber type	Oil absorber type III/R
Design	Granules/calcinated (baked)
Straßen-Rutsch-Test (German road slip test)	0 %
Shelf life from production	24 Month

Contents	Art. no.	P. Qty.
20 l	0890 61	1
40 l	0890 610 000	1

Please consider the legal instruction at the beginning of this chapter.

Disposal takes place in accordance with the applicable specifications for the respective liquid either using a waste disposal site or an incinerator. Not suitable for hydrofluoric acid!

Oil binder Extreme

Organic, water-repellent and non-slip universal binding agent for all applications and scenarios.

- Particularly suitable for hydrocarbon-based liquids such as heating and automotive fuels, oils, oil-based varnishes, paints and hydraulic fluids, and organic chemicals.
- Absorbs up to 5–8 times its own weight or more than two-thirds of its volume
- 100% organic oil binder; biodegradable before use

Contents	50 l
Oil absorber type	Oil absorber type I, Oil absorber type II, Oil absorber type III/R
Design	Slip-resistant
Straßen-Rutsch-Test (German road slip test)	4 %

Art. no. 0890 610 050

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

The absorption performance depends on the substance to be absorbed; the binding agent may also need to be worked in, e.g. using a broom.

Oil binding cloth

For absorbing oils and chemicals

- Load capacity is 25 times the tare weight
- Extremely absorbent, no leakage
- Only absorbs oils and hydrocarbon-based liquids (oleophilic) – does not absorb water

Material	PP - Polypropylene
Colour	White
Length x width	46 x 38 cm
Number of cloths	100 PCS

Art. no. 0899 900 210

P. Qty.: 25/100

Please consider the legal instruction at the beginning of this chapter.

Oil binder Basic

Water-repellent material for wiping up oily substances easily.

- Extremely high absorbency
- Water-repellent – therefore also suitable for use in water
- Flash point: 300°C
- Can be stored indefinitely

Contents	50 l
Oil absorber type	Oil absorber type I, Oil absorber type II, Oil absorber type III
Straßen-Rutsch-Test (German road slip test)	8 %

Art. no. 0890 6

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

After use, the oil binder is toxic waste and must be properly disposed of at a facility intended for this purpose. Not suitable for hydrofluoric acid.

Cleaning cloth, textile

For picking up coarse dirt, oils, greases, coolants and solvents

- Material: Reclaimed cotton, polypropylene, polyester

Container	Carton
Number of cloths	250 PCS
Length x width	37 x 34 cm
Colour	Dark multi coloured

Art. no. 0899 800 200

P. Qty.: 1

Cleaning paper ECO LINE

The all-rounder for the most common cleaning tasks

- Fits all common dispensers
- Highly absorbent and virtually lint-free
- High absorption capacity and tear-resistant

Design	Roles ware
--------	------------

Number of plies	Sheet length x sheet width	Length of roll	Art. no.	P. Qty.
2 PCS	36 x 22 cm	504 m	0899 800 290	2
2 PCS	36 x 22 cm	846 m	0899 800 511	2
2 PCS	36 x 38 cm	360 m	0899 800 773	2
3 PCS	36 x 38 cm	180 m	0899 800 850	2
3 PCS	36 x 38 cm	360 m	0899 800 823	2

Cleaning paper

Ideal for mopping up liquids, removing moist waste or cleaning tools and machine parts of oils and greases

- Highly absorbent
- Virtually lint-free
- High absorption capacity and tear-resistant
- Fits all common dispensers and our dispenser box with centre-feed dispenser

Design	Roles ware
Number of sheets	865 PCS
Number of plies	1 PCS
Sheet length x sheet width	30 x 19 cm
Length of roll	260 m

Art. no. 0899 800 653

P. Qty.: 6

Please consider the legal instruction at the beginning of this chapter.

Paper towel

Z fold in zigzag folding

- 1 box of 2790 towels (15 pack, 186 towels per pack)
- 2-ply

Colour	White
Number of plies	2 PCS
Width	210 mm
Length	215 mm

Art. no. 0993 997 085

P. Qty.: 1

Universal cleaning cloth

For thorough and fast cleaning of most surfaces without the need for water, soap or a brush. NSF-certified.

- Ideal for mobile, every-day use
- Thorough and gentle at removing even the heaviest types of soiling such as oils, greases, adhesives, paints, tar and lubricants
- Cleans and cares for hands too

Smell/fragrance	Orange
Shelf life from production	30 Month
Number of cloths	90 PCS
Width x length	27 cm x 32 cm

Art. no. 0890 900 90

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

NSF-certified: Nonfood Compounds Program Listed C1 (150555).

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Caution: Not suitable for cleaning visors!

Cleaning cloth Tex-Soft

Reusable all-round textile wiping cloth is suitable for wet and dry wiping processes

- Can be used as a polishing cloth, leaves no scratch marks
- Can be washed, wrung out and used again
- Extremely tear-resistant and water-resistant

Colour	White
--------	-------

Container	Design	Number of cloths	Sheet length x sheet width	Coating weight per m ²	Art. no.	P. Qty.
Format cloth	Layers folding	500 PCS	38 x 29 cm	65 g	0899 800 901	1
Polybag	Zickzack-folding	100 PCS	42 x 38 cm	62 g	0899 800 909	1/5
Roll	Roles ware		38 x 29 cm	50 g	0899 800 902	2
Roll	Roles ware		38 x 40 cm	65 g	0899 800 900	1

Please consider the legal instruction at the beginning of this chapter.

Cleaning cloth Tex-Rein

Extra fine cleaning cloth for dust and lint-sensitive areas

- Colourfast – no colour bleeding
- Can be washed, wrung out and reused
- Extremely tear-resistant and water-resistant
- Highly absorbent and lint-free

Container	Disposable dispenser
Design	Layers folding
Number of cloths	150 PCS
Sheet length x sheet width	38 x 27 cm
Coating weight per m ²	69 g

Continuation **Cleaning cloth Tex-Rein**

Colour	Turquoise
Sheet length	38 cm
Sheet width	27 cm

Art. no. 0899 810

P. Qty.: 1/4

Please consider the legal instruction at the beginning of this chapter.

Zigzag fold cleaning cloth Tex-Vlies

Cleaning cloth for heavily soiled areas

- Perforated tear-off
- Can be wrung out and reused
- Highly tear-proof when wet and dry
- Solvent resistant

Container	Roll
Design	Roles ware
Sheet length x sheet width	38 x 25 cm
Coating weight per m ²	135 g
Colour	Light multi coloured, White coloured
Number of tear-offs	250 PCS
Sheet length	38 cm
Sheet width	25 cm

Art. no. 0899 800 210

P. Qty.: 2

Please consider the legal instruction at the beginning of this chapter.

Cleaning cloth Tex-Wipe

For lint-free cleaning of surfaces in the automotive, metalworking and painting sectors.

- Suitable for painted, metal and smooth wooden surfaces
- Removes water, oil and grease stains
- Very absorbent
- Durable and robust
- Low lint
- Silicone-free
- Resistant to acids, bases and solvents in certain cases

Container	Roll
Design	Roles ware
Sheet length x sheet width	32 x 38 cm
Coating weight per m ²	80 g
Colour	Blue
Number of tear-offs	500 PCS

Sheet length	32 cm
Sheet width	38 cm

Art. no. 0899 800 880

P. Qty.: 1

The cleaning cloth has excellent resistance to the majority of commercially available solvents and is resistant to acids and bases in certain cases.

Cleaning cloth Tex-Polish

Special cleaning cloth for paint treatment and after polishing

- Fine hole structure for perfect polishing performance
- Washable and can be wringed out
- Highly tearproof, waterproof and abrasion-resistant
- Extremely absorbent

Container	Disposable dispenser
Design	Layers folding
Number of cloths	150 PCS
Length x width	40 x 38 cm
Coating weight per m ²	40 g
Colour	White

Art. no. 0899 811

P. Qty.: 1/4

Please consider the legal instruction at the beginning of this chapter.

Screen cleaning cloths

Impregnated disposable cloths for streak-free and gentle cleaning of laptop and flat screens of all kinds

- Non-alcoholic formula
- Anti-static effect
- Effortlessly removes dust, dirt and fingerprints

Chemical basis	Water
Smell/fragrance	Characteristic
AOX-free	Yes
Shelf life from production	24 Month
Number of cloths	100 PCS
Width x length	130 mm x 200 mm

Art. no. 0890 150 000

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

- Check the colour fastness/material compatibility in an inconspicuous spot before use.
- Use a dry cloth to finish off smartphones, tablets, E-readers.

Big microfibre car cloth

High-performance microfibre cloth for drying after wet cleaning in the automotive sector

- Extreme water absorption and enormous suction power (up to 500%)
- For quick, simple, gentle drying and high-gloss polishing
- Stitch-free, protects against scratches

Material	Microfibre
Length x width	50 x 70 cm
Coating weight per m ²	412 g
Colour	Grey

Art. no. 0899 900 135

P. Qty.: 2

Please consider the legal instruction at the beginning of this chapter.

Microactive cloth 3D Clean

Thorough and gentle cleaning thanks to 3D honeycomb structure

- Extremely high level of water absorption
- Lint-free
- Scratch-free
- Streak-free
- Perfect high-gloss finish

Material	Microfibre
Length x width	40 x 40 cm
Colour	Red, Grey

Art. no. 0899 900 141

P. Qty.: 3

Washable up to 60°C, do not use fabric conditioner. Care should be taken when cleaning acrylic glass.

Cleaning sponge Red Wave

Cleaning without chemicals. Cleaning sponge with eraser effect for stubborn dirt on smooth and hard surfaces. Absolute problem solver in the workshop and in the household.

- Clean heel marks on floors, pen marks and calcified surfaces
- The eraser effect of the melamine cleaning sponge allows stubborn dirt to be cleaned effortlessly with no chemicals, only water.
- Longer service life
- Due to its unique, reinforced structural construction, the sponge is very robust. Professional quality from industry.

Material	Melamine resin foam
Colour	White
Length x width x height	110 x 70 x 30 mm

Art. no. 0587 110 000

P. Qty.: 10

Please consider the legal instruction at the beginning of this chapter.

The cleaning sponge is not suitable for processing paints.

Cleaning cloth Tex-Clean

The fine, multi-purpose special cloth for dust- and lint-sensitive areas in practical dispenser packaging.

- Practical zigzag fold for easy removal
- Highly absorbent
- Highly tearproof, waterproof and abrasion-resistant

Container	Polybag
Design	Zickzack-folding
Number of cloths	140 PCS
Sheet length x sheet width	42 x 38 cm
Coating weight per m ²	67 g
Colour	Grey
Sheet length	42 cm
Sheet width	38 cm

Art. no. 0899 810 140

P. Qty.: 1/5

Please consider the legal instruction at the beginning of this chapter.

Wall bracket

Zigzag folded cleaning cloth dispenser holder

- Robust metal body
- Includes fastening material

Length x width x height	130 x 415 x 145 mm
-------------------------	--------------------

Art. no. 0899 810 00

P. Qty.: 1

Cleaning paper stand

Floor stand for cleaning paper rolls with wheels and waste bag holder

- Stable and durable
- Suitable for all common wiper and cleaning rollers

Material	Plastic/metal
Design	With wheels and rubbish bag holder
Width	56 cm

Continuation **Cleaning paper stand**

Height	88 cm
Depth	68 cm
Roll width	38 cm

Art. no. 0899 800 606

P. Qty.: 1

Wall-mounted roll holder

For cleaning paper rolls with waste bag holder

- Stable and durable
- Suitable for all common wiper and cleaning rollers

Material	Plastic/metal
Colour	Red
Width	50 cm
Depth	32 cm
Height	63 cm
Roll width	38 cm

Art. no. 0899 800 607

P. Qty.: 1

Table-top roll holder

For cleaning paper

- Stable and durable
- Suitable for all common wiper and cleaning rollers

Material	Plastic/metal
Colour	Red
Width	53 cm
Depth	33 cm
Height	24 cm
Roll width	38 cm

Art. no. 0899 800 609

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

3-ply toilet paper

Particularly soft, yet tear-resistant and secure.

- Soft and gentle
- Highly absorbent
- Tear-resistant
- Environmentally friendly

Design	Roles ware
Number of rolls	72 PCS
Width	9.5 cm
Length	27.5 m
Number of plies	3 PCS
Number of sheets	250 PCS
Length of roll	27.5 m
Colour	White

Art. no. 0899 900 250

P. Qty.: 72

Combination sponge

The combination sponge has two different sides, making it optimal for windscreen cleaning.

Composite material

- Hard, yellow side loosens coarse dirt
- Brown side absorbs fine dirt

Material	Polyurethane foam
Colour	Yellow, Brown
Length x width x height	140 x 90 x 60 mm
Form	Rectangular

Art. no. 0899 700 410

P. Qty.: 10

Please consider the legal instruction at the beginning of this chapter.

Pressing sponge

For gentle cleaning of all surfaces

Length x width x height	Form	Art. no.	P. Qty.
135 x 93 x 37 mm	Rectangular	0705 700 130	10
195 x 85 x 60 mm	Half-round	0705 700 131	10

Please consider the legal instruction at the beginning of this chapter.

Hydro sponge

For pre-cleaning, final cleaning of tiles and for jointing tasks

- Open cell structure
- Highly resistant to tearing and abrasion
- Absorbs water well

Material	Polyurethane foam
Length x width x height	16.5 x 11 x 6.5 cm
Form	Rectangular

Art. no. 0899 700 420

P. Qty.: 5

Please consider the legal instruction at the beginning of this chapter.

TFT/LCD cleaner

Special cleaner for sensitive surfaces based on renewable raw materials

- Easy and economical to use
- No stress cracking during application
- Made from renewable raw materials, especially skin-friendly and completely biodegradable

Contents	200 ml
Colour	Colourless
Shelf life from production	24 Month

Art. no. 0890 150 100

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Do not use on hot or warm TFT/LCD screens and make sure when spraying that no liquid runs into the edge of the frame.

Compressed air spray

Effortlessly removes dust in hard-to-reach areas

- Non-flammable!
- Can be used in low-voltage areas meeting VDE 0100 (voltage range: <50 V (AC), <120 V (DC)) even while energised.
- Easy to use and universal application

Contents	200 ml
Colour	Colourless
Chemical basis	Tetrafluorpropene
Shelf life from production	36 Month

Art. no. 0893 620 200

P. Qty.: 1/24

Please consider the legal instruction at the beginning of this chapter.

Do not spray into your eyes, mouth or body orifices. Do not spray on hot components.

Meets EU regulation (EU no. 517/2014)

Assembly cleaner Parts cleaner liquid

VOC-free cleaning liquid for the PARTS CLEANER parts washing device and pump spray bottle. NSF-certified.

- Good dissolving power on greases and oils
- Forms a temporary anti-corrosion layer
- Excellent cleaning power
- Good material compatibility
- Separates quickly in waste water in line with German Ecological Standard Test B 5105
- AOX-free and VOC-free

Contents	25 l
Colour	Light yellow

Art. no. 0995 000 001

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

NSF A1-registered (no.: 150221), corresponds to A1 requirements

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Ready-to-use solution. Do not store at temperatures below 5°C!

Recommended waste code number for used cleaner: 070601.

Cleaning table Parts Cleaner

Environmentally friendly parts cleaning for dealership and vehicle workshops.

- Cleaning liquid heated to 42 °C
- Easy and user-friendly operation
- Robust design

Height	122 cm
Width	102 cm
Working height	95 cm
Contents	100 l

Art. no. 0995 000 000

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Please read the operating manual in full and strictly observe the instructions therein before commissioning the device. Do not use solvents or highly alkaline or acidic media. Be sure to avoid carrying over flammable solvents (carburettor fuel/petrol). Residual current circuit breaker for additional protection included in scope of delivery. The device automatically switches off when the minimum fill level is reached (level switch).

Recommended waste code number for used cleaner: 070601.

Cleaning agent Rapid Cleaner

Concentrated multi-purpose cleaner with very good grease and oil dissolving power in 200 litre disposable drum

Contents	200 l
Container	Barrel
Smell/fragrance	Characteristic
Chemical basis	Naphtha

Art. no. 0995 2

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

We are happy to dispose of your cold cleaner in an environmentally friendly way in conjunction with our disposal partners.

Hand cleaner N-Plus tub

Microplastics-free hand cleaner for medium to heavy soiling with natural perlite exfoliating agents. For dispenser system art. no. 0891901

- Cleans and nourishes
- Prevents skin irritations thanks to a high proportion of substances with a prophylactic effect
- pH-neutral and soap-free
- Dermatologically tested

Contents	4000 ml
Smell/fragrance	Lemon
Colour	Grey
Performance (points system)	3 of 5 points
pH value	4.8

Art. no. 0893 900 001

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Hand cleaner N-Plus tube

Microplastics-free hand cleaner for medium to heavy soiling with natural perlite exfoliating agents

Gentle on the skin

- Cleans and nourishes
- Prevents skin irritations thanks to a high proportion of substances with a prophylactic effect
- pH-neutral and soap-free
- Dermatologically tested

Contents	350 ml
Smell/fragrance	Lemon
Colour	Grey
Performance (points system)	3 of 5 points
pH value	4.8

Art. no. 0893 900 012

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Hand cleaner N-Plus refill pouch

Microplastics-free hand cleaner for medium to heavy soiling with natural perlite exfoliating agents.

- Cleans and protects
- High proportion of substances with prophylactic effect prevent skin irritation
- pH-neutral and soap-free
- Dermatologically tested
- Alkali-free and silicone-free

Contents	3500 ml
Smell/fragrance	Lemon
Colour	Grey
Performance (points system)	3 of 5 points
pH value	4.8

Art. no. 0893 900 103

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Hand cleaner Basic

Hand cleaner for light to heavy soiling with natural exfoliating particles

- Kind to skin
- Biodegradable, wood-based exfoliating agent
- Alkali-free, solvent-free and silicone-free

Contents	10 l
Smell/fragrance	Lemon
Colour	Light brown
Performance (points system)	2 of 5 points
pH value	5.5

Art. no. 0893 900 015

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Cream soap, sensitive

Stand-alone dispenser can be placed right next to the sink

- Hand wash made from mild ingredients that are kind to skin
- Moisturising plant extracts protect and nourish stressed skin
- pH balanced and dermatologically tested

Contents	500 ml
Smell/fragrance	Neutral
Colour	White
Performance (points system)	1 of 5 points
pH value	4.8

Art. no. 0890 600 742

P. Qty.: 12

Please consider the legal instruction at the beginning of this chapter.

Hand cleaner Plus

Hand cleaner for medium to heavy soiling with a balanced blend of natural and PU abrasives in a practical inverted bottle.

Gentle on the skin

- Cleans and protects
- High proportion of substances with prophylactic effect prevent skin irritation
- pH-neutral and soap-free
- Dermatologically tested
- Inverted bottle ensures complete emptying
- Alkali-free and silicone-free

Contents	350 ml
Smell/fragrance	Lemon
Colour	Beige
Performance (points system)	3 of 5 points
pH value	6.5

Art. no. 0893 900 01

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Hand and nail brush

With bristles of different thicknesses for effective, gentle manual cleaning.

- Bristles of differing strengths
 - The hard plastic bristles remove heavy contamination
 - The soft natural bristles protect the nail bed
- Bristles made of polypropylene and natural hair
- High-quality waxed wood

Material	Wood
Material of the bristles	Polypropylene and natural bristle mix
Length	93 mm
Width	36 mm
Height	42 mm

Art. no. 0891 350 510

P. Qty.: 5

Please consider the legal instruction at the beginning of this chapter.

Dispenser system

Pressure pump with wall bracket for hand cleaner

Practical dispensing pump

- The pressure pump transports the hand cleaner as soon as the pump is pressed
- Exact dispensing by pumping once (6 cm³)

Total height: 40 cm

Material	Plastic/metal
----------	---------------

Art. no. 0891 901

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Washroom dispenser, manual

Dispenser with press lever for the washroom. For dosing soap and disinfectant.

Length	150 mm
Width	122 mm
Height	390 mm
Colour	White

Art. no. 0891 900 502

P. Qty.: 1

Dispenser system, manual SKIN LINE

Dispenser with press lever. For dispensing skin protection, cleaning and care products in the workshop

- Robust dispenser designed specifically for the requirements of workshops in a dark, dirt-resistant design
- Efficient and cost effective
- Maximum hygiene

Width	122 mm
Height	390 mm
Length	150 mm
Colour	Black, Grey

Art. no. 0891 900 500

P. Qty.: 1

Touchless dispenser system SKIN LINE

Electric dispenser for touch-free dosing of skin protection, cleaning and care products in the workshop

**Touch-free dosing and maximum hygiene
Practical rail system**

Width	122 mm
Height	340 mm
Length	115 mm
Colour	Black, Grey

Art. no. 0891 900 501

P. Qty.: 1

Liquid soap

Skin-friendly and mild soap for light soiling. For dispenser systems 0891900502 and 0891900503

- Fragrance and dye-free
- Alkali and soap-free
- pH-neutral, gentle on skin and dermatologically tested

Contents	1000 ml
Smell/fragrance	Odourless
Colour	Colourless
Performance (points system)	1 of 5 points
pH value/conditions	5/undiluted

Art. no. 0890 600 400

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Washing and shower gel

For SKIN dispenser, art. no. 0891 900 5. Mild cleaning gel for sensitive skin. Also suitable for washing hair.

Gentle and effective cleaning for hair and skin

- Advanced ingredients and lipid-replenishing effect
- Suitable for sensitive skin
- Adapts to the natural pH value of human skin
- Soap-free
- Dermatologically tested

Alkali-free and silicone-free

Contents	2000 ml
Smell/fragrance	Perfumed
Colour	Blue
Performance (points system)	1 of 5 points
pH value/conditions	5.8-6.8/at 20°C

Art. no. 0890 600 601

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Skin protection foam

Wash-off skin protection foam prevents soiling by water-soluble and insoluble substances.

Effective protective film between skin and penetrating substances

- Prevents adhesion of dirt through dirt-bonding emulsifiers
- Waterproof

Forms a dry, elastic, touch-proof protective film

- Non-slip gripping of tools
- Leaves no annoying residue on workpieces or tools

Food safe

Dermatologically tested

Contents	200 ml
Smell/fragrance	Characteristic
Colour	White
Performance (points system)	3 of 5 points
pH value/conditions	8.5/at 20°C

Art. no. 0890 600 102

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

This product is not a substitute for any prescribed protective measures such as gloves or similar items.

Basic skin protection cream

Wash-off skin-protection cream prevents soiling by insoluble substances.

- Effective protective film between skin and penetrating substances
- Forms a dry, elastic, touch-proof protective film
- Simplifies skin cleaning
- Very economical to use
- Free from preservatives and silicone
- Dermatologically tested and bio-degradable

Contents	1000 ml
Smell/fragrance	Characteristic
Colour	White
Performance (points system)	3 of 5 points
pH value/conditions	9.7/1% solution

Art. no. 0890 600 100

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Does not provide protection when working with water or systems mixed with water, such as cooling lubricants. This product is not a substitute for any prescribed protective measures such as gloves or similar items.

Skin protection lotion Special

Wash-off skin protection lotion to prevent soiling by water-soluble and non-water-soluble substances, sealants in particular.

Effective protective film between skin and penetrating substances

- Reduces contact with working substances that are harmful to skin
- The skin's functions are not affected

Forms a dry, elastic, touch-proof protective film

- Non-slip gripping of tools
- Leaves no annoying residue on workpieces or tools

Long-lasting

Dermatologically tested

Contents	200 ml
Smell/fragrance	Pleasant
Colour	White
Performance (points system)	5 of 5 points
pH value/conditions	7.6/at 20°C

Art. no. 0893 152

P. Qty.: 1/24

Please consider the legal instruction at the beginning of this chapter.

This product is not a substitute for any prescribed protective measures such as gloves or similar items.

Skin protection lotion Combination

For SKIN dispenser, art. no. 0891 900 5. Wash-off skin protection lotion to prevent soiling by water-soluble and non-water-soluble substances.

One product for forming a barrier against both water-soluble and non-water-soluble substances

- Effective protective film between skin and reacting agents
- Particularly suitable when alternating agents regularly
- No impairment of skin functions
- Owing to the active agent witch hazel, swelling of the skin is reduced when wearing air-sealing gloves

Forms a dry, elastic, touch-proof protective film

- Non-slip gripping of tools
- Leaves no annoying residue on workpieces or tools

Silicone-free and dermatologically tested

Contents	1000 ml
Smell/fragrance	Perfumed
Colour	White, Grey
Performance (points system)	5 of 5 points
pH value/conditions	7/at 20°C

Art. no. 0890 600 108

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

This product is not a substitute for any prescribed protective measures such as gloves or similar items. Please use the small, pre-punched removable label on the front to identify the contents of your SKIN dispenser system.

Skin protection lotion Ultra

For SKIN dispenser, art. no. 0891 900 5. Wash-off skin protection lotion to prevent soiling by non-water-soluble substances.

Effective protective film between skin and working materials

- Prevents adhesion of dirt through dirt-bonding emulsifiers
- Skin functions are not affected

Forms a dry, elastic, touch-proof protective film

- Non-slip gripping of tools
- Leaves no annoying greasy residue on workpieces or tools

Silicone-free and grease-free

Dermatologically tested

Contents	1000 ml
Smell/fragrance	Perfumed
Colour	White
Performance (points system)	4 of 5 points
pH value/conditions	7.9-8.5/at 20°C

Continuation **Skin protection lotion Ultra**

Art. no. 0890 600 106

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

This product is not a substitute for any prescribed protective measures such as gloves or similar items.
Please use the small, pre-punched removable label on the front to identify the contents of your SKIN dispenser system.

Skin care lotion

For SKIN dispenser, art. no. 0891 900 5. Lotion to nourish and regenerate skin after washing and showering.

Nourishes and regenerates

- Ingredients such as lipids help regenerate the natural skin barrier
- Allantoin moisturises the skin
- Panthenol has an anti-inflammatory effect and accelerates wound healing

Absorbs quickly and does not leave behind an annoying greasy film

Silicone-free

Dermatologically tested

Contents	1000 ml
Container	Bottle
Smell/fragrance	Perfumed
Performance (points system)	5 of 5 points
pH value/conditions	6/at 20°C

Art. no. 0890 600 206

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

UV 30 sun protection cream

Extra waterproof protection from natural and artificial UV-A, UV-B and UV-C rays with SPF UV-A 24/UV-B 30.

- Optimised UV filter with silicone coating
- Fragrance free, vitamin E acetate smooths and softens the skin, while protecting it from cell damage
- Also protects against welder's sunburn

Contents	100 ml
Smell/fragrance	Characteristic
Colour	White
Performance (points system)	4 of 5 points

Art. no. 0890 600 150

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

The skin tolerance of UV 30 sun protection cream has been carefully tested and proven. Using UV absorbers does not relieve you of the obligation to employ other specified protective measures. The intense midday sun should be avoided. Even sun creams with a high UV protection factor do not provide complete protection against UV rays.

For applications in the metal-working industry involving surface treatment and painting work, a special product specifically designed for artificial UV rays without a silicone coating should be used.

UV 50 sun protection spray

Waterproof, transparent sun spray for immediate protection against medium to high natural UVA and UVB radiation during outdoor work.

Protects and nourishes

- High level of protection with SPF 50 UV-A protection 26
- Vitamin E acetate makes the skin smooth and supple
- Protection against cell damage and premature skin ageing caused by the sun
- Fragrance free

Contents	200 ml
Smell/fragrance	Neutral
Colour	Yellowish
Performance (points system)	5 of 5 points

Art. no. 0890 600 151

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

If the product is not applied in sufficient quantities, this will reduce the effectiveness of the product's protection. In order to maintain the required level of protection, we recommend reapplying the product throughout the day. Even sun creams with a high UV protection factor do not provide complete protection against UV rays. Avoid the spray coming into contact with textiles to prevent permanent stains.

Disinfectant gel

Hand disinfectant gel in a 1000-ml bottle. For washroom dispensers 0891900502 and 0891900503

- Comprehensively effective against bacteria, fungi and enveloped viruses
- High-proof ethanol base
- Skin-friendly (dermatologically tested)

Chemical basis	Ethanol
Contents	1000 ml
Smell/fragrance	Product-typical
Colour	Colourless
Performance (points system)	5 of 5 points
pH value/conditions	8/undiluted

Art. no. 0890 600 300

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Disinfectant gel

The hand disinfectant gel is practical for on-the-go use.
The small, compact design fits in any pocket.

- Comprehensively effective against bacteria, fungi and enveloped viruses
- High-proof ethanol base
- Skin-friendly (dermatologically tested)

Chemical basis	Ethanol
Contents	100 ml
Smell/fragrance	Product-typical
Colour	Colourless
Performance (points system)	5 of 5 points
pH value/conditions	8/undiluted

Art. no. 0890 600 301

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Take care when using biocidal products. Always read the label and product information before use.

Maintenance oil Multi

Versatile multi-functional spray for a range of applications

- Lubricates, cleans and maintains
- Removes rust and protects against corrosion
- Resin-free, acid-free and silicone-free
- Does not attack rubber, paint or plastics

Chemical basis	Mineral oil
Colour	Light yellow transparent
Min./max. processing temperature for can	-10 to 40 °C
Min./max. temperature conditions	-30 to 130 °C
Shelf life from production	24 Month

Contents	Container	Type of spray head	Art. no.	P. Qty.
0.4 l	Aerosol can	Standard spray head	0893 055 40	1/12
5 l	Canister		0893 055 405	1
20 l	Canister		0893 055 420	1

Please consider the legal instruction at the beginning of this chapter.

Maintenance oil Multi Plus

High-performance multi-purpose spray for universal use

- Excellent penetrating and water displacing properties, also suitable as rust remover, contact spray, and long-term corrosion protection
- Versatile application
- Wear safety

Contents	400 ml
Chemical basis	Synthetic oil
Colour	Yellowish
Min./max. temperature conditions	-40 to 180 °C
Shelf life from production	24 Month

Art. no. 0893 056 000

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Lubricant is not harmful to health, making it ideally suited for the food processing industry.

Maintenance oil Multi Cobra

Versatile multi-functional spray for a range of applications with multi-functional spray head

- Lubricates, cleans and maintains
- Removes rust and protects against corrosion
- Resin-free, acid-free and silicone-free
- Does not attack rubber, paint or plastics

Contents	400 ml
Chemical basis	Mineral oil
Colour	Light yellow transparent
Min./max. processing temperature for can	-10 to 40 °C
Min./max. temperature conditions	-30 to 130 °C
Shelf life from production	24 Month
Container	Aerosol can
Type of spray head	2-way spray head

Continuation **Maintenance oil Multi Cobra**

Art. no. 0893 055 400

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Multifunctional lubricant MULTI BIO

Multifunctional and biodegradable lubricant with excellent adhesive properties

- Excellent adhesive properties on a wide range of surfaces
- Good penetration
- Corrosion protection and anti-wear additives
- Biodegradable in line with OECD 302
- Splash-resistant
- Silicone-free, resin-free and acid-free

Contents	400 ml
Chemical basis	Synthetic ester oils and native fatty oils
Colour	Yellowish
Min./max. temperature conditions	-20 to 90 °C
Shelf life from production	24 Month

Art. no. 0893 055 1

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Rust remover BOLTEX

Mineral oil-free, high-tech rust remover with KENA® microfluid formula for loosening seized connections and for cleaning surface rust and rust spots

- Loosens screw connections rusted solid
- Slow flash-off time, allowing the rust remover to act for several hours

Contents	300 ml
Container	Aerosol can
Type of spray head	Cobra spray head

Art. no. 0893 250 300

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Remove excess material or splashes immediately from sensitive and painted surfaces.

Rust remover Rost-Off Plus

High-quality rust remover, lubricating effect — owing to the latest additive technology (OMC₂ technology)

- Optimum creeping properties ensure outstanding rust penetration and extensive rust removal
- Corrosion protection additives for optimum protection
- Compatible with rubber and plastic

Contents	Container	Art. no.	P. Qty.
5 l	Canister	0890 300	1
20 l	Canister	0890 300 1	1
400 ml	Aerosol can	0890 200 004	1/12

Please consider the legal instruction at the beginning of this chapter.

Rust remover Rost-Off Blue Ice

High-quality rust remover with cracking effect and visual cold indicator

Cracking effect

By cooling the material surface down to -45°C, micro-fine cracks occur in the corrosion layer at the connection points. These „crack open“ the rust, ensuring better penetration of the active agent.

Optimum rust removal

- Rust is quickly penetrated and seized screws are loosened
- Heavily rusted screw connections are loosened without damaging them

Contents	400 ml
Container	Aerosol can

Art. no. 0893 241

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Rust remover Rost Off Special

High-performance rust remover with food registration (NSF - H1)

Extremely high degree of capillary activity

- Outstanding creeping properties ensure extremely fast penetration of rust and corrosion
- The optimum effect begins shortly after spraying

Excellent material compatibility

In contrast to many conventional rust removers, it does not attack rubbers or plastics.

Contents	400 ml
Container	Aerosol can

Art. no. 0893 130 400

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

NSF = internationally recognised organisation for the supervision and registration of products used in the food industry.

Cleaning liquid Multiclean

For cleaning and temporary lubrication in physiologically and ecologically sensitive areas. NSF-certified.

- Can be used in areas in which food is processed or stored, NSF H1 and K1
The product may come into contact with foodstuffs for technical reasons
- Good cleaning and degreasing performance
Removes oils, encrusted resin and silicone residues

Contents	400 ml
Colour	Colourless
Chemical basis	Aliphatic hydrocarbon

Art. no. 0890 109 6

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

NSF H1 and K1 registered (no.: 135926), meets the requirements of USDA 1998 H1

If used in areas in which food is processed or stored, only the minimum quantity technically required may be used.

NSF = internationally recognised organisation for the supervision and registration of products used in the food industry

VbF = Ordinance on Combustible Liquids (no longer valid as of 01.01.2004) has been replaced by the BetrSichV [Operational Safety Ordinance] (valid as of 03.10.2002)

Drilling and cutting foam CUT+COOL

Highly active, high-performance cutting foam for all machining work.

- Ideally suited for all machining work such as thread cutting, thread drilling, centring, broaching, reaming, drilling and milling.
- Excellent cooling effect and strong adhesive properties
- Strong performance thanks to high cutting speeds with low tool wear

Contents	400 ml
Container	Aerosol can
Colour	Yellowish
Chemical basis	Glycol and polyglycol ether, additives
Shelf life from production	24 Month

Art. no. 0893 050 007

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Free from sulphur, mineral oil, heavy metals and resin as well as no volatile hydrocarbons. Free from substances that impair wetting of paint.

Cutting and drilling oil CUT+COOL

Multi cutting oil for light to medium machining work

- For drilling, thread cutting, thread moulding, lathing, sinking, rubbing and sawing. Ideally suited for stainless steel, but also for high-alloy steels, constructional steels, non-ferrous and precious metals. Can also be used as a preservative agent on semi-finished/finished parts and machine parts, and can be used as gun oil.
- Cools even while spraying

Colour	Light brown
Smell/fragrance	Perfumed
Chemical basis	Mineral oil
Shelf life from production	18 Month

Contents	Container	Art. no.	P. Qty.
5 l	Canister	0893 050 1	1
400 ml	Aerosol can	0893 050 004	1/12

Please consider the legal instruction at the beginning of this chapter.

Free from substances that wet paint.

Cutting and drilling oil CUT+COOL Perfect

High-performance cutting oil for the heaviest machining work and higher cutting speeds

Safe and efficient to use

- Optimum results and safety for all materials and applications
- Longer tool life
- High corrosion protection
- Can be welded without advance cleaning for low quantities

Colour	Yellow orange
Smell/fragrance	Oil
Chemical basis	Mineral oil with synthetic ester
Shelf life from production	24 Month

Contents	Container	Art. no.	P. Qty.
5 l	Canister	0893 050 009	1
400 ml	Aerosol can	0893 050 008	1/6

Please consider the legal instruction at the beginning of this chapter.

Free from chlorine, silicone, heavy metals and resin. Free from substances that impair wetting of paint.

Drilling and cutting paste Cut and Cool Perfect

Optimum results and safety for all materials and applications

- Longer tool life
- High corrosion protection
- Can be welded without advance cleaning if used in low quantities
- Can be used as minimum quantity lubricant
- Paste suitable for the heaviest machining tasks

Contents	500 ml
Colour	Brown
Chemical basis	Mineral oil with synthetic ester
Shelf life from production	36 Month

Art. no. 0893 050 010

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Drilling/cutting oil Cut and Cool Eco

Biodegradable cutting oil

- Predefined quantity per valve actuation for up to 2500 applications
- Minimal smoke formation
- Easy to use
- Suitable for food-contact areas
- Suitable for contact with delicate materials (e.g. marble, plastic, electrical components)

Colour	Light yellow
Smell/fragrance	Neutral
Chemical basis	Synthetic ester
Shelf life from production	12 Month

Contents	Container	Art. no.	P. Qty.
5 l	Canister	0893 050 012	1
400 ml	Aerosol can	0893 050 011	1/6

Please consider the legal instruction at the beginning of this chapter.

- Free from chlorine, sulphur, phosphorous, silicone, resin and mineral oil
- Free from substances that impair wetting of paint
- Non-conductive

Cutting oil Cut+Cool DVGW

Thread-cutting oil with DVGW approval

- DVGW-approved
- Excellent lubricating properties
- Free from mineral oil, chlorine, silicone, acids and resin

Colour	Red
Smell/fragrance	Characteristic
Chemical basis	Polyglycol ether

Contents	Container	Shelf life from production	Art. no.	P. Qty.
0.4 l	Aerosol can	24 Month	0893 050 014	1/12
5 l	Canister	12 Month	0893 050 015	1

Please consider the legal instruction at the beginning of this chapter.

DVGW-approved

Cooling lubricant Cut+Cool Ultra HD

Partly synthetic high-performance cooling lubricant.
Particularly suitable for materials that are difficult to machine.

- Excellent results with stainless steel and aluminium
- Long tool service life
- Excellent corrosion protection
- High stability, therefore particularly resistant to micro-organisms
- Low consumption, therefore very economical
- Particularly skin friendly

Chemical basis	Mixed synthetic mineral oil
Conditions to maintain shelf life from production	at 5°C to 35°C
Shelf life from production	12 Month

Contents	Art. no.	P. Qty.
5 l	0893 050 035	1
20 l	0893 050 036	1

Please consider the legal instruction at the beginning of this chapter.

Meets the requirements of the Technical Rules for Hazardous Substances 611

Cooling lubricant Cut+Cool Ultra

Partly synthetic universal coolant

Excellent cooling effect with outstanding removal of chips

Strong lubricating performance

- High cutting performance
- Heat reduced due to less friction
- Possible to increase the machining speed

Chemical basis	Mixed synthetic mineral oil
Conditions to maintain shelf life from production	at 5°C to 35°C
Shelf life from production	12 Month

Contents	Art. no.	P. Qty.
5 l	0893 050 030	1
20 l	0893 050 031	1

Please consider the legal instruction at the beginning of this chapter.

Meets the requirements of Technical Rules for Hazardous Substances 611

Adhesive lubricant HHS® 2000

Partly synthetic oil that is extremely resistant to high pressures

- Eliminates squeaks and creaks and has excellent flow and penetration performance, as well as good corrosion protection.
- Highly adhesive lubricant that is not spun away when used on turning and rotating parts
- Compatible with O-rings/X-rings and plastics. Neutral behaviour on painted substrates.

Chemical basis	Hydrocarbon
Colour	Yellowish
Min./max. temperature conditions	-25 to 180 °C
Max. temperature resistance	200 °C
Shelf life from production	24 Month

Contents	Oil basis	Art. no.	P. Qty.
150 ml	Synthetic mineral oil	0893 106 1	1/12
500 ml	Mineral oil	0893 106	1/6/12/24

Please consider the legal instruction at the beginning of this chapter.

HHS® adhesive lubricant 5000

Extremely temperature-resistant, fully synthetic penetrating oil with PTFE

- Excellent creeping properties
- Reliable and long-term protection against corrosion
- Good compatibility with the majority of plastics, O-rings and X-rings

Contents	500 ml
Chemical basis	Mineral oil
Oil basis	Synthetic hydrocarbons
Colour	Transparent
Min./max. temperature conditions	-20 to 200 °C
Shelf life from production	24 Month

Art. no. 0893 106 3

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Provides optimum lubrication safety in everyday use.

Adhesive lubricant HHS® Fluid

Centrifuge-proof low-viscosity grease with dual effect: Penetrating properties of an oil, adhesive and pressure-resistant as grease

- When sprayed: Oil for good creep ability
- After evaporation: Grease prevents shearing
- Excellent pressure resistance
- Good material compatibility
- Resistant to splash water and salt water, weak acids and bases
- Silicone-, resin-, acid- and AOX-free

Contents	500 ml
Chemical basis	Mineral oil
Oil basis	Synthetic
Colour	Yellowish
Min./max. temperature conditions	-25 to 170 °C
Shelf life from production	36 Month

Art. no. 0893 106 4

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Adhesive lubricant HHS® Lube

EP long-life spray grease with a high protective factor against weathering and environmental influences

- Low adhesion of dust and dirt
- High pressure load of lubricated parts
- Minimises wear and substance loss of lubricating points

Contents	500 ml
Chemical basis	Synthesis of fat and additives in hydrocarbon solvents
Oil basis	Synthetic/mineral oil combination
Colour	Opal green
Min./max. temperature conditions	-25 to 150 °C
Shelf life from production	36 Month

Art. no. 0893 106 5

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Adhesive lubricant HHS® Grease

High-quality, white, long-life maintenance grease with PTFE

- Excellent corrosion protection and outstanding sealing properties against moisture and dirt
- Dry-running property: Once the grease film has been torn off, the PTFE performs the lubrication
- Resistant to splashed water, salt water, weak acids and alkalis, silicone-free, resin-free, acid-free and AOX-free

Contents	400 ml
Chemical basis	Mineral oil
Oil basis	Mineral oil
Colour	Brilliant white
Min./max. temperature conditions	-15 to 130 °C
Shelf life from production	24 Month

Art. no. 0893 106 7

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Adhesive lubricant HHS® Drylube

Shear-proof dry synthetic wax with PTFE

- Lubricant does not shear on fast-turning and rotating parts
- Outstanding creep and gap penetration characteristics
- Resistant to spray water and salt water, weak acids and bases

Contents	400 ml
Chemical basis	Synthetic wax oxidant
Oil basis	Synthetic wax
Colour	Yellow, Brown
Min./max. temperature conditions	-30 to 100 °C
Shelf life from production	24 Month

Art. no. 0893 106 6

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

This product is not subject to the viscosity classification. Shortly after being sprayed on, the product forms a highly effective, wax-based dry lubricating film, thereby ensuring optimum protection against lubrication.

Adhesive lubricant HHS® foodstuffs

Waterproof, synthetic adhesive lubricant with penetrating properties

Can be used in areas in which food is processed or stored (NSF H1)

Excellent creep properties

- Lubricates hard-to-reach areas
- Penetrates very tight spaces and tolerances

Contents	500 ml
Chemical basis	Synthetic oil with a multifunction additive combination
Colour	Colourless
Min./max. temperature conditions	-25 to 180 °C
Shelf life from production	24 Month

Art. no. 0893 107 6

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

NSF H1-registered (no.: 140816), meets the requirements of H1, 1998.

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

If used in areas in which food is processed or stored, only the minimum quantity technically necessary may be used. When using as an anti-corrosive film for food contact surfaces, completely remove all lubricant before re-starting the device.

Adhesive lubricant pre-cleaner HHS® Clean

Highly effective pre-cleaner + adhesion promoter (primer function) specifically matched to HHS products

- Primer function
- Short flash-off time
- Good material compatibility on various surfaces

Contents	500 ml
Oil basis	Mineral oil
Colour	Green
Min./max. processing temperature	5 to 40 °C
Shelf life from production	24 Month

Art. no. 0893 106 10

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Aluminium paste AL 1100

Highly adhesive lubricant resistant to temperatures and high pressure

- Anti-seize aluminium/copper-based high-performance lubricant
- Prevents freezing and seizing, cold shuts, wear, corrosion, frictional corrosion
- Resistant to water, lyes and acids
- Temperature resistance of -80°C to + 1,100°C

Min./max. temperature conditions	-80 to 1100 °C
Colour	Silver coloured

Container	Contents	Weight of content	Shelf life from production	Art. no.	P. Qty.
Aerosol can	300 ml	242 g	18 Month	0893 110 0	1/12
Brush box	200 ml	220 g	12 Month	0893 110 000	1/12
Can	1100 ml	1000 g	36 Month	0893 110 10	1/6
Tube	110 ml	100 g	36 Month	0893 110 1	1/10

Please consider the legal instruction at the beginning of this chapter.

Continuation **Aluminium paste AL 1100**

Do not apply to painted surfaces.

Brush can is ideal for use as a wheel hub paste.

Copper paste CU 800

Highly adhesive lubricating, separating and anti-corrosive copper paste that is extremely resistant to high temperatures and high pressures

- Temperature range from -40 °C to +1200 °C
- Great, long-lasting lubricating effect
- Resistant to water and diluted alkalis and acids
- Silicone-free and AOX-free

Chemical basis	Soft metal-containing semi-synthetic base grease
Min. temperature conditions	-20 °C
Max. temperature conditions	1200 °C
Colour	Copper

Contents	Container	Shelf life from production	Art. no.	P. Qty.
1 l	Can	36 Month	0893 800 2	1/6
100 ml	Tube	24 Month	0893 800 1	1/10

Please consider the legal instruction at the beginning of this chapter.

Do not apply to brake discs or brake pad linings.

Copper spray CU 800

Highly adhesive lubricating, separating and anti-corrosive copper spray that is extremely resistant to high temperatures and high pressures

Very high resistance

- Temperature application range from -40 °C up to +1200 °C
- Resistant to water, diluted lyes and diluted acids

Provides long-lasting protection against burning-on and seizing, cold welding, wear, corrosion and frictional corrosion.

Contents	300 ml
Chemical basis	Soft metal-containing semi-synthetic base grease
Container	Aerosol can
Min. temperature conditions	-40 °C
Max. temperature conditions	1200 °C
Shelf life from production	24 Month
Colour	Copper

Art. no. 0893 800

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Do not apply to brake discs or brake linings.

Dry lubricant spray PTFE

Dry lubrication, does not attract dirt and dust

Remedies squeaking, creaking and jamming. Provides long-term protection against wear.

Very high resistance

- Temperature resistant from -180°C to +260°C (temporarily)
- Permanently resistant to water, acids and bases

Contents	300 ml
Chemical basis	Polytetrafluoroethylene
Colour	Milky-transparent (protective film)
Min./max. temperature conditions	-180 to 260 °C
Shelf life from production	24 Month

Art. no. 0893 550

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Smokers must wash their hands after use. Smoking contaminated tobacco products may cause health-related issues.

Assembly paste

High-performance assembly paste spray for run-in lubrication

- Protects against wear and guarantees dry-running properties
- High resistance
- Temperature-resistant and pressure-resistant

Contents	300 ml
Chemical basis	Calcium complex grease
Colour	Black
Min./max. temperature conditions	-30 to 150 °C
Shelf life from production	24 Month

Art. no. 0893 850

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Solid lubricant paste

High-performance solid lubricant paste for assembly and run-in lubrication

Contents	100 ml
Colour	White
Min./max. temperature conditions	-30 to 250 °C
Shelf life from production	24 Month

Continuation **Solid lubricant paste**

Art. no. 0893 104 1

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Lubricating grease WGF 130

High-performance lubricating grease

- Lithium soap grease with molybdenum disulphide (MoS₂)
- Forms a solid lubricating film on the running surfaces from the grease itself under load
- Ensures additional emergency running lubrication

Contents	1 l
Chemical basis	Lithium 12 hydroxystearate
Oil basis	Mineral oil
Colour	Black
Min./max. temperature resistance	-30 to 130 °C
Max. short-term temperature resistance	150 °C
Shelf life from production	36 Month

Art. no. 0893 530

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Foodstuffs lubricating oil

Colourless special lubricant with creeping properties for the food industry as well as for the beverage, pharmaceutical and clinical industries

Low-viscosity and colourless special lubricant with creeping properties

- Excellent lubricating properties of hard-to-reach areas thanks to low viscosity
- Excellent creeping and cleaning effect ensures optimum protection of machines and conveyor areas exposed to water
- Economical
- No visual impairment with occasional contact between the lubricant and product

Contents	300 ml
Chemical basis	Medical white according to DAB 10
Lubricant system	Oil
Colour	Transparent
Min./max. temperature conditions	-10 to 180 °C
Shelf life from production	24 Month

Art. no. 0893 107 1

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

- NSF H1-registered (no.: 126582), corresponds to H1 requirements
- Approved by the LGA (Bavarian State Office of Commerce, Nuremberg, Germany)

NSF = international-
nally recognised
organisation for
the supervision
and registration
of products used
in the food pro-
cessing sector

Lubricant LMS Liquid Premium

**Highly adhesive special lubricant with PTFE for areas
in which food is processed or stored. NSF H1.**

- NSF H1 certification
- High penetration and lubricating effect
- Stable under high pressures and high load
- Provides excellent material protection
- Solvent-free

Contents	500 ml
Chemical basis	Mixed synthetic mineral oil
Colour	Colourless
Min./max. temperature conditions	-40 to 200 °C
Shelf life from production	24 Month

Art. no. 0893 107 006

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

NSF = international-
nally recognised
organisation for
the supervision
and registration
of products used
in the food pro-
cessing sector

Lock cylinder spray

For the care of all types of locks

- Excellent creeping properties
- Ensures very good moisture displacement
- Contains corrosion protection additives
- Resin- and acid-free

Contents	50 ml
Chemical basis	Mineral oil
Colour	Light brown
Shelf life from production	24 Month

Art. no. 0893 052

P. Qty.: 1/12/24

Please consider the legal instruction at the beginning of this chapter.

Maintenance spray

For lubricating hinges, tool mounts and machine mounts

- Highly effective wear protection additives ensure excellent friction reduction
- Excellent creeping and cleaning performance
- Also suitable for use as gun oil

Chemical basis	Mineral oil
Colour	Light brown
Shelf life from production	24 Month
Container	Aerosol can

Contents	Min./max. temperature conditions	Art. no.	P. Qty.
0.15 l	-15 to 150 °C	0893 051	1/12
100 ml	-30 to 150 °C	0893 051 702	1/24

Please consider the legal instruction at the beginning of this chapter.

Silicone spray grease

Glass-like transparent, extremely lubricating and insulating silicone grease that displaces water

- Good protection against moisture and corrosion
- Good lubricating properties
- Very high level of electrical resistance

Chemical basis	Polydimethylsiloxane
Colour	Transparent, translucent, opaque
Contents	500 ml

Art. no. 0893 223

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Care and lubricant spray

Protects and maintains plastic and rubber in vehicles, in technical equipment and in the home

- Non-dirty, non-greasy and fully synthetic care and lubricant film
- Anti-slip protection against friction and noises
- Effective, lasting protection
- Resistant to high temperatures
- Filled with environmentally-friendly propellant
- Silicone-free, resin-free and AOX-free

Contents	300 ml
Chemical basis	White oil with additives
Solid lubricant	PTFE-Polytetrafluoroethylene
Colour	Transparent
Shelf life from production	24 Month

Art. no. 0893 224

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Wire cable spray

Protective wax with OMC₂ for lubricating and preserving

- Does not drip when heated
- Optimum penetration
- Outstanding resistance to water
- Contains additives with OMC₂ technology
- Silicone-free and AOX-free
- Resin-free and acid-free
- Free from solid lubricants
- Compatible with Viton and Perbunan elastomers

Contents	500 ml
Chemical basis	Synthetic wax oxidant

Colour	Brown
Min./max. temperature conditions	-40 to 120 °C
Shelf life from production	24 Month

Art. no. 0893 105 8

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Gearwheel spray

Black, shear-resistant, high-pressure resistant special lubricant

- High pressure resistance
- Centrifuge-resistant
- Solid lubricant additives for good dry-running properties
- Contains corrosion protection additives
- O-ring compatible
- Resistant to spray water and salt water, as well as to weak acids and alkali solutions
- Silicone-free, resin-free, acid-free and bitumen-free

Contents	400 ml
Chemical basis	Mineral oil with polybutene
Oil basis	Mineral oil
Colour	Black
Min./max. temperature conditions	-30 to 180 °C
Shelf life from production	24 Month

Art. no. 0893 105 5

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Soiled lubrication points must be thoroughly cleaned and degreased with 1A cleaner, art. no. 0890 106 500, prior to application.

Commercial vehicle low-viscosity grease

Lithium-soap, high-pressure low-viscosity grease based on synthetic base oil

Conforms to specifications MAN 283 LI-P 00/000, MB 264.0 and Willy Vogel

Complies with leading vehicle manufacturer specifications for optimum quality

Excellent pressure absorption capacity

Good feed behaviour, even at low temperatures

Water-repellent

Excellent protection against corrosion

Silicone-, acid- and resin-free

Weight of content	25 kg
Soap base	Lithium

Continuation **Commercial vehicle low-viscosity grease**

Colour	Green
Min./max. temperature conditions	-40 to 100 °C
Max. short-term temperature resistance	110 °C
Shelf life from production	72 Month

Art. no. 0893 881 4

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

The operating instructions of the assembly and commercial vehicle manufacturers must be observed.

Woodslide

For neutralising resin

- Prevents sticking and soiling with chips or wood flour.
- Cleans adjustment wheels, hand spindles and dimensional stops
- Prevents corrosion

Contents	5 l
Container	Canister
Colour	Transparent
Shelf life from production	24 Month

Art. no. 0893 070

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Woodslide must not be applied directly to the workpiece surface. Test product first for use on painted parts.

Cable lubricant

For easy feeding of electric cables

- Reduces friction resistance by up to 80%
- Gel-like viscosity
- Leaves no sticky residue behind
- Non-toxic and biodegradable

Chemical basis	Water
Colour	Transparent
Density	1.1 g/cm³
pH value	7.5-8.5
Min. processing temperature	5 °C
Max. processing temperature	40 °C
Bio-degradable	95%
Weight of content	1000 g
Container	Bottle
Shelf life from production	36 Month

Art. no. 0893 750 4

P. Qty.: 1/8

Please consider the legal instruction at the beginning of this chapter.

Avoid contact with natural stone such as marble and granite. Remove soiling while fresh.

Hand-lever grease gun Lube-Shuttle®

The system for lubricating greases in 400 g system cartridges

- Simple, quick and completely clean loading and removal of grease cartridge, without opening the gun
- No need to bleed anymore; virtually no problems caused by air
- Optimum emptying of cartridges; completely environmentally friendly

Material	Steel
Max. working pressure	800 bar
Length	380 mm
Product weight (per item)	929 g

Art. no. 0986 05

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Lube-Shuttle® is a registered trademark of MATO GmbH & Co KG.

Hand-lever grease gun

For 400 g cartridges (DIN 1284, 235 x Ø 53.5 mm) or for 500 cm³ loose grease

- Feed quantity can be dispensed up to 1.5 cm³
- Working pressure: 400 bar
- Maximum pressure up to over 800 bar

Material	Steel
Max. working pressure	800 bar
Length	370 mm
Product weight (per item)	1298 g

Art. no. 0986 00

P. Qty.: 1

Double-handed grease gun

The short stroke two-hand grease gun for 500 g screw cartridges for easy and clean lubrication of machines.

- Innovative short-stroke technology, i.e. with variable stroke
- 10 mm grease pump piston for fast grease delivery
- With hose holder

Material	Metal
Max. working pressure	400 bar
Connection thread	M10 x 1
Suitable for	500 g screwed cartridge
Length	350 mm
Product weight (per item)	1097 g

Art. no. 0986 000 002

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

- Since the piston chamber of the grease gun is not filled using spring pressure, but via the vacuum generated by the piston, the hand lever must not be opened suddenly.
- Perform even and quick work cycles.
- Depending on the viscosity (given by NLGI degree and temperature), due to the vacuum principle, a lingering time must be observed when the hand lever is open in order to achieve sufficient filling of the piston chamber.

Single-handed grease guns

With variable pressure setting directly on handle

- Enables one-handed lubrication, which facilitates work with hard-to-reach lubrication points
- Ergonomic handle, non-slip, very good power transmission and handling
- Can be switched from grease conveyance with high volume to high pressure using the handle

Material	Metal
Max. working pressure	300 bar
Connection thread	M10 x 1

Suitable for	Length	Product weight (per item)	Art. no.	P. Qty.
400 g - lube shuttle cartridge	230 mm	1143 g	0986 000 011	1
400 g - pull off cartridge	400 mm	1400 g	0986 000 010	1
500 g screwed cartridge	235 mm	807 g	0986 000 012	1

Chuck

For hand-lever grease gun

- Also suitable for Lube-Shuttle hand-lever grease gun
- M10x1

Art. no. 0986 003

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Easylock grease coupling

Hydraulic safety gripper nosepiece for all greasing work and maintenance tasks in vehicle construction, agriculture, building and industry.

- High-performance hydraulic seal
- Integrated linear swivel
- Can be disconnected at pressures up to 600 bar or more
- External diameter in accordance with DIN 1283

Art. no. 0986 004 001

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Cordless grease gun FP 12-A

Sturdy and handy cordless grease gun for lubricating lubrication points.

- High working pressure enables application of all standard greases
- Can be used for cartridges and bags as well as other types of container
- Li-ion battery pack for a long working time per battery charge

Nominal voltage	12 V/DC
Rechargeable battery/battery capacity	3 Ah
Max. working pressure	562 bar
Capacity with cartridge	411 g
Max. hose pressure	690 bar
Weight of machine with rechargeable battery	3.3 kg
Included in delivery (Lieferumfang)	Carrying bag

Art. no. 5700 200 1

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Please consider the legal instruction at the beginning of this chapter.

Filing neck required for filling using grease filler item no. 098602.

Multi-purpose grease I

Universal lithium-saponified grease

- Squeeze-stable and oxidation-resistant
- Excellent sealing, dust- and dirt-repellent

Soap base	Lithium 12 hydroxystearate
Lubricant code	K2K-30
Min./max. temperature conditions	-30 to 130 °C
Colour	Yellow
NLGI grade/conditions	2/with DIN 51818
Base oil viscosity, kinematic/conditions	110 mm ² /s/at 40 °C
Min. dripping point/conditions	180 °C/in accordance with DIN ISO 2176
Min./max. worked penetration /conditions	265 x 0.1 mm-295 x 0.1 mm/in accordance with DIN ISO 2137
Corrosion protection period/category	Corrosion category 0
VKA welding load	1800 N
Shelf life from production	60 Month
Oil basis	Mineral oil

Weight of content	Container	Art. no.	P. Qty.
400 g	Cartridge	0893 870 1	1/12
400 g	Cartridge Lube Shuttle	0893 870 101	1/12
500 g	Screwed cartridge	0893 870 102	1/12
25 kg	Pail	0893 870 103	1

Please consider the legal instruction at the beginning of this chapter.

Greases are supplied in plastic cartridges. The plastic cartridges improve storage (they prevent the grease from oozing out at high temperature). Store cartridges upright in a cool, dry place! The operating instructions of the vehicle, machinery and assembly manufacturers must be observed! For further information, refer to the Technical Data Sheet.

Multi-purpose grease II

Lithium-soap graphite grease resistant to high pressures with EP additives.

- Resistant to high pressure due to EP additive
- Excellent emergency running characteristics due to graphite
- Good sealing effect and corrosion protection

Soap base	Lithium 12 hydroxystearate
Lubricant code	KPF2K-30
Min./max. temperature conditions	-30 to 130 °C
Colour	Grey, Black
NLGI grade/conditions	2/with DIN 51818
Base oil viscosity, kinematic/conditions	110 mm ² /s/at 40 °C
Min. dripping point/conditions	180 °C/in accordance with DIN ISO 2176
Min./max. worked penetration /conditions	265 x 0.1 mm-295 x 0.1 mm/in accordance with DIN ISO 2137

Corrosion protection period/ category	Corrosion category 0
VKA welding load	2400 N
Shelf life from production	60 Month
Oil basis	Mineral oil

Weight of content	Container	Art. no.	P. Qty.
400 g	Cartridge	0893 871 1	1/12
400 g	Cartridge Lube Shuttle	0893 871 101	1/12
500 g	Screwed cartridge	0893 871 102	1/12
25 kg	Pail	0893 871 103	1

Please consider the legal instruction at the beginning of this chapter.

Greases are supplied in plastic cartridges. The plastic cartridges improve storage (they prevent the grease from oozing out at high temperature). Store cartridges upright in a cool, dry place! The operating instructions of the vehicle, machinery and assembly manufacturers must be observed!

Multi-purpose grease III

Physiologically inert, colourless grease with a multi-functional combination of additives.

- Can be used in areas in which food is processed or stored
- Good adhesive properties
- Dust and water-repellent

Soap base	Inorganic
Lubricant code	KP2N-20
Min./max. temperature conditions	-15 to 130 °C
Colour	Transparent
NLGI grade/conditions	2/with DIN 51818
Base oil viscosity, kinematic/conditions	200 mm ² /s/at 40 °C
Min./max. worked penetration /conditions	265 x 0.1 mm-295 x 0.1 mm/in accordance with DIN ISO 2137
Corrosion protection period/ category	Corrosion category 0
VKA welding load	2200 N
Shelf life from production	24 Month
Oil basis	Medical white oil

Weight of content	Container	Art. no.	P. Qty.
0.4 kg	Cartridge	0893 107 002	1/24
0.4 kg	Cartridge Lube Shuttle	0893 107 402	1/12
25 kg	Pail	0893 107 252	1

Please consider the legal instruction at the beginning of this chapter.

NSF H1 registered (no.: 135924), meets the requirements of USDA 1998 H1. The product may come into contact with foodstuffs for technical reasons.

Continuation **Multi-purpose grease III**

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Greases are supplied in plastic cartridges. The plastic cartridges improve storage (they prevent the grease from oozing out at high temperature). Store cartridges upright in a cool, dry place! The operating instructions of the vehicle, machinery and assembly manufacturers must be observed! For further information, refer to the technical data sheet.

Long-life grease III

Lithium-soap, multi-purpose grease with EP additives for high loads

- For long lubrication intervals
- Good sealing action and resistant to water, resistant to oxidation and corrosion
- Free from heavy metals and chlorine, silicone and resin-free

Soap base	Lithium 12 hydroxystearate
Lubricant code	KP2K-30
Min./max. temperature conditions	-30 to 130 °C
Colour	Light brown
NLGI grade/conditions	2/with DIN 51818
Base oil viscosity, kinematic/conditions	280 mm ² /s/at 40°C
Min. dripping point/conditions	180 °C/in accordance with DIN ISO 2176
Min./max. worked penetration /conditions	265 x 0.1 mm-295 x 0.1 mm/in accordance with DIN ISO 2137
Corrosion protection period/category	Corrosion category 0
VKA welding load	2600 N
Shelf life from production	60 Month
Oil basis	Mineral oil

Weight of content	Container	Art. no.	P. Qty.
400 g	Cartridge	0890 402	1/12
400 g	Cartridge Lube Shuttle	0890 402 1	1/12
500 g	Screwed cartridge	0890 402 2	1/12
25 kg	Pail	0890 402 3	1

Please consider the legal instruction at the beginning of this chapter.

Greases are supplied in plastic cartridges. The plastic cartridges improve storage (they prevent the grease from oozing out at high temperature). Store cartridges upright in a cool, dry place! The operating instructions of the vehicle, machinery and assembly manufacturers must be observed! For further information, see the technical information leaflet.

Multi-purpose grease IV

Synthetic high-performance grease with white solid lubricants

- Can be used in areas in which food is processed or stored
- Resistant to high pressure due to EP additive
- Excellent emergency running properties
- Good sealing action and protection against corrosion

Soap base	AL complex
Lubricant code	KPFHC2R-40
Min./max. temperature conditions	-45 to 180 °C
Colour	White
NLGI grade/conditions	2/with DIN 51818
Base oil viscosity, kinematic/conditions	350 mm ² /s/at 40 °C
Min. dripping point/conditions	250 °C/in accordance with DIN ISO 2176
Min./max. worked penetration /conditions	285 x 0.1 mm-285 x 0.1 mm/in accordance with DIN ISO 2137
Corrosion protection period/category	Corrosion category 0
VKA welding load	3000 N
Shelf life from production	24 Month
Oil basis	Synthetic

Weight of content	Container	Art. no.	P. Qty.
0.4 kg	Cartridge	0893 107 003	1/24
25 kg	Pail	0893 107 253	1

Please consider the legal instruction at the beginning of this chapter.

NSF H1-registered (no.: 135924), meets the requirements of USDA 1998 H1. The product may come into contact with foodstuffs for technical reasons.

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Greases are supplied in plastic cartridges. The plastic cartridges improve storage (they prevent the grease from oozing out at high temperature). Store cartridges upright in a cool, dry place! The operating instructions of the vehicle, machinery and assembly manufacturers must be observed.

Commercial vehicle high-performance lubricating grease

Lithium-complex lubricating grease, partly based on synthetic oil

- Complies with the specifications of MAN 284, MB 265.1 and exceeds MB 267
- Broad range of applications
- Very high pressure absorption capacity

Soap base	Lithium complex
Lubricant code	KP2N-30
Min./max. temperature conditions	-30 to 140 °C
Colour	Yellow, Brown
NLGI grade/conditions	2/with DIN 51818
Base oil viscosity, kinematic/conditions	210 mm ² /s/at 40°C
Min. dripping point/conditions	260 °C/in accordance with DIN ISO 2176
Min./max. worked penetration /conditions	265 x 0.1 mm-295 x 0.1 mm/in accordance with DIN ISO 2137
Corrosion protection period/category	Corrosion category 0
VKA welding load	2800 N
Shelf life from production	72 Month
Oil basis	Mineral oil

Weight of content	Container	Art. no.	P. Qty.
400 g	Cartridge	0893 880	1/12
400 g	Cartridge Lube Shuttle	0893 880 1	1/24
500 g	Screwed cartridge	0893 880 002	1/12
25 kg	Pail	0893 880 4	1

Please consider the legal instruction at the beginning of this chapter.

Not suitable for lubricating points for which lubricating greases containing solid lubricants are specified, such as track rod joints. We recommend using multi-purpose grease II, art. no. 08938711, for this purpose.

The operating instructions of the major assembly and commercial vehicle manufacturers must be observed! For further information, refer to the technical data sheet. Store upright in a cool, dry place!

V-belt spray

For extending the service life of V-belts

- Prevents slipping, transfers full drive output, eliminates squeaking
- Eliminates readjustment work in case of minor belt slippage due to cold, moisture or due to normal elongation
- AOX-free

Contents	400 ml
Chemical basis	Mineral oil
Colour	Light yellow
Boiling point	-44 °C
Ignition temperature	250 °C
Shelf life from production	24 Month

Art. no. 0893 230

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Only use in well-ventilated areas.

Brake protector paste 1400

Grey supple and adhesive paste with excellent lubricating properties, reliably separates and ensures excellent protection against corrosion.

- High compressive strength ensures easy movement and minimum wear
- Prevents corrosion, seizing and burning
- High ceramic content
- Ensures uniform loosening of screw connections
- Does not contain any metallic pigments and is free from MoS₂ as well as additives containing sulphur
- Non-toxic
- Silicone and metal-free

Colour	Light grey (bright grey)
Smell/fragrance	Characteristic
Chemical basis	Mixed synthetic mineral oil
Shelf life from production	24 Month

Weight of content	Art. no.	P. Qty.
3 g	0893 116 010	50
100 g	0893 116 100	1/12

Please consider the legal instruction at the beginning of this chapter.

Brake cylinder paste

Fully synthetic brake cylinder paste for hydraulic brake systems

- Keeps sleeves supple
- Compatible with DOT 3, DOT 4, DOT 5.1 brake fluid
- Protects against corrosion
- Extends the brake cylinder service life

Weight of content	180 g
Colour	Yellow
Smell/fragrance	Characteristic
Chemical basis	Synthetic oil with a multifunction additive combination
Shelf life from production	36 Month

Art. no. 0893 980

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

HT brake protection

Lubricating, separating and anti-corrosive paste extremely resistant to high temperatures and high pressures

- Heat-resistant up to 1400°C
- Permanent and high level of lubrication thanks to ceramic components
- Resistant to diluted acids, bases, spray water and salt water

Colour	Light grey (bright grey)
Chemical basis	Mineral oil
Shelf life from production	12 Month

Contents	Weight of content	Smell/fragrance	Art. no.	P. Qty.
200 ml	335 g	Mild	0893 816 001	1/12
300 ml	295 g	Characteristic	0893 816	1/12

Please consider the legal instruction at the beginning of this chapter.

- Do not apply to brake discs and brake friction lining
- Shake the aerosol thoroughly

HT brake protection brush adapter

Colour	Black
Length	110 mm
Material	PP - Polypropylene

Art. no. 0891 800 000

P. Qty.: 1

Tyre mounting paste

For mounting car, truck and motorcycle tyres

Good sliding properties

- Low force and minimal time required
- Minimal use of materials
- Low machine wear
- Protects tyres and rim flange
- Improved centring of the tyre on the rim

Short flash-off time

- Positive connection between the tyre and rim is established soon after assembly
- Fewer complaints and subsequent costs for any re-balancing task

Rubber and rim care

- Keeps the rubber soft, thereby ensuring permanent sealing between the rim and tyre bead
- Prevents rust from forming (anti-corrosive)
- Prevents the tyre from sticking to the rim

Weight of content	5 kg
Viscosity/consistency	Pasty
Chemical basis	Hydrocarbonate

Contents	Colour	Shelf life from production	Art. no.	P. Qty.
4.8 l	White, Transparent	60 Month	0890 122 1	1
4716.98 ml	Black	24 Month	0890 124 1	1

Please consider the legal instruction at the beginning of this chapter.

Brush for tyre mounting paste

- Length: 28 cm
- Angled shape

Length	28 cm
Design	Offset

Art. no. 0693 080 0

P. Qty.: 1

Tyre mounting paste Cargo Special

For fitting and removing all large and heavy-duty tyres, such as truck tyres, agricultural tyres and industrial tyres (EM tyres)

- Excellent gliding properties
- Long flash-off time
- Tyre and rim care
- Frost-resistant
- Physiologically safe and biodegradable
- Silicone-free

Contents	4 l
Weight of content	4 kg
Colour	Yellow, Brown
Viscosity/consistency	Pasty
Shelf life from production	12 Month

Art. no. 0890 123 404

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Not suitable for fitting motorcycle and truck tyres due to long flash-off behaviour.

High-temperature lubricant paste HSP 1400

Grey, metal-free lubricant paste that reduces wear, separates surfaces reliably and provides outstanding corrosion protection.

- For universal use, supple and highly adhesive
- Safe for health
- Ensures easy movement and minimal wear
- Prevents corrosion, seizing and burning on

Contents	300 ml
Chemical basis	Mixed synthetic mineral oil with organic thickener and white solid lubricant combination
Colour	Grey
Min./max. temperature conditions	-40 to 1400 °C
Shelf life from production	24 Month

Art. no. 0893 123

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

NSF H2 registered (no.: 150178), corresponds to H2 requirements.

NSF = internationally recognised organisation for the supervision and registration of products used in the food processing sector

Not suitable for lubricating bearings

Compressor oil WK 100

Reliable lubrication of air compressors

- Suitable for all types of air compressors
- Highly reliable lubrication
- Highly resistant to ageing
- Contains additives to protect against corrosion and wear

Contents	1000 ml
Container	Bottle
Colour	Transparent
Smell/fragrance	Characteristic
Chemical basis	Mineral oil
Shelf life from production	36 Month

Art. no. 0893 050 506

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Only suitable for bearing lubrication on turbo-compressors.

BIO chainsaw oil

Biodegradable chain oil with SuperTECH adhesion additive for all high-performance power saws

- High-quality additives guarantee optimum lubrication of chainsaw chains, guide rails and chain wheels
- New SuperTECH adhesion additive for excellent adhesion

Suitable for tricky application conditions

- When sawing hardwood, the guide bar does not overheat
- Suitable for use in extreme daytime temperatures in summer and winter

Contents	5 l
Container	Canister
Colour	Yellow
Smell/fragrance	Characteristic
Chemical basis	Natural ester

Continuation **BIO chainsaw oil**

Art. no. 0893 057 05

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

TRIATHLON® gearbox oil Automatic Super

Gearbox oil for universal use with high thermal stability and excellent low-temperature properties.

TRIATHLON gearbox oils are produced and packaged in compliance with the most stringent quality specifications in accordance with DIN EN ISO 9001

- High product safety
- Extensive manufacturer approvals

Only high-quality first raffinates and raw materials are used in TRIATHLON oils

Satisfies key specifications of automotive manufacturers

Outstanding protection against wear and corrosion

Contents	20 l
Type of oil	HC synthesis
Approved for gear oils	Dexron III H, Dexron III G, Dexron II E, Dexron II D, Allison C4, Caterpillar TO-2, Voith H55.6335.xx, MAN 339 Type V1, MAN 339 Type Z1, MB 236.1, TASA, Ford Mercon
Recommended applications for gear oils	ZF-TE-ML 02F, ZF-TE-ML 03D, ZF-TE-ML 09, ZF-TE-ML 11B, ZF-TE-ML 14B, ZF-TE-ML 04D, ZF-TE-ML 14A, ZF-TE-ML 17C
Shelf life from production	60 Month

Art. no. 0897 410 003

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

TRIATHLON® gearbox oil Gear 75W-90

High-performance, high-pressure gearbox oil for a broad range of applications

- Produced and packaged in compliance with the most stringent quality specifications in line with DIN EN ISO 9001
- Made with high-quality first raffinates and raw materials
- Outstanding lubrication reduces running noise
- High degree of protection against corrosion and wear and optimum resistance to ageing

Contents	20 l
Type of oil	Fully synthetic
Viscosity grade	75W-90
Approved for gear oils	API GL 4+, Ford ESD M2C 175-A
Recommended applications for gear oils	VW 50150 (G50), ZF-TE-ML 08A
Shelf life from production	60 Month

Art. no. 0897 475 923

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

TRIATHLON® gearbox oil Gear Cargo 75W-90

Multigrade gearbox oil, suitable for lubrication of all drive elements, such as synchronised and non-synchronised manual gearboxes and hypoid-toothed final drives

TRIATHLON gearbox oils are produced and packaged in compliance with the most stringent quality specifications in accordance with DIN EN ISO 9001

- High product safety
- Extensive manufacturer approvals

Only high-quality first raffinates and raw materials are used in TRIATHLON oils

Satisfies key specifications of automotive manufacturers

Reduces friction and saves fuel

Type of oil	Partly synthetic
Viscosity grade	75W-90
Approved for gear oils	API GL 4, API GL 5, API MT1, MIL-L 2105 D, MIL-PRF 2105 E
Recommended applications for gear oils	DAF, Eaton, Scania STO 1:0, Volvo (axles), ZF-TE-ML 12E, ZF-TE-ML 16B, ZF-TE-ML 17B, ZF-TE-ML 19B, MAN M3343 Type M
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.
20 l	0897 475 943	1
60 l	0897 475 944	1

Please consider the legal instruction at the beginning of this chapter.

Gearbox oil Gear DCT

High-performance oil with optimum ageing stability and excellent wear protection. Very good low-temperature properties and excellent shear stability.

Lubricant specially designed for dual-clutch transmissions (DCT transmissions). Also suitable for dual-clutch transmissions, with common oil supply for clutch, synchronisation, gear train and hydraulic control system.

Type of oil	HC synthesis
Shelf life from production	60 Month

Continuation **Gearbox oil Gear DCT**

Contents	Recommended applications for gear oils	Art. no.	P. Qty.
20 l	Chrysler, Ford WSS-M2C 936-A, VW G 052 182, VW G 052 529, Mitsubishi Dia Queen, Volvo 1161838, BMW DCTF-1, MB 236.21, Peugeot Citroen (PSA) 9734.S2, Porsche 999.917.080.00	0897 430 003	1
60 l	Chrysler, Ford WSS-M2C 936-A, VW G 052 182, VW G 052 529, Mitsubishi Dia Queen, Volvo 1161838, BMW DCTF-1, Peugeot Citroen (PSA) 9734.S2, MB 236.21, Porsche 999.917.080.00	0897 430 004	1

Please consider the legal instruction at the beginning of this chapter.

TRIATHLON® gearbox oil Gear Hypoid 85W-90

High-performance gearbox oil for hypoid gearboxes with a large axle offset, as well as for transfer gearboxes, intermediate gearboxes and auxiliary gearboxes

TRIATHLON gearbox oils are produced and packaged in compliance with the most stringent quality specifications in line with DIN EN ISO 9001

- High product safety
- Extensive manufacturer approvals

Only high-quality first raffinates and raw materials are used in TRIATHLON oils

Satisfies key specifications of automotive manufacturers

Type of oil	Mineral
Viscosity grade	85W-90
Approved for gear oils	API GL 5, MB 235.0, MIL-L 2105 D
Recommended applications for gear oils	ZF-TE-ML 16C, ZF-TE-ML 17B, ZF-TE-ML 19B, ZF-TE-ML 21A, MAN 342 Type M1
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.
20 l	0897 485 903	1
60 l	0897 485 904	1
208 l	0897 485 905	1

Please consider the legal instruction at the beginning of this chapter.

TRIATHLON® hydraulic oil HEES 46

High-performance hydraulic oil compatible with all commercially available sealing compounds as well as steel, non-ferrous metals and light metals.

TRIATHLON engine oils are produced and packaged in compliance with the most stringent quality specifications in accordance with DIN EN ISO 9001

- High product safety
- Extensive manufacturer approvals

Only high-quality first refinery products and raw materials are used in TRIATHLON oils

Fulfills key specifications of automotive manufacturers (VDMA 24568- and ISO VG 46)

Biodegradable and non-toxic

Offers optimal corrosion protection and consistent viscosity with large temperature fluctuations and reduced ageing.

ISO-VG grade	46
Approved for hydraulic oils	VDMA 24568
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.
20 l	0897 646 203	1
208 l	0897 646 205	1

Please consider the legal instruction at the beginning of this chapter.

Approvals/specifications:

- VDMA 24568
- ISO VG 46

TRIATHLON® hydraulic oil HLP

High-performance hydraulic oil compatible with all commercially available sealing compounds as well as steel, non-ferrous metals and light metals.

- Produced and packaged in compliance with the most stringent quality specifications in accordance with DIN EN ISO 9001
- Made with high-quality first raffinates and raw materials
- Offers optimum wear protection under heavy loads

Type of oil	Mineral
Approved for hydraulic oils	DIN 51524-2
Shelf life from production	60 Month

Contents	ISO-VG grade	Art. no.	P. Qty.

TRIATHLON® hydraulic oil HVLP 46

High-performance hydraulic oil compatible with all commercially available sealing compounds as well as steel, non-ferrous metals and light metals.

TRIATHLON engine oils are produced and packaged in compliance with the most stringent quality specifications in accordance with DIN EN ISO 9001

- High product safety
- Extensive manufacturer approvals

Only high-quality first refinery products and raw materials are used in TRIATHLON oils

Fulfils key specifications of automotive manufacturers (VDMA 24568- and ISO VG 46)

Offers optimal wear and corrosion protection and consistent viscosity with large temperature fluctuations and high thermal loads.

ISO-VG grade	46
Approved for hydraulic oils	DIN 51524-3
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.

Approvals/specifications:

- DIN 51524 Part 3
- ISO VG 46

Catch tray

For substances that are hazardous to water according to the German Water Resources Act (WHG)

- With zinc-plated grate inlay and feet
- Suitable for a standing 200-l drum
- Ground clearance: 100 mm

Length	800 mm
Width	800 mm
Height	460 mm

Contents	203 l
Surface	Zinc plated

Art. no. 0962 897

P. Qty.: 1

Engine oil Basic 5W-30

Latest, year-round low-friction engine oil for passenger petrol and diesel vehicles, including vehicles with diesel particle filter (DPF) according to exhaust gas standard Euro 4 and service interval extension (Longlife Service).

- Fast oil supply at low temperatures
- High lubrication reliability at high and low temperatures
- Reduces oil and fuel consumption and cuts harmful emissions

Type of oil	HC synthesis
Viscosity grade	5W-30
Recommended applications for engine oils	ACEA C3, BMW Longlife-04, MB 229.51, VW 504 00, VW 507 00
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.
60 l	0897 990 304	1
208 l	0897 990 305	1

Please consider the legal instruction at the beginning of this chapter.

Engine oil Basic 5W-40

Ideal for the latest petrol and diesel engines with multi-valve technology and turbocharging, as well as with or without charge-air cooling (CAC).

- Cuts fuel consumption in the cold-running phase
- Reliable supply of oil to the engine
- Fast oil supply at low temperatures, reliable cold start
- High lubrication reliability at high and low temperatures
- Tested for catalytic converters and turbochargers

Type of oil	HC synthesis
Viscosity grade	5W-40
Recommended applications for engine oils	ACEA A3/B4, API SN/CF, BMW Long-life-98, MB 229.31, VW 502 00, VW 505 00
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.
60 l	0897 990 404	1
208 l	0897 990 405	1

Please consider the legal instruction at the beginning of this chapter.

Observe the operating instructions of the vehicle and engine manufacturer.

Engine oil Basic 10W-40

Engine oil based on latest formula for year-round use in passenger petrol and diesel vehicles, with and without exhaust-gas turbocharging (EGT) and charge-air cooling (CAC).

- Smooth-running engine
- Fast oil supply at low temperatures
- Good lubrication reliability over the entire temperature application range
- Tested catalytic converter and tried and tested turbo
- Miscible and compatible with standard engine oils

Type of oil	Mineral
Viscosity grade	10W-40
Recommended applications for engine oils	ACEA A3/B3, API SL/CF, MB 229.1, VW 505 00
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.
60 l	0897 990 104	1
208 l	0897 990 105	1

Please consider the legal instruction at the beginning of this chapter.

Observe the operating instructions of the vehicle and engine manufacturer.

Special fuel TRIATHLON® 2S safety mix

**Ready-to-use mixture for 2-stroke engines (1:50),
based on alkylate petrol**

- Maximum performance at low and high engine temperatures
- Excellent engine cleanliness, residue-free combustion, smoke-free
- Free of harmful benzene, aromatic compounds and low-sulphur

Type of oil	Fully synthetic
Shelf life from production	36 Month

Contents	Art. no.	P. Qty.
5 l	0897 055 005	1/4
20 l	0897 055 020	1
200 l	0897 055 200	1

Please consider the legal instruction at the beginning of this chapter.

Refer to the instructions in the manufacturer's operating instructions for changing to special fuel. Check the carburettor settings and adjust them if necessary.

Engine oil TRIATHLON® Cargo Super 10W-40

Year-round, smooth-running engine oil for diesel engines

- Produced and packaged in compliance with the most stringent quality specifications in line with DIN EN ISO 9001
- Made with high-quality first raffinates and raw materials
- Outstanding smooth-running and wear protection properties
- Ideal for long oil change intervals

Type of oil	Partly synthetic
Viscosity grade	10W-40
Approved for engine oils	MAN M3277, MB 228.5, API CI-4, Volvo VDS-3, ACEA E4 E7
Recommended applications for engine oils	Renault RXD, Mack EO-M Plus, MTU Type 3, Caterpillar ECF-1-a, Cummins 20077, Cummins 20078, Renault RLD-2, DAF HP2, Deutz DQC III-10, Scania LDF-2
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.
20 l	0897 310 403	1
60 l	0897 310 404	1
208 l	0897 310 405	1

Please consider the legal instruction at the beginning of this chapter.

Engine oil TRIATHLON® Cargo Ultra 10W-40

Year-round engine oil for diesel engines

- Produced and packaged in compliance with the most stringent quality specifications in line with DIN EN ISO 9001
- Uses high-quality first raffinates and raw materials
- Provides optimum engine cleanliness
- Ensures excellent wear protection and reduced fuel consumption

Type of oil	HC synthesis
Viscosity grade	10W-40
Approved for engine oils	MB 228.51, MAN M3477, Renault RXD, Volvo VDS-3, ACEA E6 E7, API CI-4, ACEA E9
Recommended applications for engine oils	MTU Type 3, MTU Type 3.1, Renault RLD-2, Caterpillar ECF-1-a, Cummins 20076, Cummins 20077, Mack EO-M Plus, DAF HP2, Deutz DQC III-10 LA, Mack EO-N, Renault RGD, Volvo CNG, MB 226.9
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.

Engine oil TRIATHLON® Diesel 15W-40

Multigrade engine oil for year-round use

High resistance to shearing

Prevents black sludge from forming

Optimum lubrication

TRIATHLON engine oils are produced and packaged in compliance with the most stringent quality specifications in accordance with DIN EN ISO 9001

- High product safety
- Extensive manufacturer approvals

Only high-quality first raffinates and raw materials are used in TRIATHLON oils

Satisfies important specifications of automotive manufacturers

Type of oil	Mineral
Viscosity grade	15W-40
Recommended applications for engine oils	Volvo VDS, Allison C4, Caterpillar TO-2, MIL-L 2104 E, MIL-L 46152 D, MTU Type 1, MAN 271
Shelf life from production	60 Month

Contents	Approved for engine oils	Art. no.	P. Qty.

Engine oil Endurance IV 0W-20

State-of-the-art synthesis technology enables excellent cold-start performance combined with shorter starting times

- Designed to meet the high demands of the VW Group
- The Longlife IV lubricant ensures excellent cold-start performance and increases the efficiency of the engine thanks to its reduced viscosity.
- Compared to the already fuel-saving Longlife III, it offers an additional fuel consumption reduction of approx. 1.5%. Enables extremely long oil change intervals (WIV, etc.).

Type of oil	HC synthesis
Viscosity grade	0W-20
Approved for engine oils	VW 508 00, VW 509 00
Shelf life from production	60 Month

Contents	Recommended applications for engine oils	Art. no.	P. Qty.

Engine oil TRIATHLON® Extra 5W-30

Low-viscosity, smooth-running oil for year-round use

- Produced and packaged in compliance with the most stringent quality specifications in line with DIN EN ISO 9001
- Made with high-quality first raffinates and raw materials
- High level of wear protection and reduced friction for extended engine service life
- HC synthetic oil

Type of oil	HC synthesis
Viscosity grade	5W-30
Approved for engine oils	ACEA A1-02, ACEA A5-02, ACEA B1-02, API SL, Ford WSS-M2C 913-A, Ford WSS-M2C 913-B, Ford WSS-M2C 912-A1, ILSAC GF-2

Tested for turbochargers and catalytic converters

Engine oil Extra F-Eco 5W-20

Light running oil for Ford petrol engines

- Low-viscosity engine oil based on synthetic technology and state-of-the-art additive technology, and which has been specially developed to meet the requirements of Ford petrol engines.
- Deposits are safely prevented, excellent lubrication reliability is ensured and high fuel economy made possible.

Type of oil	HC synthesis
Viscosity grade	5W-20

BMW Longlife-04 must be removed from the release and may only be offered now as a recommendation.

Engine oil TRIATHLON® Power 5W-40

Smooth-running engine oil for maximum performance in petrol and diesel engines

TRIATHLON engine oils are produced and packaged in compliance with the most stringent quality specifications in accordance with DIN EN ISO 9001

- High product safety
- Extensive manufacturer approvals

Only high-quality first refinery products and raw materials are used in TRIATHLON oils

Satisfies important specifications of automotive manufactures

Properties:

- Excellent corrosion protection
- Good cold-start properties
- Long oil change interval owing to outstanding ageing stability
- Good lubricating properties
- Optimal engine cleanliness
- Can be mixed with standard engine oils

Type of oil	HC synthesis
Viscosity grade	5W-40

Please consider the legal instruction at the beginning of this chapter.

ACEA A1-04/B1-04/A5-04/B5-04/C2-04, API SM/CF

Würth also recommends this product for vehicles that comply with the following specifications:

Peugeot, Citroen, Honda, Toyota, Fiat 9.55535-S1, ILSAC GF-3

Engine oil TRIATHLON® Premium R 5W-30

State-of-the-art, low-ash, smooth-running engine oil for passenger cars

- Produced and packaged in compliance with the most stringent quality specifications in line with DIN EN ISO 9001
- Made with high-quality first raffinates and raw materials
- Prevents deposits and ensures maximum engine power
- Provides excellent protection against wear and reduces oil and fuel consumption
- Ensures maximum service life of diesel particulate filters
- HC synthetic oil

Type of oil	HC synthesis
Viscosity grade	5W-30
Approved for engine oils	ACEA C4-08
Recommended applications for engine oils	Renault RN 0720
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.
60 l	0897 905 334	1
208 l	0897 905 335	1

ACEA C4-08, Renault RN 0720

Tested for turbochargers and catalytic converters

Engine oil TRIATHLON® Ultra 10W-40

Smooth-running engine oil with synthetic components for passenger cars

- Fuel-saving, smooth-running oil with excellent cold-starting behaviour
- Outstanding protection against wear and corrosion
- Mineral

Type of oil	Mineral
Viscosity grade	10W-40
Recommended applications for engine oils	PSA B71 2294
Shelf life from production	60 Month

Contents	Approved for engine oils	Art. no.	P. Qty.

Engine oil TRIATHLON® Universal SAE 15W-40

High-performance, multigrade engine oil for optimum lubrication and a long engine service life

- Good wear protection properties and prevention of black sludge formation
- Low oil consumption as well as being very resistant to ageing, viscosity and temperatures
- Mineral

Type of oil	Mineral
Viscosity grade	15W-40
Approved for engine oils	API SL, API CF, API CG 4, MB 228.3, MB 229.1, Caterpillar TO-2, ACEA A3/B4, ACEA E2 #5, Allison C4
Recommended applications for engine oils	Mack EO-L, MTU Type 2, Volvo VDS, MAN M3275-1, PSA B71 2295

Continuation **Engine oil TRIATHLON® Universal SAE 15W-40**

Shelf life from production	60 Month

TRIATHLON® tractor oil STOU/UTTO 10W-30

Universal oil for agricultural machinery

- Produced and packaged in compliance with the most stringent quality specifications in line with DIN EN ISO 9001
- Made with high-quality first raffinates and raw materials
- Universal oil that meets the key requirements for both STOU and UTTO
- ACEA E2 API CF-4/SF/GL 4

Type of oil	Mineral
Viscosity grade	10W-30
Approved for engine oils	ACEA E2, API CF, API SF, API GL 4
Recommended applications for engine oils	ZF TE-ML 06A, ZF TE-ML 06B, ZF TE-ML 07B, New Holland 82009201, New Holland 82009202, New Holland 82009203, CASE New Holland MAT 3525, CASE New Holland MAT 3526, CASE (IHC) MS 1209, John Deere J27, John Deere J20C, Massey Ferguson CMS M1144, Massey Ferguson CMS M1139, Massey Ferguson CMS M1143, Massey Ferguson CMS M1135, Ford New Holland M2C 159-C, Ford New Holland M2C 159-B, Ford New Holland M2C 134-D

TRIATHLON® tractor oil UTTO 10W-30

Multi-purpose oil for forestry and agricultural machinery

Advanced multigrade oil (UTTO = Universal Tractor Transmission Oil)

Specifically for forestry machinery and agricultural machinery.

Reduces the types of oil required

For use in gearboxes, hydraulic systems and wet brakes.

Type of oil	Mineral
Viscosity grade	10W-30
Approved for engine oils	API GL 4
Recommended applications for engine oils	John Deere J20D, New Holland M2C 41B, New Holland M2C 48B, Ford M2C-86-B, Ford M2C-53-A, Ford M2C-134-A, Ford M2C-134-B, Ford M2C-134-C, Ford M2C-134-D, Allison C4, Caterpillar TO-2, CASE (IHC) MS 1204, CASE (IHC) MS 1205, CASE (IHC) MS 1206, CASE (IHC) MS 1207, CASE (IHC) MS 1209, Massey Ferguson M1135, Massey Ferguson M1141, Massey Ferguson M1143, Massey Ferguson M1145, SAME-Lamborghini, Fendt, Deutz, Schlüter, Landini, Renault, Volvo BM WB 101, AGCO Q-1826, CASE (IHC) B6
Shelf life from production	60 Month

Contents	Art. no.	P. Qty.
60 l	0897 010 304	1
208 l	0897 010 305	1

Please consider the legal instruction at the beginning of this chapter.

Observe the operating specifications provided by the tractor manufacturer. Compatible with all commercially available engine oils. However, it is only fully effective when used unmixed.

Compressed air drum pump

Pneumatically operated, double-action pump for non-aggressive liquids, oils, low-viscosity greases

- Digital measuring instrument with LCD display
- Min./max. output: 1/25 l per minute
- Total height/weight: 1230 mm, 8 kg

Hose length	3 m
Pump-tube length	930 mm
Connection thread	2 inch
Max. flow volume	25 l/min
Min. air pressure	3 bar
Max. temperature conditions	50 °C

Art. no. 0891 625

P. Qty.: 1

Max. air pressure of 10 bar must never be exceeded. Pump performance is lower at working temperatures below 10°C. The digital measuring instrument cannot be calibrated.

Hand-lever drum pump

Self-aspirating, robust polypropylene hand-lever drum pump

- Locking ring for secure hold
- Telescopic pump pipe for 60 l and 200 l drums; adjustable from 500–900 mm
- Feed quantity: approx. 300 ml/stroke

Material	Plastic
Colour	Black, Red
Min. pipe length	500 mm
Max. pipe length	900 mm
Connection thread	2 inch

Art. no. 0891 621

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Brake fluid DOT 4, low viscosity

For hydraulic brake systems. Prescribed for VW/Audi, BMW and Opel vehicles.

- Excellent protection against corrosion compared to iron and non-ferrous metals
- High degree of thermal stability
- Suitable for innovative brake systems (e.g. ESP)

Colour	Yellow, Amber
--------	---------------

Contents	Art. no.	P. Qty.
5 l	0892 009 405	1
20 l	0892 009 420	1
60 l	0892 009 460	1

Please consider the legal instruction at the beginning of this chapter.

Brake fluid DOT 4

For hydraulic brake systems. Prescribed for various VW/Audi, Seat and Skoda vehicles.

Meets and exceeds the specifications: SAE J 1703, 1704, FMVSS 116, DOT 3 and DOT 4

Brake fluids can be mixed with all other products that meet the test requirements of FMVSS 116, SAE J 1703, 1704 or ISO 4925.

Excellent lubricating properties

Suitable for use in the hydraulic power transmission of clutch systems.

Contents	Colour	Art. no.	P. Qty.
0.25 l	Colourless	0892 009 25	1/24
5 l	Yellow, Amber	0892 009 5	1
20 l	Colourless	0892 009 020	1
60 l	Colourless	0892 009 60	1

Please consider the legal instruction at the beginning of this chapter.

Change brake fluids according to the vehicle manufacturer instructions. Under no circumstance mix with automatic transmission fluids (ATF) or mineral oils. Avoid contact with painted surfaces, as brake fluids have a solvent effect on paints. Brake fluid is hygroscopic.

For canisters/drums: The tap must only be used to pour brake fluid. After use (and during storage), always seal the canister with the original lid. The taps do not ensure that the brake fluid is not enriched with humidity. Please alert your customers to the correct storage method. Observe the information provided by the vehicle manufacturer.

Brake fluid DOT 4 Plus

For hydraulic brake systems. Prescribed for Mercedes Benz vehicles.

- Meets and exceeds the specifications: SAE J 1703, 1704, FMVSS 116, DOT 3 and DOT 4
- Excellent corrosion protection compared to iron and non-ferrous metals
- High thermal stability
- Good rubber compatibility
- Outstanding lubricating properties

Colour	Yellow, Amber

The tap must only be used to pour brake fluid. After use (and during storage), always seal the canister with the original lid. The taps do not ensure that the brake fluid is not enriched with humidity. Please alert your customers to the correct storage method. Observe the information provided by the vehicle manufacturer.

Rust stop primer

Active corrosion protection and primer for metal surfaces

- Good adhesive properties on a wide variety of surfaces, including in conjunction with PU and MS polymer sealing compounds
- Temperature resistant up to 80°C, briefly up to 140°C
- Easy to sand

Contents	400 ml
Chemical basis	Epoxy resin

Colour	Art. no.	P. Qty.
Red brown	0893 210 2	1/12
White grey	0893 210 1	1/12

Please consider the legal instruction at the beginning of this chapter.

Rust Stop primer

Brushable, active corrosion protection for metallic surfaces

- Excellent corrosion protection
- Quick-drying
- Can be painted over
- Short-term temperature resistance up to +120°C
- VOC-compliant

Contents	750 ml
Weight of content	960 g
Chemical basis	Alkyd resin

Colour	Art. no.	P. Qty.
Red brown	0890 191	1/6
White grey	0890 192	1/6

Please consider the legal instruction at the beginning of this chapter.

Primer Rust Stop Quattro

Fast-drying universal primer with a broad range of applications

- Unique combination of primer, adhesion promoter, corrosion protection and welding primer in one product
- Very high temperature resistance up to 300°C, short-term resistance up to 500°C
- Lower solvent content
- Complies with the maximum VOC content specified in the VOC Directive (1999/13/EC)

Contents	400 ml
Chemical basis	Polyvinyl butyral
Colour	Silver grey

Art. no. 0893 214 1

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Turn the can upside down and spray until the valve is empty after use.

Rust converter

Environmentally friendly dispersion-based rust converter

- Can be filled or painted over
- Environmentally friendly, as dispersion-based
- Reliably stops the corrosion process and provides an optimised application surface for additional paint work

Contents	1000 ml
Colour	Cream
Shelf life from production	60 Month
Max. temperature resistance	120 °C

Art. no. 0893 110

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Do not wash treated surfaces with water. Immediately wash the rust converter off painted surfaces. Do not use in direct sunlight, on hot surfaces over +40°C and when there is risk of frost. Protect from frost. Clean the equipment with water after use.

Rust converter spray

Corrosion protection paint with rust-conversion properties

- Ideal for difficult rust-affected areas, forms an iron complex that neutralises the rust layer
- High-quality epoxy primer for reliable protective layer
- Can be filled or painted over, silicone-free and acid-free

Contents	400 ml
Colour	Colourless
Shelf life from production	24 Month
Max. temperature resistance	100 °C

Art. no. 0893 110 400

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Hardenes at room temperature. After use, turn the can upside down and spray until the valve is empty. Only 1-C products should be used when applying paint.

Anti-corrosion varnish Zinc 300

Provides permanent protection against corrosion

- Excellent corrosion protection
- Temperature resistance up to approx. 300°C
- Quick drying

Contents	500 ml
Chemical basis	Fixed metallic zinc dust
Colour	Silver coloured
Drying time	15 min
Conditions for drying time	at 20 °C

Art. no. 0892 200

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Zinc spray

Long-term protection and repair of metallic surfaces

- Excellent corrosion protection
- Excellent adhesive properties on bare metal
- Excellent spot welding properties

Contents	400 ml
----------	--------

Chemical basis	Colour	Art. no.	P. Qty.
Alkyd resin	Zinc	0893 113 113	1/12
Alkyd resin combination	Zinc, bright	0893 113 114	1/12

Please consider the legal instruction at the beginning of this chapter.

Not suitable as adhesive base for PU, MS polymer and hybrid sealing compounds.

Perfect aluminium spray, matt

Outstanding long-term protection and optimum metal surface appearance

- High layer thickness with first spray coat
- Versatile use thanks to adjustable spray head
- Good resistance to running and abrasion
- Spot weldable

Chemical basis	Acrylated alkyd combination
Contents	400 ml
Colour	Aluminium coloured

Art. no. 0893 114 115

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Perfect zinc spray and Perfect zinc spray, light contain zinc, and therefore offer optimum cathodic protection against corrosion. If the surface is damaged, the zinc coating sacrifices itself (sacrificial anode), thereby protecting the metal against rust. If the surface is damaged, the metal is no longer protected.

Not suitable as adhesive base for PU, MS polymer and hybrid sealing compounds.

High-shine Perfect aluminium silver spray

Outstanding long-term protection and optimum metal surface appearance

- High layer thickness with first spray coat
- Versatile use thanks to adjustable spray head
- Good resistance to running and abrasion

Contents	400 ml
Colour	Aluminium silver
Gloss level	High gloss
Min. curing time	4 h
Min. dust-drying time	15 min

Art. no. 0893 114 119

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Not suitable as adhesive base for PU, MS polymer or hybrid sealing compounds.

Stainless steel spray Perfect

Outstanding long-term protection and optimum metal surface appearance

- High layer thickness with first spray coat
- Versatile use thanks to adjustable spray head
- Good resistance to running and abrasion
- Spot weldable

Chemical basis	Acrylated alkyd combination
Contents	400 ml
Colour	Stainless steel coloured, Chrome coloured
Dry layer thickness (first back-and-forth motion)	30 µm
Min. dust-drying time	15 min

Art. no. 0893 114 116

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Perfect zinc spray and Perfect zinc spray, light contain zinc, and therefore offer optimum, active cathodic protection against corrosion. If the surface is damaged, the zinc coating sacrifices itself (sacrificial anode), thereby protecting the metal against rust.

Not suitable as adhesive base for PU, MS polymer and hybrid sealing compounds.

Perfect zinc spray

Outstanding long-term protection and optimum metal surface appearance

- High layer thickness with first spray coat
- Spot weldable

Tested corrosion protection in accordance with DIN

- Perfect zinc spray, light: 250 hours
- Perfect zinc spray: 500 hours
- Can be used for repairs in accordance with DIN EN ISO 1461

Contents	400 ml
----------	--------

Chemical basis	Colour	Gloss level	Art. no.	P. Qty.
Acrylic resin	Zinc	Matt	0893 114 113	1/12
Modified alkyd resin	Zinc, bright	Glossy	0893 114 114	1/12

Please consider the legal instruction at the beginning of this chapter.

Gravel throw and underbody protection

Rubber-based coating compound containing solvents, can be painted over

Can be painted over with many commercially available, solvent-based and water-based one-component and two-component top coat paints

Tip for pros

- Various structures can be sprayed by varying the distance or pressure
- The colour becomes darker after staining with clear varnish

Contents	Colour	Art. no.	P. Qty.
500 ml	Black	0892 075 250	1/12
500 ml	Grey	0892 075 350	1/12
1000 ml	Black	0892 075 200	1/12
1000 ml	Grey	0892 075 300	1/12

Please consider the legal instruction at the beginning of this chapter.

Do not spray on joints, engines, gears and brake systems. After use, turn the can upside down and spray until the valve is empty. Do not dilute, or mix with water or paint. The product can be painted within 24 hours. It can then only be painted once it has been sanded and cleaned.

Stone chip protection AQUA

Climate-optimized, paintable, water-based stone chip protection.

- Dries completely down to -10°C
- Suitable for oven drying
- Very easy to sand once completely dry

Contents	1 l
----------	-----

Colour	Art. no.	P. Qty.
Black	0892 070 100	1/12
Grey	0892 070 200	1/12

Please consider the legal instruction at the beginning of this chapter.

Dries down to -10°C. When painting, ambient influences must be observed. Do not spray on joints, engines, gears and brake systems. Dilution with water (maximum 2%). With IR (infra-red) drying, the following must be taken into account:

- Maximum drying time depends on the temperature, coat thickness, fresh air or compressed air supply
- When using IR drying, the material must not be heated above maximum 60°C, as blistering may occur

Underbody seal Special

Vapour-permeable underbody seal for use on wooden underbodies

- Excellent adhesion to wood
- No run-off on vertical surfaces
- Highly resistant to ageing

Contents	500 ml
Colour	Black
Chemical basis	Mix naphtha, solvent, propellant
Min. proportion of solids	33 %
Min. skin-formation time	75 min
Drying time	135 min

Art. no. 0892 078 550

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Store the product in a cool, dry place. Recommended storage temperature +10°C to +30°C. Protect from direct sunlight. Product can be removed again after application with thinner. Once dried, the product can be removed again only by mechanical means. Turn the can upside down and spray until the valve is empty after use.

Wax underseal

Wax-based coating compound containing solvents, cannot be painted over

- Permanently elastic with self-healing effect
- Paint-, rubber- and PVC-compatible
- Resistant to splash water and salt water, weak acids and bases

Chemical basis	Wax
Min. skin-formation time	48 h

Contents	Colour	Min. proportion of solids	Drying time	Art. no.	P. Qty.
500 ml	Beige	39.9 %	150 h	0892 079 500	1/12
500 ml	Black	39 %	150 h	0892 078 500	1/12
1000 ml	Beige	80 %	120 h	0892 079 100	1/12
1000 ml	Black	80 %	120 h	0892 078 100	1/12

Please consider the legal instruction at the beginning of this chapter.

Underseal

Bitumen-based coating compound containing solvents, cannot be painted over

- With long-term protection and anti-rusting effect
- Resistant to splash water and salt water, weak acids and bases

Colour	Black
Chemical basis	Bitumen
Min. skin-formation time	75 min
Drying time	2.5 h

Contents	Min. proportion of solids	Art. no.	P. Qty.
500 ml	33 %	0892 073	1/12
1000 ml	66 %	0892 072	1/12

Please consider the legal instruction at the beginning of this chapter.

Do not spray on joints, engines, gears and brake systems. After use, turn the can upside down and spray until the valve is empty.

Lead-free bodywork tinning paste

Lead-free, high-quality S-Sn97Cu3 tinning paste. Flux type in accordance with DIN EN 29454-1.

- Melting range: 230–250°C
- Complies with the legal specifications of European Parliament Directive 2000/53/EC and the German national used vehicle law
- Tin content 60–70%, lead-free

Weight of content	1 kg
Colour	Light grey

Art. no. 0982 90

P. Qty.: 1

Cavity wax

For repairs and long-lasting protection

- High permeability and excellent penetration
- High resistance to heat and good flexibility in the cold
- Optimal corrosion protection from a layer thickness of just 50 µ

Colour	Beige
--------	-------

Continuation **Cavity wax**

Contents	Container	Art. no.	P. Qty.
500 ml	Aerosol can	0892 082 105	1/12
1000 ml	Can	0892 082 100	1/12

Please consider the legal instruction at the beginning of this chapter.

The material temperature should be +10°C to +30°C. After use, turn aerosol can upside down and spray until nozzle is empty.

Protective wax

Highly transparent wax anti-corrosive agent that displaces water

- 360° valve allows the bottle to be used in all possible positions – even from overhead
- Heat-resistant up to +160°C

Contents	400 ml
Colour	Transparent
Min./max. skin-formation time	90-120 min

Art. no. 0893 082 400

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Not suitable for use on visible painted surfaces

Corrosion protection spray

Creep capacity, colourless special fluid

- Low-viscosity special oil with excellent penetrating properties
- Excellent material compatibility on various surfaces such as varnished surfaces, metals and plastics
- Self-sealing protective film that does not dry
- Economical
- Excellent salt water resistance in line with ASTM B117

Contents	300 ml
Colour	Transparent
Corrosion protection period	6 Month

Art. no. 0893 15

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

This information is only a recommendation based on our experience. Check material compatibility on an invisible area if necessary.

Anti-corrosive wax

Ready-to-use protective wax with long-acting effect on metal surfaces, including for outdoor use.

Forms a wax-like protective film

Extra-long protection and excellent weather resistance

Easy and reliable to apply

Hardly any dust adhesion, fast drying, no need to dilute

Contents	5 l
Container	Canister
Colour	Milky-transparent (protective film)
Corrosion protection period	3 Years

Art. no. 5991 521 292

P. Qty.: 1

Winter service vehicles must be post-treated. Do not apply to hot surfaces.

Plastic adhesion promoter SR

Plastic adhesion promoter for use in spot repairs of plastic parts.

- Even application rate
- Constant atomisation pressure produces high yield
- Excellent adhesion properties
- Dries quickly

Contents	400 ml
Colour	Transparent

Art. no. 5867 000 125

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Not suitable for PE, Styrofoam and synthetic resin-coated surfaces. After use, turn the can upside down and spray until the nozzle is empty.

Primer filler 2-component Multi-Fill

2-component epoxy primer filler for optimum application safety on all metals, anodised surfaces and GFRP.

- Optimal adhesion and corrosion protection properties on bare sheet metal
- Very good insulating action
- Can be filled
- Long application time approx. 4 days at 20°C
- Can be painted over, wet-on-wet

Contents	400 ml
Colour	Beige

Continuation **Primer filler 2-component Multi-Fill**

Art. no. 0893 213 1

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Cannot be used over acidic primer. In conjunction with PE spray filler, it is essential that the drying times are observed. Turn the can upside down and spray until the valve is empty after use.

Thick-film primer filler

Corrosion protection with excellent filling and coverage for metallic surfaces.

Excellent adhesion properties

- Adheres to aluminium, bare and galvanised sheet metal, old paint etc.
- Also adheres in conjunction with PU and MS polymer sealing compounds

Long-lasting corrosion protection

Contents	400 ml
Colour	Grey
Drying time	25 min
Can be varnished after	15 min

Art. no. 0893 212 1

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Can be used on galvanised and hot-dip galvanised surfaces following pre-treatment with zinc cleaner under certain conditions. Turn the can upside down and spray until the valve is empty after use.

Primer filler

Active protection against corrosion with excellent filling properties for metallic surfaces

- Quick-drying primer filler with active protection against corrosion for optimum top-coat results
- Excellent adhesive properties
- Excellent filling properties
- Heat-resistant up to 110°C
- Very easy to sand
- VOC-compliant

Contents	400 ml
----------	--------

Colour	Art. no.	P. Qty.
Dark grey	0893 211 101	1/12
Light grey (bright grey)	0893 211 103	1/12
Medium grey	0893 211 102	1/12

Please consider the legal instruction at the beginning of this chapter.

Turn the can upside down and spray until the valve is empty after use.

Underseal gun

For applying stone chip and underseal products containing solvents.

With variable spraying nozzle

For restoring original structures of sill panels, wheel wells, under-carriages etc.

Art. no. 0891 106 3

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Cannot be used to apply cavity sealing products. Nylon probes cannot be connected.

Underseal cup gun

For applying solvent- and water-based stone chip protection, underbody seal and cavity sealing products

- Flexible range of applications
- One application device for all applications
- For restoring original textures on sill boards, wheel wells, under-carriages etc.
- User safety
- Excluding probes

Art. no. 0891 110 500

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Corrosion protection agent Metalyt

Repair coat for retrospective galvanising with TITANID formula

- Ideal surface structure for all bodywork and paintwork
- Sprayable micro-coating for professional trades
- One spray coat is sufficient
- Spot welding, inert gas welding and gas fusion welding possible

Chemical basis	Zinc in inorganic-organic matrix
Contents	400 ml
Colour	Silver grey
Min./max. dust-drying time/conditions	5-8 min/at 20°C

Art. no. 0893 214 420

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Continuation **Corrosion protection agent Metalyt**

TITANID
corrosion pro-
tection formula
awarded
The German
Raw Material
Efficiency prize
2011

Dust-dry after approx. 5–8 minutes. Dry to handle after approx. 1 hour. Can be filled and painted after 2 hours/60°C or 24 hours at room temperature. Complete mechanical loads after 2–3 days.

Corrosion protection Promax

Anti-corrosive coating and welding primer with TITAN-ID formula

- Optimum protection and maximum safety even at 10–20 µm coat thickness
- Excellent to weld
- Permanently temperature resistant up to 300°C

Chemical basis	Zinc in inorganic-organic matrix
Contents	400 ml
Colour	Silver grey

Art. no. 0893 214 400

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

TITANID
corrosion pro-
tection formula
awarded
The German
Raw Material
Efficiency prize
2011

Dust-dry after approx. 5–8 min. Touch-dry after approx. 1 hour. Turn the can upside down and spray until the valve is empty after use.

Building marker

Marking spray with ergonomic spray head for use in the construction and surveying field

- Ergonomic spray head for clean application
- Fine, precise paint spray
- Excellent adhesion to absorbent, non-absorbent and slightly moist surfaces
- Weather-resistant and frost-proof

Contents	500 ml
----------	--------

Colour	Art. no.	P. Qty.
White	0893 199 101	1/12
Yellow	0893 199 102	1/12
Red	0893 199 103	1/12
Neon blue	0893 199 104	1/12
Neon green	0893 199 105	1/12
Neon orange	0893 199 106	1/12
Neon yellow	0893 199 107	1/12
Neon red	0893 199 108	1/12

Please consider the legal instruction at the beginning of this chapter.

Impurities can be loosened and removed with 1A cleaner.

Road marker

Marking spray with safety closure for highlighting road damage and construction sites

- Fine, precise paint spray
- Excellent adhesion to absorbent, non-absorbent and slightly moist surfaces
- Excellent luminosity and coverage
- Weather-resistant and frost-proof

Contents	600 ml
----------	--------

Colour	Art. no.	P. Qty.
White	0893 199 201	1/12
Yellow	0893 199 202	1/12

Neon yellow	0893 199 207	1/12
Neon red	0893 199 208	1/12

Please consider the legal instruction at the beginning of this chapter.

Fresh soiling can be removed with thinner. Hardened marking paint can be removed with a high-pressure cleaner and a brush. The shelf life is 2 years.

Forest marker

Fluorescent forest marker spray for woodworking and forestry applications

- For drawing, marking and labelling
- Very luminous markings visible from a distance
- Water and weather-resistant
- Excellent adhesion – even on damp surfaces

Contents	500 ml
----------	--------

Colour	Art. no.	P. Qty.
White	0892 175 10	1/12
Red fluorescent	0892 175 11	1/12
Orange fluorescent	0892 175 12	1/12
Yellow fluorescent	0892 175 13	1/12
Green fluorescent	0892 175 14	1/12
Blue fluorescent	0892 175 15	1/12
Pink fluorescent	0892 175 16	1/12

Please consider the legal instruction at the beginning of this chapter.

This information is only a recommendation based on our experience. Preliminary testing required!

Line marker

Marking spray for manually marking and line marking in the line-marking cart

- Abrasion-resistant
- Resistance to weathering
- Wide range of applications
- Quick drying time
- Economical
- Easy to use

Contents	500 ml
----------	--------

Colour	Art. no.	P. Qty.
Red	0893 199 12	1/12
White	0893 199 10	1/12
Yellow	0893 199 11	1/12

Please consider the legal instruction at the beginning of this chapter.

The protective cap can be secured against unwanted spraying by turning. Fresh soiling can be removed with thinner. Hardened marking paint can be removed with a high-pressure cleaner and a brush. The shelf life is two years.

The surface must be dry and free from dust or grease. Cannot be used on other paints or paint residues.

Line marking cart

Marking cart for line marking with line marker art. no. 0893 199 10, 0893 199 11 and 0893 199 12

- Precise line demarcation, runs very straight
- Height-adjustable retainer for setting the spray stream width with measuring scale
- Centrally and laterally adjustable retainer for line and kerb marking
- Height-adjustable handle which can be adjusted for right-/left-handed use
- Spray stream width 40–110 mm
- 3 holders for spare spray cans

Colour	Red
--------	-----

Art. no. 0891 198

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

When ordering the line marking trolley, please order the spray head, art. no. 0891199, separately.

Wood decking oil

For protecting and freshening up wood for outdoor use

Penetrates deep into the wood

- Provides reliable protection against penetrating moisture
- Increases durability of wood
- Keeps the wood elastic
- Less susceptible to cracking

Contents	2.5 l
Chemical basis	Alkyd resin
Smell/fragrance	Odourless
Density/conditions	0.82 g/cm ³ /at 20 °C

Colour	Art. no.	P. Qty.
Bangkirai	0890 997 302	1
Natural	0890 997 300	1
Teak	0890 997 301	1

Please consider the legal instruction at the beginning of this chapter.

Do not use on hot surfaces or in direct sunlight. The surface must be dry. Oil-soaked cloths can ignite spontaneously and must be disposed of in a tightly sealed container following use.

Surface repair set

For kitchen work surfaces, table-top surfaces, parquet floors, staircases and much more.

The most important products for repairing damage to surfaces or edge areas that are subsequently exposed to major loads, all in one set.

Included in delivery (Lieferumfang)	Hard wax, 20 pcs., 0964 890 6; gas melter 0890 305 3; fine-grain pens, 3 pcs., 0890 403 600
--	---

Art. no. 0964 890 011

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Hard wax

For filling larger damaged areas on the surface or around edges that are subsequently exposed to major loads.

High strength

- Specifically for repairing areas exposed to high loads within the surface area
- High friction resistance

Inexpensive repair work

Instead of replacement or costly new surface treatment of the whole surface.

Chemical basis	Wax
Min. processing time	3 min
Max. processing time	5 min
Softening point	76 °C
Conditions for softening point	in accordance with ISO 2207
Min. dripping point	81 °C
Dripping point conditions	in accordance with DIN 51801
Min. flashing point	100 °C

Walnut, medium	0890 403 117	5

Please consider the legal instruction at the beginning of this chapter.

- Suitable for indoor use
- Please follow the instructions for use provided in each pack carefully
- Please note that wood has a natural colour that is dependent on a number of different factors. Therefore, several wax colours should always be used to ensure the touch-up work does not show

Gas melter

Portable, gas-operated melter for quick and targeted melting of hard wax

Versatile

- Cordless operation makes the gas melter flexible to use
- Pen shape makes it easier to handle
- The gas melter is always ready to use thanks to the lighter integrated into the lid

Excellent temperature regulation

Switches off automatically when the cap is pressed on for high safety levels

Contents	9 ml
----------	------

Art. no. 0890 305 3

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

The gas melter is supplied empty. „Butane gas“, art. no. 0893250001, is required to fill the gas melter for the first time.

Gas volume is 9 ml. This equates to a burning time of 60–90 minutes.

Retouching wax

For filling and at the same time retouching fine scratches, small holes and abrasions.

Wide range of colours

Matching colours for a wide range of different wood colours.

Simple application

Fast and easy filling of small scratches, cracks and open joints.

Inexpensive repair work

Instead of replacement or costly new surface treatment of the whole surface

Low mechanical strength

Chemical basis	Wax
Softening point	50 °C

Please consider the legal instruction at the beginning of this chapter.

- Suitable for indoor use.
- Please follow the application instructions included with each assortment pack precisely.
- Please note that wood has a natural colour that depends on a wide range of different factors. Therefore, several wax colours should always be used to ensure the touch-up work does not show.

Soft wax assortment, brown

20 pieces, for filling smaller damaged areas that are not later exposed to major loads, in classic brown colours

- Large selection of colours for a wide range of different wood colour tones.
- Colours can be mixed with each other
- Easy to apply
- Cost-effective repair work

Number of pieces in assortment/set	20 PCS
Min./max. processing time	2-3 min

Paint retouching pen

For recolouring and covering edges and scratches as well as for pre-colouring damaged areas. A sprung pen tip provides an even flow of paint and therefore optimum results.

Easy and quick to apply

- No brush and paint pot required
- Ready to use immediately and quick-drying

Wide range of colours

Matching colours for a wide range of different wood colours.

Good adhesion

- Adheres to many surfaces, making it suitable for universal use
- Resistant to smearing and scratch-resistant

Suitable for indoor and outdoor use

Chemical basis	Acrylic resin

2-component repair filler

For all wood and imitation wood surfaces

- Hardness and strength equivalent to that of wood and high resistance to weathering.
- Begins to dry in just a few minutes, does not drop into holes and recesses and is fully resistant within 20–40 minutes depending on the room temperature.
- The filler can be painted with a wide range of paint systems.

Chemical basis	Polyester resin
Max. curing time	30 min
Shelf life from production/conditions	12 Month/at 10°C

Contents	Colour	Art. no.	P. Qty.
150 ml	Oak bright	0890 302 1	1
180 ml	White	0890 302 2	1

Please consider the legal instruction at the beginning of this chapter.

Ensure that the compound does not become too hard.

2-component repair filler and its hardener must be disposed of as special waste. Waste codes in accordance with EAK 080409 – adhesive and sealant waste that contains organic solvents and other harmful substances.

Retouching putty Wood filler

To fill and repair wood surface damage

- The pasty, easy-to-shape, fine-grained compound is extremely quick to dry
- Shades can be mixed together for improved matching of the colour to the surface of the wood
- Once completely dry, the wood filler can easily be further processed, e.g. sawed, sanded, nailed, stained, glazed, painted and polished like wood

Chemical basis	Nitro cellulose basis
Can be varnished after	12 h
Max. curing time	3 h

Contents	Colour	Shelf life from production/conditions	Art. no.	P. Qty.
50 ml	Beech	24 Month/at 10°C to 30°C	0890 304 70	1/10
50 ml	Natural	24 Month/at 10°C to 30°C	0890 304 00	1/10
50 ml	Oak bright	24 Month/at 10°C to 30°C	0890 304 10	1/10
50 ml	Oak, medium	24 Month/at 10°C to 30°C	0890 304 20	1/10
250 ml	Beech	18 Month/at 10°C to 30°C	0890 304 7	1/6
250 ml	Natural	24 Month/at 10°C to 30°C	0890 304 0	1/6

Contents	Colour	Shelf life from production/conditions	Art. no.	P. Qty.
250 ml	Oak bright	24 Month/at 10 °C to 30 °C	0890 304 1	1/6
250 ml	Oak, medium	18 Month/at 10 °C to 30 °C	0890 304 2	1/6

Please consider the legal instruction at the beginning of this chapter.

When used outdoors, a final coating must be carefully applied.

Filler Light filler

Light filler for filling joints, cracks and holes in wall and ceiling surfaces

- Ready to apply
- Virtually shrink-free
- Easy to paint
- Easy to sand (200 µm grain size fraction max. 1%)

Colour	White
Min./max. processing temperature	5 to 30 °C
Min./max. curing time	6-8 h
Shelf life from production	12 Month

Contents	Art. no.	P. Qty.
5 l	0892 162 250	1
310 ml	0892 162 310	1/24

Please consider the legal instruction at the beginning of this chapter.

Please note that these values merely serve as empirical values. It should therefore be noted that the hardening time increases with thicker joints.

Smoothing and filling filler, powder form

Polymer-modified and fibre-reinforced gypsum-based joint, filling and surface filler.

- High adhesive strength for exemplary joint formation with excellent protection against cracks
- Hardly any shrinkage in joints, slots or holes
- Processing time of approx. 50 minutes makes work easier

Colour	White
Min./max. processing temperature	5 to 25 °C
Max. processing time	50 min
Shelf life from production	10 Month
Ratio of ingredients	1 kg of spatula to 0.6 l of water
Swamp time	3 min

Continuation **Smoothing and filling filler, powder form**

Weight of content	Art. no.	P. Qty.
5 kg	0892 600 16	4
25 kg	0892 600 17	10/20

Please consider the legal instruction at the beginning of this chapter.

For further information, please refer to the technical data sheet.

Joint and surface filler WF

Ready-to-use filler for dry indoor construction, complies with EN 15824

Ready for use

- Easy to use
- No mixing tools required
- Powder and water do not spill
- No residue
- Saves time
- Consistently high level of quality

Contents	10 l
Colour	White
Min./max. processing temperature	5 to 35 °C
Min./max. drying time	2-3 h
Shelf life from production	12 Month

Art. no. 0892 600 18

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Wear a fine-dust mask when sanding.

Store WF joint and surface filler in a cool, but frost-free place. Do not expose to direct sunlight.

Joint and surface filler WLF

Ready-to-use light filler for dry and indoor use with perlite. Complies with EN 15824.

- Excellent filling power
- Stable surface
- Ready for use
- Cracks do not form, as less shrinkage
- Extremely supple and easy to sand

Contents	10 l
Colour	Light grey (bright grey)

Min./max. processing temperature	5 to 35 °C
Min./max. drying time	2-3 h
Shelf life from production	12 Month

Art. no. 0892 600 15

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Store WLF joint and surface filler in a cool, but frost-free place. Do not expose to direct sunlight.

Compressed air cleaning gun TOP Gun

Professional cleaning gun for cleaning surfaces on the vehicle.

- Micro-atomisation results in effective use of cleaning agent
- The air and cleaning agent supply can be adjusted manually
- Ball bearing drive generates swirling effect
- Low wear and maintenance

Min./max. working pressure	6-9 bar
Product weight (per item)	954 g
Max. flow rate	160 l/min

Art. no. 0891 703 140

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Compressed air cleaning gun TOP Gun Plus

Professional cleaning gun with an additional extractor with vacuum cleaner connection for cleaning all vehicle surfaces.

- Thorough cleaning with a combination of a cyclone effect and suction (extractor)
- Gently cleans delicate surfaces
- Better mobility through 360° compressed air coupling

Width x height x depth	360 x 275 x 120 mm
Min./max. working pressure	4-7 bar
Volumetric capacity	1 l
Product weight (per item)	1612 g
Max. flow rate	254 l/min

Art. no. 0891 703 160

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

For best results, the cleaning gun requires a constant air pressure of between 5.5 and 6.3 bar.

Tornador Gun spare parts kit for cleaning and washing device

Inner textile hose (1 pc), rotating hose (2 pcs), funnel (1 pc)

Art. no. 0891 703 120

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Foam gun

For use with Würth utility vehicle cleaners, workshop cleaners and service cleaners and other cleaners together with high-pressure devices or steam jets

Uniform foam structure

- Long-lasting
- Efficient use of cleaning agent thanks to a longer soaking time and slow running of the foam
- Areas in which foam has already been applied are easy to identify

Type description	Foam cleaner
Included in delivery (Lieferumfang)	Container, adapter 1/4" on union nut for Kärcher high-pressure devices M22, 1/4" on M22 reducing nipple
Min. working pressure	150 bar

Art. no. 0891 370

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Rinse the foam gun with water after use.

High-pressure sprayer

Versatile high-pressure sprayer for cleaning vehicles and buildings

- Uniform spraying pattern, even without continuous repumping
- FPM seals resistant to chemicals
- Resistant to phosphoric acid up to 85%; resistant to hydrofluoric acid up to 50%

Liquid volume	5 l
Container capacity	8 l
Working pressure	3 bar
Hose length	1.3 m
Product weight (per item)	2583 g

Art. no. 0891 385 005

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Use only for aqueous Würth cleaning products.

Alkali-resistant high-pressure spraying device

Versatile high-pressure spraying device for cleaning vehicles and buildings with maximum resistance to alkalis.

- Large pressure pad
 - Uniform spraying pattern, even without continuous repumping
- Quick and convenient to refill
 - Large filler opening with integrated funnel for fast filling of the device
- Convenient working
 - 360° rotating plastic spray pipe with flat jet nozzle facilitates comfortable and effortless work by adjusting the direction

Liquid volume	5 l
Container capacity	8 l
Flow capacity conditions	at 3 bar
Flow capacity	0.86 l/min
Max. operating temperature	40 °C
Material	HDPE - High density polyethylene
Height x width	490 x 200 mm
Hose length	2 m
Product weight (per item)	2.6 kg

Art. no. 0891 385 008

P. Qty.: 1

Use only for aqueous Würth cleaning products.

Foam high-pressure spraying device Perfect Foam

Ideal for applying cleaning foam for vehicle and commercial car cleaning

- The high-pressure spraying device transforms a cleaning agent into an effective foam, which effectively dissolves and easily removes dirt, insects and tough road grime.
- The foam sprayer creates a fixed foam cell structure, so that the foam easily adheres to the surface and can work very effectively.

Liquid volume	8 l
Container capacity	12.5 l
Flow capacity conditions	at 3 bar
Flow capacity	0.86 l/min
Max. operating temperature	40 °C
Material	HDPE - High density polyethylene
Height x width	650 x 240 mm
Hose length	2.5 m
Product weight (per item)	2.89 kg

Art. no. 0891 385 009

P. Qty.: 1

Use only for aqueous Würth cleaning products.

Vehicle cleaner Active foam

Truck shampoo that is gentle on paintwork for light to medium soiling.

- Time saving of up to 50% when used regularly
- Deep penetrating effect and high cleaning effect achieved after one application
- Silicate-free
- Phosphate-free
- Separates easily in line with Austrian standard B5105
- Empty drums can be disposed of via the German Green Dot recycling system

Container	Canister
Chemical basis	Fatty alcohols
Colour	Yellowish
pH value/conditions	13/at 20 °C
Density/conditions	1.1 g/cm ³ /at 20 °C
Shelf life from production	36 Month
AOX-free	Yes
Silicone-free	Yes
Phosphate-free	Yes
Bio-degradable	Yes

Continuation **Vehicle cleaner Active foam**

Contents	Weight of content	Art. no.	P. Qty.
60 l	66 kg	0893 044 060	1
200 l	220 kg	0893 044 200	1

Please consider the legal instruction at the beginning of this chapter.

Do not apply to hot surfaces or in direct sunlight.

Vehicle cleaner Extra strong active foam

Truck shampoo with increased cleaning power for medium to heavy soiling.

- When used regularly, time-consuming brushing is all but eliminated
- Highly effective cleaning
- Silicate-free

Chemical basis	Amphoteric tenside
Colour	Light yellow
pH value/conditions	13/at 20°C
Density/conditions	1.09 g/cm³/at 20°C
Shelf life from production	36 Month
AOX-free	Yes
Silicone-free	Yes
Phosphate-free	Yes

Contents	Weight of content	Art. no.	P. Qty.
30 l	32.7 kg	0893 045 030	1
60 l	65.4 kg	0893 045 060	1
200 l	218 kg	0893 045 200	1

Please consider the legal instruction at the beginning of this chapter.

Do not apply to hot surfaces or in direct sunlight!

Special power cleaner

For removing incredibly stubborn dirt on commercial vehicles

- For removing even the most stubborn dirt on construction vehicles and commercial vehicles
- Particularly effective on mineral debris such as cement and lime deposits
- Excellent cleaning effect with a short working time (max. 5 minutes)

Contents	20 l
Container	Canister
Chemical basis	Concentrate on acid base
Weight of content	21 kg
Colour	Light yellow
pH value/conditions	1.5/100 g/l aqueous solution

Density/conditions	1.05 g/cm³/at 20°C
Shelf life from production	24 Month
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes

Art. no. 0893 037 020

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Do not allow medium to dry out and do not apply to glass surfaces (windows). Thoroughly rinse the vehicle with a hot-water, high-pressure cleaner using plenty of water at a lance distance of 1 m.

Universal cleaner Truck Wash

Alkaline universal cleaner for cleaning tarpaulin, attachments and chassis on trucks, buses and construction machinery

- Reliably removes stubborn dirt such as grease, oil, dirt from the road, tar splashes and rubber abrasion
- Excellent washing power and quick cleaning thanks to alkaline setting
- Paints, plastics and metal parts are not attacked

Contents	30 l
Container	Canister
Shelf life from production	24 Month
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes

Art. no. 0893 038 020

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Do not use the medium in intense sunlight or on hot surfaces. Do not let it dry.

Vehicle basic cleaner

Environmentally friendly cleaning concentrate for basic cleaning during professional vehicle treatment

- Great cleaning performance
- Particularly high yield
- Oils and greases are penetrated and separated
- Optimised material compatibility
- Free of phosphate and volatile organic solvents. AOX-free.
- Biodegradable
- Silicone-free

Contents	20 l
Container	Canister
Smell/fragrance	Mild

Continuation **Vehicle basic cleaner**

Colour	Blue
pH value/conditions	8.5/undiluted
AOX-free	Yes
Silicone-free	Yes
Phosphate-free	Yes
Bio-degradable	Yes

Art. no. 0893 475 1

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Do not spray on hot surfaces or in sunlight. Do not let it dry out. Protect from frost.

Pre-spray cleaning concentrate

Alkaline cleaning agent for pre-treating and removing stubborn dirt

- Effective pre-cleaner
- Multifunctional application
- Free of phosphate, AOX and silicone
- pH value in the concentrate: approx. 13
- Easily biodegradable in line with OECD*
- Does not compromise the effectiveness of light fluid separators

Contents	25 l
Chemical basis	Anionic tenside
Smell/fragrance	Characteristic
Colour	Light brown
Container	Canister
pH value	13
Density/conditions	1.066 g/cm ³ /at 20°C
AOX-free	Yes
Silicone-free	Yes
Phosphate-free	Yes

Art. no. 0893 025 9

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

- Do not allow to dry, and do not use on galvanised surfaces
- Perform preliminary testing on surfaces sensitive to alkaline, such as aluminium
- Protect against frost

Cleaning concentrate Active wash

pH-neutral car shampoo for active-cleaning brush washing of passenger cars and commercial vehicles

- Based on active-cleaning surfactants
- Combination of special ingredients enables brushes to slide better
- No streaking when using auto waxes and drying aids
- Easily biodegradable in accordance with OECD*.
- Does not compromise the effectiveness of light fluid separators

Contents	25 l
Chemical basis	Nonionic tenside
Smell/fragrance	Lemon
Colour	Yellow
Container	Canister
pH value	7
Density/conditions	1.02 g/cm ³ /at 20°C
AOX-free	Yes
Silicone-free	Yes
Phosphate-free	Yes

Art. no. 0893 025 1

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

- Do not allow to dry!
- Store in a frost-free place!

Active foam wash

Intensive, highly concentrated foam cleaner for foam pre-treatment and wash of vehicles in car washes.

- Highly concentrated active foam
- Combination of special ingredients enables brushes to slide better
- No streaking when using auto waxes and drying aids
- Free of phosphate, AOX and silicone
- pH value in the concentrate: 7.0
- Easily biodegradable in line with OECD*. Does not compromise the effectiveness of light fluid separators.

Contents	25 l
Chemical basis	Anionic tenside
Smell/fragrance	Characteristic
Colour	Yellow
Container	Canister
pH value	7
Density/conditions	1.015 g/cm ³ /at 20°C
AOX-free	Yes
Silicone-free	Yes
Phosphate-free	Yes

Continuation **Active foam wash**

Art. no. 0893 025 2

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Do not allow to dry! Store in a frost-free place!

*OECD = Organisation for Economic Cooperation and Development

Premium active scented foam wash

Powerful pH-neutral scented foam for intensive scent across the entire car wash.

- Excellent cleaning result thanks to long penetration time
- Increases the service life of the brushes
- Does not compromise the effectiveness of light fluid separators

Contents	25 l
Chemical basis	Anionic tenside
Smell/fragrance	Fruity
Colour	Green
Container	Canister
pH value	7
Density/conditions	1.03 g/cm ³ /at 20°C
AOX-free	Yes
Silicone-free	Yes
Phosphate-free	Yes

Art. no. 0893 026 0

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Do not let it dry. Store in a frost-free place.

Premium active wash

Deep-action protection for a reflective gloss effect.

Can already be applied in the shampooing area and supports the drying process

No diminishing of method of action of light liquid separators

Readily biodegradable in accordance with OECD (Organisation for Economics Cooperation and Development).

Phosphate- and AOX-free
pH-value in concentrate: 3

Contents	25 l
Chemical basis	Cationic surfactants

Smell/fragrance	Fruity
Colour	Yellow
Container	Canister
pH value	3
Density/conditions	1.02 g/cm ³ /at 20°C
AOX-free	Yes

Art. no. 0893 026 1

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Do not let it dry. Store in a frost-free place.

Hygienic operating cleaner

Liquid, intensive, foam-based cleaning concentrate for agricultural, municipal and forestry vehicles and machinery. Effective cleaning performance due to special surfactant combinations for agricultural vehicles and machinery.

- Loosens even stubborn dirt
- Does not attack plastic, car glazing, tarpaulin, paint and rubber
- Solvent- and silicone-free

pH value	13-13.5
Ratio of ingredients	1% - 10%

Contents	Art. no.	P. Qty.
5 l	0997 368 045	1
20 l	0997 368 046	1

Blue high gloss desiccant

Liquid desiccant for use in vehicle car washes with air blowers

- Facilitates rapid breakup of large areas of water film
- Creates an additional protective film
- Free of phosphate, AOX and silicone
- pH value in the concentrate: approx. 4
- Free of mineral oil and hydrocarbons
- Does not compromise the effectiveness of light fluid separators.
- Easily biodegradable in line with OECD.

Contents	25 l
Chemical basis	Cationic surfactants
Colour	Blue
pH value	4

Continuation **Blue high gloss desiccant**

Silicone-free	Yes
Phosphate-free	Yes
Bio-degradable	Yes
AOX-free	Yes
Container	Canister

Art. no. 0893 025 5

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Store in a frost-free place! Avoid overdosing! Only use on cleaned and rinsed surfaces.

Premium blue gloss desiccant

High-performance drying aid for use in vehicle car washes with air blowers.

- Facilitates very rapid and outstanding drying
- Impressive special gloss effect
- Protects against recontamination
- Pleasant fragrance
- Does not compromise the function of light liquid separators
- Free of phosphates, AOX, mineral oils and hydrocarbons
- pH value in concentrate: approx. 4

Contents	25 l
Chemical basis	Cationic surfactants
Colour	Blue
pH value	4
AOX-free	Yes
Container	Canister

Art. no. 0893 026 6

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Do not let it dry. Store in a frost-free place.

Car shampoo 3 in 1

Vehicle cleaner with a triple effect: cleaning, gloss enhancement and maintenance are achieved in just one step.

- Special mixture of active ingredients for effective and thorough cleaning
- Coats the paint with a permanent protective film
- Boosts shine

Chemical basis	Surfactants
Colour	Blue
Phosphate-free	Yes

Contents	Container	Density/ conditions	AOX-free	Art. no.	P. Qty.
1000 ml	Bottle	1.007 g/cm ³ /at 23°C	Yes	0893 012 002	1/6
5000 ml	Canister	1.007 g/cm ³ /at 20°C		0893 012 051	1

Do not use on hot surfaces in direct sunlight. Protect from frost.

Engine cleaner Engine wash

Powerful engine cleaner for engines, engine compartments and gearboxes

High cleaning performance

- Quickly and thoroughly removes oil, grease, tar and other soiling
- The cleaner adheres to vertical surfaces due to its viscosity, which means that it can get under the dirt and loosen it to optimal effect

Gentle on materials

Sensitive surfaces such as aluminium, tin and zinc as well as painted surfaces, plastics and rubber are not attacked due to the lack of aggressive substances.

Container	Canister
Smell/fragrance	Fresh
Chemical basis	Water and alkaline tenside
pH value	8.5

Contents	Art. no.	P. Qty.
5 l	0893 013 05	1
20 l	0893 013 20	1

Please consider the legal instruction at the beginning of this chapter.

Engine cleaner

Powerful cleaner for engines, gearboxes, machines, chassis and bodywork

- Quickly and easily removes oil, grease, tar and other soiling
- Gentle on materials
- Biodegradable > 95%
- Separates easily

Contents	0.3 l
Container	Aerosol can
Smell/fragrance	Characteristic
Chemical basis	Mineral oil

Art. no. 0890 23

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

The ignition system must be covered with suitable equipment in order to prevent starting difficulties after washing the engine. For effective cleaning performance, we recommend using a hot-water high-pressure cleaner. The cleaning performance during manual application is actively supported by the use of hot water.

Injector solvent Injector-Ex

Mineral oil free injector and spark plug solvent with KENA® microfluid formula.

- Excellent creeping characteristics facilitates deep penetration of the product
- Very heavily coked injectors and spark plugs are efficiently loosened
- Effect is enhanced by slow evaporation, rust is transformed and coking is solvated
- Very cost-effective application

Contents	250 ml
Colour	Colourless
Smell/fragrance	Fruity
Chemical basis	Surfactants, ester
Shelf life from production	24 Month

Art. no. 0893 300 250

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Engine seal

Seal for engines and engine compartments of all types of vehicles

User-friendly

- No polishing required
- Can also be applied to damp surfaces

Contains silicone

Freshens up plastic parts and engine components and leaves behind a water and dirt-repellent protective film

Smell/fragrance	Pleasant
Chemical basis	Aqueous silicone solution
pH value/conditions	7.5/at 20°C

Contents	Art. no.	P. Qty.
5 l	0893 479 005	1
20 l	0893 479 020	1

Please consider the legal instruction at the beginning of this chapter.

Active glass cleaner

Active cleaning foam for streak-free cleaning on glass and smooth surfaces

- Outstanding dirt-dissolving power
- Cleans painted surfaces as well as rubber and plastic parts while remaining gentle on the material
- Saves money thanks to 20x yield

Smell/fragrance	Lemon
Colour	Colourless
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes

Contents	Container	Chemical basis	pH value	Density/conditions	Art. no.	P. Qty.
5 l	Canister	Mix of organic solvents	Approx. 10	0.97 g/cm ³ /at 20°C	0890 250 5	1
20 l	Canister	Mix of organic solvents	Approx. 10	0.97 g/cm ³ /at 20°C	0890 252 0	1
500 ml	Aerosol can	Water and propanol	9.5	0.89 g/cm ³ /at 20°C	0890 25	1/12/24

Please consider the legal instruction at the beginning of this chapter.

Glass and window cleaner

Powerful liquid cleaner with anti-static effect for cleaning windows

- Cleans without streaking
- Excellent material compatibility
- Suitable for use on polycarbonate glass, photovoltaic glazing and scratch-resistant glazing
- Quick and powerful cleaning with no streaks, and is still gentle on all gloss surfaces

Contents	5 l
Chemical basis	Ethanol
Smell/fragrance	Characteristic
Colour	Transparent
Density/conditions	0.98 g/cm ³ /at 20°C
Shelf life from production	60 Month
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes

Art. no. 0890 220 5

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Do not use on hot surfaces or in direct sunlight.

Insect remover

With a special foam formula for fast and reliable removal of insect residues on glass, chrome, paint and plastic surfaces

- With special foam formula – allow to soak in and the contamination dissolves
- Removes even stubborn contamination
- Very good material compatibility on all surfaces

Chemical basis	Anionic tenside
Colour	Colourless
pH value	10
Shelf life from production	24 Month
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes

Continuation **Insect remover**

Contents	Container	Art. no.	P. Qty.
5 l	Canister	0893 470 002	1
20 l	Canister	0893 470 003	1
500 ml	Plastic bottle	0893 470 001	1/12

Please consider the legal instruction at the beginning of this chapter.

Do not use on heated paints or in the sun. Protect from frost.

Insect remover

Special cleaner for fast and reliable removal of insect residues on glass, chrome, paint and plastic surfaces

- Easily removes insect soiling that damages paintwork, without leaving any residue
- Easy and quick to apply
- Does not attack paint, chrome, plastic, rubber etc.

Contents	500 ml
Container	Hand spray
Chemical basis	Alkaline tenside
Smell/fragrance	Characteristic
Colour	Yellow, Green
pH value	11
Shelf life from production	36 Month
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes

Art. no. 0893 470

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Do not use on heated paints or in the sun. Protect from frost.

Premium rim cleaner

Acid-free special cleaner for all steel and light-alloy wheel rims

- Gentle on the wheel rim surface and wheel nuts
- Even removes surface rust particles
- 360° application: sprays in all positions

Chemical basis	Mixture of surfactants and selected complex compounds
Smell/fragrance	Characteristic
Colour	Yellow green
pH value/conditions	7.5/undiluted
Density/conditions	1.08 g/cm ³ /at 20°C
Shelf life from production	36 Month
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes
Free of phosphoric acid	Yes

Contents	Container	Art. no.	P. Qty.
400 ml	Aerosol can	0893 476 500	1/6
5 l	Canister	0893 476 505	1
20 l	Canister	0893 476 520	1

Please consider the legal instruction at the beginning of this chapter.

Aluminium wheel rim cleaner

Acidic special cleaner for light-alloy wheel rims

- Removes even the most stubborn brake dust deposits, tar spray and other hard-to-remove dirt
- Regular use maintains the original appearance and the build-up of new soiling is prevented.
- AOX and silicone-free

Chemical basis	Phosphoric acid, non-ionic surfactants
Smell/fragrance	Characteristic
Colour	Colourless
pH value/conditions	1/at 20 °C
Density/conditions	1.14 g/cm ³ /at 20 °C
Shelf life from production	24 Month
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes
Free of phosphoric acid	No

Contents	Container	Art. no.	P. Qty.
5 l	Canister	0890 102 05	1
500 ml	Spray bottle	0890 102	1/12

Please consider the legal instruction at the beginning of this chapter.

Use only on light-alloy wheel rims. Do not use on hot wheel rims or in direct sunlight. Do not spray on vehicle paint, chrome, highly polished aluminium, plastic or other surfaces.

Intensive wheel rim cleaner

For all painted and unpainted light metal wheel rims and steel wheel rims

- Excellent cleaning performance thanks to gel formula
- AOX and silicone-free
- Acid-free

User-friendly

- No run-off, makes it economical to use
- Long exposure time possible (up to 30 minutes)
- Separates easily, i.e. separates quickly in the waste water in accordance with Ö-Norm (Austrian standard) B5105

Chemical basis	Alkaline tenside
Smell/fragrance	Fruity
Colour	Rosy
pH value/conditions	10/undiluted
Density/conditions	1.14 g/cm ³ /at 20 °C
Shelf life from production	12 Month
AOX-free	Yes

Silicone-free	Yes
Bio-degradable	Yes

Contents	Container	Art. no.	P. Qty.
1 l	Spray bottle	0893 476	1/6
5 l	Canister	0893 476 05	1

Please consider the legal instruction at the beginning of this chapter.

Do not use on hot wheel rims or in direct sunlight.

Tyre foam

High-quality care product for tyre walls

Cleans, cares, protects

- Simple to apply in a single step, thereby saving time
- Does not need to be wiped off afterwards
- Ideal before the tyres go into storage
- Dust- and dirt-repellent
- Does not attack paint, plastics, rubber and metals

Contents	500 ml
Chemical basis	Alkaline surfactants, silicone oil
Smell/fragrance	Characteristic
Colour	White
pH value/conditions	9/at 20°C
Density/conditions	0.919 g/cm³/at 20°C
Shelf life from production	18 Month
AOX-free	Yes
Silicone-free	No
Bio-degradable	Yes

Art. no. 0890 121

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Do not spray on tyre treads, brake discs and brake drums. Contains silicone.

Tar remover

Effortlessly removes tar, oil, and splashes of underbody seal and cavity sealant from paint and chrome

- Strong solvent for removing stubborn dirt
- Easy rinsing thanks to emulsifying effect

Smell/fragrance	Characteristic
Colour	Colourless
AOX-free	Yes
Bio-degradable	Yes

Continuation **Tar remover**

Contents	Container	Chemical basis	Density/ conditions	Shelf life from production/ conditions	Art. no.	P. Qty.
300 ml	Can	Aliphatic hydrocarbon	0.749 g/cm ³ / at 20°C	36 Month/at 20°C	0890 26	1/12
5000 ml	Canister	Mineral oil	0.8 g/cm ³ /at 20°C	24 Month/at 20°C	0890 26 005	1

Please consider the legal instruction at the beginning of this chapter.

Gloss seal

Provides lasting, reliable protection with extremely simple application

- Resistant to weathering, salt, sunlight, cold cleaner and other influences that generally affect paint
- Is non-aggressive and therefore gentle on paints
- Achieves an extremely smooth paint surface and protects for up to 18 months
- Silicone-free

Contents	250 ml
Shelf life from production	36 Month

Art. no. 0893 012 6

P. Qty.: 1/24

Please consider the legal instruction at the beginning of this chapter.

Spray shine

Provides new and used cars with a high gloss in just minutes

- Minimal time required
- Vehicle looks like it has just been polished
- Silicone-free

Smell/fragrance	Sweetish
Colour	Blue

Contents	Art. no.	P. Qty.
0.5 l	0893 011 500	1/12
5 l	0893 011 5	1

Please consider the legal instruction at the beginning of this chapter.

Polymer surface protection

Transparent surface protection for sealing and preserving smooth surfaces as well as for removing polishing streaks and holograms.

Contains high-quality polymers

- Polishing streaks are reliably removed
- Excellent resistance to weathering and UV
- Brilliant gloss of painted surfaces

Lotus effect

- Water- and dirt-repellent effect
- Prevents lime deposits
- Reduces the amount of cleaning and care required

Contents	500 ml
Shelf life from production	24 Month

Art. no. 0893 158

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Multi-purpose cleaner Liquid Green

Powerful multi-purpose cleaner with great grease and resin dissolving capacity

- Grease, resin, and other dirt is thoroughly and reliably removed
- Multipurpose cleaner
- Gentle on materials
- Does not contain any phosphates or organic solvents
- Biodegradable in line with OECD302 B
- Silicone-free and AOX-free

Colour	Neon green
Chemical basis	Anionic tenside

Contents	Container	Art. no.	P. Qty.
500 ml	Hand spray	0893 474	1/12
5000 ml	Canister	0893 474 5	1

Please consider the legal instruction at the beginning of this chapter.

Do not use on hot surfaces or in direct sunlight. Not suitable for polycarbonate glass. Do not let it dry out. Protect from frost.

Cleaning spray Super Clean

Universal cleaning and care spray for smooth and painted surfaces

- Bright shine and permanent protection
- Brings a new shine to plastics; for indoor and outdoor use
- Easily removes tar, grease and surface rust after a brief application time
- Removes holograms from dark paints
- Contains silicone

Contents	400 ml
Colour	Clear

Art. no. 0893 011 400

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Do not use on hot surfaces or in direct sunlight.

Car sponge

For cleaning cars and commercial vehicles

- Very good cleaning
- Promotes foaming
- Actively absorbent
- Non-scratch
- Permanently elastic

Material	Polyurethane foam
Length x width x height	18 x 13 x 6 cm

Art. no. 0899 700 400

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Hand brush

Car brush with ergonomic, comfortable handle for effective and simple cleaning of all surfaces

- Diagonally arranged bristles can reach all areas
- Split hair tips so the brushes draw in lots of water
- Cleaning that is gentle on paint thanks to split and therefore softened bristles

Colour	Red, Black
Material	PP - Polypropylene
Material of the bristles	Polybutylene terephthalate -PBT
Length	320 mm
Width	115 mm

Height	107 mm
Length of bristles	40 mm

Art. no. 0891 350 102

P. Qty.: 1

Washing brush, 150 x 250 mm

Car washing brush with water passage, rotary joint and rubber edge.

- A water passage ensures optimum water distribution
- Swivel brush, with patented rotating device
- Split hair tips so that the brushes draw in lots of water

Material	PP - Polypropylene
Material of the bristles	Polybutylene terephthalate -PBT
Colour	Red, Black
Length	250 mm
Width	115 mm
Height	150 mm
Length of bristles	47 mm
Max. temperature conditions	50 °C

Art. no. 0891 350 100

P. Qty.: 1

Washing brush

Vehicle washing brush with water flow-through

- A water passage ensures optimum water distribution
- Diagonally arranged bristles can reach all areas
- Split hair tips to absorb large quantities of water

Material	PP - Polypropylene
Material of the bristles	Polybutylene terephthalate -PBT
Colour	Red, Black
Length	400 mm
Width	80 mm
Height	115 mm
Length of bristles	52 mm
Max. temperature conditions	50 °C

Art. no. 0891 350 202

P. Qty.: 1

Hand brush

With water flow-through and adapter

- A water passage ensures optimum water distribution
- Split hair tips so that the brushes draw in lots of water
- Cleaning that is gentle on paint thanks to split and therefore softened bristles

Material	PP - Polypropylene
Material of the bristles	Polybutylene terephthalate -PBT
Colour	Red, Green
Length	287 mm
Width	47 mm
Max. temperature conditions	50 °C

Art. no. 0891 350 204

P. Qty.: 1

Aluminium handle

Aluminium handle with water passage, 1560 mm

- Ergonomic handle with water channel
- Made of aluminium with robust impact-resistant and grip-friendly plastic
- With 1/2" and 3/4" water hose connection
Mounting with a pipe clamp
- Can be used with pressure of up to 6 bar

Material	Aluminium
Length	1560 mm
Diameter	31 mm
Max. temperature conditions	50 °C
Design	With water flow-through

Art. no. 0891 350 103

P. Qty.: 1

Aluminium telescopic shaft with water drain

With 1/2" - 3/4" hose connection

- Can be flexibly adjusted to a length of 1600-2780 cm
- Made of aluminium with robust, impact-proof and easy-grip plastic, ensuring convenient and functional use.
- The shaft can be used with pressure of up to 6 bar

Material	Aluminium
Length	1600 mm
Max. length	2780 mm
Min. length	1600 mm
Diameter	31 mm
Max. pressure	6 bar

Max. temperature conditions	50 °C
Design	With water flow-through

Art. no. 0891 350 104

P. Qty.: 1

Aluminium handle

Aluminium handle, 1495 mm

Material	Aluminium
Length	1495 mm
Diameter	28 mm
Max. temperature conditions	50 °C

Art. no. 0891 350 210

P. Qty.: 1/10

Please consider the legal instruction at the beginning of this chapter.

Floor squeegee

Black cellular rubber floor squeegee for effective removal of water and oil

- Resistant to oil
- Ideal for large surfaces
- Soft cellular rubber ensures gentle treatment and optimum protection of surfaces
- Durable

Colour	Black
Material	Polypropylene, foam rubber
Length	600 mm
Width	35 mm
Height	95 mm
Product weight (per item)	250 g

Art. no. 0891 350 207

P. Qty.: 1

Rim brush

With split, diagonally arranged bristles for effective cleaning

- Diagonally arranged bristles can reach all areas
- Split hair tips so that the brushes draw in lots of water
- Cleaning that is gentle on paint thanks to split and therefore softened bristles

Width	70 mm
Length	170 mm

Continuation **Rim brush**

Art. no. 0891 350 211

P. Qty.: 2

Squeegee WIPE-N-SHINE

With handle mount for removing residual drops of water

- Ideal for large surfaces
- Can be used with telescopic handle
- Soft rubber ensures gentle treatment and optimum protection of surfaces
- Durable

Colour	Green
Material	Polyoxymethylene, thermoplastic elastomers
Length	450 mm
Width	190 mm
Height	70 mm
Product weight (per item)	233.5 g
Design	With handle mount

Art. no. 0891 350 206

P. Qty.: 1

Rubber blade WIPE-N-SHINE

With handle for removing drops of water

- Can be used with telescopic handle
- Soft rubber ensures gentle treatment and optimum protection of surfaces
- Durable

Colour	Green
Material	Polyoxymethylene, thermoplastic elastomers
Length	350 mm
Width	198 mm
Height	53 mm
Product weight (per item)	207 g
Design	With handhold

Art. no. 0891 350 205

P. Qty.: 1

Dispensing pump

For 4000 ml bucket of hand cleaner

- The pressure pump transports the hand cleaner as soon as the pump is pressed
- Single pump action dispenses a precise amount (6 cm³)
- Total height: approx. 40 cm

Material	Plastic
----------	---------

Art. no. 0891 901 1

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Plastic paint Plast PT®

For visual care of all plastic parts on a car

- Solvent-free
- High-quality, emulsion-based plastic paint
- Return faded plastic to look like new

Contents	75 ml
pH value	8-9.0

Colour	Shelf life from production	Art. no.	P. Qty.
Anthracite	5 Years	0893 280 2	1/12
Black	90 Month	0893 280 1	1/12

Please consider the legal instruction at the beginning of this chapter.

When being applied, plastic paint is sensitive to moisture. Therefore, do not apply in the rain or bring into contact with water shortly after application.

Textile cleaner Liquid Clear

Multifunctional fabric cleaner with nano-waterproofing

- Cleans and waterproofs in a single step
- Transparent liquid
- Odourless
- Easy and practical to use
- Excellent material compatibility
- Fabrics are given lasting protection by the surface-active waterproofing

Contents	500 ml
Container	Hand spray
Smell/fragrance	Odourless

Continuation **Textile cleaner Liquid Clear**

Chemical basis	Butoxyethanol
pH value	5.0

Art. no. 0893 474 200

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Do not use on hot surfaces or in direct sunlight. Do not let it dry out. Protect from frost.

Plastic care

High-quality care wax for all outdoor plastic and rubber parts

- Outstanding colour restoration and a satiny shine
- Provides permanent care and protection against environmental influences
- Care wax

Contents	1 l
Smell/fragrance	Lemon
Chemical basis	Mineral oil

Art. no. 0893 477

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Deep cleaner for plastic

Universal application for cleaning and protecting all plastic parts for indoor and outdoor use

- Outstanding cleaning power and gentle protection in a single step
- Specially selected raw materials for optimum care
- Provides lasting protection against environmental influences
- Contains silicone

Smell/fragrance	Fresh
Chemical basis	Polydimethylsiloxane

Contents	Container	Art. no.	P. Qty.
0.5 l	Hand spray	0893 285	1/12
5 l	Canister	0893 285 5	1

Please consider the legal instruction at the beginning of this chapter.

Do not spray on operating elements (steering wheel, pedals), as there is a danger of slipping! Not suitable for glass or textiles.

Plastic care agent Vinyl care

High-quality plastic care for vehicle interiors and exteriors

- Outstanding colour restoration and a satiny shine
- Gentle on materials
- Protects and seals the surface
- Contains silicone
- AOX-free

Container	Canister
Smell/fragrance	Aromatic
Chemical basis	Hydrocarbon

Contents	Art. no.	P. Qty.
5 l	0893 477 05	1
20 l	0893 477 20	1

Please consider the legal instruction at the beginning of this chapter.

Do not use on hot surfaces, in direct sunlight or on tyre treads.

Cockpit cleaning and care spray

Provides outstanding cleaning power and gentle care in a single step.

- Cleaning and care in a single product
- Optimum care
- Anti-static effect
- Gentle spray mist
- Citrus scent

Contents	400 ml
Container	Aerosol can
Chemical basis	Mineral oil
Smell/fragrance	Lemon
Colour	Colourless
Min. flashing point	-90 °C
Density/conditions	0.72 g/cm ³ /at 20°C
Shelf life from production	36 Month
AOX-free	Yes
Silicone-free	Yes

Art. no. 0890 222 1

P. Qty.: 1/24

Please consider the legal instruction at the beginning of this chapter.

Do not spray on the windscreen and side windows. Air the vehicle interior briefly following application.

Leather cleaner

Special cleaner with a surfactant and solvent base for smooth leather and Alcantara

- Gently removes stubborn dirt
- Cleans and maintains the leather
- Suitable for all colours
- Foam application does not „saturate“ the leather
- Phosphate and silicone-free

Contents	500 ml
Container	Plastic bottle
Smell/fragrance	Pleasant
Chemical basis	Water tenside
pH value	10.2

Art. no. 0893 012 902

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Check the colour fastness/material compatibility in an inconspicuous spot before use. Not suitable for suede. After cleaning, treat with a leather care product (not for Alcantara surfaces!).

Interior cleaner

Special cleaning foam with anti-static additive for the entire vehicle interior

- Cleans all painted and plastic parts, glass surfaces and upholstery. Removes nicotine odours and leaves a pleasant fresh scent in the interior.
- The anti-static additive creates temporary anti-dust protection on the surface for longer lasting cleanliness in the vehicle interior.

Contents	0.5 l
Container	Aerosol can
Smell/fragrance	Peach
Chemical basis	2-propanol
pH value	9.5

Art. no. 0893 033

P. Qty.: 1/12/24

Please consider the legal instruction at the beginning of this chapter.

Stain remover

Easily removes tar, oil, grease and lubricant stains

- Solvent-based
- Does not leave dirty edges
- Neutral behaviour on metal

Contents	1 l
Container	Can
Chemical basis	Naphtha
Shelf life from production	24 Month

Art. no. 0890 21 100

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Combustible liquids, Category 2: skin irritation, Category 2; specific target organ toxicity – one-off exposure, Category 3: inhalation risk, Category 1: chronic aquatic toxicity, Category 2

Oil stain remover

Highly effective oil stain remover to loosen and bind oils and greases.

- Highly volatile cleaner for thorough and effective removal of various oil stains with penetrating action
- Biodegradable

Contents	1000 ml
Container	Can
Chemical basis	Acetic aether
Shelf life from production	24 Month

Art. no. 0890 610 555

P. Qty.: 1/15

Please consider the legal instruction at the beginning of this chapter.

Shake the oil stain remover vigorously as the binding material settles on the bottom and needs to be mixed with the liquid before use.

Cockpit care

Plastic interior care with fruity fragrance

- High-quality carnauba waxes and jojoba oil provide optimum care
- Gentle on materials
- Provides lasting protection against environmental influences
- Anti-static
- Contains no phosphates and no organic solvents.
- Separates quickly in waste water in line with German Ecological Standard Test B 5105.
- Biodegradable > 95%
- AOX-free and silicon-free

Smell/fragrance	Fruity
Colour	Beige
pH value	6.8
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes
Contents	500 ml
Container	Spray bottle

Art. no. 0893 473 1

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Vehicle cleaner Active Clean

Intensive foam cleaner for the entire vehicle interior

Micro-fine active foam (vacuum effect)

- Foam remains on the surface and actively draws out the dirt when the foam bubbles burst
- Outstanding dirt dissolving power
- Upholstery does not become wet, meaning drying times are shorter

Gentle on materials

Suitable for all surfaces in the vehicle interior. The pre-determined breaking points of the airbag are not affected.

Contents	500 ml
Container	Aerosol can
Smell/fragrance	Fruity
Chemical basis	Water, soap and glycol
pH value	7.7

Art. no. 0893 472

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Protect product from frost.

Waterproofing spray Universal

For water, oil and dirt-proofing of textile surfaces

- Excellent water repellency
- Prolonged service life for textiles
- Protection against stains, dirt, oils and fats

Contents	400 ml
Container	Aerosol can
Smell/fragrance	Ester-like
Chemical basis	Fluorocarbon resin
Shelf life from production	24 Month

Art. no. 0893 032 100

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Only use in a well-ventilated area. Only spray for a few seconds. Keep away from children. Contains solvents. Not suitable for highly polished leather and painted smooth leather. Test for material compatibility on an invisible area prior to application. Cover sensitive plastics and paints prior to application. Wipe excess material off non-textile surfaces.

Deodoriser

Neutralises unpleasant odours in textiles

- Suitable for virtually all textiles
- Odour molecules are not just masked as with air fresheners, but are completely eliminated naturally
- Uniform fine wetting of the entire surface without it becoming too wet
- AOX-free

Smell/fragrance	Perfumed
Chemical basis	Water, soap and glycol
pH value/conditions	7/at 20°C
Shelf life from production	24 Month

Contents	Container	Art. no.	P. Qty.
500 ml	Spray bottle	0893 139 20	1/12
5000 ml	Canister	0893 139 205	1

Please consider the legal instruction at the beginning of this chapter.

Preliminary testing required for textiles sensitive to water (e.g. silk). Not suitable for leather and suede.

Air conditioning disinfection Quick Fresh Active

For quick and effective removal of odours and bacteria in indoor and vehicle air conditioning systems

- Reduces unpleasant odours
- Disinfectant effect by antibacterial silver ions
- Long-lasting fresh scent

Chemical basis	Water and alcohol
Contents	100 ml
Weight of content	76 g
Smell/fragrance	Lemon
Colour	Transparent
Density	0.77 g/ml

Art. no. 0893 764 650

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Preliminary tests are essential before use, especially on light surfaces.

Take care when using biocidal products. Always read the label and product information before use.

Vehicle cleaner Vehicle interior cleaner

Environmentally friendly cleaning agent for the entire vehicle interior

- Biodegradable in accordance with the Detergent Regulation
- Powerful yet gentle cleaning effect

Contents	1 l
Container	Spray bottle
Smell/fragrance	Characteristic
Chemical basis	Nonionic tenside
pH value	11.2

Art. no. 0890 120

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Rubber care Rubber Fit

Silicone-free care for rubber seals

- The suppleness of the rubber parts is preserved, thus increasing the service life and preventing cracking
- Eliminates squeaking and creaking
- Resistant to spray and salt water

Contents	75 ml
Smell/fragrance	Characteristic
Chemical basis	Hydrocarbon

Art. no. 0893 012 8

P. Qty.: 1/24

Please consider the legal instruction at the beginning of this chapter.

Use of the product on acrylic glass (PMMA) may result in stress cracks.

Rubber care spray

Prevents door, bonnet and luggage compartment rubber seals from freezing in winter or becoming stuck due to ageing and heat

- Rubber components remain supple
- Freshens up colours
- Does not attack painted and chrome parts

Contents	300 ml
Smell/fragrance	Characteristic
Chemical basis	Mineral oil

Art. no. 0890 110

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Solvent-free leather care agent

Gentle cleaning and intensive care of smooth leather

- Special care emulsion of selected waxes and silicones for all kinds of smooth leather
- Cares for the leather and leaves behind an attractive, visually enhanced shine

Contents	500 ml
Smell/fragrance	Floral
Chemical basis	Wax emulsion, waterbased

Art. no. 0893 012 901

P. Qty.: 1/12

Pre-cleaner

Specially tailored cleaner for plastics, painted metal surfaces and glass parts

Excellent cleaning power with high degree of material compatibility

- Cleans contact surfaces thoroughly
- Does not attack paints and plastics

Short flash-off time

The cleaned parts can be processed further immediately

Contents	1 l
Smell/fragrance	Mild
Colour	Colourless
Density	0.717 g/cm ³
Min. flashing point	-21 °C
Shelf life from production	24 Month

Art. no. 0893 200 1

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

Combustible liquids, Category 2: skin irritation, Category 2; specific target organ toxicity – one-off exposure, Category 3: inhalation risk, Category 1: chronic aquatic toxicity, Category 2

Acetone cleaner

Special cleaner for unpainted metal surfaces and glass

- Greases, oils and other soiling are softened and removed quickly and effectively
- Dissolves various paint residues
- The cleaner leaves behind no residue on the material being cleaned

Smell/fragrance	Characteristic
Chemical basis	Acetone

Contents	Container	Shelf life from production	Art. no.	P. Qty.
0.25 l	Can	24 Month	0893 460	1
5 l	Canister	12 Month	0893 460 002	1

Please consider the legal instruction at the beginning of this chapter.

Paint finish assortment

113 pieces, in system case 8.4.2 for professional treatment of painted surfaces

Contents:

- 2 professional vehicle polishes (P10 + P30)
- 250 P2000 abrasive polishing discs (rip tape) used for removing trapped dust and fine surface defects
- 1 sanding block set (sanding block, soft interface, abrasive polishing disc moistener)
- 5 P2000 automotive finishing discs for matting surfaces
- 2 orange sanding pads, Ø 90 mm
- 1 green sanding pad, Ø 90 mm
- 1 pneumatic polishing machine with speed control
- 1 adhesive disc (rip tape), Ø 75 mm

ORSY

Number of pieces in assortment/set	265 PCS
------------------------------------	---------

Art. no. 5964 089 308

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

When using a dry polishing pad, apply a little more polish. Remove the polish residue with a microfibre cloth. Proceed in sections.

Polish set

6 pieces

Art. no. 0988 043 712

P. Qty.: 1

Fast grinding polish P10 Plus

Highly abrasive high-gloss polish for quickly removing surface defects in fresh repairs and fully hardened top coats

- Extremely high surface removal rate and unprecedented gloss level
- For conventional and scratchproof paint types
- Suitable for use on used and new paint surfaces
- Silicone-free

Colour	Green
--------	-------

Weight of content	Art. no.	P. Qty.
1 kg	0893 150 010	1
250 g	0893 150 012	1/15

Please consider the legal instruction at the beginning of this chapter.

Continuation **Fast grinding polish P10 Plus**

High-gloss polish P20 Plus

Medium-abrasive high-gloss polish for efficient paint preparation

- For conventional and scratchproof paint types
- Sanding grooves from a grain of P2000 can be easily removed
- Can be applied manually and by machine

Colour	Light yellow
--------	--------------

Weight of content	Art. no.	P. Qty.
1 kg	0893 150 020	1/6
250 g	0893 150 022	1/15

Please consider the legal instruction at the beginning of this chapter.

P - ONE STEP 3IN1 - grinding polish, finish polish and wax

Polish out grinding marks, reliably remove holograms and streaks, and protect the resulting high-gloss surface for a long time with just one all-round product.

- High removal
- Very high gloss level
- Long-lasting paint sealant with carnauba wax

Colour	Blue
--------	------

Weight of content	Art. no.	P. Qty.
1 kg	0893 150 060	1/6
250 g	0893 150 062	1/15

Please consider the legal instruction at the beginning of this chapter.

We recommend our blue or orange polishing pads for polishing.

Anti-hologram polish P30 Plus

High-gloss finish polish for permanently removing streaks and holograms on dark vehicle paints

- Unique powdered composition made from aluminium oxide
- Thick consistency
- Can be applied manually and by machine
- Silicone-free

Colour	Light grey (bright grey)
--------	--------------------------

Weight of content	Art. no.	P. Qty.
1 kg	0893 150 030	1
250 g	0893 150 032	1/15

Please consider the legal instruction at the beginning of this chapter.

Recommended pad:

„Orange“ or „Lambskin“ polishing pad

Clay Polish and Cleaner

Synthetic clay used for the removal of spray mist and other contaminants

- Gentle particle removal without grinding or re-polishing
- Deep-pore cleaning of all smooth surfaces
- Stays soft, does not become brittle
- Solvent-free and chemical-free

Product weight (per item)	263 g
Width	5 cm
Length	9 cm
Colour	Blue

Art. no. 0893 157 1

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Surface rust remover

For easy removal of surface rust on bodywork, sheet metal and steel, iron and cast metal parts.

- Contains effective acids, surface-active agents and surfactants
- pH value (10%): 1.3
- AOX-free and silicone-free

Contents	5 l
Colour	Transparent
Smell/fragrance	Characteristic
Chemical basis	Water and hydrochloric acid
Shelf life from production	24 Month

Art. no. 0890 130

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Recommendation: The treated areas should be protected against further corrosion by applying a primer or corrosion protection spray (art. no. 089315). Check materials such as plastics and rubber for compatibility.

Do not use in direct sunlight. Avoid direct heat.

Aluminium polish

For cleaning and polishing

- Polish paste
- Polishing additives with re-lubricating effect
- Low consumption

Weight of content	500 g
Colour	Dark grey

Art. no. 0893 121 301

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Premium carnauba wax LEGENDARY

The highest quality level with maximum carnauba wax content

- Brilliant mirror finish
- Maximum long-lasting protection

Contents	200 ml
Shelf life from production	24 Month

Art. no. 0893 014 200

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

We recommend using with our black polishing puck.

Polishing Pad Wave

Extremely fine and soft polishing pad with hook and loop fastener for the removal of micro-scratches and holograms.

Wave structure

- No splattering of the polish at high speeds
- Minimal heat generation combined with long service life

Colour	Black
Diameter	135 mm

Art. no. 0585 28 130

P. Qty.: 2

Polishing pads

Polishing pads in three different abrasive grades

- Maximum effectiveness with minimum wear
- Open-cell foam for a consistent removal rate
- More flexibility with each bodywork shape

Hardness degree	Colour	Diameter	Art. no.	P. Qty.
Extra hard	Green	90 mm	0585 025 090	4
Extra hard	Green	145 mm	0585 025 145	2

Cleaning pad Clay series

Efficient deep cleaning and perfect preparation of painted surfaces for the best polishing results

- Easily removes stubborn residue and dirt from painted surfaces that cannot be removed by conventional cleaning, producing a mirror-like finish.
- Especially gentle cleaning owing to very low heat development and avoidance of aggressive cleaning agents.

Colour	Black, Red
Diameter	150 mm

Art. no. 0585 300 150

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Sheep's wool polishing pad

100% pure new sheep's wool for creating perfect surfaces. Easy to apply/work in oils, waxes and polishes

- Achieve perfect and unique surface results.
- The sheep's wool pad absorbs the wax, oil or polish very well and works this perfectly into the floor.

Colour	Beige
Diameter	406 mm

Art. no. 0585 808 000

P. Qty.: 15

Polishing pad

Polishing sponge for large-surface polishing and cleaning of vehicle paints.

Open-pore, abrasive foam

Very well-suited to processing fast sanding polish and high-gloss polish in large-surface polishing work.

Sharp-edged

Allows machine processing of edges and hard-to-reach areas.

Colour	White
Diameter	200 mm

Art. no. 0585 200 30

P. Qty.: 5

Cleaning sponge Clay series

Efficient deep cleaning and perfect preparation of painted surfaces for the best polishing results

- Easily removes stubborn residue and dirt from painted surfaces that cannot be removed by conventional cleaning, producing a mirror-like finish.
- Especially gentle cleaning owing to very low heat development and avoidance of aggressive cleaning agents.

Colour	Black, Red
Length x width	110 x 70 mm

Art. no. 0585 300 110

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Cleaning glove Clay series

Efficient deep cleaning and perfect preparation of painted surfaces for the best polishing results

- Easily removes stubborn residue and dirt from painted surfaces that cannot be removed by conventional cleaning, producing a mirror-like finish.
- Especially gentle cleaning owing to very low heat development and avoidance of aggressive cleaning agents.

Colour	Black, Red
Length x width	210 x 140 mm

Art. no. 0585 300 210

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Lambskin Premium

For economical removal of scratched, dull and partially ground paint areas.

Lint-free result

Lambskin is highly suitable for use on dark paint.

Quickly visible working result

The thick skin structure ensures optimal removal rate.

Minimal heat generation combined with long service life

Due to highest-quality genuine lambskin.

Material	Lambswool
Colour	Black
Support-disc diameter	125 mm
Diameter	135 mm

Art. no. 0585 135

P. Qty.: 5

Do not rinse with water!

Simply brush away old paint and polish residues with the polishing pad cleaning brush after finishing the polishing work.

Lambskin, white

For professional polishing work on heavily stressed and weathered paint surfaces.

Universal use

Suitable for light and dark paint surfaces

Very good removal rate

Due to very fine skin structure

Minimal heat generation combined with long service life

Due to highest-quality genuine lambskin

Material	Lambswool
Colour	White

Support-disc diameter	Diameter	Art. no.	P. Qty.
80 mm	80 mm	0585 23 80	5
125 mm	135 mm	0585 235	5
150 mm	195 mm	0585 195	1

Do not rinse with water!

Simply brush away old paint and polish residues with the polishing pad cleaning brush after finishing the polishing work.

Microactive cloth Basic

Microactive cloth ideal for vehicle valeting and maintenance

Outstanding cleaning power

- When dry
Dust attraction through static effect
- When wet
Removal of coarse and greasy dirt

Loopless, protects against scratches

Material	Polyethylene fibre/polyamide microfibre
Length x width	40 x 40 cm
Coating weight per m ²	300 g
Colour	Green

Art. no. 0899 900 050

P. Qty.: 50

Please consider the legal instruction at the beginning of this chapter.

Microactive cloth Clean & Polish

Microfibre cloth for cleaning and polishing of smooth surfaces

- High-tech fibres for optimal cleaning of smooth surfaces
- Optimal cleaning and polishing results without chemical additives
- Streak and lint-free work

Material	70% polyester, 30% polyamide
Length x width	40 x 40 cm
Coating weight per m ²	170 g
Colour	Anthracite

Art. no. 0899 900 150

P. Qty.: 10

Please consider the legal instruction at the beginning of this chapter.

Must not be tumble-dried

Car and window chamois

Made from real sheepskin

- High water absorption capacity
- Lint-free
- Long life

Material	Sheepskin
Colour	Yellowish Chamois
Length x width	70 x 45 cm
Coating weight per m ²	80 g

Art. no. 0899 700 630

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Care information

Wash out the car and window chamois after each use to prolong its service life, but make sure that no washing agents that contain acid or dissolve grease are used. Wring out the cloth and spread it out to air-dry; do not place on radiators or in the sun.

Microactive cloth Duo

Microactive cloth with two different sides

- Low-pile side for cleaning all surfaces
- When dry: Binds dust by static charge
- When wet: Removes coarse and greasy dirt
- Stitch-free, protects against scratches

Material	70% polyester, 30% polyamide
Length x width	40 x 40 cm
Coating weight per m ²	360 g
Colour	Blue

Continuation **Microactive cloth Duo**

Art. no. 0899 900 138

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Microactive cloth Professional

Microactive cloth for professional maintenance cleaning and vehicle valeting.

- Extremely high cleaning power
- Cleans without using cleaning agents
- Extremely fine, strong fibres

Material	Polyethylene fibre/polyamide microfibre
Length x width	40 x 40 cm
Coating weight per m ²	300 g

Colour	Art. no.	P. Qty.
Blue	0899 900 131	3
Red	0899 900 132	3
Yellow	0899 900 133	3

Microactive cloth Gloss

Microactive cloth with dense fibre structure for deep gloss

- Extremely soft, velvety premium quality
- Can be used dry and damp
- Washable up to 60°C

Material	80% polyester, 20% polyamide
Length x width	40 x 40 cm
Coating weight per m ²	210 g
Colour	Blue

Art. no. 0899 900 139

P. Qty.: 3

XXL cleaning glove “Fuzzy”

Highly effective microfibre glove for deep-cleaning tasks in the automotive, caravan and household sectors

- Large cleaning surface for quick cleaning
- Ideal for people with allergies, as dust is not stirred up
- Long service life thanks to high-quality finish
- Glove is easy to clean

Material	Chenille microfibre
Colour	Light green
Length x width	23 x 18 cm

Art. no. 0899 710 005

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Hand-wash the glove to clean it or wash in the washing machine up to 60°C (with washing bag).

Windscreen cleaner Screenwash Plus

With anti-freeze for windscreen washer systems

Outstanding, improved cleaning performance

- Safely and effectively prevents windscreen and headlight cleaning systems from freezing
- Crystal-clear view despite winter contaminants such as road salt and oily road dirt

Gentle on materials

- Does not attack polycarbonate glass
- Gentle on paint and rubber

Chemical basis	Water and ethanol
Smell/fragrance	Lemon
Colour	Blue
Max. anti-freeze	-63 °C
Shelf life from production	24 Month

Contents	Container	Art. no.	P. Qty.
1 l	Plastic bottle	0892 332 840	1/12
5 l	Plastic canister	0892 332 850	1
30 l	Plastic canister	0892 332 855	1
60 l	Plastic canister	0892 332 860	2
200 l	Plastic barrel	0892 332 880	1

Please consider the legal instruction at the beginning of this chapter.

DN 60 tap

Plastic tap with DN 60 connection for 20-l plastic canister and 60-l plastic drum

Material	Plastic
Product weight (per item)	51.5 g

Art. no. 0891 302 03

P. Qty.: 1

Windscreen cleaner TopDos rapid windscreen cleaner

The integrated Top Dos dispensing unit enables precise dispensing (25 ml per dispensing process)

- Windscreen cleaning 1:100 high concentrate
- Prevents smearing
- Eliminates glare and greasy films
- Ensures a crystal clear view
- Removes stuck insects and other dirt
- Excellent material compatibility

Contents	250 ml
Ratio of ingredients	250 ml is sufficient for 25 l washing liquid
Container	Plastic bottle in a display box
Chemical basis	Anionic tenside
Smell/fragrance	Peach
Colour	Orange
pH value	6
Shelf life from production	24 Month

Art. no. 0892 333 250

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Windscreen cleaner Rapid windscreen cleaner

Highly-concentrated windscreen cleaner 1:100

- Prevents streaking
- Removes reflective and lubricant films
- Removes stuck-on insects and other soiling

Contents	5 l
Ratio of ingredients	1:100
Container	Canister
Chemical basis	Sodium sulphate
Smell/fragrance	Peach
Colour	Orange
pH value	6-7
Shelf life from production	24 Month

Continuation **Windscreen cleaner Rapid windscreen cleaner**

Art. no. 0892 333 5

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Windscreen cleaner Flash cleaner in display carton

Highly-concentrated windscreen cleaner 1:100. Small container for easy dosing depending on tank size.

- Prevents streaking
- Removes reflective and lubricant films
- Ensures crystal-clear visibility
- Removes stuck-on insects and other soiling

Contents	32 ml
Ratio of ingredients	32 ml is sufficient for 2,5 - 3 l washing liquid
Container	Plastic bottle in a display box
Chemical basis	Anionic tenside
Smell/fragrance	Peach
Colour	Orange
pH value	6-7
Shelf life from production	24 Month

Art. no. 0892 333

P. Qty.: 25/100

Please consider the legal instruction at the beginning of this chapter.

Super de-icer spray

Quickly and effectively removes ice and white frost

- Heavily iced windows are quickly and effectively cleared of ice and white frost
- Protects windows against icing up again
- Paints, rubber and plastics are not attacked

Colour	Blue
pH value	7.8
AOX-free	Yes
Silicone-free	Yes
Bio-degradable	Yes

Contents	Smell/fragrance	Art. no.	P. Qty.
400 ml	Lemon	0892 331 203	1/12
500 ml	Citrus	0892 331 201	1/12

Please consider the legal instruction at the beginning of this chapter.

Window seal

Rain-resistant, easy-to-use glass seal increases driving safety by improving visibility and extending service life of windscreen wipers

- Rain and water bead at approx. 70-80 km/h and roll off the window
- Dirt, insects and ice can be sustainably removed more easily
- Ultra-thin coating that is as hard as glass
- Suitable for all untreated glass surfaces on all types of vehicle
- Quick and easy application
- Silicone-free and AOX-free

Contents	20 ml
Container	Plastic bottle
Shelf life from production	18 Month

Art. no. 0893 012 414

P. Qty.: 12

Please consider the legal instruction at the beginning of this chapter.

The sealed window is immediately active. Wait at least one hour before cleaning the vehicle or using a car wash. It is recommended that gloves be worn during sealing work. Under extreme weather conditions, a fine droplet film may form on the windscreen, which resembles misting from the outside. It can be removed by switching on the hot-air blower and routing the hot air onto the windscreen. We recommend replacing the windscreen wipers with the window seal. Do not use on plastic, metal or paint. Cleaner and sealing residues must be completely removed from the bodywork. Do not use on hot surfaces. Store in a frost-free and dry location. Do not use abrasive, highly acidic or highly alkaline glass cleaners.

Caution: Not suitable for polycarbonate glass!

Paint spray Quattro

Versatile, satin-finished thick-coat lacquer spray with excellent covering and anti-rust properties.

- Corrosion protection, can also be applied to residual rust, excellent coverage, very easy to apply
- Outstanding adhesion to virtually all surfaces, high degree of elasticity, shock resistance and impact resistance
- Can be painted with virtually all commercially available paints

Contents	400 ml
Chemical basis	Alkyd resin
Gloss level	Satin matt

Colour	Art. no.	P. Qty.
Argentite grey MB 7354	0893 347 354	1/6
Optional	0893 330	12

Please consider the legal instruction at the beginning of this chapter.

Paint spray, special

Durable nitro-alkydal quality at a high technical level.

High-grade nitro-alkydal quality

- Easy to use
- Excellent spreading properties
- Fast drying
- Good coverage
- Can be painted over all common primers, filler products and paint types
- Quick-drying paint resin
- Does not contain heavy metals

Contents	400 ml
Chemical basis	Nitroalkydale
Gloss level	High gloss
Max. temperature resistance	80 °C

Colour	Art. no.	P. Qty.
Hammered silver	0893 351 187	1/6
Hammered gold	0893 351 873	1/6

Please consider the legal instruction at the beginning of this chapter.

Paint spray, high gloss

Durable nitro-alkydal quality at a high technical level.

- Can be coated with all common primers, filler products and paint types
- Quick-drying paint resin
- Formula does not contain heavy metals

Chemical basis	Nitroalkydale
Gloss level	High gloss
Max. temperature resistance	80 °C

Contents	Colour	Art. no.	P. Qty.
400 ml	Golden yellow RAL 1004	0893 361 004	1/6

Please consider the legal instruction at the beginning of this chapter.

- 400-ml can with round nozzle
- 600-ml can with fan nozzle

1-component universal primer

High-filling 1-component acidic primer with good flowing properties and outstanding adhesion on iron, steel, aluminium and zinc.

- Short drying time, high filling power
- Active corrosion protection

Available colours:

- FC 0001 = red (only 1 kg and 5 kg container)
- FC 0002 = beige
- FC 0003 = dark grey

Chemical basis	Polyvinyl butyral
----------------	-------------------

Weight of content	Available colours	Art. no.	P. Qty.
1 kg	FC 0001, FC 0002, FC 0003	5866 100 101	1
5 kg	FC 0001, FC 0002, FC 0003	5866 100 105	1
25 kg	FC 0002, FC 0003	5866 100 125	1

Please consider the legal instruction at the beginning of this chapter.

Protect from frost. Check the colour prior to application. The surface must have the correct pre-treatment depending on the surface. The use of a suitable pre-cleaner or a pre-coat is recommended in special cases. For further information, please refer to the technical data sheet.

Permissible maximum VOC content of product category 2 (e) of the German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV): 780 g/l

Max. VOC content of 1-component universal primer: 734 g/l.

Available colours:

- FC 0001 = red (only 1 kg and 5 kg container)
- FC 0002 = beige
- FC 0003 = dark grey

Important!

Only enter the colour code (e.g. FC 0006). Information such as the RAL number or text such as „RAL 5010, please“ is recognised by the system as incorrect.

1-component synthetic resin primer

High-coverage synthetic resin thick-film primer with excellent application properties and active corrosion protection.

- Active protection against corrosion thanks to zinc phosphate
- Short drying time, high filling power
- High degree of stability under load
- Application in thick coats
- Suitable for electrostatic application
- Chromate and lead-free
- Solids content of base material: 73%
- For indoor and outdoor use

Chemical basis	Alkyd resin
Available colours	FC 0004, FC 0005

Weight of content	Art. no.	P. Qty.
5 kg	5866 101 105	1
25 kg	5866 101 125	1

Please consider the legal instruction at the beginning of this chapter.

The surface must have the correct pre-treatment depending on the surface.

Permissible maximum VOC content of product category 2 (e) of the German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV): 540 g/l

Max. VOC content of 1-component synthetic resin primer: 496 g/l

1-component synthetic resin paint

Fast-drying, highly weather-resistant synthetic resin lacquer for machinery and structures.

- Short drying time
- Highly resistant to UV and weathering
- Excellent coverage
- High degree of stability under load
- Excellent application, high final hardness, stable gloss
- Resistant to temporary exposure to fuels
- Solids content of base material in percent: 53.6

Continuation 1-component synthetic resin paint

Chemical basis	Alkyd resin
Gloss level	Glossy

Weight of content	Colour	Art. no.	P. Qty.
1 kg	Colour Category 1	5866 300 101	1
1 kg	Colour Category 2	5866 300 201	1
5 kg	Colour Category 1	5866 300 105	1
5 kg	Colour Category 2	5866 300 205	1

Please consider the legal instruction at the beginning of this chapter.

Protect from frost. Check the colour prior to application. The surface must have the correct pre-treatment depending on the surface. The use of a suitable pre-cleaner or a pre-coat is recommended in special cases. For further information, please refer to the technical data sheet.

Specify the colour with RAL or original colour number in item-related text. Your order cannot be processed without this information.

In accordance with the German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV), this product may not be used for repairing vehicle paintwork or for coating structures, their components or decorative components.

1-component container lacquer

Weather-resistant, single-layer lacquer with outstanding corrosion protection properties and high printing capacity

- High degree of resistance to UV and weathering
- Resistant to temporary exposure to fuels
- Excellent coverage
- Excellent anti-corrosion properties
- Good rolling and brushing properties
- Suitable for electrostatic application
- High degree of elasticity

Chemical basis	Alkyd resin
Gloss level	Semi-matt

Weight of content	Colour	Art. no.	P. Qty.
5 kg	Colour Category 1	5866 301 105	1
5 kg	Colour Category 2	5866 301 205	1
25 kg	Colour Category 1	5866 301 125	1
25 kg	Colour Category 2	5866 301 225	1

Please consider the legal instruction at the beginning of this chapter.

Protect from frost. Check the colour prior to application. The surface must have the correct pre-treatment depending on the surface. The use of a suitable pre-cleaner or a pre-coat is recommended in special cases. For further information, please refer to the technical data sheet.

In accordance with the German Ordinance on Solvent-Based Paints and Lacquers dated 16. 12.2004, this product may not be used for repairing vehicle paintwork or for coating structures, their components or decorative components.

For accelerated drying and increased resistance, hardener thinner, art. no. 5866501101 can be used instead of thinner.

1-component thick-film lacquer

Primer, corrosion protection and lacquer in a single product.

- Excellent corrosion protection properties
- Outstanding covering and filling power
- Quick drying

Chemical basis	Alkyd resin
----------------	-------------

Weight of content	Colour	Gloss level	Art. no.	P. Qty.
1 kg	Colour Category 1	Satin matt	5866 203 101	1

25 kg	Colour Category 2	Satin matt	5866 203 225	1

Please consider the legal instruction at the beginning of this chapter.

Hardener thinner

For accelerated drying of 1-component synthetic resin lacquer, 1-component container lacquer and 1-component thick coat lacquer

Contents	1 l
----------	-----

Art. no. 5866 501 101

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

1-component painting lacquer AQUA

Alkyd resin lacquer that can be diluted with water for high-quality lacquering of primed metal surfaces and wooden components for both indoors and outdoors.

- Can be diluted with water, virtually odourless, highly adhesive
- Weather-resistant in accordance with VOB Part C, DIN 18 363
- Highly resistant to UV and weathering
- Non-sticking, non-fading, breathable
- Resistant to temporary exposure to fuels
- Solids content of base material: 46.2%

Weight of content	3 kg
Chemical basis	Alkyd resin combination
Gloss level	Satin matt

Colour	Art. no.	P. Qty.
Colour Category 1	5866 302 103	1
Colour Category 2	5866 302 203	1

Please consider the legal instruction at the beginning of this chapter.

Protect from frost. Check the colour prior to application. The surface must have the correct pre-treatment depending on the surface. The use of a suitable pre-cleaner or a pre-coat is recommended in special cases. For further information, please refer to the technical data sheet.

Permissible maximum VOC content of product category 1 (d) of the German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV): 150 g/l

Max. VOC content of 1-component painting lacquer, colour category 1: 79 g/l.

Important!

Specify the colour with RAL or original colour number in item-related text! Your order cannot be processed without this information!

Primer 2-component universal primer

Primer with excellent adhesion and with good filling properties (up to 100 µm) and outstanding protection against corrosion

- Fast-drying primer coating with excellent filling properties
- Excellent corrosion protection
- Wet-on-wet application possible
- Excellent adhesion on iron, steel, GFRP, aluminium and galvanised surfaces
- Can be painted over with all commercially available one-component and two-component paints (except solvent-based double-layer base paints)
- Permissible maximum VOC content: 540 g/l of product category 2 (e) of the German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV). Max. VOC content: 517 g/l
- Solids content of base material in %: 70.2
- Can be painted with all commercially available paints
- Cannot be covered
- Available colours: FC 0006 = light grey

Chemical basis	Two-component acrylic
Available colours	FC 0006

Weight of content	Art. no.	P. Qty.
5 kg	5866 103 105	1
10 kg	5866 103 110	1

Please consider the legal instruction at the beginning of this chapter.

The surface must have the correct pre-treatment depending on the surface.

Important: Specify the colour code in item-related text! E.g.: FC 0006 for light grey

Not suitable for powder coatings

Primer 2-component epoxy primer

Primer that is resistant to chemicals with excellent adhesion and outstanding corrosion protection properties

- High protection against corrosion
- Suitable for electrostatic application
- Excellent chemical and mechanical resistance
- Can be used for insulation purposes on thermoplastic surfaces
- Permissible maximum VOC content: 540 g/l of product category 2 (e) of the German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV). Max. VOC content: 565 g/l
- Solids content of base material in %: 69.8
- Available colours: FC 0006 = light grey

Continuation **Primer 2-component epoxy primer**

Weight of content	5 kg
Chemical basis	2-methoxy-1-methylethyl acetate
Available colours	FC 0006

Art. no. 5866 104 105

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

The surface must have the correct pre-treatment depending on the surface.

Only enter the colour code (e.g. FC 0006). Information such as the RAL number or text such as „RAL 5010, please“ is recognised by the system as incorrect.

Not suitable for powder coatings (temperatures too high)

Acrylic filler 2K-HS

Fast-drying, high-solid acrylic filler with outstanding stability for high coat thicknesses (up to 300 µm).

- Outstanding stability (no drop-in)
- Dries very quickly
- Excellent wet-on-wet application (no intermediate sanding)
- High coat thickness
- Excellent to sand
- High degree of rust protection thanks to anti-corrosive pigments
- Solids content of base material: 73.4%
- Can be painted with all commercially available top-coat paint systems
- Cannot be covered

Contents	4 l
Can be varnished after	5 h

Art. no. 5866 102 104

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

The surface must have the correct pre-treatment depending on the surface.

Only enter the colour code (e.g. FC 0006). Information such as the RAL number or text such as „RAL 5010, please“ is recognised by the system as incorrect.

Permissible maximum VOC content of product category 2 (e) of the German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV): 540 g/l.

Max. VOC content: 488 g/l.

2-component primer hardener

For 2C-HS filler, 2C universal primer

Density/conditions	0.973 g/cm ³ /at 20 °C
Shelf life from production/conditions	12 Month/at 20 °C

Contents	Weight of content	Art. no.	P. Qty.
1 l	1080 g	5866 401 101	1
5 l	5248 g	5866 401 105	1

Please consider the legal instruction at the beginning of this chapter.

2-component HS top coat

High-solid HS acrylic paint with high degree of resistance to UV and weathering.

- Quick-drying
- Highly scratch, shock and impact-resistant
- Excellent resistance to solvents, petrol, grease and weakly-concentrated acids and bases

Chemical basis	Polyurethane acrylic
----------------	----------------------

Contents	Colour	Gloss level	Art. no.	P. Qty.
1 l	Colour Category 1	Glossy	5866 202 101	1
1 l	Colour Category 2	Glossy	5866 202 201	1
3 l	Colour Category 1	Glossy	5866 202 103	1

3 l	Colour Category 2	Glossy	5866 202 203	1
3 l	Colour Category 2	Satin matt	5866 202 204	1

Please consider the legal instruction at the beginning of this chapter.

Protect from frost. Check the colour prior to application. The surface must have the correct pre-treatment depending on the surface. The use of a suitable pre-cleaner or a pre-coat is recommended in special cases. For further information, please refer to the technical data sheet.

Permissible maximum VOC content of product category 2 (e) of the German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV.): 420 g/l.

Max. VOC content of 2-component HS top coat: 417 g/l.

Important!

Specify the colour with RAL or original colour number in item-related text! Your order cannot be processed without this information.

2-component thick-film lacquer

Primer, corrosion protection and top-coat in a single product.

- Long processing time, high coat thickness
- Excellent corrosion protection properties
- Highly resistant to UV and weathering
- High degree of shock and impact resistance
- Excellent water resistance, resistant to solvents
- Solids content of base material: 74.8%

Weight of content	5 kg
Chemical basis	Polyurethane acrylic

Colour	Gloss level	Art. no.	P. Qty.
Colour Category 1	Matt	5866 204 107	1

Colour Category 2	Satin matt	5866 204 205	1
Colour Category 2	Semi-matt	5866 204 206	1

Please consider the legal instruction at the beginning of this chapter.

Fire behaviour classified in accordance with DIN EN 13501-1:2010-01

- Fire behaviour B
- Smoke development s1
- Flaming droplets d0

Protect from frost. Check the colour prior to application. The surface must have the correct pre-treatment depending on the surface. The use of a suitable pre-cleaner or a pre-coat is recommended in special cases. For further information, please refer to the technical data sheet.

Permissible maximum VOC content of product category 2 (d) of the German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV.) : 420 g/l.

Max. VOC content of 2-component thick-film lacquer: 420 g/l.

Important!

Specify the colour with RAL or original colour number in item-related text! Your order cannot be processed without this information!

Clear varnish 2-component Rapid

Clear varnish for permanent sealing of touched-up surfaces and newly painted small parts

- Very quick-drying, good running two-component clear varnish with excellent resistance to weathering, chemicals and petrol
- High output rate
- Quick to dry
- Constant atomisation pressure until completely empty
- Excellent resistance to wear and scratches
- Ideally suited for spot repair work

Chemical basis	Two-component resin
Contents	250 ml

Art. no. 5867 000 124

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Processing time following activation: max. 14 hours. Turn the can upside down and spray until the valve is empty after use.

2-component HS clear varnish VOC

Top-quality, high-solid acrylic clear varnish for complete and partial painting of passenger cars and commercial vehicles.

- Brilliant clear varnish condition, optimum application
- Perfect polishing immediately after forced drying
- VOC-compliant high-solid acrylic varnish
- High degree of resistance to all weather influences as well as chemical and mechanical stresses
- Also suitable as protective varnish for neon colours (daylight luminous paints)

Chemical basis	Two-component acrylic
Gloss level	High gloss

Contents	Art. no.	P. Qty.
1 l	5866 200 101	1
5 l	5866 200 105	1

Please consider the legal instruction at the beginning of this chapter.

Permissible maximum VOC content of product category 2 (d) of the German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV): 420 g/l.

Max. VOC content of 2-component HS clear varnish VOC: 420 g/l.

2-component HS hardener for top coats

Perfectly suited for use with 2-component HS acrylic paint, 2-component clear varnish and 2-component thick coat lacquer.

- Suitable for partial and full paint

Chemical basis	Polyisocyanate
Density/conditions	1.031 g/cm ³ /at 20 °C

Contents	Art. no.	P. Qty.
1 l	5866 400 101	1
5 l	5866 400 105	1

Please consider the legal instruction at the beginning of this chapter.

Acrylic thinner

For 2-component acrylic products and 1-component thick-film lacquers

- To dilute or to adjust the viscosity of 2-component top coats and 2-component clear varnishes for painting.

Contents	5 l
Container	Tinplate canister

Art. no. 0823 400 0

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Universal thinner

For almost all solvent-based paint and primer materials
For adjusting the viscosity of paint products

Contents	Container	Art. no.	P. Qty.
5 l	Plastic canister	0823 440 5	1
30 l	Tinplate canister	0823 440 30	1

Please consider the legal instruction at the beginning of this chapter.

Clear varnish

Overpainting

The clear varnish means you can paint over untreated wood surfaces.

Compatibility

The clear varnish is compatible with all AC and NC varnishes.

Speed

The varnish dries in a very short time.

Contents	400 ml
----------	--------

Continuation **Clear varnish**

Gloss level	Colour	Art. no.	P. Qty.
High gloss	Transparent, high gloss	0893 188 1	1/6
Semi-matt	Transparent, silk matt	0893 188	1/6

Please consider the legal instruction at the beginning of this chapter.

Not suitable for synthetic resin varnish.

Clear varnish

- Anti-fogging
- Quick-drying
- Wide range of applications
- Makes minor surface damage such as scratches, scrapes and similar virtually invisible

Contents	400 ml
----------	--------

Gloss level	Colour	Art. no.	P. Qty.
Matt	Transparent, matt	0893 188 2	1/6
Satin matt	Transparent, silk matt	0893 188 3	1/6

Please consider the legal instruction at the beginning of this chapter.

Filter screen

With colour-coded system for simple visual identification of mesh size.

Colour	Mesh size	Art. no.	P. Qty.
Blue	125 µm	0899 700 111	250
Orange	260 µm	0899 700 100	250
Yellow	190 µm	0899 700 110	100

Please consider the legal instruction at the beginning of this chapter.

Dust binder cloth

For binding even the finest dust before painting work.

For universal use

Slightly coarser mesh fabric with soft, harmless waterproofing

- Reliable dust absorption and binding

Silicone-free and wax-free

Unlimited shelf life as does not dry out

Backing material	Gauze from rayon thread
Type of impregnation	Non-drying alkyd resin
Colour	White
Length x width	80 x 50 cm

Art. no. 0899 700 001

P. Qty.: 5

Please consider the legal instruction at the beginning of this chapter.

Filler VAKU 20

Fine filler with high elasticity for sealing pores and for repairing small scratches, grooves and uneven surfaces

- Precisely matched combinations of fillers and resins
- Quick-drying
- Easy to sand
- Brilliant white pigmentation
- Temperature-resistant up to 80°C

Chemical basis	Polyester resin
Colour	White
Shelf life from production	12 Month

Weight of content	Art. no.	P. Qty.
970 g	0892 602 01	1/6
1960 g	0892 602 02	1/4

Please consider the legal instruction at the beginning of this chapter.

Tip: Before the final coating, skim the repaired spot with 1-component or 2-component universal primer, HS filler or Rust Stop Quattro (to eliminate the risk of visible repair edges or gloss reduction)

Maximum permissible VOC content of VAKU 20: 250 g/l of product category 2(b). Max. VOC content in accordance with German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV): 2 g/l

Filler VAKU 30

Universal filler with outstanding properties. Can be used as knifing and fine filler.

- No breakaway in edges with fine sanding
- Easy to sand, minimal dust build-up
- High filling power and a high degree of stability under load

Chemical basis	Polyester resin
Colour	Beige
Shelf life from production	12 Month

Weight of content	Art. no.	P. Qty.
900 g	0892 603 01	1/6
1960 g	0892 603 02	1/4
2640 g	0892 603 03	1/4

Please consider the legal instruction at the beginning of this chapter.

Tip 1

For optimum corrosion protection and reliable adhesion, pre-prime area to be filled using two-component Multi-Fill (do not use one-component primer, as this can cause loss of adhesion) prior to application of filler

Tip 2

Less is more. For pore-free application, it is important to apply the filler in several thin layers.

Maximum permissible VOC content of VAKU 30: 250 g/l of product category 2(b). Max. VOC content in accordance with German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV): 0 g/

Do not use on heavily weathered surfaces.

Filler VAKU 40

Filler for filling and levelling deep uneven surfaces and scratches

- Extremely easy to sand and minimal dust build-up
- Quick drying
- High filling power and a high degree of stability under load
- Heat-resistant up to 80°C

Chemical basis	Polyester
Colour	Light beige
Weight of content	1760 g
Shelf life from production	12 Month

Art. no. 0892 604 02

P. Qty.: 1/4

Please consider the legal instruction at the beginning of this chapter.

Maximum permissible VOC content of VAKU 40: 250 g/l of product category 2(b). Max. VOC content in accordance with German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV): 0 g/l

Filler VAKU 50

Elastic contour filler, specifically for use on paintable plastic parts

- High degree of elasticity
- Excellent adhesion
- Short drying time
- Easy to sand
- Can also be used on other material substrates
- Temperature-resistant up to 80°C

Contents	590 ml
Chemical basis	Polyester resin
Colour	Anthracite
Weight of content	970 g
Shelf life from production	12 Month

Art. no. 0892 605 01

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Tip: Preliminary tests are recommended due to the broad range of mixed plastics! Pre-treatment with a 1-component plastic primer is advisable to ensure optimum adhesion.

Not suitable for repairing breakage points.

To prevent possible complaints, always ensure the correct dosing ratio between the filler and hardener.

Filler VAKU 60

Polyester resin-based TIN-Metallic filler with aluminium pigmentation for vehicle construction and vehicle repairs

- High-quality filler and resin combinations enable a non-porous, closed filling of recesses and uneven surfaces
- Low dust build-up during sanding
- Aluminium pigmentation ensures an extremely high degree of strength in conjunction with metallic surfaces

Contents	1282.1 ml
Chemical basis	Polyester resin
Colour	Anthracite, metallic
Weight of content	1760 g
Shelf life from production	12 Month

Art. no. 0892 606 02

P. Qty.: 1/4

Please consider the legal instruction at the beginning of this chapter.

- Fillers are sensitive to drying quickly
- Caution! – Risk of cracking above 80°C
- Particular caution should be exercised when using infra-red radiators
- Maximum permissible VOC content of VAKU 60: 250 g/l of product category 2(b). Max. VOC content in accordance with German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV): 14 g/l

Filler VAKU 70

Glass fibre reinforcement filler for bridging cracks, holes and for repairing glass fibre reinforced plastics.

- Balanced proportion of glass fibres
- Excellent adhesion and stability
- Quick to harden
- Temperature-resistant up to 80°C

Contents	1120.8 ml
Chemical basis	Polyester resin
Colour	Green
Weight of content	1760 g
Shelf life from production	12 Month

Art. no. 0892 607 02

P. Qty.: 1/4

Please consider the legal instruction at the beginning of this chapter.

Tip: Can be coated with VAKU 20, VAKU 30 and VAKU 40 filler without sanding in between coats.

To prevent possible complaints, always ensure the correct dosing ratio between the filler and hardener.

Repair resin VAKU 80

Laminating resin for repairing larger holes and damage to GFRP parts in conjunction with glass fibre mats and fabric

Balanced resin mixture

Excellent application properties

Special lid/outlet combination

- User friendly
- Easy to empty down to the last drop

Contents	869.6 ml
Chemical basis	Polyester resin
Colour	Yellowish
Weight of content	970 g
Shelf life from production	12 Month

Art. no. 0892 608 01

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

- When laminating in conjunction with VAKU 90 glass fibre mat, ensure bubble-free application.
- Apply VAKU 80 wet-on-wet in several steps.
- Maximum permissible VOC content of VAKU 80: 250 g/l of product category 2(b). Max. VOC content in accordance with German Ordinance on Solvent-Based Paints and Lacquers (ChemVOC FarbV): 0 g/l

VAKU acrylic filler

Ready-to-use, 1-component water-based filler

Ready to apply

- Fast and easy to apply
- Saves time
- No hardener required
- Can be painted and sanded
- Good adhesion and load-bearing capacity

Contents	400 ml
Chemical basis	Acrylic resin
Colour	White
Weight of content	720 g
Shelf life from production	12 Month

Art. no. 0892 600 21

P. Qty.: 1/12

Please consider the legal instruction at the beginning of this chapter.

For indoor use only. When sanding, you should wear a fine-dust mask. Store VAKU acrylic filler in a cool, but frost-free place. Do not expose to direct sunlight. Unopened, it can be stored for 1 year.

Hardener for filler

Putty hardener for our polyester putty VAKU 20-
VAKU 80

Weight of content	40 g
Colour	Red
Smell/fragrance	Characteristic
Max. temperature resistance	80 °C
pH value	Slightly acidic

Art. no. 0892 600 004

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Touch-up paint Spot Finisher

Touch-up paint for homogeneous painting transitions in the edge zones

- Excellent dissolving capacity
- Glossy when dry
- Smooth edges
- Ideal for repair painting and spot repairs

Contents	400 ml
Colour	Transparent

Art. no. 0893 345

P. Qty.: 1/6

Please consider the legal instruction at the beginning of this chapter.

Turn the can upside down after use and spray until the nozzle is empty.

02

CONNECTION ELEMENTS

ASSY® 4 CSMP universal screw Steel zinc plated partial thread countersunk milling pocket head

Universal partial-thread screw for fast, gap-free fastening of wood-wood connections in furniture construction, interior fitting or wood construction in indoor dry or sheltered areas

- Ideal power transmission thanks to RW drive
- Significant reduction in the amount of force required when screwing in the screw
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw
- High strength values and ductility

ETA-11/0190 approved

ETA-11/0190 approved

- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Use the Würth timber construction software for dimensioning of ASSY screws from a diameter of 5 mm
- Do not use the screw in applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas. If used outdoors and in rooms that are constantly exposed to high humidity, please use ASSY 4 A2 or A4 stainless steel screws and, if atmosphere contains chlorine, HCR stainless steel screws
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® 4 CSMP universal screw collated Steel zinc plated partial thread countersunk milling pocket head

Universal collated partial-thread screw for gap-free fastening, without pre-drilling, of wood-wood connections in interior construction, window installation or wood construction in indoor dry or wet areas

- Ideal power transmission thanks to RW drive
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw

Internal drive	RW20
Material	Hardened steel
RoHS-compliant	Yes

ASSY® 4 CSMP ZINi timber screw Steel zinc-nickel partial thread countersunk milling pocket head

Universal partial-thread screw for fast, fastening of wood-wood connections (spruce) with increased risk of corrosion in wood construction. Suitable for dry or sheltered areas

- Ideal power transmission thanks to RW drive
- Significant reduction in the amount of force required when screwing in the screw
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw
- High strength values and ductility

For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® 4 A2 BP slate screw A2 stainless steel plain full thread back panel head

Full-thread screw made of high-quality austenitic A2 stainless steel with large flat washer head for fixing roof slates or thin metal sheets in the food industry in wood in outdoor areas exposed to the elements

- Ideal power transmission thanks to RW drive
- Powerful connection of e.g. thin fibreboards for furniture back panels
- Higher breaking torque
- Gentle thread start ensures optimised positioning and biting of the screw
- Stainless mounting for accessible wood connections in outdoor areas exposed to weathering

- Austenitic stainless steel is characterised by a high degree of corrosion resistance against aggressive industrial air, sea air, tap water, river water, mine water and salt water, as well as woods containing tannic acid. It is resistant to acid to a certain extent and not suitable for atmospheres containing chlorine gas
- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Use the Würth timber construction software for dimensioning of ASSY screws from a diameter of 5 mm
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® 4 BP rear panel screw Steel zinc plated full thread back panel head

Full-thread screw with large back panel head for mounting thin back panel plates, e.g. hard fibre into the side of the panel edge of units in a dry inner or sheltered areas

- Ideal power transmission thanks to RW drive
- Powerful connection of e.g. thin fibreboards for furniture back panels
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw

Material	Hardened steel
Surface	Zinc plated

ASSY® 4 A2 CS universal screw A2 stainless steel plain partial thread countersunk head

Partial-thread screw made of high-quality austenitic A2 stainless steel with countersunk head for universal wood-wood fastening in outdoor areas exposed to the elements

- Ideal power transmission thanks to RW drive
- Form-fitting connection to metal fittings or in wooden products with high bulk density
- Higher breaking torque
- Gentle thread start ensures optimised positioning and biting of the screw
- Stainless mounting for accessible wood connections in outdoor areas exposed to weathering

Continuation **ASSY® 4 A2 CS universal screw A2 stainless steel plain partial thread countersunk head**

- Austenitic stainless steel is characterised by a high degree of corrosion resistance against aggressive industrial air, sea air, tap water, river water, mine water and salt water, as well as woods containing tannic acid. It is resistant to acid to a certain extent and not suitable for atmospheres containing chlorine gas
- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Use the Würth timber construction software for dimensioning of ASSY screws from a diameter of 5 mm
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® 4 A2 CS fittings screw A2 stainless steel plain full thread countersunk head

Full-thread screw made of high-quality austenitic A2 stainless steel with countersunk head for fixing metal profiles or fittings in wood in outdoor areas exposed to the elements or interior applications constantly exposed to corrosion

- Ideal power transmission thanks to RW drive
- Form-fitting connection to metal fittings or in wooden products with high bulk density
- Higher breaking torque
- Gentle thread start ensures optimised positioning and biting of the screw
- Stainless mounting for accessible wood connections in outdoor areas exposed to weathering

ASSY® 4 CS MDF fittings screw Steel zinc-plated full thread countersunk head

Special full-thread screw with countersunk head for fastening fittings or cabinet connectors in highly compressed fibreboards, e.g. MDF

- Ideal power transmission thanks to RW drive
- Form-fitting connection to metal fittings or in wooden products with high bulk density
- Maximum reliability of the screw connection due to asymmetrical single thread
- Ideal for friction-free screw fitting in plastic, such as in anchors or in homogeneous highly compressed wooden materials

- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Use the Würth timber construction software for dimensioning of ASSY screws from a diameter of 5 mm
- Do not use the screw in applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas. If used outdoors and in rooms that are constantly exposed to high humidity, please use ASSY 4 A2 or A4 stainless steel screws and, if atmosphere contains chlorine, HCR stainless steel screws

ASSY® 4 CS RS roller-sorted fittings screw Steel zinc plated full thread countersunk head

Roller-sorted, full-thread screw with countersunk head for serial or machine fastening of fittings or cabinet connectors in wood or wooden plates in indoor dry or wet areas

- Ideal power transmission thanks to RW drive
- Form-fitting connection to metal fittings or in wooden products with high bulk density
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw

ASSY® 4 CS universal screw collated Steel zinc plated full thread countersunk head

Universal, full-thread screw with countersunk head for serial fixing of particleboard flooring or substructures on the floor or façade in indoor dry or wet areas

- Ideal power transmission thanks to RW drive
- Form-fitting connection to metal fittings or in wooden products with high bulk density
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw
- High strength values and ductility

- Austenitic stainless steel is characterised by a high degree of corrosion resistance against aggressive industrial air, sea air, tap water, river water, mine water and salt water, as well as woods containing tannic acid. It is resistant to acid to a certain extent and not suitable for atmospheres containing chlorine gas
- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Use the Würth timber construction software for dimensioning of ASSY screws from a diameter of 5 mm
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® 4 CSMR sports floor screw Steel zinc plated full thread countersunk milling head

Special collated full-thread screw with countersunk head with milling pockets for series fastening of particleboard flooring in indoor dry or wet areas

- Ideal power transmission thanks to RW drive
- Easy countersinking in hardwood/softwood with high knot content as well as hard wood fibreboards
- No over-tightening or stripping with high feed performance
- Ideal for friction-free screw fitting in plastic, such as in dowels or in homogeneous highly compressed wooden materials

Nominal diameter (d)	4 mm

- Do not use the screw in applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas. If used outdoors and in rooms that are constantly exposed to high humidity, please use ASSY 4 A2 or A4 stainless steel screws and, if atmosphere contains chlorine, HCR stainless steel screws
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® 4 FBS CUT RCS window construction screw Steel zinc plated full thread raised countersunk head

Special full-thread screw with raised countersunk head and restraining ribs for gentle attachment of window fittings in hardwoods in indoor dry or sheltered areas

- Ideal power transmission thanks to RW drive
- Visually appealing connections in window construction
- No over-tightening or stripping with high feed performance
- Easy recessing and quick biting of the screw in hardwoods

Material	Hardened steel
Surface	Zinc plated
RoHS-compliant	Yes
Head diameter (d _h)	7.2 mm
Internal drive	RW20

ASSY® 4 FBS RCS RS roller-sorted window construction screw

Steel zinc plated full thread raised countersunk head

Roller-sorted full-thread screw with raised countersunk head and restraining ribs for gentle attachment of window fittings in wood in indoor dry or sheltered areas

- Ideal power transmission thanks to RW drive
- Visually appealing connections in window construction
- Less tendency of the wood to split and very few blow-outs

ASSY® 4 HCR 1.4529 CS swimming pool screw Stainless steel highly corrosion resistant 1.4529 plain partial thread countersunk head

High-quality partial-thread screw made of high-quality austenitic HCR stainless steel 1.4529 with countersunk head for wood-wood fastening in areas constantly exposed to corrosion, swimming pool area (corrosion resistance class V)

- Ideal power transmission thanks to RW drive
- Form-fitting connection to metal fittings or in wooden products with high bulk density
- Higher breaking torque
- Gentle thread start ensures optimised positioning and biting of the screw
- Suitable for extremely chlorine-laden areas, with simultaneous SO₂-, exposure to chlorine gas and high temperatures

Material	High corrosion-resistant steel, 1.4529 X1NiCrMoCuN25-20-7

- ASSY screws are approved for quasi-static loads
- For optimum use of the screw, the right-size RW bit must be used
- Partial-thread screws are ideal for connecting wooden components. To achieve optimum assembly of the components, the components to be fixed must not be thicker than the length of the shank
- To avoid contact corrosion that can occur between two different metals in direct contact. The noble metal promotes, in conjunction with e.g. water or normal humidity, corrosion of the base metal. It is generally recommended that the product with the smaller surface area, e.g. the screw, be made of the noble metal. A shielding non-conductive layer between the metals is also recommended

ASSY® 4 HCR 1.4539 CS stainless steel screw Stainless steel highly corrosion resistant 1.4539 plain partial thread countersunk head

High-quality partial-thread screw made of high-quality austenitic HCR stainless steel 1.4539 with countersunk head for wood-wood fastening in areas severely exposed to corrosion (corrosion resistance class IV)

- Ideal power transmission thanks to RW drive
- Form-fitting connection to metal fittings or in wooden products with high bulk density
- Higher breaking torque
- Gentle thread start ensures optimised positioning and biting of the screw
- Suitable for high chloride or SO₂-contaminated areas with simultaneous exposure to splash water or fog

Material	Stainless steel, 1.4539 X1NiCrMoCu25-20-5
Surface	Plain
RoHS-compliant	Yes

ASSY® 4 Isotop roofing screw Steel zinc plated double thread cylinder head

Special double threaded screw ideal for fixing roof insulation and façade mountings with soft or pressure-resistant insulation materials in indoor dry or sheltered areas

ASSY Isotop

- Ideal power transmission thanks to RW drive
- Unobtrusive mounting of wooden components
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw
- Ideal for flexible loads such as insulation on rafters

ASSY® 4 JH joist hanger screw Steel zinc plated full thread pan head

Full-thread screw with visually appealing pan head with shank reinforcement mounted on the underside for fastening sheet metal parts and metal connectors in wood in indoor dry or sheltered areas without play

ASSY
RW

- Ideal power transmission thanks to RW drive
- Flat mounting of load-bearing sheet metal parts or steel-wood connections
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw
- High strength values and ductility

ASSY® 4 COMBI T transportation anchor screw Steel zinc plated partial thread hexagon head

Special transport anchor screw with shank-reinforced screw head for safe, clearance-reduced attachment in the matched ball head anchor for transporting wooden elements made of coniferous timber, laminated timber, timber veneer or board plywood

- Ideal power transmission thanks to RW drive
- Flexible assembly with high power transmission and precise fit in metal connections
- No over-tightening or stripping and high feed
- Smooth thread start ensures optimised recessing and biting of the screw
- High strength values and ductility

ASSY® 4 COMBI timber screw Steel zinc plated partial thread hexagon head

Powerful partial-thread screw with shank reinforcement for wood-wood fastening with washer or precise 90° metal-wood fastening in wood construction in indoor dry or sheltered areas

- Ideal power transmission thanks to RW drive
- Precise fit in metal and very high power transmission combined with two drive types
- Significant reduction in the amount of force required when screwing in the screw
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw
- High strength values and ductility

- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Use the Würth timber construction software for dimensioning of ASSY screws from a diameter of 5 mm
- Do not use the screw in applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas. If used outdoors and in rooms that are constantly exposed to high humidity, please use ASSY 4 A2 combi stainless steel screws
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® 4 P CSMP universal screw Steel zinc plated partial thread with underhead thread milling pockets head

Universal partial-thread screw with underhead thread with high tightening effect for fast, gap-free fastening of wood-wood connections in furniture construction, interior construction or wood construction in indoor dry or sheltered areas

- Ideal power transmission thanks to RW drive
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw

- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Use the Würth timber construction software for dimensioning of ASSY screws from a diameter of 5 mm
- Do not use the screw in applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas. If used outdoors and in rooms that are constantly exposed to high humidity, please use ASSY 4 A2 or A4 stainless steel screws and, if atmosphere contains chlorine, HCR stainless steel screws
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® 4 A2 PH fittings screw A2 stainless steel plain partial thread pan head

Partial-thread screw made of high-quality austenitic A2 stainless steel with visually appealing pan head for fastening metal hollow profiles in wood in outdoor areas exposed to the elements

ASSY
RW

- Ideal power transmission thanks to RW drive
- Flat fastening metal sheets for secondary purposes
- Higher breaking torque
- Gentle thread start ensures optimised positioning and biting of the screw
- Stainless mounting for accessible wood connections in outdoor areas exposed to weathering

For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® 4 RCS fittings screw Steel brass-plated full thread raised countersunk head

Universal full-thread screw with raised countersunk head for fastening brass-plated fittings to wood or wooden materials in furniture construction, shopfitting or interior construction in indoor dry or sheltered areas

- Ideal power transmission thanks to RW drive
- Form-fit connection of the 90° countersunk head to metal fittings with 90° countersinks or in wooden products with high bulk density
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw

ASSY® 4 A2 WH washer head screw A2 stainless steel plain partial thread washer head

Partial-thread screw made of high-quality austenitic A2 stainless steel with large washer head for wood-wood fastening in outdoor areas exposed to the elements

- Ideal power transmission thanks to RW drive
- Visually appealing screw connection on wood surface
- Higher breaking torque
- Gentle thread start ensures optimised positioning and biting of the screw
- Stainless mounting for accessible wood connections in outdoor areas exposed to weathering

ETA-11/0190 approved

- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Dimensions of the ASSY screws can be carried out in the Würth timber construction software from a Ø of 5 mm
- Do not use the screw in applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas. If used outdoors and in rooms that are constantly exposed to high humidity, please use ASSY 4 A2 WH or ASSY 4 A2 BP stainless steel screws
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® 4 WH washer head screw Steel zinc plated partial thread washer head

Partial-thread screw with large washer head washer head for wood-wood fastening in a structural wood construction which must be pulled together in indoor dry or sheltered areas

- Ideal power transmission thanks to RW drive
- Visually appealing screw connection on wood surface
- Significant reduction in the amount of force required when screwing in the screw
- No over-tightening or stripping with high feed performance
- Gentle thread start ensures optimised positioning and biting of the screw
- High strength values and ductility

- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY®plus 4 FBS RCS window construction screw Hardened steel zinc-plated full thread raised countersunk head

Special full threaded screw with raised countersunk head and restraining ribs for gap-free fastening close to edges. For mounting of metal fittings to timber windows without pre-drilling the wood

- Ideal power transmission thanks to RW drive
- Visually appealing connections in window construction
- Maximum reliability of the screw connection due to asymmetrical single thread
- Small edge distances

ASSY®plus VG 4 CS construction screw Steel zinc plated full thread countersunk head

Special full-thread screw with countersunk head for universal use for high-load-bearing wood-wood, wood-metal connections or reinforcements in structural wood construction, which also require small edge and screw clearances, in indoor dry or wet areas

- Ideal power transmission thanks to RW drive
- Form-fitting connection to metal fittings or in wooden products with high bulk density
- Highest power transmission in the tensile and compressive direction
- Compact screw connections and small material cross-sections due to effective drill tip
- High strength values and ductility

Approved according to ETA-11/0190, for wood-concrete composite ceilings ETA-13/0029

- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Use the Würth timber construction software for dimensioning of ASSY screws from a diameter of 5 mm
- Do not use for screw applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY®plus VG 4 CSMP construction screw Steel zinc plated full thread countersunk milling pocket head

Special full-thread screw with countersunk head with milling pockets for universal use for high-load-bearing wood-wood, wood-metal connections or reinforcements in structural wood construction, which also require small edge and screw clearances, in indoor dry or wet areas

- Ideal power transmission thanks to RW drive
- Clean countersinking in softwood or wood material
- Visually appealing countersunk finish in wood-wood applications or precise countersunk finish in metal-wood applications thanks to innovative milled pockets
- Highest power transmission in the tensile and compressive direction
- Compact screw connections and small material cross-sections due to effective drill tip
- High strength values and ductility

- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Use the Würth timber construction software for dimensioning of ASSY screws from a diameter of 5 mm
- Do not use for screw applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® plus 4 A2 P CSMR60 wood façade screw A2 stainless steel plain partial thread with underhead thread countersunk head 60°

Special partial-thread screw with underhead thread with high tightening effect made of high-quality, austenitic A2 stainless steel with small countersunk head and milling ribs for flat, gap-free attachment close to edges, without predrilling, of wooden façades, skirting boards, fences etc. in outdoor areas constantly exposed to weathering

- Ideal power transmission thanks to RW drive
- Easy countersinking in hardwood/softwood with high knot content as well as hard wood fibreboards
- Maximum reliability of the screw connection due to asymmetrical single thread
- Precise positioning and very clean drilling due to advanced centring drill tip
- Stainless mounting for accessible wood connections in outdoor areas exposed to weathering

Material	Stainless steel A2

- Austenitic stainless steel is characterised by a high degree of corrosion resistance against aggressive industrial air, sea air, tap water, river water, mine water and salt water, as well as woods containing tannic acid. It is resistant to acid to a certain extent and not suitable for atmospheres containing chlorine gas

Continuation **ASSY® plus 4 A2 P CSMR60 wood façade screw A2 stainless steel plain partial thread with underhead thread countersunk head 60°**

- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Dimensions of the ASSY screws can be carried out in the Würth timber construction software from a Ø of 5 mm
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY® plus 4 CS universal screw Hardened zinc-plated steel full thread countersunk head

Special full threaded screw with raised countersunk head and restraining ribs for gap-free fastening close to edges. For mounting of metal fittings to timber windows without pre-drilling the wood.

- Ideal power transmission thanks to RW drive
- Precise positioning and very clean drilling due to advanced centring drill tip
- Form-fitting connection to metal fittings or in wooden products with high bulk density
- Maximum reliability of the screw connection due to asymmetrical single thread

ASSY®plus 4 P CSMR 60 flooring screw Hardened zinc-plated steel partial thread countersunk head 60°

Partial thread flooring screw with underhead thread with small 60° countersunk milling head and high joining effect. Suitable for gap-free fastening, close to edges without pre-drilling (e.g. Tongue and groove profile wooden boards). The firm hold of the underhead thread in the component prevents any possible creaking or squeaking noises when walking on the floor.

- Ideal power transmission thanks to RW drive
- Precise positioning and very clean drilling due to advanced centring drill tip
- Easy countersinking in hardwood/softwood with high knot content as well as hard wood fibreboards
- Maximum reliability of the screw connection due to asymmetrical single thread
- High strength values and ductility

For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY®plus 4 BP MDF rear panel screw Hardened zinc plated steel full thread washer head

Full-thread screw with geometry and drill tip attuned to MDF for mounting rear walls in MDF front faces without predrilling, splitting or bulging

- Ideal power transmission thanks to RW drive
- Screw fitting without gaps or bulging in MDF front surfaces
- Powerful connection of e.g. thin fibreboards for furniture back panels
- Maximum pull-out strength and minimum splitting effect

Nominal diameter (d)	3.4 mm
Head diameter (d _h)	8 mm
Head height (k)	1.4 mm
Internal drive	RW10
Material	Hardened steel
Surface	Zinc plated
RoHS-compliant	Yes

- Do not use the screw in applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas. Please use ASSYplus 4 stainless steel screws for outdoor applications and rooms with constant high humidity
- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Dimensions of the ASSY screws can be carried out in the Würth timber construction software from a Ø of 5 mm
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY®plus 4 CS MDF universal screw Hardened zinc plated steel partial thread countersunk head

Partial-thread screw with geometry and drill tip attuned to MDF for connection in MDF front faces of cabinet parts without predrilling, splitting or bulging

- Ideal power transmission thanks to RW drive
- Screw fitting without gaps or bulging in MDF front surfaces
- Form-fitting connection to metal fittings or in wooden products with high bulk density
- Maximum pull-out strength and minimum splitting effect

ASSY®plus 4 P CSMR wooden plate screw Hardened zinc-plated steel partial thread with underhead thread countersunk head

Partial thread screw with underhead thread countersunk milling head and high joining effect. Suitable for gap-free fastening, close to edges without pre-drilling of wooden composite boards or solid woods. The firm hold of the underhead thread enables connections without an assembly gap even with lightweight wooden fibre boards and the screw head ending at the board surface.

- Ideal power transmission thanks to RW drive
- Precise positioning and very clean drilling due to advanced centring drill tip
- Easy countersinking in hardwood/softwood with high knot content as well as hard wood fibreboards
- Maximum reliability of the screw connection due to asymmetrical single thread
- High strength values and ductility

ASSY®plus 4 CSMP special universal screw Hardened zinc-plated steel partial thread countersunk head

Universal partial thread with countersunk head with milling pockets. Suitable for gap-free attachment close to edges without pre-drilling of wood-wood connections in indoor dry or sheltered areas.

- Ideal power transmission thanks to RW drive
- Small edge distances
- Clean countersinking in softwood or wood material
- Maximum reliability of the screw connection due to asymmetrical single thread

ASSY®plus 4 CSMP HO corpus cabinet screw with access hole

Hardened zinc-plated steel partial thread countersunk head

Partial thread screw with access hole with extended thread length and countersunk milling pockets for joining components without splitting pre-drilling or over-turning. Especially suitable for cabinet construction as well as for different plate materials close to edges.

- Ideal power transmission thanks to RW drive
- Precise positioning and very clean drilling due to advanced centring drill tip
- Clean countersinking in softwood or wood material
- Maximum reliability of the screw connection due to asymmetrical single thread

ASSY®plus 4 A2 TH glass strip screw A2 plain stainless steel partial thread top head 60°

Special Partial Thread screw made of high quality, austenitic A2 stainless steel with small top head and milling ribs. Suitable for gap free fastening close to edges of delicate glass strips or skirting boards in outdoor areas constantly exposed to weathering.

- Ideal power transmission thanks to RW drive
- Precise positioning and very clean drilling due to advanced centring drill tip
- Well-designed, unobtrusive mounting of wooden components
- Maximum reliability of the screw connection due to asymmetrical single thread
- Stainless mounting for accessible wood connections in outdoor areas exposed to weathering

- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Use the Würth timber construction software for dimensioning of ASSY screws from a diameter of 5 mm
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY®plus 4 A2 SRCS wood façade screw A2 plain stainless steel partial thread small raised countersunk head 60°

Special partial thread screw made of high quality austenitic A2 stainless steel with small raised countersunk head and milling ribs. Suitable for visually appealing fastening, close to edges without pre-drilling of wooden facades, skirting boards, fences etc in outdoor areas constantly exposed to weathering.

- Ideal power transmission thanks to RW drive
- Precise positioning and very clean drilling due to advanced centring drill tip
- Clean countersinking in softwood/hardwood with high knot content
- Maximum reliability of the screw connection due to asymmetrical single thread
- Stainless mounting for accessible wood connections in outdoor areas exposed to weathering

ASSY®plus 4 A2 CH TERRACE terrace construction screw A2 plain stainless steel partial thread with underhead thread cylinder head

Special partial thread screw with grooved shank made of high quality austenitic A2 stainless steel with small cheese head and underhead thread. Provides visually appealing fastening, close to edges without pre-drilling of terrace floorboards, wooden facades, skirting boards, fences etc. Suitable for outdoor areas constantly exposed to weathering.

- Ideal power transmission thanks to RW drive
- Precise positioning and very clean drilling due to advanced centring drill tip
- Unobtrusive mounting of wooden components
- Maximum reliability of the screw connection due to asymmetrical single thread
- Stainless mounting for accessible wood connections in outdoor areas exposed to weathering

ASSY®plus 4 A2 PH SOLAR roof hook screw A2 stainless steel plain partial thread pan head

Special full thread screw made of high quality austenitic A2 stainless steel with pan head for mounting close to edges without pre-drilling. Suitable for roof hooks when installing photovoltaic systems in outdoor areas constantly exposed to weathering.

- Ideal power transmission thanks to RW drive
- Precise positioning and very clean drilling due to advanced centring drill tip
- Flat fastening of sheet metal onto substrate for secondary purposes
- Maximum reliability of the screw connection due to asymmetrical single thread
- Stainless mounting for accessible wood connections in outdoor areas exposed to weathering

ASSY®plus VG 4 COMBI construction screw Steel zinc plated full thread hexagon head

Special full-thread screw with hexagon head and underside shank reinforcement for high-load-bearing metal-wood connections in structural wood construction, which also require small edge and screw clearances, in indoor dry or wet areas

- Ideal power transmission thanks to RW drive
- Flexible assembly with high power transmission and precise fit in metal connections
- Highest power transmission in the tensile and compressive direction
- Compact screw connections and small material cross-sections due to effective drill tip
- High strength values and ductility

- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Use the Würth timber construction software for dimensioning of ASSY screws from a diameter of 5 mm
- Do not use for screw applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

ASSY®plus 4 TH glass strip screw Hardened zinc-plated steel partial thread top head 60°

Special partial threaded screw with small top head and milling ribs. Suitable for gap-free mounting close to edges of delicate glass strips or skirting boards in furniture, shop or interior construction.

- Ideal power transmission thanks to RW drive
- Precise positioning and very clean drilling due to advanced centring drill tip
- Well-designed, unobtrusive mounting of narrow wooden components
- Maximum reliability of the screw connection due to asymmetrical single thread
- High strength values and ductility

- Do not use the screw in applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas. Please use ASSYplus 4 stainless steel screws for outdoor applications and rooms with constant high humidity
- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. Dimensions of the ASSY screws can be carried out in the Würth timber construction software from a Ø of 5 mm
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

Bit holder for ASSY screws

Ideal for mechanical attachment of bits and screw heads when driving-in screws.

- No bit slippage in drive
- No risk of injuries caused by bit slippage when driving in long, large screws
- Prevents incorrect screw attachments
- Bit holder magnetically attached to screw socket
- Enhanced grip
- Zinc plating/blue coating (A2K) for rust protection

45° angled washer, round hole

For optimum transfer of tensile loads for metal/wood connections with ASSY countersunk screws.

- For metal tabs with a thickness of 2–3 mm
- High-precision fit and exact 45° specification for screwing the ASSY screws
- No pulling through of the screw head when using thin sheet metals
- Quick and easy installation of angled washer using a simple round hole or slot hole in the metal plate
- Clean appearance of the finished screw connection
- Material: Steel blue passivated (A3K)
- application in utilisation classes 1 and 2

Countersink angle (α)	90 Degree
Insertion depth (h ₂)	1.9 mm
Material	Steel
Surface	Zinc plated

ETA-11/0190

To create metal cut-outs in the pull tab, download CAD drawings of the required holes from the Download section.

Angled washer 45° oval hole

For optimum transfer of tensile loads for metal/wood connections with ASSY countersunk screws.

- High fitting accuracy and precise 45° specification for fastening ASSY plus full-thread screws
- Screw head does not pull through when using thin-walled metal tabs
- Quick and easy mounting of the angled washer through a simple oval hole in the metal plate
- Clean appearance of the finished screw connection
- Application in utilisation classes 1 and 2

Countersink angle (α)	90 Degree
Material	Cast steel
Surface	Zinc plated

Internal diameter (d)	Height (h ₁)	Insertion depth (h ₂)	Min./max. material thickness	Suitable for screw	Art. no.	P. Qty.

ETA-11/0190

To create metal cut-outs in the pull tab, download CAD drawings of the required holes from the Download section.

Screw-in angle 45/60 degrees

Easy-to-install screw-in angle for quick and precise angled fitting of long ASSY timber screws at an angle of 45 or 60 degrees

- Both sides of this variably adjustable parallel stop can be used for the central positioning of the screws on the beam
- Screw run-off during screw insertion is minimised by the use of a stainless steel stop, both ends of which can be inserted
- Convenient and easy working is ensured by the permanent magnet for overhead work, integrated bit holder and the possibility of one-hand mounting
- Setpoints are easier to mark off due to the integrated detachment line and guarantees long service life through wear-resistant plastic

Length	200 mm
Width	30 mm
Height	120 mm
Suitable for screw	ASSY 4 diameter 6 mm, ASSY 4 diameter 8 mm, ASSY 4 diameter 10 mm, ASSYplus VG countersunk head diameter 6 mm, ASSYplus VG countersunk head diameter 8 mm, ASSYplus VG countersunk head diameter 10 mm, ASSYplus VG cylinder head diameter 6 mm, ASSYplus VG cylinder head diameter 8 mm, ASSYplus VG cylinder head diameter 10 mm

Art. no. 0165 300 20

P. Qty.: 2

Load bearing deviations, which can occur due to incorrect screw mounting or screw damage caused by intersecting screws at the crossing points, are avoided.

FP connector

For manufacturing wood/concrete composite ceilings using wet and dry methods.

- Advantages:
- Especially for the installation of dry, precast concrete elements with integrated FT connectors:

Baseplate length	111 mm
Width	50 mm
Height	70 mm
Suitable for screw	ASSYplus VG countersunk head diameter 10 mm

Art. no. 0165 300 10

P. Qty.: 50

ETA-13/0029
Expert report (from Karlsruher Institut für Technologie (KIT)) on improving concrete strength (up to 120 mm)

When using precast concrete elements:

- Merging of precast concrete elements with the wooden ceiling, without gaps, using additional ASSY 4 WH washer head screws
- Torque value (20 Nm) of the ASSYplus FT 4 countersunk head screws, 10 mm diameter for the FP connector
- To prevent the wooden ceilings shrinking after assembly, the unfinished wooden ceiling must be protected against moisture penetration
- Timber dimensioning software, load tables and detailed processing instructions can be found on the service page www.wuerth.de/assy.

D anchor Timber screw

Tension-free spaced installation anchor for dry ridge fixing and for attaching window frames, door casings or substructures.

- Material: Galvanised steel, blue coated
- Saves time
- Used as part of a system with an AW anchor cover cap
- The screw has a conical transition in the lower part of the head thread

Head thread length (lg ₂)	22 mm

D anchor can be combined with Jamo® screws when assembling substructures. The D anchor has a higher load-bearing capacity and requires no subsequent readjustments.

JAMO® spacing assembly screw wood-concrete Spacing assembly screw for wood/concrete

The screw for making changes to spacing of wooden substructures on wooden, stone or concrete surfaces.

Substrates:

Solid wood (coniferous wood, ash, beech, oak), laminated beams, cross laminated timber (CLT) timber veneer (coniferous wood or BauBuche), OSB, chipboard and in combination with dowels in stone or concrete.

Benefits:

Approved load-bearing spacing assembly screw in accordance with ETA 11/0190 with wobble-free placement characteristics and quick bite.

Plastic non-friction coating:

High-quality slide coating to reduce friction and for easy screwing in.

Nominal diameter (d)	6 mm
Head diameter (d _h)	12.5 mm
Head height (k)	3.5 mm
Internal drive	AW30

Length (l)	Thread length (lg)	Art. no.	P. Qty.

ETA-11/0190

When selecting the screw length, keep in mind that the thread must be fully anchored into the surface. The requirements of the European Technical Approval and the dowel approval must be observed. More information about load values can be found at: www.wuerth.de/assy

Jamo plus 4 CSMP screw for adjustable distance mounting Steel zinc-plated partial thread with underhead thread for adjusting the countersunk head with milling pockets

Approved screw for adjustable distance mounting of wooden substructures on wood

- Ideal power transmission thanks to RW drive
- Permanent attachment of the component to be connected
- Maximum reliability of the screw connection due to asymmetrical single thread
- Precise positioning and very clean drilling due to advanced centring drill tip
- High strength values and ductility

Nominal diameter (d)	6 mm
Head diameter (d _h)	12 mm

ETA-11/0190 approved

- Do not use the screw in applications with direct exposure to the elements or in humid rooms with atmospheres containing chlorine gas. If used outdoors and in rooms that are constantly exposed to high humidity, please use ASSY 4 A2 or A4 stainless steel screws and, if atmosphere contains chlorine, HCR stainless steel screws
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the JAMO 4 CS, ASSY D screws with countersunk head or pan head

Jamo 4 CS screw for adjustable distance mounting Steel zinc-plated partial thread with underhead thread for adjusting the countersunk head

Screw for making adjustments to the mounting distance of wooden substructures on wooden, stone or concrete surfaces

- Ideal power transmission thanks to RW drive
- Permanent attachment of the component to be connected
- Maximum reliability of the screw connection due to asymmetrical single thread
- Ideal for friction-free screw fitting in plastic, such as in anchors or in homogeneous highly compressed wooden materials
- High strength values and ductility

Angled washer 45° A2 oval hole

For optimum transfer of tensile stresses for metal/wood connections with ASSY 4 or ASSY 3.0 stainless steel countersunk head screws in outdoor areas exposed to the elements

- High fitting accuracy and precise 45° specification for screwing ASSY 4 or ASSY 3.0 A2 stainless steel countersunk head screws
- No pulling through of the screw head when using thin sheet metals
- Quick and easy mounting of the angled washer through a simple oval hole in the metal plate
- Clean appearance of the finished screw connection
- Use in utilisation class 3 and outdoor areas exposed to the elements

Countersink angle (α)	90 Degree

To create metal cut-outs in the pull tab, download CAD drawings of the required holes from the Download section.

Angled washer 30° CLT

For ASSY® screws with countersunk head

- Quick and easy assembly of the 30° CLT angled washer through a simple 40-mm round hole bore during element joining in cross laminated timber (CLT), laminated veneer lumber (LVL) or solid wood.
- Increase of the pre-production level through factory pre-assembly. A light press fit of the angled washer 30° CLT in the drilled hole ensures a tight fit during transport.
- Gap-free joining of elements by using partial-thread screws with countersunk head.

Internal diameter (d)	8.5 mm
Insertion diameter (d ₁)	40 mm
Outer diameter (d ₂)	40 mm

Countersink angle (α)	90 Degree
Height (h ₁)	16 mm
Material	Steel
Surface	Zinc plated
Suitable for screw	ASSY 4 countersunk head diameter 8 mm, ASSYplus VG countersunk head diameter 8 mm, ASSY 3 countersunk head diameter 8 mm
Diameter of hole	40 mm

Art. no. 0457 700 462

P. Qty.: 75

Oval decking connector

Fast and simple connection of wooden decking boards without a visible screwed joint

- Simple
- Wooden floorboards can be prepared for laying in the workshop: Mark the floorboards (depending on the distance between the sides of the frame of the substructure) then mill the floorboards to the markings. For connecting without screw holes on the top of the decking boards (only the first and last boards have to be screwed once). This ensures a delicate decking surface that can be walked on with bare feet without hesitation. The decking connector was developed to work hand in hand with the Würth decking construction screw. The decking construction screw blends into the structure well. The substructure does not require pre-drilling, as the decking construction screw has a drill tip.

Length (l ₁)	80 mm
Width (b ₁)	35 mm
Bar width (b ₂)	8 mm
Thickness (h ₁)	4 mm
Material	Aluminium

Art. no. 0907 000 80

P. Qty.: 100

Decking connector, bracket

Fast and simple connection of wooden decking boards without a visible screwed joint

- Spacers prevent moisture building up between the boards and the substructure
- Boards can swell and shrink in any direction
- Aluminium for a long life and high corrosion resistance
- Joint width can be adjusted
- Specially developed for the installation of wooden decks

Length (l ₁)	60 mm
Width (b ₁)	60 mm
Thickness (h ₁)	7 mm
Material	Aluminium

Continuation **Decking connector, bracket**

Art. no. 0907 000 90

P. Qty.: 100

TIP: Set torque on screwdriver, as stainless steel screws are not hardened!

Support pad

The support pad provides structural protection of the wood and prolongs the service life of the terrace

- Creates clearance between foundation and substructure
- Serves as a support point for the substructure
- Prevents water logging and premature rotting of the wood

Length	90 mm
Width	90 mm
Height	10 mm
Material	Rubber

Art. no. 0907 000 110

P. Qty.: 50

Spacer for terrace

Würth spacer allows for a uniform joint width when laying decking, while maintaining distance to the subconstruction to ensure that the whole construction is optimally ventilated and water is prevented from accumulating.

- Open construction prevents water accumulating
- Quick and simple laying with consistent spacing maintained

Length	80 mm
Width	25 mm
Height	6 mm
Material	PA - Polyamide
Colour	Black

Joint width	Art. no.	P. Qty.
4 mm	0907 000 218	200
7 mm	0907 000 219	200

Sound insulation strip, SonusStripe

Reduces the flange transmission of air and body sound through internal friction

- Consisting of basic ecological materials: sand and wood
- Load-independent, acoustic decoupling, particularly effective in low frequency ranges
- No risk of confusion as use is suited for all applications and levels

Max. compressive strength	23 N/mm ²
Fire resistance rating	B2

Type description	Length x width x thickness	Product weight (per item)	Art. no.	P. Qty.
SonusStripe 50	1200 x 50 x 15 mm	1099.6 g	5405 120 005	5
SonusStripe 60	1200 x 60 x 15 mm	1299.6 g	5405 120 006	5
SonusStripe 80	1200 x 80 x 15 mm	1799.6 g	5405 120 008	5
SonusStripe 100	1200 x 100 x 15 mm	2199.6 g	5405 120 010	5
SonusStripe 120	1200 x 120 x 15 mm	2599.6 g	5405 120 012	5

Higher loads in construction have no negative impact on the effects of the SonusStripe acoustic decoupling strips

Spacer strip

The spacer strip provides structural wood protection and prolongs the service life of the terrace

- Creates clearance between terrace boards and substructure, thus minimising the risk of screws shearing off
- Guarantees optimum underfloor ventilation of the terrace boards
- Secured with ASSY A2 pan head screws, prefix number 0180

Length	345 mm
Width	18 mm
Height	8 mm
Material	PA 6 GF30 - Polyamide

Art. no. 0907 000 100

P. Qty.: 50

Corner connector screw

For connecting pre-drilled unit parts in furniture construction and shopfitting.

WÜPOFAST®, blue galvanised Particle board screw

Steel, blue galvanised, full thread, raised countersunk, PZ recessed head.

- Plastic slide coating
- Bending angle
- Breaking torque
- Screw-in torque
- 25° tip

Material	Steel
Surface	Zinc plated
RoHS-compliant	Yes

Not for outdoor use

WÜPOFAST®, blue galvanised Particle board screw

Steel, blue galvanised, full thread, countersunk head, PZ recessed head.

- Pozidrive recessed head
- Plastic slide coating
- Bending angle
- Breaking torque
- Screw-in torque
- 25° tip
- Precision positioning on hard surfaces such as coated and waterproof chipboard and all types of wood, wooden materials and MDF.

Not for outdoor use

WÜPOFAST® brass-plated Particle board screw

Brass-plated steel, full thread, raised countersunk head, PZ. Take the use of new materials into account. New innovative manufacturing and testing process – consistent high quality for professionals.

- Pozidrive recessed head
- Plastic slide coating
- Bending angle
- Breaking torque
- Screw-in torque

Nominal diameter (d)	3.5 mm
Length (l)	20 mm
Thread length (lg)	16 mm
Head diameter (d _h)	7 mm
Internal drive	Z2
Material	Steel
Surface	Brass plated
RoHS-compliant	Yes

Art. no. 0195 335 20

P. Qty.: 4000

Not for outdoor use

WÜPOFAST® nickel-plated Particle board screw

Nickel-plated steel, full thread, raised countersunk head, PZ. Manufacturing and testing process ensures consistent high quality for professionals.

- Pozidrive recessed head
- Plastic slide coating
- Bending angle
- Breaking torque
- Screw-in torque

Material	Steel
RoHS-compliant	Yes

Not for outdoor use

WÜPOFAST® A2 Particle board screw

Stainless steel A2, full thread, raised countersunk head, PZ

- Wüpo particle board screws meet the heightened requirements brought about through the use of new materials and modern machining techniques.
- No need for pre-drilling
- The thin bolt core creates a large pull-out strength and low material deformation

Not for outdoor use.

Dry wall screw with drill tip

With drill tip

- Tapping screw thread with ZEBRA plus drill tip
- For screwing gypsum plasterboard to metal profiles with a thickness of 0.75 – 2.25 mm
- Hardened, phosphated steel
- Trumpet head with Phillips drive PH 2

Material	Steel
Surface	Phosphated
RoHS-compliant	Yes
Head diameter (d _h)	8.5 mm
Internal drive	H2

Nominal diameter (d)	Length (l)	Art. no.	P. Qty.
3.5 mm	25 mm	0189 35 25	1000/2000

Dry wall screw with double-start thread

For screwing on metal substructures up to max. 1 mm

- Double-start thread with special needle tip
- Hardened, phosphated steel
- Bugle head with PH 2 cross recess drive

Internal drive	H2

Gypsum plasterboard screw

For screwing plasterboard panels onto one another

- Sharp coarse thread
- Hardened, phosphated steel
- Countersunk head with Phillips drive PH 2

Material	Steel
Surface	Phosphated
RoHS-compliant	Yes
Nominal diameter (d)	5.5 mm
Length (l)	38 mm
Head diameter (d _h)	8 mm
Internal drive	H2

Art. no. 0189 655 38

P. Qty.: 500/1000

Stand connecting screw

Hardened, phosphated steel. Screw specially designed for sound-absorbing and dry construction.

- For connecting U-profiles, C-supports and other metal profiles on substructures up to 1 mm material thickness per component
- Double-threaded tapping screw thread

Nominal diameter (d)	3.9 mm
Length (l)	13.5 mm
Head diameter (d _h)	8 mm
Head height (k)	2.67 mm
Internal drive	H2
Material	Steel
Surface	Phosphated
RoHS-compliant	Yes

Art. no. 0189 335 13

P. Qty.: 1000

Cement board screw

For attaching cemented panels to metal substructures of up to 1 mm and to wooden substructures

- Hilo thread with special needle tip
- 60° milling head with Phillips drive PH 2
- Hardened, phosphated steel

Nominal diameter (d)	3.9 mm
Head diameter (d _h)	7 mm
Internal drive	H2
Material	Steel
Surface	Phosphated
RoHS-compliant	Yes

Dry wall screw Top head

The patented dry wall screw for screwing plaster-board panels onto metal substructures (C-supports and U-profiles) and wood substructures

- Patented head shape prevents the screw head from fraying
- Smooth bedding of the screw thanks to a sharp-edged tip and threads
- Screws in fast thanks to sharp-edged threads
- Hardened, phosphated steel
- Philips drive PH 2

Head diameter (d _h)	8.5 mm
Internal drive	H2
Material	Steel
Surface	Phosphated
RoHS-compliant	Yes

DIN 571 wood screw, blue coated Hexagon head

DIN 571, blue galvanized steel

- For solid wood connections
- Hexagon head for improved application of force when screwing in
- The wood screw forms its nut thread instead of cutting
- A core hole must be pre-drilled depending on the diameter and type of wood (hardwood)

Material	Steel
Surface	Zinc plated
RoHS-compliant	Yes

Wood screw, DIN 571 A2 Hexagon head

DIN 571, stainless steel A2

- For solid wood connections
- Hexagon head for improved application of force when screwing in
- The wood screw forms its nut thread instead of cutting it, depending on the diameter, pre-drilling must be carried out

Material	Stainless steel A2
Surface	Plain
RoHS-compliant	Yes

ELMO® speed screws

Galvanised steel, blue, AW slot drive. The quick and time-saving combination screw. With two different drives in the screw head: AW drive for secure working with large quantities and normal slot drive for smaller quantities.

Asymmetrical thread

- Low screw-in torque
- High over-turning force

AW drive

- Optimal force transmission
- Excellent fit
- Rapid finding
- Screw settles securely
- Virtually no unscrewing of bit
- No wobbling
- No damage to surface coating of screw

Head

- Pan head
- Combi AW slot drive

Material	Hardened steel
Surface	Zinc plated
RoHS-compliant	Yes

Shaft head screw

Galvanized steel, blue passivated, 8 x 30

Nominal diameter (d)	8 mm
Length (l)	30 mm

Art. no. 0902 310

P. Qty.: 100

Universal anchor AW

Assembly anchor for quick and secure mounting of door jambs. Save time while protecting the environment.

- Invisible mounting of door jambs
- No need to apply pressure as adhesive is already applied
- Highly secure bonding when used with
- Vertical assembly and full surface adhesive contact, even when drill holes are angled – ball head screw evens out the angle (90°–75°)!
- Assembly instructions included
- AW25 drive

Nominal diameter (d ₁)	6 mm
Length (l ₁)	89 mm
Plate length (a ₁)	55 mm
Plate width (b ₁)	55 mm
Internal drive	AW25
Plate size	55 x 55 mm

Art. no. 0902 60 85

P. Qty.: 100

Tested and assessed in expert's report no. 037-2002-1

Please observe the instructions for application of the adhesives.

Hammerset anchor, rotatable

For installation of plastic windows in the reveal

- Fast and simple installation of plastic windows in masonry
- Swivel anchors absorb thermal length changes in frame materials highly effectively

Window installation bracket with height adjustment bracket JB-DK

Galvanised steel for adjustable window installation in insulated wall structures.

Systematic, flexible, secure

The JB-DK adjustable window installation system enables glazing to be installed systematically, in line with RAL guidelines and with safe transfer of all live loads. The system is adjustable in three dimensions to enable easy compensation of structural tolerances. It can be installed at any level and adjusted according to the isothermal profile.

Type description	JB-DK50/5-W
------------------	-------------

Length	Height	Art. no.	P. Qty.
138 mm	5 mm	0479 733 23	1/50
138 mm	10 mm	0479 733 24	1/50
188 mm	10 mm	0479 733 30	1/50

The load capacity of brackets and rails has been determined by the manufacturer based on test report no. 10541805 from IFT Rosenheim. Individual calculations can be found in the guidelines on installing windows and house doors.

JB-DK100/10-AW75-ALW-W	0479 733 39	1/50

Window mounting rail with screw-on plate JB-D

Galvanised steel for adjustable window installation in insulated wall structures.

Systematic, flexible, secure

The JB-D adjustable window installation system enables glazing to be installed systematically, in line with RAL guidelines and with safe transfer of all live loads. The system is adjustable in three dimensions to enable easy compensation of structural tolerances. It can be installed at any level and adjusted according to the isothermal profile.

Height	37.3 mm

The load capacity of brackets and rails has been determined by the manufacturer based on test report no. 10541805 from IFT Rosenheim. Individual calculations can be found in the guidelines on installing windows and house doors.

Window installation rails W-ABZ

Fall-proof, adjustable window mounting with approval

- Fall-proof mounting with approval
- Systematic, flexible, secure

The W-ABZ window installation system enables fall-proof window installation in line with all the applicable guidelines and regulations

Min. joint width (f min)	17 mm

General construction permit Z-14.4-728

The dimensions are based on the following approvals, standards and guidelines:

- Z-14.4-728 Fall-proof window element mounting
- ETA-08/0190 Plastic anchors for multiple anchoring of non-load-bearing systems in concrete and masonry
- ETA-11/0190 Self-tapping screws for use in timber constructions
- ETB Guideline „Fall prevention components“
- Guidelines for planning and executing the installation of windows and exterior doors, in particular Chapter 5 (art. no.: 5995000000).
- Eurocode 1 - Effects

Mounting rail

Rigid mounting rail profile (complies with tech. guideline no. 20) with slots for adjustment and fixed holes for securing the window element in place.

Length	165 mm
Width	55 mm

Art. no. 0479 733 22

P. Qty.: 1/50

Mounting bracket

Rigid mounting bracket profile (complies with tech. guideline no. 20) with slots for adjustment and fixed holes for securing the window element in place.

Recommended fastener in concrete:

- Screw anchor W-SA 7.5 type MS
- Plastic frame anchor W-UR8

Recommended fastener in aerated concrete:

Plastic frame anchor W-UR8

Recommended fastener in solid or perforated brick masonry:

- Plastic frame anchor W-UR8
- AMO III screw diameter 7.5 mm

Recommended fastener for connection to window sill or window frame profile:

- FBS 1
- ASSY 3.0
- pias drilling screw

Recommended fastener for window frame profile or coupling of frames:

Pias drilling screw

Length (L1)	58 mm
Material	Steel
Surface	Sendzimir galvanized

Length 2 (L2)	Art. no.	P. Qty.
70 mm	0479 733 20	1/50
120 mm	0479 733 21	1/50

VWM pre-wall mounting system EPS EPS VWM system

Easy to assemble pre-wall mounting system with special system profiles made from high-density EPS for fitting windows in front of supporting walls

- Tested pre-wall mounting system with special system profiles made from high-density EPS
- Easy to mount thanks to low weight and dovetail connection to the special profiles

Material	EPS - Expanded polystyrene
Material thickness (t)	80 mm

Dimension VWM (SxS2xL)	Art. no.	P. Qty.
80 x 80 x 1200 mm	0479 743 208	10/108
120 x 80 x 1200 mm	0997 842 840	5/72
140 x 80 x 1200 mm	0479 743 214	5/60
160 x 80 x 1200 mm	0997 825 691	5/60

- Observe the RAL guidelines on assembly and planning of windows and house doors when planning and assembling (art. no. 5995 000 000).

Continuation **VWM pre-wall mounting system EPS EPS VWM system**

- Always seal and adhere EPS special system profiles using the associated VWM assembly adhesive (art. 0479 743 200) to the substrate and to each other.
- The VWM assembly adhesive must be ordered separately.
- When mounting, follow Special Case 1 in accordance with the RAL guidelines for mounting. If there are any special requirements, it may be necessary to consider Special Case 2.
- It is important to check that installation has been performed correctly for the specific construction conditions (e.g. weight of window casement, surface properties). When planning and selecting suitable fasteners, their properties (e.g. application surface, edge spacings, loads) need to be taken into account.
- To attach fall-proof glazing in accordance with DIN 18008-4, additional suitable and approved securing systems such as the W-ABZ window installation rail (art. no. 0479 740 XXX) must be used. Alternatively, approval is required for each individual case.
- Instructions for processing can be found in the processing guidelines/mounting instructions.
- Technical data and other product documentation can be found in the online shop.

Pre-wall mounting system VWM

Pre-wall installation system with mounting brackets designed to be fitted circumferentially for optimal attachment and sealing of windows and doors in front of supporting walls in insulation layers

- Overhand of 80 mm to 200 mm possible
- Complies with the requirements of EnEV
- Window replacement in case of renovation or repair without damaging the façade/ETICS possible

Dimension VWM	Max. throat depth	Content (rm)	Art. no.	P. Qty.
80 x 80 x 1200 mm	80 mm	118.8 m	0479 742 108	1
140 x 90 x 1200 mm	140 mm	72 m	0479 742 114	1
160 x 110 x 1200 mm	160 mm	48 m	0479 742 116	1
180 x 110 x 1200 mm	180 mm	48 m	0479 742 118	1
200 x 110 x 1200 mm	200 mm	33.6 m	0479 742 120	1

Cover strip

High-quality self-adhesive plastic cover strip for the overlap of connecting joints

- For battening and lining connecting joints
- Quick installation with high-quality self-adhesive strips
- Well designed overlap of connecting joints

Processing temperature	0 °C
Max. temperature resistance	80 °C
Number of metres per pack	75 m
Thickness	7 mm
Colour	Traffic white RAL 9016

Width	Length	Art. no.	P. Qty.
20 mm	1500 mm	0518 822 150	75
20 mm	2500 mm	0518 822 250	75

50 mm	2500 mm	0518 825 250	75

Product is only suitable for visual enhancement of the connecting joints and therefore does not assume any sealing function

Flat strip

High-quality self-adhesive plastic flat strip for the overlap of connecting joints

- For battening and lining connecting joints
- With high-quality self-adhesive strips for quick and easy assembly
- Quick and simple to shorten, ensuring minimum waste

Length	50 m
Processing temperature	0 °C
Max. temperature resistance	80 °C
Number of metres per pack	50 m
Thickness	1 mm
Colour	Traffic white RAL 9016

Width	Art. no.	P. Qty.

30 mm	0518 803 500	1
40 mm	0518 804 500	1
50 mm	0518 805 500	1

Product is only suitable for visual enhancement of the connecting joints and therefore does not assume any sealing function

Flat strip with lip

High-quality self-adhesive plastic strip with lip for the overlap of connecting joints. Elegantly smooths out unevenness in the reveal.

- Plastic strip with lip, ideal for visual enhancement of connecting joints
Due to the flexible lip, more minor reveal unevenness is smoothed out
- With high-quality self-adhesive strips for quick and easy assembly

Processing temperature	0 °C
Max. temperature resistance	80 °C
Number of metres per pack	75 m

Continuation **Flat strip with lip**

Thickness	1 mm

Flat strip with seal for outdoor use

High-quality self-adhesive plastic flat strip for covering and sealing connecting joints

- For the professional lining and battening of all types of joints and transitions throughout the home and construction industry
- Quick and easy assembly thanks to high-quality self-adhesive foam tape
- Green liner is for outdoor use

Width	25 mm
Processing temperature	0 °C
Max. temperature resistance	80 °C

Window construction screw, self-drilling, raised countersunk head FEBOS® M

Steel, galvanized, blue passivated, PH drive. For non-automatic screw connections.

- Metric thread
- Self-drilling window construction screw for use in UPVC window construction
- For connecting UPVC profiles with the metal reinforcement (up to 2.5 mm) and for securing fittings on profiles with metal stiffening (up to 2.5 mm)
- Greater load capacity threads with thin sheathing iron
- The danger of forced feed with large distances between plastic and metal stiffening is minimised by the flat metric thread

Material	Steel
Surface	Zinc plated
RoHS-compliant	Yes
Thread type x nominal diameter (d _t)	M4.0
Head diameter (d _h)	7 mm
Head height (k _t)	3.05 mm
Drill tip length (l _p)	5.2 mm
Drill tip diameter (d _p)	3.4 mm
Internal drive	H2

The colours may differ slightly from the original colour for production-related reasons.

ASSY® 4 A2 CS universal screw assortment A2 stainless steel plain partial thread countersunk head

705 pieces in system case. Partial-thread screw made of high-quality austenitic A2 stainless steel with countersunk head for universal wood-wood fastening in outdoor areas exposed to the elements

- Ideal power transmission thanks to RW drive
- Form-fitting connection to metal fittings or in wooden products with high bulk density
- Higher breaking torque
- Smooth thread start ensures optimised recessing and biting of the screw
- Stainless mounting for accessible wood connections in outdoor areas exposed to weathering

Art. no. 5964 018 700

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

ASSY

ETA-11/0190 approved

- Austenitic stainless steel is characterised by a high degree of corrosion resistance against aggressive industrial air, sea air, tap water, river water, mine water and salt water, as well as woods containing tannic acid. It is resistant to acid to a certain extent and not suitable for atmospheres containing chlorine gas
- We recommend using the Würth software or the corresponding design aids for planning and dimensioning your assembly. ASSY screws can be dimensioned in the Würth timber construction software from a Ø of 5 mm
- ASSY 4, ASSYplus 4 and ASSYplus 4 FT chipboard screws are optimised for use in wood and wood materials. For applications in plastic anchors where load capacity can also be reduced, use only screws without an optimised thread tip (tip with milling ribs, drill tip, self-clearing groove etc.), such as the ASSY D screws with countersunk head or pan head

Plumber's sealing screw **pias®**

Self-drilling **pias®** drill tip

- Centre punching, boring, thread cutting and screwing in a single step
- Low contact pressure
- Optimum drilling performance
- Reduced time and effort

Cured-on, high-quality EPDM sealing washer

ASSY screw

AW drive

For 3.9/4.2/4.8 mm Ø

General construction permit Z-14.4-634

For use with wood and gypsum material boards and cement-bound mineral construction material boards with thin-walled steel profiles.

The recommendation for the maximum wood thickness l_H was calculated with reference to the maximum attachment thickness l_U of the substructure.

Wing-pias® must be appropriately tested for usability for each application case. Only install using equipment with depth stop and claw coupling.

Scaffolding screw

Incl. hexagon nut with collar

- Yellow galvanised steel (A2C)
- Strength class 5.8

Material	Steel
Surface	Zinc plated yellow
Thread type x nominal diameter (d ₁)	M14
Length (l ₁)	70 mm

External drive (s ₁)	Art. no.	P. Qty.
WS19	0228 914 70	50
WS22	0228 914 71	50

Distance assembly kit

For the quick and easy installation of trapezoidal and corrugated light panels on wooden substructures

- Can be completely assembled from one side
- Minimal effort thanks to pre-assembled sealing washer and spacer
- Therefore 50% time savings in assembly

Min. profile thickness	1 mm
Material of the screw	Stainless steel A2
Surface of the screw	Plain
Material of the sleeve	PA - Polyamide
Gasket material	Ethylene propylene diene terpolymer rubber

12 mm	0217 912	1

Self-tapping screw with bugle head

DIN 7500-1, large head, case-hardened steel (-O-), zinc flake silver, TXplus

- Pre-drill floor panel (wood or multi-layer panel or similar) with a diameter of at least 9 mm
- Countersink the holes in the floor panel according to the large countersunk head of the screw or set countersinking depth
- Pre-drill the steel substructure for the M8 thread groove and select the drill diameter according to the material strength and thickness (recommended dia. 7.2 mm)

Thread type x nominal diameter (d ₁)	M8
Head diameter (d _k)	22.5 mm
Head height (k ₁)	6 mm
Standards	DIN 7500-1
Material	Steel

Continuation **Self-tapping screw with bugle head**

Surface	Flake zinc silver
Head type	Bugle head
Internal drive	TXP40
Thread type	Metric thread
Guideline values for hole diameters	7.2 mm
RoHS-compliant	Yes

Length (l ₁)	Art. no.	P. Qty.
50 mm	0209 920 850	100
55 mm	0209 920 855	100
60 mm	0209 920 860	100

The grooving tip is not suitable for mounting. Grooving tip length is 5XP (P = thread pitch, at diameter M8 P = 1.25 mm).

Self-tapping screw with bugle head

DIN 7500-1, large head, case-hardened steel (-O-), zinc flake black, TXplus

- Pre-drill floor panel (wood or multi-layer panel or similar) with a diameter of at least 9 mm
- Countersink the holes in the floor panel according to the large countersunk head of the screw or set countersinking depth
- Pre-drill the steel substructure for the M8 thread groove and select the drill diameter according to the material strength and thickness (recommended dia. 7.2 mm)

Thread type x nominal diameter (d ₁)	M8
Head diameter (d _h)	22.5 mm
Head height (k ₁)	6 mm
Standards	DIN 7500-1
Material	Steel
Surface	Flake zinc black
Head type	Bugle head
Internal drive	TXP40
Thread type	Metric thread
Guideline values for hole diameters	7.2 mm
RoHS-compliant	Yes

Length (l ₁)	Art. no.	P. Qty.
50 mm	0209 921 850	100
55 mm	0209 921 855	100
60 mm	0209 921 860	100

The grooving tip is not suitable for mounting. Grooving tip length is 5XP (P = thread pitch, at diameter M8 P = 1.25 mm).

GEFU® thread-rolling screw with Taptite 2000® thread, pan head with cross recessed

DIN 7500-1 (dimensions according to ISO 7045), shape CE, with case-hardened (-O-) galvanised steel, blue passivated (A2K) with anti-friction coating

- Non-cutting thread formation
- TRILOBULAR shape of the core diameter combined with the radius profile of the thread flanks
- Large thread flank overlap
- Strain-hardened receiving thread (nut thread)
- Play-free and self-locking thread seating
- The formed thread corresponds to a standard metric thread

Standards	DIN 7500-1
Material	Steel, case-hardened
Surface	Zinc plated
RoHS-compliant	Yes

The suitability of the GEFU for the application or component in question must be determined through preliminary testing. Guideline values for suitable hole diameters are specified in DIN 7500-2.

WÜPLAST® pan head screw with Z Phillips head

WN 1412, galvanised steel 10.9, transparent coated (A3K) for thermo-plastic materials

30° angle

- Greater flank overlap

Thread pitch

- Material preservation

Reset core diameter

- Low screw-in torques

High-quality surfaces

Material	Steel
Property class	10.9
Surface	Zinc plated
RoHS-compliant	Yes

WÜPLAST screws only conform to strength class 10.9 as defined in DIN EN ISO 898-1 to a limited extent, since the screw geometry does not allow all requirements to be tested and applied in accordance with the above standard.

Lock washer, washer and nut assortment

**2400 pieces in system case 4.4.1. Zinc-plated steel,
blue passivated (A2K)**

Scope of delivery:

- Hexagon nuts, ISO 4032, strength class 8
- Washers, ISO 7089 in 200HV
- Washers, ISO 7093 in 200HV
- Lock washer, DIN 127

Material	Steel
Surface	Zinc plated
RoHS-compliant	Yes

ORSY

Product weight (per item)	6480 g
Number of pieces in assortment/set	2400 PCS

Art. no. 5964 514 900

P. Qty.: 1

Locking nut, nut and washer assortment

1700 pieces in system case 4.4.1. ISO 7040, ISO 4032, ISO 7089, steel or 200 HV for washers, zinc-plated, blue passivated (A2K)

Material	Steel
Surface	Zinc plated
RoHS-compliant	Yes
Product weight (per item)	6000 g
Number of pieces in assortment/set	1700 PCS

ORSY

Art. no. 5964 031 702

P. Qty.: 1

Sealing ring, copper, shape A

Shape A

- A copper ring can be used anywhere (except in the presence of some strong acids) due to its corrosion resistance. Via special pre-heating, the metal ring's structure softens further so that, when under pressure, it can embed itself into all the uneven areas of the parts to be screwed together.

Material	Copper
Surface	Plain
Form	A
Max. temperature resistance	300 °C

Inch

- Made of Perbunan N (nitrile rubber) PN 70 ±5
- Temperature resistance: -35°C to +120°C
- Space-saving, easy to install, reliable sealing elements.
- Resistant to all mineral oils, lubricating grease, hot water, steam, compressed air and weak acids.

ISO	3601
Design	Imperial
Material	Perbunan
Surface	Plain
Shore A hardness	70 +/- 5
Min./max. temperature resistance	-35 to 120 °C
RoHS-compliant	Yes

Continuation **O-ring, imperial**

Cover cap for hexagonal bolts and nuts

For hexagonal screws/nuts (according to DIN or ISO widths across flats)

- Colours: black, white, grey
- Material: Polyethylene (not UV-stabilised)
- Operating temperatures: -50°C to +60°C (briefly 80°C) without mechanical stress

Material	PE - Polyethylene
RoHS-compliant	Yes
Suitable for	Hexagon bolts and nuts

Colour	Suitable for screw	Suitable for width across flats (s ₁)	Outer diameter (d ₁)	Height (h ₁)	Art. no.	P. Qty.

Screw cap for number plate screw

For number plate screws

- Material: High-density polyethylene
- The cap is pressed on in the same way as pushing a button
- Additional, more effective rust protection for galvanic treatment
- Water, oil and alkali-resistant
- Prevents contamination of the screw slots and injuries due to the sharp-edged screw heads

Material	Plastic
RoHS-compliant	Yes
Outer diameter (d ₁)	11.5 mm
Height (h ₁)	5 mm

Screw plug GPN 700, for metric thread

GPN 700, polyethylene (PE-HD), yellow

Other standard	GPN 700
Material	HDPE - High density polyethylene
Colour	Yellow
Min./max. temperature resistance	-40 to 80 °C
Max. short-term temperature resistance	100 °C

Screw plug GPN 710, for pipe thread

GPN 710, polypropylene (PP), black

Thread type x nominal diameter (d ₁)	G2
Outer diameter (d ₂)	72 mm
Height (h ₁)	25 mm
Insertion depth (h ₂)	12 mm
Width across flats (s ₁)	27 mm

Other standard	GPN 710
Material	PP - Polypropylene
Colour	Black
Min./max. temperature resistance	-20 to 100 °C
Max. short-term temperature resistance	130 °C

Art. no. 0598 710 2

P. Qty.: 50

Pipe protective cap WP 250

Polyethylene, yellow

Particularly suitable for straight pipes

Hose clamp with corrugated spring

For applications with high pressure and temperature fluctuations

Corrugated spring on strap interior

- Self-tightening action
- Increased water tightness, even with high pressure and temperature fluctuations

Asymmetrical housing

- Even distribution of force
- Clamp head does not tilt away during tightening

Smooth, embossed inside of band with rounded edges

Prevents injuries and hose damage.

Turnbuckle

For creating hose clamps with custom sizes and shapes in conjunction with universal tensioning strap

Material of the buckle	Stainless steel A2, 1.4310
Material of the screw	Steel
Surface of the screw	Zinc plated
Internal drive	Z2
Width across flats	1/4 inch

Art. no. 0547 000 11

P. Qty.: 25

Universal tensioning strap

For creating hose clamps with custom sizes and shapes in conjunction with turnbuckle

Material of the tensioning strap	stainless steel A2
Surface	Plain
Width	8 mm
Length	5 m

Art. no. 0547 000 10

P. Qty.: 1

Spring band clamp Standard

Spring steel, zinc flake

Width of band	12 mm
DIN	3021
Material	Spring steel
Surface	Flake zinc
Colour	Black
RoHS-compliant	Yes
Corrosion protection period	720 h
Form	A

Hose clamp Rapid

With quick release fastener

Quick-release fastener (from clamping range 25–40 mm)

Quick and easy pre-assembly thanks to „ratchet effect“

Strap perforation cover/turned-up edges

Prevents injury and hose damage

Long hexagonal

Secure guide during assembly, even when out of view

Material of the clamp band	Stainless steel A2
Material of the housing	Stainless steel A2
Material of the screw	Steel
Surface of the screw	Zinc/nickel plating
Width of band	14.3 mm

Min./max. grip range	Art. no.	P. Qty.
12-22 mm	0547 312 022	25
16-27 mm	0547 316 027	25
20-32 mm	0547 320 032	25
25-40 mm	0547 325 040	25
35-50 mm	0547 335 050	25
40-60 mm	0547 340 060	10
50-70 mm	0547 350 070	10
60-80 mm	0547 360 080	10

Min./max. grip range	Art. no.	P. Qty.
70-90 mm	0547 370 090	10
80-100 mm	0547 380 100	10
90-110 mm	0547 390 110	10
100-120 mm	0547 300 120	10
110-130 mm	0547 310 130	10
130-150 mm	0547 330 150	10
150-170 mm	0547 350 170	10
160-180 mm	0547 360 180	5
190-210 mm	0547 390 210	5

Fuel hose clamp Power

High tightening torque

Higher tightening torque than conventional hose clamps, recommended 3.5 Nm

Cannot be over-tightened by hand

Asymmetrical housing

- Even distribution of force
- Clamp head does not tilt away during tightening

Smooth, embossed inside of band with rounded edges

Prevents injuries and hose damage

Material of the clamp band	Stainless steel A2
Surface of the clamp band	Plain
Material of the screw	Ferritic steel F1
Surface of the screw	Tin plated
Material of the housing	Ferritic steel F1
Surface of the housing	Tin plated
Width of band	9 mm

Min./max. grip range	Art. no.	P. Qty.
8-12 mm	0539 28 12	100
10-16 mm	0539 210 16	100

Hose clamp Mini

For minimally-stressed hoses in tight installation conditions

Material of the clamp band	Stainless steel A2
Surface of the clamp band	Plain
Material of the screw	Steel
Surface of the screw	Zinc plated
Material of the housing	Steel
Surface of the housing	Zinc plated
Width of band	5 mm

Continuation **Hose clamp Mini**

Min./max. grip range	Art. no.	P. Qty.
7-11 mm	0541 7 11	50/100
11-19 mm	0541 9 16	50/100

Screwless hose clamp

Low installation height

Low installation height, small clamping range

Precise assembly even in the narrowest spaces

Smooth inside of band, rounded edges

Prevents injuries and hose damage

Material	Stainless steel A2, 1.4301
Surface	Plain

Width of band	Suitable for min./max. external diameter (D _e)	Nominal width (d1)	Colour	Art. no.	P. Qty.

Joint bolt clamp Type C1, W2

Joint bolt clamp in accordance with DIN 3017 shape C1, W2

Material of the clamp band	Ferritic steel F1
Surface of the clamp band (11)	Plain
Material of the screw	Steel
Surface of the screw	Zinc plated

Width of band (A)	Min./max. grip range	Art. no.	P. Qty.
18 mm	19-21 mm	0537 19 21	50
25 mm	104-112 mm	0537 104 112	25

Hose clamp with clamping jaw

For connections with high and even contact pressure

Powerful clamping jaw design

- High clamping force
- High density

Material	Steel
Surface	Zinc plated

Pipe and fastening clamp Multifix

The fastening clamp with rubber profile

Reinforced tabs

The support washers prevent the tabs from tearing under extreme mechanical stress

Rubber profile

- Vibration protection
- Protection against seepage
- Sound absorbing
- Good resistance to friction, alcohol, acids, and bases

Standards	DIN 3016
Material	Steel

Continuation **Pipe and fastening clamp Multifix**

Tensioning and cutting tool

Drop-forged tool that can exert a tensile force of up to 10 kN on the tensioning strap.

Art. no. 0529 5

P. Qty.: 1

Blind rivet, flat head

Sleeve: Al-Mg aluminium 2.5. Mandrel: Galvanised steel, blue passivated (A2K)

- High-quality rivet connection
- Clean, secure closing
- Reliable, patented riveting mandrel locking mechanism
- Consistently high tensile strength and shearing resistance
- High-strength rivet connections; impact-resistant and impermeable to spray water
- No kinking of rivet body with small nominal clamping range

Material of the sleeve	Aluminium, AlMg 2.5
Material of the mandrel	Steel
Surface of the sleeve	Plain
Surface of the mandrel	Zinc plated

Plastic blind rivet

For reaffixing internal trims in vehicles without any problems when plastic threaded screws have been torn out.

Easy mounting

With plastic blind rivet pliers.

Corrosion-free

Does not conduct electricity

Painted surfaces are not damaged.

Material

Rivet sleeve made from PA, rivet bolt made from POM, black.

Colour	Black

Plastic blind rivet Type 1

Rivet pin, rounded

- Easy assembly with a blind rivet tool
- Corrosion-free, protects against contact corrosion
- Non-conductive connection option
- Allows attachments to cavities

Drill hole diameter	6 mm
Min./max. attachment thickness	2.8-5 mm
Sleeve diameter	5.8 mm
Sleeve length	19 mm
Head diameter	20 mm
Head height	2.7 mm

Expanding nut Type 1

Suitable for round holes

- One-sided assembly, hence nut locking function
- Cannot be twisted
- Corrosion resistant
- High retention force and secure seat in the component
- Flange can serve as a spacer
- No direct contact between sheet metal and screw
- Can be used again after removal

Screw rivet Type S

Open

- Forms rivet systems capable of adjustment that can be loosened again simply.
- The screw is knocked or turned into the rivet body for installation.
- A screwdriver is used to remove.

Wire cable – C2C

Wire cable on lightweight plastic reels. Always the correct length in any installation situation.

- Cross-section 7 x 7
- Fast, tool-free installation using the wire cable holder

Material	Steel
Surface	Zinc plated

Permissible load	Length (L ₀)	Product weight (per item)	Wire cable diameter	Art. no.	P. Qty.
350 N	50 m	9.54 g	1.5 mm	5255 000 510	50
350 N	150 m	9.66 g	1.5 mm	5255 000 512	150
700 N	50 m	25.76 g	2.5 mm	5255 000 520	50
700 N	150 m	25.7 g	2.5 mm	5255 000 522	150
1150 N	100 m	37 g	3 mm	5255 000 525	100

Wire cable with 90° eyelet ending

For simplified installation and calibration. No preparation necessary.

- Cross-section 7 x 7, wire cable diameter 2 mm
- Increased vibration protection in comparison to threaded rod
- Can be installed at an angle without mounting rails

Length of wire cable ends (L)	38 mm
Width (B)	12 mm
Height (H)	25 mm
Material thickness (t)	3 mm
Eyelet diameter (ØD ₁)	7.5 mm
Permissible load	550 N
Material	Steel
Wire cable diameter	2 mm
Surface	Zinc plated

Continuation **Wire cable with 90° eyelet ending**

Wire cable length	Product weight (per item)	Art. no.	P. Qty.
1 m	33 g	5255 000 631	10
3 m	66.2 g	5255 000 633	10
5 m	95 g	5255 000 635	10

Wire cable with ending and trapezoidal plate hook

For simplified installation and calibration. No preparation necessary.

- Cross-section 7 x 7, wire cable diameter 2 mm
- Increased vibration protection in comparison to threaded rod
- Can be installed at an angle without mounting rails

Length of wire cable ends (L)	60 mm
Hook diameter 2 (ØD)	5 mm
Height (H)	24 mm
Permissible load	550 N
Material	Steel
Wire cable diameter	2 mm
Surface	Zinc plated

Wire cable length	Product weight (per item)	Art. no.	P. Qty.
1 m	31.9 g	5255 000 601	10
3 m	64.2 g	5255 000 603	10
5 m	98.9 g	5255 000 605	10

Wire cable ending with male thread M8

For simplified installation and calibration. No preparation necessary.

- Cross-section 7 x 7, wire cable diameter 2 mm
- Increased vibration protection in comparison to threaded rod
- Can be installed at an angle without mounting rails

Length of wire cable ends (L)	70 mm
Permissible load	550 N
Material	Steel
Length (L _G)	45 mm
Connection thread (AG)	M8

Wire cable diameter	2 mm
Surface	Zinc plated

Wire cable length	Product weight (per item)	Art. no.	P. Qty.
1 m	39.8 g	5255 000 611	10
3 m	71.5 g	5255 000 613	10
5 m	105.2 g	5255 000 615	10

Wire cable with ending and hook

For simplified installation and calibration. No preparation necessary.

- Cross-section 7 x 7, wire cable diameter 2 mm
- Increased vibration protection in comparison to threaded rod
- Can be installed at an angle without mounting rails

Length of wire cable ends (L)	75 mm
Hook diameter 2 (ØD)	6.3 mm
Hook diameter (ØD _h)	8 mm
Permissible load	550 N
Material	Steel
Wire cable diameter	2 mm
Surface	Zinc plated

Wire cable length	Product weight (per item)	Art. no.	P. Qty.
1 m	46.8 g	5255 000 621	10
3 m	77.5 g	5255 000 623	10
5 m	112.3 g	5255 000 625	10

Bracket, double-tabbed

For empty pipes

Elongated hole length (LL)	4.7 mm
Elongated hole width (LB)	6 mm
Material	Steel
Surface	Sendzimir galvanized

Continuation **Bracket, double-tabbed**

Suitable for pipe external diameter (ØD)	Hole distance (LA)	Width of band (B)	Thickness of tape (t)	Length (L)	Art. no.	P. Qty.

Transportation anchor

With chain link and stop on the cross bar. An expert opinion is available for the transport anchor system with the ASSY 4 Combi T transport anchor bolt or ASSY 3.0 combination screw.

The ASSY transport anchor enables all types of wooden components to be lifted safely and easily

Max. load capacity	1.3 t
Surface	Zinc plated
Length of stirrup piece (c)	165 mm
Internal width (f)	40 mm

Art. no. 0184 000 13

P. Qty.: 2

Please consider the legal instruction at the beginning of this chapter.

Please consider the legal instruction at the beginning of this chapter.

Complies with the machinery directive (89/392/EEC) in version 93/44/EEC.

Maintenance:

- The transportation anchor must be inspected by an expert/safety representative of the company using the product at least once a year. In addition to damage of any kind, the degree of wear must also be determined in particular.
- Modifications and repairs, in particular those involving welding elements to the transportation anchor, are not permitted!
- For safety reasons, the screws must only be used once.

Stud with small head

DIN 1434, galvanised steel, blue passivated (A2K)

Standards	DIN 1434
Material	Steel
Surface	Zinc plated

Hollow section fastener BoxBolt®

A4 stainless steel, with CE marking

The mechanical material properties of the screws correspond to strength class 70 in accordance with DIN EN ISO 3506-1

Material	Stainless steel A4
Surface	Plain
RoHS-compliant	Yes

Continuation **Hollow section fastener BoxBolt®**

Thread type x nominal diameter	Screw length (l)	Width across flats (S)	Width across flats, sleeve (S _{HÜ})	Sleeve dia- meter (d _{HÜ})	Art. no.	P. Qty.

Please consider the legal instruction at the beginning of this chapter.

ETA 15/0768

Never exceed the permissible working loads. Before using hollow section fasteners, always check that the steel structure can withstand the required loads.

Hollow profile fastener BoxBolt® HDG

Steel, hot-dip galvanised, with CE marking

The mechanical material properties of the screws correspond to strength class 8.8 in accordance with DIN EN ISO 898-1

Material	Steel
Surface	Hot dip galvanized
RoHS-compliant	Yes

Window sill screw pias®

Stainless steel A2

AW drive

- Improved power transmission
- Longer service life
- Optimal centring
- Zero come-out

Polyamide disk

- UV-stabilized; discolouration and embrittlement of the disk is minimized.
- Disk will not crack while screw is being screwed in.

Nominal diameter (d ₁)	4.2 mm
Washer diameter (d ₂)	12 mm
Length (l ₁)	20 mm
Head diameter (d _k)	7.95 mm
Washer thickness (h ₁)	2 mm
Drill tip length (l _p)	3 mm
Head height (k ₁)	2.8 mm
Drill tip diameter	2.8 mm

Continuation **Window sill screw pias®**

Internal drive	AW20
Material	Stainless steel A2
Surface	Plain

Art. no. 0211 724 220

P. Qty.: 500

Maximum thickness of aluminium: 2.5 mm

Use only screwdrivers with depth stop

Window sill screw

Tapping screw thread, stainless steel A2

AW drive

- Improved power transmission
- Longer service life
- Optimal centring
- Zero come-out

Polyamide disk

- UV-stabilized; discolouration and embrittlement of the disk is minimized.
- Disk will not crack while screw is being screwed in.

Material	Stainless steel A2
Material of the washer	PA - Polyamide
Surface	Plain
RoHS-compliant	Yes
Nominal diameter (d ₁)	3.9 mm
Washer thickness (h ₁)	2 mm
Washer diameter (d ₂)	12 mm
Head diameter (d _h)	7.9 mm
Head height (k ₁)	2.8 mm
Internal drive	AW20

Length (l ₁)	Art. no.	P. Qty.
16 mm	0126 283 916	500
25 mm	0126 283 925	500

Window sill screw A2

Coarse thread, stainless steel A2

AW drive

- Improved power transmission
- Longer service life
- Optimal centring
- Zero come-out

Polyamide disk

- UV-stabilized; discolouration and embrittlement of the disk is minimized.
- Disk will not crack while screw is being screwed in.

Material	Stainless steel A2
Material of the washer	PA - Polyamide
Surface	Plain
RoHS-compliant	Yes
Nominal diameter (d_1)	3.9 mm
Washer thickness (h_1)	2 mm
Washer diameter (d_2)	12 mm
Head diameter (d_k)	7.9 mm
Head height (k_1)	2.8 mm
Internal drive	AW20

Continuation **Window sill screw A2**

Safety screw

Galvanised steel, blue passivated, dowel thread

For the secure attachment of protective screens, cellar grills and similar items.

Material:

Galvanised steel, blue coated

Head shape:

Decorative head with AW 40 drive and sealing plug

With plug screw thread

Suitable for Würth frame anchor TYPE WE and WD

Nominal diameter (d ₁)	7 mm
Head diameter (d _h)	17 mm
Head height (k ₁)	4.5 mm
Material	Steel

Surface	Zinc plated
Internal drive	AW40

Length (l ₁)	Art. no.	P. Qty.
85 mm	0265 27 85	25
105 mm	0265 27 105	25
120 mm	0265 27 120	25

Bit 1/4 AW 40 and sealing plugs are included in every package.

Safety screw

Stainless steel A2, plain, dowel thread

For the secure attachment of protective screens, cellar grills and similar items.

Material:

A2 stainless steel

Head shape:

Decorative head with AW 40 drive and sealing plug

With plug screw thread

Suitable for Würth frame anchor TYPE WE and WD

Nominal diameter (d ₁)	7 mm
Head diameter (d _k)	17 mm
Head height (k ₁)	4.5 mm
Material	Stainless steel
Surface	Plain
Internal drive	AW40

Length (l ₁)	Art. no.	P. Qty.
85 mm	0265 57 85	25
105 mm	0265 57 105	25

Bit 1/4 AW 40 and sealing plugs are included in every package.

Safety screw

Galvanised steel, blue coated, wood screw thread

For the secure attachment of protective screens, cellar grills and similar items.

Material:

Galvanised steel, blue coated

Head shape:

Decorative head with AW 40 drive and sealing plug

With wood screw thread similar to DIN 571

Head height (k ₁)	4.5 mm
Internal drive	AW40
Material	Steel
Surface	Zinc plated
RoHS-compliant	Yes

Continuation **Safety screw**

Safety screw

Stainless steel A2, bare, wood screw thread

For the secure attachment of protective screens, cellar grills and similar items.

Material:

A2 stainless steel

Head shape:

Decorative head with AW 40 drive and sealing plug

With wood screw thread similar to DIN 571

Head height (k ₁)	4.5 mm
Internal drive	AW40
Material	Stainless steel
Surface	Plain
RoHS-compliant	Yes

Nominal diameter (d ₁)	Length (l ₁)	Head diameter (d _k)	Art. no.	P. Qty.
7 mm	50 mm	17 mm	0265 67 50	25
10 mm	85 mm	19 mm	0265 610 85	25

Bit 1/4 AW 40 and sealing plugs are included in every package.

Washer with round hole, mainly for wood construction

DIN 440 galvanised steel, blue coated (A2K)

Material	Steel
Vickers hardness, HV	100 HV
Surface	Zinc plated
RoHS-compliant	Yes
Form	R

Suitable for screw thread	Internal diameter (d ₁)	Outer diameter (d ₂)	Thickness (h ₁)	Art. no.	P. Qty.

Locking disc spring washer Type M

Plain A4 stainless steel

- Type M: for high-strength connections with normal head contact
- A4 stainless steel, material number 1.4401
- Spring force for friction-fit connection
- Specially embossed surface for form-fit connection
- Reusable
- Protects the counter surface from damage (washer does not turn during installation)
- Minimal tightening torque distribution
- Universal application, e.g. also suitable for slot fastening and sheet-metal screw joints

Material	Stainless steel A4
Surface	Plain
RoHS-compliant	Yes
Form	M
Suitable for	High-strength bonds with normal head contact

Suitable for screw thread	Internal diameter (d ₁)	Outer diameter (d ₂)	Height (h ₁)	Thickness (s ₁)	Art. no.	P. Qty.
M4	4.1 mm	10.2 mm	1.3 mm	1 mm	0404 4	100/1000

M14	14.4 mm	30.25 mm	3.3 mm	2.4 mm	0404 14	100
M16	16.4 mm	32.5 mm	3.75 mm	2.5 mm	0404 16	100

The extremely reliable positive locking effect against unscrewing has been verified through the application of a dynamic load (vibration) across the screw axis in many practical tests.

Locking disc spring washer Type Z

Plain A4 stainless steel

- Type Z: for cheese head screws and hexagon socket screws
- A4 stainless steel, material number 1.4401
- Spring force for friction-fit connection
- Specially embossed surface for form-fit connection
- Reusable
- Protects the counter surface from damage (washer does not turn during installation)
- Minimal tightening torque distribution
- Universal application, e.g. also suitable for slot fastening and sheet-metal screw joints

Material	Stainless steel A4
Surface	Plain
RoHS-compliant	Yes
Form	Z
Suitable for	Cylinder head and hexagon head bolts with normal head contact

Suitable for screw thread	Internal diameter (d ₁)	Outer diameter (d ₂)	Height (h ₁)	Thickness (s ₁)	Art. no.	P. Qty.
M6	6.1 mm	9.9 mm	1.6 mm	1.4 mm	0404 06	100/500

Heavy-duty fixings (metal dowel for tensile zone)	873

Plastic multi-purpose dowel SHARK® Pro

The most versatile plastic anchor. Knots into cavities, expands in solid materials

- Ensures knotting in all cavities and spreading in all solid materials
- Quick and easy installation
- Resistant to rotting, weathering and ageing

Anchor diameter	Anchor length (l)	Min. required screw diameter	Embedding depth (h s)	Nominal drill-bit diameter (d 0)	Art. no.	P. Qty.

Plastic multi-purpose Zebra Shark® anchor without collar

Universal anchor for fixtures in almost all building materials (low load range)

- Fully resistant to rotting, weathering and ageing
- Pre-formed thread means low insertion torque for WÜPOFAST screw
- Longitudinal locking edges prevent rotation
- A single screw diameter can be used, regardless of the application
- Expanding segments knot together or fold out for positive locking in perforated brick/cavity walls
- Pre-formed thread in head
- Three-way division for anchorage via positive locking or friction locking
- Wings act as anti-rotation device in solid or hollow block brick
- For mounting, we recommend the ASSY-D plug screw

Nylon anchor

Plastic anchors for light loads (secondary attachments)

- High-quality polyamide (nylon)
- Halogen and silicon free
- Temperature resistant from -40°C to +80°C
- The hammer-in stop prevents premature expansion during push-through installation
- The twist lock prevents turning in the drill hole
- Wall plug shaft with no expansion pressure prevents damage to plaster and tiles
- Push-through and cotter-pin installation
- For mounting, we recommend the ASSY-D plug screw

Anchor diameter	Anchor length (l)	Embedding depth (h nom)	Nominal drill-bit diameter (d 0)	Required wood screw diameter (d scr.wood)	Art. no.	P. Qty.
5 mm	25 mm	25 mm	5 mm	2.5 - 4 mm	0903 5 25	100/1000

20 mm	90 mm	90 mm	20 mm	16 mm	0903 20 90	5

- Drill perforated brick using the rotary drill (without striking tool)
- The drill cuttings must be removed from the drill hole
- Screw length = attachment thickness (+plaster/insulation thickness) + anchor length + screw diameter

Nail anchor SHARK® Hammer type FK A2

With fast assembly and proven performance, this product offers an all-round solution for fastening light loads using push-through installation. Wall plug body with flat collar nail made from A2 stainless steel

- Quick, cost-effective installation
- Can be removed via drive in screw head
- Pre-assembled with matching screw

Anchor diameter	6 mm
Anchor length (l)	40 mm
Max. attachment height (t fix)	10 mm
Embedding depth (h nom)	30 mm
Nominal drill-bit diameter (d 0)	6 mm
Surface	Plain

Art. no. 5906 346 40

P. Qty.: 100

Nail anchor SHARK® Hammer type PK A2

With fast assembly and proven performance, this product offers an all-round solution for fastening light loads using in-place installation. Wall plug body with mushroom collar, nail made from A2 stainless steel

- Quick, cost-effective installation
- Can be removed via drive in screw head
- Pre-assembled with matching screw
- Ideal for slots thanks to large contact surface

Anchor diameter	6 mm
Anchor length (l)	40 mm
Max. attachment height (t fix)	10 mm
Embedding depth (h nom)	30 mm
Nominal drill-bit diameter (d 0)	6 mm
Surface	Plain

Art. no. 5906 366 40

Nail anchor

For dry walling, with zinc-plated steel nail

Quick, cost-effective installation

Pre-assembled — no need to search for the right screw

Also suitable for ducts

Can be removed via drive in screw head

Properties

- UV-resistant
- Plastic anchors made of high-quality polyamide – resistant to mould
- Heat resistant -40 to +150°C
- Halogen- and silicone-free

Anchor diameter	6 mm
Anchor length (l)	30 mm
Max. attachment height (t fix)	5 mm
Embedding depth (h nom)	30 mm
Nominal drill-bit diameter (d 0)	6 mm

Art. no. 0903 760 300

P. Qty.: 1000

Securing sleeve

For quick and economic mounting of light attachment parts in all solid materials, galv. steel

- Quick, easy installation
- Hardened spring steel
- Can be loaded immediately

50 mm	0945 48 50	200

Size 6.4 x 40 cannot be stored in ORSY

Brass anchor

Female thread with metric thread as an inexpensive alternative for outdoor use, for concrete and solid brick

- Brass female thread anchor
- Knurled surface for good holding power
- Screwing in a screw/threaded rod with a metric thread expands the anchor and fixes it in the anchoring base
- Corrosion resistant
- Minimal anchorage depth
- Minimal edge and axial clearance
- Suitable for push-through and cotter-pin installation
- Used without a setting tool
- Cost-effective attachment for outdoor use

Internal diameter	Anchor length (l)	Embedding depth (h s)	Drill hole depth (t)	Nominal drill-bit diameter (d 0)	Art. no.	P. Qty.

Sound protection anchor W-SSD, type MB

For fixtures with noise protection requirements, with collar

- Structure-borne sound insulation for reduced noise levels
- Reduces the amount of structure-borne sound transmitted and conducted into the structure
- Excellent screw guidance, no breaking out at the side
- Very good holding power
- High static friction
- Immediate load-bearing capacity after insertion – no waiting
- Weather resistant
- UV resistant
- Salt water resistant
- Thermally stable from -40°C to +100°C
- Halogen free
- Chemical resistant
- Free of substances containing silicone

Type description	W-SSD
Design	With collar

Spacer installation system Amo[®]-Max spacer

Used to introduce the loads through the insulation into the substrate during assembly with Amo[®]-Max spacer installation system

- High-quality aluminium (AlMgSiF 28)
- Resistant to rotting, weathering and ageing
- For use in cotter-pin installation
- For universal use, as combinable with various anchor systems depending on substrate
- Flexible adjustment of mounting height with different spacing disks
- The AMO-Max system can be disassembled

Outer diameter (Ø)	40 mm
Material	Aluminium

Compensation thickness	Art. no.	P. Qty.
60 mm	0911 100 060	10
80 mm	0911 100 080	10
100 mm	0911 100 100	10

200 mm	0911 100 200	10

Test reports 031-02 and 05-141

Spacer installation system Amo[®]-Max plastic sleeve

For Amo[®]-Max spacer installation system

- For universal use, as combinable with various anchor systems depending on substrate
- Flexible adjustment of mounting height with different spacing disks
- For use in cotter-pin installation
- The AMO-Max system can be disassembled.

Made of glass-fibre reinforced plastic (polyamide PA6)

- Impact-resistant, abrasion resistant and vibration damping
- Good resistance to oils and greases
- Resistant to rotting, weathering and ageing
- Temperature resistant from -30°C to +100°C

Material	PA - Polyamide

16.5 mm	0911 111 016	25

Test reports 031-02 and 05-141

Spacer installation system Amo[®]-Max spacer disc

To compensate for the plaster layer during assembly with Amo[®]-Max spacer installation system

- For universal use, as combinable with various anchor systems depending on substrate
- Flexible adjustment of mounting height with different spacing disks
- For use in cotter-pin installation
- The AMO-Max system can be disassembled.

Made of glass-fibre reinforced plastic (polyamide PA6)

- Impact-resistant, abrasion resistant and vibration damping
- Good resistance to oils and greases
- Resistant to rotting, weathering and ageing
- Temperature resistant from -30°C to +100°C

Outer diameter (Ø)	40 mm
Material	PA - Polyamide

Spacer installation AMO®-Light

For securing lighter loads to insulated facades, for concrete and masonry. Innovative construction with nylon dowel integrated in the screw shank.

- Lower cost, since screw and anchor are supplied in a set
- Easier installation owing to quick insertion process
- Immediate load-bearing capacity – no waiting
- AMO-Light screw: Plastic anchor in screw shaft made from high-quality polyamide (Nylon)
- The add-on piece is attached to the screw shank by screwing a 4 mm chipboard screw (no drill tip, counter thread, ring thread) into the plastic anchor (the plastic anchor is in the screw shank, see detail A)

Plastic frame anchor W-UR 10

- Expands in four directions
- Very strong twist lock
- Made from high-quality polyamide (nylon) – resistant to rotting, weathering and ageing

Nominal drill hole diameter	10 mm
Embedding depth	70 mm
Drill hole depth	80 mm
Length	115 mm
Internal drive	AW40
Required particle-board screw diameter	4 mm, screw-in depth: 16-26 mm

Art. no. 0912 810 613

P. Qty.: 50

Drill perforated and hollow blocks with a rotary drill (without impact mechanism)
Drill cuttings must be removed from the drill hole

Spacer installation system AMO®-Therm

High load-bearing spacer installation system with thermal separation on insulated and non-insulated surfaces

- Quick and easy installation
- Thermal bridge-reduced element for connecting and transferring loads from the attached part to the substrate

Secure attachment with approval for high loads in a wide range of building materials

When anchoring in a substrate with the injection mortars WIT-VM 250, WIT-VM 200 and WIT PM 200

Usable lengths from 80 to 300 mm can be covered with an AMO-Therm

Individual and flexible length setting using the adapter with commercially available threaded rods with acceptance test certificate 3.1

Connection thread (1)	M12
Material of the connection thread (2)	Stainless steel A4
Length (5)	80 mm

Diameter threaded rod (3)	Art. no.	P. Qty.
M12	0913 000 012	20
M16	0913 000 016	20

Spacer installation system AMO®-Therm

Adapter ATA with threaded fitting, zinc plated steel.
High load-bearing spacer installation system with thermal separation on insulated and non-insulated surfaces.

- Quick and easy installation
- Thermal bridge-reduced element for connecting and transferring loads from the attached part to the substrate

Secure attachment with approval for high loads in a wide range of building materials

When anchoring in a substrate with the injection mortars WIT-VM 250, WIT-VM 200 and WIT PM 200

Insulation anchor with expansion nail W-DSD

For fastening hard, self-supporting insulating materials such as polystyrene or expanded plastic slabs in concrete and masonry. Design with plate dia.Ø 50 mm

- High-quality material Anchor (PP), nail (ABS)
- Temperature-resistant from -40 °C to +80 °C
- For use in in-place installation

Material of the nail	Acrylonitrile butadiene styrene
Anchor diameter	10 mm
Disc diameter	50 mm
Embedding depth (h nom)	30 mm
Drill hole depth (t)	40 mm

300 mm		Stainless steel A2	5921 018 300	200
300 mm	W-MDD	Steel	5921 008 300	200

The insulation panels must be fastened with at least 4 anchors per square metre.

Insulation screw W-IS

For attaching wood-wool panels and multilayer panels in concrete

- With white screw head (RAL 9003) and wood-wool structure, galvanised steel
- Drive: TX 30
- Push-through installation
- Immediate load-bearing capacity
- Low drill hole depth ($h_0 = 25$ mm)
- Low drill hole diameter ($d_0 = 6$ mm)
- Minimal anchorage depth
- Quick, easy installation by screwing in the insulation screw
- Virtually no expansion effect
- Easy to fully remove
- Quick, easy installation with a cordless screwdriver or tangential impact screwdriver
- Integral trim cap made of flame-retardant plastic

Head diameter	37 mm
Nominal drill-bit diameter (d 0)	6 mm
Through-hole in the component to be connected (d f)	8 mm

Length	Max. attachment height (t fix)	Art. no.	P. Qty.
50 mm	25 mm	0905 026 050	100
75 mm	50 mm	0905 026 075	100

225 mm	200 mm	0905 026 225	100
250 mm	225 mm	0905 026 250	100

Fire resistance (anchoring base: concrete C20/25): F90 = 0.015 kN, exposure to fire according to DIN 4102-02:1977-09 (uniform temperature curve)

The anchor can be used to fasten insulation materials to internal ceilings where the total weight of the thermal insulation and covering does not exceed 15 kg/m².

Insulation fixing W-DH

For mounting insulation tarpaulins or films on a wooden substructure in conjunction with a suitable wood screw (e.g. ASSY 4)

- High-quality polypropylene (PP)
- Thermally stable from -40°C to +100°C
- Quick and easy installation
- Insulation disc can be used in conjunction with a nail anchor
- Insulation disc can be attached directly to wood with a particle board screw

Type description	W-DH
Inside diameter of hole (d hole)	9 mm
Disc height (h disc)	7 mm
Countersink diameter (d count)	14 mm

Disc diameter	Art. no.	P. Qty.
50 mm	0903 780 50	100
90 mm	0903 780 90	100

Ceiling nail W-DN

Easy mounting: Plug it in, drive it flush, and done! For the mounting of ceiling suspensions or C-profiles in dry walling. For concrete, zinc-plated steel

- Small drill hole depth, small drill hole diameter
- Immediate load-bearing capacity – no waiting
- No special drills or setting tools required

Multiple attachment of non-load-bearing systems in concrete: European Technical Approval ETA-12/0029

- Dimensioned in accordance with the European Technical Approval Guidelines (ETAG) for „Metal Anchors for Use in Concrete“, Appendix C, measurement process C
- Anchorage with European Technical Approval in cracked concrete (tension zone) and non-cracked concrete (compression zone)
- The anchor has European Technical Approval for use in reinforced or unreinforced standard concrete with a strength class of min. C20/25 and max. C50/60 in accordance with EN 206-1:2000-12

Fire resistance: R30, R60, R90, R120 (anchoring base: concrete C20/25 to C50/60): Technical Report TR 020 „Evaluation of anchorages in concrete concerning resistance to fire“ (included in ETA-12/0029)

Type description	W-DN
Material	Steel
Surface	Zinc plated
Anchor diameter	6 mm
Effective anchoring depth (h ef)	32 mm
Nominal drill-bit diameter (d 0)	6 mm

Drill hole depth (h 0)	40 mm
Through-hole in the component to be connected (d f)	7 mm

Length	Max. attachment height (t fix)	Art. no.	P. Qty.
40 mm	5 mm	0905 364 5	200
70 mm	35 mm	0905 36 35	200

Quick-action ceiling anchor W-DS/S with hook

Easy to install by hand. For suspensions in concrete, zinc plated steel, version with hook

- Quick and easy to install
- Less drilling effort
- No special drill or setting tool required
- Simple insertion process: Insert by hand, pull down sharply – done
- Anchorage via friction locking – controlled expansion anchor

Art. no. 0905 363 001

P. Qty.: 100

Multiple attachment of non-load-bearing systems in concrete: European Technical Approval ETA-13/0490

- Dimensioning in accordance with the "Guideline for European Technical Approval (ETAG) for metal anchors in concrete" Appendix C, Dimensioning method C
- The anchor has European Technical Approval for use in reinforced or non-reinforced standard concrete with a strength class of min. C20/25 and max. C50/60 in accordance with EN 206-1:2000-12.
- Multiple attachment of non-load-bearing systems; Anchorage with European Technical Approval in cracked concrete (tension zone) and non-cracked concrete (compression zone)

Concrete screw W-BS Compact type ST

Easy installation with cordless drill. Avoids hitting reinforcement due to very low insertion depth. For concrete, with connecting thread, ideal for mounting pipe clamps or spacer sleeves, zinc plated steel

- Quick and easy assembly without tangential impact screwdriver
- Time and cost-saving assembly
- Can be assembled by hand

Anchor size	6 mm
Anchor length (l)	28 mm
Head type	With connection thread
Max. attachment height (t fix)	3 mm
Material	Steel
Surface	Zinc plated

Internal drive	Art. no.	P. Qty.
	5929 586 628	100
TX25	5929 586 828	100

- ETA-15/0091 for multiple attachment of non-load-bearing systems in concrete
- Fire resistance: R30, R60, R90, R120; Technical Report TR020

The W-BS Compact can be mounted by hand.

If a cordless drill is used for assembly, it is recommended that at least 5 preliminary tests are performed on location to ensure the correct screwdriver setting and to prevent overtightening of the W-BS Compact. It is recommended that you start with the screwdriver's lowest torque setting and increase it if necessary.

A tangential impact screwdriver should not be used for assembly.

Concrete screw W-BS Compact type I

Easy installation with cordless drill. Avoids hitting reinforcement due to very low insertion depth. For concrete, with female thread (M8/M10), for threaded rod suspensions, zinc plated steel

- Quick and easy assembly without tangential impact screwdriver
- Time and cost-saving assembly
- Can be assembled by hand

Anchor size	6 mm
Anchor length (l)	40 mm
Head type	Hexagon head
Max. attachment height (t fix)	15
Material	Steel
Surface	Zinc plated

Art. no. 5929 570 601

P. Qty.: 50

- ETA-15/0091 for multiple attachment of non-load-bearing systems in concrete
- Fire resistance: R30, R60, R90, R120; Technical Report TR020

The W-BS Compact can be mounted by hand.

If a cordless drill is used for assembly, it is recommended that at least 5 preliminary tests are performed on location to ensure the correct screwdriver setting and to prevent over-tightening of the W-BS Compact. It is recommended that you start with the screwdriver's lowest torque setting and increase it if necessary.

A tangential impact screwdriver should not be used for assembly.

Concrete screw W-BS Compact type LP

Easy installation with cordless drill. Avoids hitting reinforcement due to very low insertion depth. With large pan head, ideal for attaching small mounting rails to concrete, zinc plated steel

- Quick and easy installation without the need for a tangential impact screwdriver
- Time and cost-saving assembly
- Can be assembled by hand

Anchor size	6 mm
Head type	Pan head
Material	Steel
Surface	Zinc plated
Internal drive	TX30
Head diameter	17.6 mm

Anchor length (l)	Max. attachment height (t fix)	Art. no.	P. Qty.
28 mm	3 mm	5929 556 028	100
40 mm	15 mm	5929 556 040	100

- ETA-15/0091 for multiple attachment of non-load-bearing systems in concrete
- Fire resistance: R30, R60, R90, R120; Technical Report TR020

The W-BS Compact can be mounted by hand.

If a cordless drill is used for assembly, it is recommended that at least 5 preliminary tests are performed on location to ensure the correct screwdriver setting and to prevent overtightening of the W-BS Compact. It is recommended that you start with the screwdriver's lowest torque setting and increase it if necessary.

A tangential impact screwdriver must not be used for assembly.

Impact anchor W-SD

Push-through installation anchor for wood, metal and panel materials. For concrete

Stop bits must be used

Anchors and stop bits form a perfectly coordinated system. This system unit prevents installation errors and ensures attachment as stipulated in the approval.

- Installation type: Push-through installation
- Small drill hole depth (W-SD 6: 32 mm; W-SD 6L: 42 mm; W-SD 8: 43 mm)
- Low minimum component thickness ($h_{min} = 80$ mm)
- Small drill hole diameter
- Immediate load-bearing capacity – no waiting after insertion
- Easy insertion – no installation torque
- Anchorage via friction locking – distance-controlled expanding anchor

Anchor diameter	6 mm
Max. attachment height (t fix)	4 mm
Nominal drill-bit diameter (d 0)	6 mm

Anchor length (l) (l)	Type description	Art. no.	P. Qty.
38 mm	W-SD M6	0905 700 400	100
48 mm	W-SD M6L	0905 700 404	100/600

Multiple attachment of non-load-bearing systems in concrete

European Technical Approval ETA-07/0138

Dimensioned in accordance with the European Technical Approval Guidelines (ETAG) for „Metal Anchors for Use in Concrete“, Appendix C, measurement process C

Fire resistance (anchoring base: concrete C20/25 to C50/60): R30, R60, R90, R120 (W-SD M6L, W-SD M8): Technical Report TR 020 „Evaluation of anchorages in concrete concerning resistance to fire“ (included in ETA-07/0138)

**Fire protection
certified**

The partial safety factors of the resistances regulated in the approval and a partial safety factor of the effects of $\gamma_F = 1.4$ have been taken into account. Please refer to the European Technical Approval Guidelines (ETAG), Appendix C, for information on combining tensile and transverse loads, edge influence and groups of anchors.

The partial safety factors for load-bearing capacity on exposure to fire of $\gamma_{M,fi} = 1.0$ as recommended in the approval and the partial safety factor of the effects of $\gamma_F = 1.0$ have been taken into account.

Carbide masonry drills must comply with the specifications set out in the code of practice of the German institute of building technology (DIBt) and the Association of German Tool Manufacturers (FWI) on the characteristics, requirements and tests of masonry drills with carbide cutting inserts used to drill holes for fixing anchors. Würth hammer drills meet the specifications set out in the code of practice.

Stop bit SDS

For impact anchor W-SD

Type description	Drilling length up to collar (l drl)	Art. no.	P. Qty.

Würth hammer drills meet the specifications set out in the code of practice.

Nail anchor W-NA with M6 thread

Extremely easy to install: Position, hammer, done!
Ideal for mounting parts that need to be dismantled again. For concrete, with connecting thread M6, washer and nut, zinc plated steel

Quick and easy installation

- Less drilling required thanks to reduced anchorage depth of 25 mm
- Easy insertion: Simply knock in – no torque required
- No special drills or setting tools required

Very low edge and axial clearances possible

Anchor diameter	6 mm
Nominal drill-bit diameter (d 0)	6 mm
Effective anchoring depth (h ef)	30 mm
Effective anchoring depth reduced (h ef, red)	25 mm
Drill hole depth (h 0)	40 mm
Drill hole depth reduced (h 0, red)	35 mm
Minimum component thickness (h min)	80 mm
Through-hole in the component to be connected (d f)	7 mm
Material	Steel
Surface	Zinc plated

Anchor length (l)	Min./max. height of the fixture (t fix)	Art. no.	P. Qty.
44 mm	0-5 mm	0905 362 005	200
49 mm	5-10 mm	0905 362 010	200
54 mm	10-15 mm	0905 362 015	200

- Multiple attachment of non-load-bearing systems in concrete: European Technical Approval ETA-11/0339
- Fire resistance: R30, R60, R90, R120 (anchoring base: concrete C20/25 to C50/60): Technical Report TR 020 „Evaluation of anchorages in concrete concerning resistance to fire“ (included in ETA-11/0339)

The nail anchor offers the benefits of a bolt anchor while also being easy to install; the nail anchor is simply knocked into the drill hole through the attached part.

Nail anchor W-NA-K with nail head

Quick and easy installation: Position, hammer, done!
Ideal for secure mounting of ceiling suspensions, C-profiles and panels. For concrete, with nail head, zinc plated

- Quick and easy installation
- Very low edge and axial clearances possible
- Torque-controlled expanding anchor – expands when subjected to load

Anchor diameter	6 mm
Nominal drill-bit diameter (d 0)	6 mm
Effective anchoring depth (h ef)	30 mm
Effective anchoring depth reduced (h ef, red)	25 mm
Drill hole depth (h 0)	40 mm
Drill hole depth reduced (h 0, red)	35 mm
Minimum component thickness (h min)	80 mm
Through-hole in the component to be connected (d f)	7 mm
Material	Steel
Surface	Zinc plated

Anchor length (l)	Min./max. height of the fixture (t fix)	Art. no.	P. Qty.
39 mm	0-5 mm	0905 361 005	200
44 mm	5-10 mm	0905 361 010	200
69 mm	30-35 mm	0905 361 035	200
89 mm	50-55 mm	0905 361 055	100

- Multiple attachment of non-load-bearing systems in concrete: European Technical Approval ETA-11/0339
- Fire resistance: R30, R60, R90, R120 (anchoring base: concrete C20/25 to C50/60): Technical Report TR 020 „Evaluation of anchorages in concrete concerning resistance to fire“ (included in ETA-11/0339)

The nail anchor offers the benefits of a bolt anchor while also being easy to install; the nail anchor is simply knocked into the drill hole through the attached part

Nail anchor W-NA-K/A4 with nail head

Quick and easy installation: Position, hammer, done!
Ideal for secure mounting of ceiling suspensions, C-profiles and panels. For concrete, with nail head, A4 stainless steel

Fast and simple installation

- Less drilling required thanks to reduced anchorage depth of 25 mm
- Easy insertion: Simply knock in – no torque required
- No special drills or setting tools required

Push-through installation

Very low edge and axial clearances possible

Elegant, attractive design

Torque-controlled expanding anchor — expands when subjected to load

Anchor diameter	6 mm
Nominal drill-bit diameter (d 0)	6 mm
Effective anchoring depth (h ef)	30 mm
Effective anchoring depth reduced (h ef, red)	25 mm
Drill hole depth (h 0)	40 mm
Drill hole depth reduced (h 0, red)	35 mm

Minimum component thickness (h min)	80 mm
Through-hole in the component to be connected (d f)	7 mm
Material	Stainless steel A4, 1.4401
Surface	Plain

Anchor length (l)	Min./max. height of the fixture (t fix)	Art. no.	P. Qty.
44 mm	5-10 mm	0905 371 005	200
69 mm	30-35 mm	0905 371 030	200

- Multiple attachment of non-load-bearing systems in concrete: European Technical Approval ETA-11/0339
- Fire resistance: R30, R60, R90, R120 (anchoring base: concrete C20/25 to C50/60): Technical Report TR 020 „Evaluation of anchorages in concrete concerning resistance to fire“ (included in ETA-11/0339)
- Fire-tested in line with the ZTV tunnel fire curve in the cracked tension zone

The nail anchor offers the benefits of a bolt anchor while also being easy to install; the nail anchor is simply knocked into the drill hole through the attached part

Nail anchor W-NA-K/HCR with nail head

Quick and easy installation: Position, hammer, done!
Ideal for secure mounting of ceiling suspensions, C-profiles and panels. For concrete, with nail head, highly corrosion-resistant steel HCR

Fast and simple installation

- Less drilling required thanks to reduced anchorage depth of 25 mm
- Easy insertion: Simply knock in – no torque required
- No special drills or setting tools required

Push-through installation

Very low edge and axial clearances possible

Elegant, attractive design

Torque-controlled expanding anchor – expands when subjected to load

Anchor diameter	6 mm
Nominal drill-bit diameter (d 0)	6 mm
Effective anchoring depth (h ef)	30 mm
Effective anchoring depth reduced (h ef, red)	25 mm
Drill hole depth (h 0)	40 mm
Drill hole depth reduced (h 0, red)	35 mm
Minimum component thickness (h min)	80 mm
Through-hole in the component to be connected (d f)	7 mm
Material	High corrosion-resistant steel, 1.4529 X1NiCrMoCuN25-20-7
Surface	Plain

Anchor length (l)	Min./max. height of the fixture (t fix)	Art. no.	P. Qty.
44 mm	0-5 mm	0905 381 005	200
69 mm	30-35 mm	0905 381 030	200

- Multiple attachment of non-load-bearing systems in concrete: European Technical Approval ETA-11/0339
- Fire resistance: R30, R60, R90, R120 (anchoring base: concrete C20/25 to C50/60): Technical Report TR 020 „Evaluation of anchorages in concrete concerning resistance to fire“ (included in ETA-11/0339)
- Fire-tested in line with the ZTV tunnel fire curve in the cracked tension zone

Not possible to order S-24!

The nail anchor offers the benefits of a bolt anchor while also being easy to install; the nail anchor is simply knocked into the drill hole through the attached part

Nail anchor W-NA-M with threaded rods M8/M10

Ideal for suspensions with M8 or M10 threaded rods (step thread). For concrete, zinc-plated steel

Fast and simple installation

- Less drilling required thanks to reduced anchorage depth of 25 mm
- Easy insertion: Simply knock in – no torque required
- No special drills or setting tools required

Push-through installation

Compatible with both M8 and M10 threaded rods thanks to step thread

Very low edge and axial clearances possible

Torque-controlled expanding anchor – expands when subjected to load

Anchor diameter	6 mm
Min./max. height of the fixture (t fix)	0-0 mm
Nominal drill-bit diameter (d 0)	6 mm
Minimum component thickness (h min)	80 mm
Through-hole in the component to be connected (d f)	9 mm
Material	Steel
Surface	Zinc plated

Anchor length (l)	Effective anchoring depth (h ef)	Effective anchoring depth reduced (h ef, red)	Drill hole depth (h 0)	Drill hole depth reduced (h 0 red) (Drill hole depth reduced (h 0, red))	Art. no.	P. Qty.

63 mm	30 mm	25 mm	40 mm	35 mm	0905 361 009	100

- Multiple attachment of non-load-bearing systems in concrete: European Technical Assessment ETA-11/0339
- Fire resistance: R30, R60, R90, R120 (anchoring base: concrete C20/25 to C50/60): Technical Report TR 020 „Evaluation of anchorages in concrete concerning resistance to fire“ (included in ETA-11/0339)

The nail anchor offers the benefits of a bolt anchor while also being easy to install; the nail anchor is simply knocked into the drill hole through the attached part.

Metal cavity anchor W-MH/L pan head screw

The proven solution for easy and secure fastening in all types of cavity walls. For setting with manual assembly pliers

- Excellent holding power due to spreading supporting elements with large contact radius
- Simple setting with associated mounting pliers
- Pre-assembled with metric pan head screw

Type description	W-MH/L
Design	With pan head screw
Material	Steel
Surface	Zinc plated

With ratchet-function	200	0903 201	1

Spring-loaded anchor Type W-FK

For attachments to cavity walls or false ceilings, suitable for various panel thicknesses and large usable lengths. With washer and MS knurled nut

- The spring toggle expands automatically in any position
- The design of a spring toggle means it does not need to be inserted as deeply in a cavity as a toggle dowel
- Zinc-plated steel
- Fully pre-assembled
- Anti-rotation lock (claws) prevents movement during installation
- Load distributed over large surface area to ensure good holding power

Type description	W-FK
------------------	------

Anchor diameter	Hole diameter in component (d Bau)	Minimum cavity depth (h)	Nominal drill-bit diameter (d 0)	Max. attachment height (d a)	Art. no.	P. Qty.
3 mm	4 mm	30 mm	11 mm	65 mm	0904 731	25
4 mm	5 mm	40 mm	14 mm	69 mm	0904 741	25

Spring-loaded anchor Type W-FKH

With washer, nut and hook, zinc-plated steel. For secondary attachments in hollow walls, hollow ceilings or panel building materials of all kinds

- The spring toggle expands automatically in any position
- The design of a spring toggle means it does not need to be inserted as deeply in a cavity as a toggle anchor
- Fully pre-assembled
- Anti-rotation lock (claws) prevents movement during installation

Type description	W-FKH
------------------	-------

Anchor diameter	Hole diameter in component (d Bau)	Minimum cavity depth (h)	Nominal drill-bit diameter (d 0)	Max. attachment height (d a)	Art. no.	P. Qty.
3 mm	4 mm	30 mm	11 mm	65 mm	0904 732	25
4 mm	5 mm	40 mm	14 mm	69 mm	0904 742	25

Spring-loaded anchor Type W-FKW

With centring plug, polyamide flush sleeve and M10 hexagon nut. Specially designed for sanitary fixtures in hollow walls, suitable for different panel thicknesses

- The spring toggle expands automatically in any position
- The design of a spring toggle means it does not need to be inserted as deeply in a cavity as a toggle anchor
- Fully pre-assembled
- Anti-rotation lock (claws) prevents movement during installation

Type description	W-FKW
Anchor diameter	10 mm
Hole diameter in component (d Bau)	14 mm
Minimum cavity depth (h)	90 mm
Nominal drill-bit diameter (d 0)	30 mm
Max. attachment height (d a)	140 mm

Art. no. 0904 710 002

P. Qty.: 25

Tilting anchor W-KD

With washer and hexagon nut, zinc-plated steel. For secondary attachments in hollow walls, hollow ceilings and various sandwich elements

- Fully pre-assembled
- The toggle anchor locks itself into the substrate
- The rotatable threaded rod allows each attachment point to be adjusted individually, e.g. when creating a slope

Type description	W-KD
Anchor length (l)	100 mm
Design	With washer and nut

Anchor diameter	Hole diameter in component (d Bau)	Art. no.	P. Qty.

W-KDH	8 mm	130 mm	9 mm	0904 782	25

Tilting anchor W-KDW

Specially designed for mounting washbasins, wall-hung toilets etc. to cavity walls or supply shafts. With extra-large bearing surface. With centring plug, polyamide collar sleeve and hexagon nut.

- Galvanised steel
- Fully pre-assembled
- The tilting anchor bolts itself into the surface
- Large contact surface for soft materials
- The rotating threaded rod allows each attachment point to be adjusted individually, e.g. for an inclined attachment
- Large contact surface for soft materials, even with a minimal cavity depth of only 90 mm

Type description	W-KDW
Anchor diameter	10 mm
Hole diameter in component (d Bau)	14 mm
Design	Rubber spacer, collar and hexagon nut

Anchor length (l)	Art. no.	P. Qty.
130 mm	0904 710 003	25
180 mm	0904 710 001	25

Cavity anchor W-HR

Universal cavity anchor for metric screws, suitable for all plate thicknesses (10 to 51 mm). Can be applied without a setting tool

- Large load supporting surface ensures good holding power
- Universal clamping range
- Quick, easy installation without setting tools
- Immediate load-bearing capacity – no waiting
- All types of metric screw heads can be used
- Removable screw

Min./max. board thickness/ mirror thickness (d a)	10-51 mm
Material	Steel/plastic
Surface	Zinc plated

Type description	Thread type x anchor diameter	Nominal drill-bit diameter (d 0)	Art. no.	P. Qty.
W-HR 5	M5	12 mm	0904 720 5	50
W-HR 6	M6	12 mm	0904 720 6	50
W-HR 8	M8	18 mm	0904 720 8	25

Useful information:

Loads must be introduced into lightweight partition walls in accordance with DIN 18183-1:2009-05 relating to partitions and facings with gypsum boards on metal framing.

Plasterboard plug W-GS Type ZD

made of die-cast zinc. For quick and easy installation in gypsum plasterboard/gypsum fibreboard, without pre-drilling and without additional setting tool

- High-quality die-cast zinc
- Attachment via positive locking
- Patented rotation lock: when the screw is unscrewed, the plasterboard plug does not turn in the reverse direction, but remains in the anchoring base

Material	Die-cast zinc
----------	---------------

Type description	Anchor length (l)	Art. no.	P. Qty.
W-GS/ZD	33 mm	0903 252 1	200
W-GS/ZD-L	39 mm	0903 253 1	200

Plasterboard plug W-GS Type K

Made of sustainable regranulate with a reinforced centring tip. For cheap and fast installation in gypsum plasterboard, without the need for pre-drilling or an additional setting tool, with patented hexagon drive

- Attachment via positive locking
- Quick installation using a cordless screwdriver and matching bit thanks to the patented drive
- Patented rotation lock: when the screw is unscrewed, the plasterboard plug does not turn in the reverse direction, but remains in the anchoring base

Type description	W-GS/K
Anchor length (l) (l)	33 mm
Material	Plastic

Art. no. 0903 251 1

P. Qty.: 200

- To attach the component, use the ASSY®-D 4.5 mm-diameter plug screw or a wood/particle board screw without drill bit tip, counter thread or ring thread
- Use in damp areas in combination with a stainless steel screw
- Type K made from fibreglass-reinforced plastic is suitable for standard gypsum panels

Multi-purpose metal anchor W-MG

Drop-in anchor for secondary attachments on porous surfaces, e.g. pumice, lightweight or aerated concrete. Zinc-plated steel

- Can be used in various surfaces: Aerated concrete class AC2/AC4, perforated brick, pumice, lightweight concrete
- The anchor is knocked into class AC2 aerated concrete until flush without pre-drilling
- Easy installation
- For use in cotter-pin installation
- The W-MG 8 metal anchor used in conjunction with the M8 stud screw meets the requirements of the German technical guidelines for gas installations (TRGI). Item 3.3.7.2 of these guidelines stipulates the requirements for laying the inner pipes: „Pipe attachments must be fire resistant. The supporting parts of pipe attachments must be made of non-flammable materials.“
- Wood and particle board screws can be used
- Galvanised steel

Anchor diameter	Anchor length (l) (l)	Nominal drill-bit diameter in PB 4 (d 0)	Nominal drill-bit diameter in perforated brick (d 0)	Nominal drill-bit diameter in pumice (d 0)	Art. no.	P. Qty.
5 mm	30.5 mm	3 mm	6 mm	5 mm	0905 305	200
6 mm	32 mm	3.5 mm	8 mm	6 mm	0905 306	200
8 mm	38 mm	6 mm	10 mm	8 mm	0905 308	200
8 mm	60 mm	6 mm	10 mm	8 mm	0905 308 60	100
10 mm	60 mm	8 mm	14 mm	12 mm	0905 310	100

- Fire resistance: F30, F60, F90 and F120 (anchoring base: Vertically perforated brick, VPB ≥ 12, hollow sand-lime brick, HSLB ≥ 12, aerated concrete, strength class ≥ 4), exposure to fire according to DIN 4102-2:1977-09 (uniform temperature time curve)

Screw anchor WG-FIX, pan head

Universal screw anchor for easy ancillary attachments in solid brick and gypsum plasterboard

- Quick, easy installation
- AW drive for longer bit service life, improved power transmission and no ejection forces
- Panhead variant for large surface area

Max. attachment height (d a)	2.5 mm
Anchor length (l)	30 mm
Material	Steel
Surface	Zinc plated
Nominal drill-bit diameter (d 0)	4 mm

Art. no. 0189 363 30

P. Qty.: 250

Screw in with high extra load, low rotation speed and torque limiter. Stop screwing in once the screw is firmly seated. Insert screw into gypsum plasterboard without pre-drilling.

Screw anchor WG-FIX, raised countersunk head

Universal screw anchor for easy ancillary attachments in solid brick and gypsum plasterboard

- Quick, easy installation
- AW drive for longer bit service life, improved power transmission and no ejection forces.
- Raised countersunk head version for neat, easy countersinking
- HiLo thread for elevated over-torque
- High thread pitch allows fast screw insertion.

Max. attachment height (d a)	16 mm
Anchor length (l)	45 mm
Material	Steel
Surface	Zinc plated
Nominal drill-bit diameter (d 0)	4 mm

Art. no. 0189 306 345

P. Qty.: 250

Screw in with high extra load, low rotation speed and torque limiter. Stop screwing in once the screw is firmly seated. Insert screw into gypsum plasterboard without pre-drilling.

Lightweight construction anchor W-KL

**Anchor made of ABS plastic for secondary mountings.
Use in conjunction with a suitable plug screw**

- High-quality ABS
- Fully resistant to rotting
- Thermally stable from -40°C to + 80°C
- Attachment via positive locking
- Anchorage without expansion pressure
- Small edge and axial clearance possible
- For mounting, we recommend the ASSY-D plug screw

Material	ABS
Anchor diameter	18 mm
Type description	W-KL

Art. no. 0903 50

P. Qty.: 100

Insulation anchor W-ID SLIM

A clever, simple problem solver for fixing lightweight loads on external thermal insulation composite systems (ETICS)

- The special thread geometry makes it extremely easy to screw into the insulation
- For optimal processing, the mounting part must have a through hole of min. 8 mm and max. 12 mm
- Thanks to the drill tip, the anchor penetrates effortlessly through the plaster and sealing layer

Material	Die-cast zinc
Material of the screw	Stainless steel A2

Anchor length (l)	Head diameter (ds)	Colour	Art. no.	P. Qty.
62.7 mm	15 mm		5925 108 015	100
62.7 mm	15 mm	Anthracite grey RAL 7016	5925 118 015	100
62.7 mm	15 mm	Black	5925 138 015	100
62.7 mm	15 mm	Mouse grey RAL 7005	5925 148 015	100
62.7 mm	15 mm	White	5925 128 015	100
63.2 mm	20 mm		5925 108 020	100

Insulation anchor W-ID Easy

The quick, easy and efficient way to attach light loads to external thermal insulation composite systems (ETICS)

- No complicated spaced installation for light loads
- For attaching closure panels in insulating boards (e.g. external walls with thermal insulation composite systems)
- Suitable for use outdoors and in wet rooms – stainless steel A2 screw and washer
- Thermal bridges do not occur because the anchor does not penetrate the masonry
- The anchor is used in push-through installation

Permits time and cost-saving installation on the construction site

- Metal sheets can be prepared in the workshop
- Can be installed by one person without the need to change tools
- No need to pre-drill in masonry or thermal insulation composite systems

Anchor length (l)	45 mm
Head diameter (ds)	15 mm
Material	Stainless steel A2
Material of the screw	Stainless steel A2
Colour	Stainless steel, polished/matt

Art. no. 0903 500 910

P. Qty.: 100

Optional accessory: Manual hole punch for making round through-holes in the sheet metal part to be anchored (the holes can also be drilled in the sheet metal part).

Aerated concrete anchor W-GB

Plastic anchor designed specifically for aerated concrete

- Three-segment plastic anchor specifically for use in aerated concrete
- Three-way division for almost positive locking anchoring in soft, aerated concrete
- Matched to specific screw diameters
- Attachment with cotter-pin installation
- When the anchor is tapped into the pre-drilled hole, the segments that protrude over the core diameter burrow into the aerated concrete. As a result, positive locking occurs when the screw is then inserted.
- For mounting, we recommend the ASSY-D plug screw

Anchor diameter	Anchor length (l)	Anchoring depth (h v)	Nominal drill-bit diameter (d 0)	Drill hole depth (t)	Art. no.	P. Qty.
10 mm	55 mm	55 mm	10 mm	65 mm	0903 50 10	25
12 mm	60 mm	60 mm	12 mm	70 mm	0903 50 12	25
14 mm	75 mm	75 mm	14 mm	85 mm	0903 50 14	25

Amo® III spacing assembly screw 7.5 type 2 cheese head 8.0 mm

For mounting windows in concrete and solid stone masonry. With small cylinder head. Zinc-plated steel, blue coated, AW30 drive.

- Short installation times, no setting tool or anchor required
- AW drive for longer bit service life and improved power transmission
- Load-bearing capacity is retained even under thermal stress

Fire protection test report no. 3174/0649-2 dated 12 January 2000 in concrete

Test of suitability for attaching a flood-proof window in accordance with ift directive FE-07/1 conducted by the ift Rosenheim Institute.

Test report no. 202 31790 dated 17 May 2006

Component test with frame screws to attach a glazed plastic door (window casement weight 72.5 kg) to a structure without lateral supports or sand-lime brick masonry.

Tests carried out without lateral support and spacer blocks, ift Rosenheim: Test report 105 34261 dated 21 November 2007

Component test with frame screws to attach a glazed plastic door (window casement weight 70 kg) to a structure without lateral supports or sand-lime brick masonry.

Testing carried out without any lateral supports or spacer blocks.

ift Rosenheim: Test report 105 35697 dated 31 March 2008

Component test with frame screws to attach a glazed plastic door (window casement weight 70 kg, screw connection in profile without steel reinforcement) to a structure without lateral supports or sand-lime brick masonry.

Testing carried out without any lateral supports or spacer blocks.

ift Rosenheim: Test report 105 43036 dated 21 October 2010

Thread diameter (d)	7.5 mm

Amo® III spacing assembly screw 7.5 type cheese head 7.5 mm

For mounting windows in concrete and solid stone masonry. Particularly small cylinder head for screw insertion with narrow window rebates. Zinc-plated steel, blue coated, AW25 drive.

- Positive-locking, removable anchorage with no expansion pressure
- Load-bearing function is retained, even under thermal load
- Tested fire resistance duration of 120 minutes
- Time saving – no anchor necessary
- Short installation times, as no tools are required for insertion
- AW drive for longer bit service life, improved power transmission and no ejection forces
- Through-hole mounting
- Immediate load-bearing capacity – no waiting after insertion
- Positive locking for high load-bearing capacity
- Removable
- Virtually no expansion forces on insertion

Thread diameter (d)	7.5 mm

Fire protection test report no. 3174/0649-2 dated 12 January 2000

Test of suitability for attaching a flood-proof window in accordance with ift directive FE-07/1 conducted by the ift Rosenheim Institute. Test report no. 202 31790 dated 17 May 2006

Testing a fastening element: Evaluation of test results for practical use in window installation by the ift Rosenheim Institute. Test report no. 23511241/2 dated 13 February 1990

Test of suitability for fastening a window to a brick masonry structure by ift Rosenheim. Test report no. 50922462 dated 11 October 2000

Information for use

Guidelines for planning and executing the installation of windows and exterior doors, 2010 edition

Art. no. 5995 000 000:

The fixture must safely transfer all standard forces affecting the window to the structure and the foundation. The total load must therefore be calculated from e.g. the window load, wind load and working load (see DIN 1055). The currently applicable building regulations stipulate that buildings and their components must be planned in such a way that they do not endanger human life and health or pose a risk to public safety. Attachment of the windows must also comply with this criterion.

Window walls according to former DIN 18056 standard or elements with a surface greater than 9 m² and accident-proof glazing as specified in the German technical rules for safety glazing (TRAV) or DIN 18008-4

The DIN 18056 standard applied to window walls with a minimum surface area of 9 m² and a minimum side length of 2 m on the shortest side. Anchors with a general construction permit or European Technical Approval or with individual approval should be used for this application. Similarly, only anchors with a general construction permit or European Technical Approval or with individual approval must be used to attach accident-proof glazing as specified in the German technical rules for safety glazing (TRAV) or DIN 18008-4.

Other information

It is important to check that the components are correctly installed for the specific construction conditions (e.g. weight of window casement, surface properties, hole pattern in the brick). Accident-proof glazing as specified in the German technical rules for safety glazing (TRAV) or DIN 18008-4 may only be attached with the AMO Combi screw if appropriate individual approval has been obtained before installation starts.

Drill perforated and hollow blocks with a rotary drill (without impact mechanism)

Drill perforated and hollow blocks with a rotary drill (without impact mechanism)

Align window frames using alignment clamps or Amo® Bag

Screw length = frame width + gap + screw-in depth (see also 55.2 Amo® III 11.5 mm)

Amo® III spacing assembly screw 7.5 TYPE 3 half round head

For mounting windows in concrete and solid stone masonry. With large flat head, lies cleanly on the frame and can be optimally covered with cover caps.

Zinc-plated steel, blue passivated, AW30 drive.

- Positive-locking, removable anchorage with no expansion pressure
- Load-bearing capacity is retained even under thermal stress
- AW drive for longer bit service life, improved power transmission and no ejection forces

Test report no. 202 31790. Attachment of a flood-proof window in accordance with ift directive FE-07/1

Test report no. 105 34261. Attachment of a plastic window in sand-lime brick masonry. Weight of casement: 72.5 kg. Test performed without lateral spacer blocks.

Test report no. 105 43036. Attachment of a plastic window in sand-lime brick masonry. Weight of casement: 70 kg. Screw connection in profile without steel reinforcement.

Test performed without lateral spacer blocks.

Plan, calculate and confirm your own, specific window installation using the ift tool at www.montagetool.de

It is important to check that the components are correctly installed for the specific construction conditions (e.g. weight of window casement, surface properties, hole pattern in the brick). Note the guidelines for planning and executing the installation of windows and house doors (art. no. 5995 000 000).

To ensure the fall-proof mounting of windows in line with applicable guidelines and regulations, approved securing systems (e.g. window installation bracket W-ABZ) must be used, or approval is required for each individual case.

Align window frames using alignment clamps or Amo Bag

Screw length = frame width + distance + screw-in depth (see also 55.2 Amo III 11.5 mm)

AMO® renovation case

231 pieces in system case 8.4.1. AMO-Y or AMO-COM-BI, the appropriate spacing assembly screw for any surface.

- The universal solution for mounting windows in concrete, perforated and solid brickwork and wood

Length	270 mm
Width	370 mm
Number of pieces in assortment/set	231 PCS
Product weight (per item)	15000 g

Art. no. 5964 023 403

P. Qty.: 1

AMO® III spacing assembly screw 7.5 type 1 countersunk milling head

For mounting windows in concrete and solid stone masonry. With countersunk milling head for easy sinking in wood and plastic profiles. Steel, yellow zinc-plated, AW30 drive

- Positive-locking, removable anchorage with no expansion pressure
- Load-bearing function is retained, even under thermal load
- Tested fire resistance duration of 120 minutes
- Time saving – no anchor necessary
- Short installation times, as no tools are required for insertion
- AW drive for longer bit service life, improved power transmission and no ejection forces
- Immediate load-bearing capacity – no waiting after insertion

Length (l)	92 mm
Thread diameter (d)	7.5 mm
Material	Steel
Surface	Zinc plated yellow
Head type	Countersunk milling head

Head diameter (dk)	12 mm
Internal drive	AW30

Art. no. 0234 130 92

P. Qty.: 200

Align window frames using alignment clamps or Amo Bag

Screw length = frame width + distance + screw-in depth (see also 55.2 Amo III 11.5 mm)

AMO® III spacing assembly screw 7.5 A2 type 2 cylinder head 8.0 mm

For mounting windows in concrete and solid stone masonry. Made of stainless steel A2. Ideal for frames made of thermally-treated wood. With a small cheese head, drive AW30

- Positive-locking, removable anchorage with no expansion pressure
- Saves time – no anchors required
- Short installation times, as no tools are required for insertion
- AW drive for longer bit service life, improved power transmission and no ejection forces
- Push-through installation
- Immediate load-bearing capacity – no waiting after insertion
- Positive locking for high load-bearing capacity
- Removable
- Virtually no expansion forces on insertion

Thread diameter (d)	7.5 mm

It is important to check that the components are correctly installed for the specific construction conditions (e.g. weight of window casement, surface properties, hole pattern in the brick).

Spacing assembly screw AMO® III 11.5

Window mounting in concrete and solid stone masonry with increased load requirements. Ø11.5mm, with cheese head, zinc-plated steel, blue passivated, drive AW40

- Positive-locking, removable anchoring with no expansion pressure
- Load-bearing function is retained, even under thermal load
- Immediate load-bearing capacity – no waiting after insertion
- Tested fire resistance duration of 120 minutes
- Tested burglary-resistant properties for plastic windows in resistance class WK 2 according to DIN V ENV 1627
- Time saving, no anchor required
- Short installation times, as no tools are required for insertion
- AW drive for longer bit service life, improved power transmission and no ejection forces
- Through-hole mounting
- Positive locking for high load-bearing capacity
- Removable
- AW40 bit in every pack
- Virtually no expansion forces on insertion

Thread diameter (d)	11.5 mm
Material	Steel
Surface	Zinc plated
Head type	Socket head
Head diameter (dk)	11.5 mm

132 mm	0234 840 132	50
152 mm	0234 840 152	50
182 mm	0234 840 182	50

- Fire protection test report no. 3174/0649-2 dated 12 January 2000
- Break-in protection resistance class 2 according to DIN V ENV 1627. Expert opinion of ift Rosenheim no. 255/29923 dated 21 November 2005
- Test of suitability for fastening a window to a brick masonry structure by ift Rosenheim. Test report no. 105 30599 dated 10 July 2006

It is important to check that the components are correctly installed for the specific construction conditions (e.g. weight of window casement, surface properties, hole pattern in the brick).

Pre-drilling of window frame (10 mm). Drill perforated and hollow blocks with a rotary drill (without impact mechanism). No pre-drilling is necessary in aerated concrete; Amo III screw can be screwed in directly. Align window frames using alignment clamps or Amo Bag.

Screw length = frame width + gap + screw-in depth.

Spacing assembly screw AMO®-Y Ø 7.5 mm

Spacing assembly screw ideal for window and door mounting in aerated concrete, concrete as well as solid and perforated bricks. Optimised thread geometry and special coating

- Tension-free spaced mounting with all frame materials for anchoring in aerated concrete, concrete as well as solid and perforated bricks
- Tested burglary-resistant properties in resistance class RC3
- Burglary-resistant assembly in resistance classes RC2 and RC3

222 mm	0234 630 222	100

Approval:

national technical approval for anchoring window frames in concrete and masonry Z-21.1-2097

Test reports:

Test report 211 43728. Proof of burglary-resistant properties resistance class RC3. Plastic windows in aerated concrete masonry PP2-0.35.

Test report no. 105 42538/1. Attachment of a plastic window in aerated concrete masonry PP2-0.35. Test performed without lateral spacer blocks.

Individual window installation situation:

Individual window installation situation: Plan, calculate and confirm using the ift assembly tool at www.montagetool.de

It is important to check that the components are correctly installed for the specific construction conditions (e.g. weight of window casement, surface properties, hole pattern in the brick). Note the guidelines for planning and executing the installation of windows and house doors (art. no. 5995 000 000). To ensure the fall-proof mounting of windows in line with applicable guidelines and regulations, approved securing systems (e.g. window installation rail W-ABZ) must be used, or approval is required for each individual case.

Spacing assembly screw AMO®-Y 11.5 mm

For window and door installation, the specialist in aerated concrete

- Positive-locking, removable anchorage with no expansion pressure
- Short installation times, as no setting tools are required
- AW drive for longer bit service life, improved power transmission and no ejection forces

Length (l)	252 mm
Thread diameter (d)	11.5 mm
Material	Steel

Surface	Flake zinc silver
Head type	Socket head
Head diameter (dk)	11.3 mm
Internal drive	AW30

Art. no. 0234 640 252

P. Qty.: 50

General Building approval anchoring of windows in concrete and masonry
Component test using AMO-Y 11.5 mm frame screw to attach a glazed plastic door to a structure without lateral supports or spacers in PP 1.6–0.30 aerated concrete masonry. Test report no. 11-002642-PR01 dated 25 May 2012
Individual window installation situation: Plan, calculate and confirm using the ift assembly tool at www.montagetool.de

It is important to check that the components are correctly installed for the specific construction conditions (e.g. weight of window casement, surface properties, hole pattern in the brick). Note the guidelines for planning and executing the installation of windows and house doors (art. no. 5995 000 000). To ensure the fall-proof mounting of windows in line with applicable guidelines and regulations, approved securing systems (e.g. window installation rail W-ABZ) must be used, or approval is required for each individual case.

Plastic frame anchor W-UR 10 XS

For use in perforated brick with small chambers and thin webs in conjunction with the AMO Combi screw

- Reliable, simple assembly
- Immediate load-bearing capacity – no waiting after insertion
- Broad and flexible range of applications
- Perforated brick: AMO Combi in conjunction with W-UR 10 XS
- The anchorage does not require dimensioning apart from the verified window size for the tested surfaces and the appropriate installation.
- Removable anchorage

Anchor diameter	10 mm
Anchor length (l)	78 mm

Art. no. 0912 810 900

P. Qty.: 100

- It is important to check that the components are correctly installed for the specific construction conditions (e.g. weight of window casement, surface properties, hole pattern in the brick). Accident-proof glazing as specified in the German technical rules for safety glazing (TRAV) or DIN 18008-4 may only be attached with the AMO Combi screw if appropriate individual approval has been obtained before installation starts.
- Drill perforated and hollow blocks with a rotary drill (without impact mechanism)

Plastic frame anchor W-UR 10 XXL

For use in perforated brick with large chambers and solid webs in conjunction with the AMO Combi screw

- Reliable, simple assembly
- Immediate load-bearing capacity – no waiting after insertion
- Broad and flexible range of applications
- Perforated brick with large chambers: AMO Combi in conjunction with W-UR 10 XXL: Always anchored in at least 2 webs
- The anchorage does not require dimensioning apart from the verified window size for the tested surfaces and the appropriate installation.
- Removable anchorage

Anchor diameter	10 mm
Anchor length (l)	208 mm

Art. no. 0912 810 901

P. Qty.: 100

Component test with frame anchor W-RD 10 using AMO III screw to attach a glazed plastic door without lateral supports or spacer blocks in POROTON T12 clay block. Test report no. 105 44179/2 dated 23 December 2010

Component test with frame anchor W-UR 10 XXL using AMO Combi screw to attach a glazed plastic door without lateral supports or spacer blocks in POROTON-T8-36.5 MW masonry. Test report no. 11-001214-PR01 dated 17 October 2011

Expert opinion from ift Rosenheim dated 5 March 2012 no.: 12-000288-PR01 confirms that test report no. 105 44179/2 dated 23 December 2010 is also applicable to the AMO Combi screw and the W-UR 10 XXL.

- It is important to check that the components are correctly installed for the specific construction conditions (e.g. weight of window casement, surface properties, hole pattern in the brick). Accident-proof glazing as specified in the German technical rules for safety glazing (TRAV) or DIN 18008-4 may only be attached with the AMO® Combi screw if appropriate individual approval has been obtained before installation starts.
- Drill perforated and hollow blocks with a rotary drill (without impact mechanism)
- When the W-UR 10 XXL is used, the screw is no longer than the anchor and therefore reaches the second chamber in modern filled perforated bricks, ensuring that the anchor is guided correctly into the drill hole and the frame. Consequently, the load-bearing capacity is not reduced.

Spacing assembly screw AMO®-Combi 7.5/11.5

The universal solution for attaching windows in concrete, perforated and solid brickwork and wood

- For tension-free installation of windows in the reveal
- AMO Combi can be screwed directly into solid stone, concrete and wood due to the hardened thread
- Immediate load-bearing capacity: no waiting after insertion

Thread diameter (d)	7.5 mm
Head thread diameter	11.5 mm
Head thread length	50 mm
Material	Steel
Surface	Zinc plated
Internal drive	AW30
Approval	DIBt Z-21.2-2017

Length (l)	Art. no.	P. Qty.
135 mm	0234 030 135	100
150 mm	0234 030 150	100
180 mm	0234 030 180	100
242 mm	0234 030 242	100

General technical approval anchoring of windows in masonry reveals Z.21.2-2017

Test report no. 11-001214-PR01 Component test for attaching glazed plastic door in brick masonry Poroton-T8-36.5 MW. Weight of casement: 95.5 kg.

Test report no. 11-002744-PR01 Component test for attaching a two-leaf glazed plastic door in brick masonry Poroton T10. Weight of casement: 74.5 kg.

Test report no. 13-002288-PR03 Component test for attaching plastic house door in brick masonry made of ThermoPlan S9 from Mein Ziegelhaus. Weight of casement: 145 kg.

Continuous usage load 100,000 cycles.

Test report no. 11-002592-PR01 Verification of burglary-resistant properties of resistance class RC2/RC 2N in brick masonry made of Poroton-S10-P

It is important to check that the components are correctly installed for the specific construction conditions (e.g. weight of window casement, surface properties, hole pattern in the brick). Accident-proof glazing as specified in the German technical rules for safety glazing (TRAV) or DIN 18008-4 may only be attached with the AMO-Combi screw if the appropriate individual approval has been obtained before installation starts.

Drill perforated and hollow blocks with a rotary drill (without impact mechanism)

When the W-UR 10 XXL is used, the screw is no longer than the anchor and therefore reaches the second chamber in modern filled perforated bricks, ensuring that the anchor is guided correctly into the drill hole and the frame. Consequently the load-bearing capacity is not reduced.

Metal frame anchor W-MRE

For window mounting in perforated brick masonry and lightweight construction materials. Single expansion, access hole, PZ3 drive, zinc plated steel

- Universal metal frame anchor for light loads
- Excellent fitness for purpose with virtually all common construction materials
- Fast, economical push-through installation
- Large expansion zone moulds to the anchoring base for effective attachment in perforated brick masonry or lightweight construction materials
- Tension-free spaced installation
- Option of concealed mounting via cover cap
- Bugle head screw M6 with pre-drilled head < diameter / > 3 for cover cap to allow for tolerances (PZ3 drive)
- Rounded, reduced wall plug body for easier installation with hollow profiles
- Locking cam for hollow profiles and as an anti-rotation device
- Sleeve: Galvanised sheet steel
- Screw: Galvanised steel, blue passivated

Drive type	Z
Hole diameter in component (d f)	10.5 mm
Nominal drill-bit diameter (d 0)	10 mm
Embedding depth (h nom)	60 mm
Surface	Zinc plated
Drill hole depth (h 1)	65 mm

DIN	18056
Head type	Countersunk head
Internal drive	Z3
Design	Single expansion

Anchor length (l) (l)	Max. attachment height (t fix)	Art. no.	P. Qty.
112 mm	50 mm	0903 912 112	100
132 mm	70 mm	0903 912 132	100
152 mm	90 mm	0903 912 152	100
182 mm	120 mm	0903 912 182	100

Test of a fastener: Evaluation of test results for practical use in window installation by the ift Rosenheim Institute, test report no. 328477/2 dated 22 January 1986

Fire resistance, direct exposure to flames

Installation guidelines/RAL Quality Assurance Association:

The fixture must safely transfer all standard forces affecting the window to the structure. This means the total load must be calculated from e.g. the window load, wind load and working load (see DIN 1055). The currently applicable building regulations stipulate that buildings and their components must be planned in such a way that they do not endanger human life and health or pose a risk to public safety. Attachment of the windows must also comply with this criterion. We recommend anchors 51, 52, 53 and 55 for this application.

Window walls according to DIN 18056:

This standard applies to window walls with an area of at least 9 m² and a minimum side length of 200 cm, comprising a support structure (frame, jambs, crossbars) with infill (e.g. glazing). This standard does not apply to walls made from glass blocks. We recommend anchors with technical approval for this application.

Metal frame anchor W-MRD

For window mounting in perforated brick masonry and lightweight construction materials. Double expansion, head access to hole, PZ3 drive

- Universal metal frame anchor for light loads
- Excellent fitness for purpose with virtually all common construction materials
- Fast, economical push-through installation
- Large expansion zone moulds to the anchoring base for effective attachment in perforated brick masonry or lightweight construction materials
- Tension-free spaced installation
- Option of concealed mounting via cover cap
- Bugle head screw M6 with pre-drilled head < diameter / > 3 for cover cap to allow for tolerances (PZ3 drive)
- Rounded, reduced wall plug body for easier installation with hollow profiles
- Locking cam for hollow profiles and as an anti-rotation device
- Sleeve: Galvanised sheet steel
- Screw: Galvanised steel, blue passivated

Drive type	Z
Hole diameter in component (d f)	10.5 mm
Nominal drill-bit diameter (d 0)	10 mm
Embedding depth (h nom)	90 mm
Surface	Zinc plated
Drill hole depth (h 1)	95 mm
DIN	18056
Head type	Countersunk head
Internal drive	Z3
Design	Double expansion

Anchor length (l) (l)	Max. attachment height (t fix)	Art. no.	P. Qty.
152 mm	60 mm	0903 914 152	100
182 mm	90 mm	0903 914 182	100

Test of a fastener: Evaluation of test results for practical use in window installation by the ift Rosenheim Institute, test report no. 328477/2 dated 22 January 1986

Fire resistance, direct exposure to flames

Installation guidelines/RAL Quality Assurance Association:

The fixture must safely transfer all standard forces affecting the window to the structure. This means the total load must be calculated from e.g. the window load, wind load and working load (see DIN 1055). The currently applicable building regulations stipulate that buildings and their components must be planned in such a way that they do not endanger human life and health or pose a risk to public safety. Attachment of the windows must also comply with this criterion. We recommend anchors 51, 52, 53 and 55 for this application.

This standard does not apply to walls made from glass blocks. We recommend anchors with technical approval for this application.

Metal frame anchor WUS 10

For window mounting in all solid materials. Countersunk head screw, PZ3 drive, zinc plated steel

- Universal frame anchor for light loads
- Excellent fitness for purpose with concrete, solid stone masonry, natural stone surfaces
- Fast, economical push-through installation
- Tension-free spaced installation
- Locking cam for hollow profiles and as an anti-rotation device
- Concealed mounting via cover cap
- Suitable for machine insertion using PZ3 drive
- Captive cone
- Sleeve: Sheet steel, Al/Zn coating
- Screw: Galvanised steel, blue passivated
- Cone: Galvanised steel, blue passivated

Anchor diameter	10 mm
Drive type	Z

This standard does not apply to walls made from glass blocks. We recommend anchors with technical approval for this application

Metal frame anchor WUL8

For window mounting in all solid materials, small head diameter for profiles with narrow bottom rebate. Pan head screw, TX20 drive

- The small head diameter is ideal for profiles with a narrow bottom rebate
- Fast, economical push-through installation
- Tension-free spaced installation
- Suitable for machine insertion using TX20 drive
- Captive die cast zinc cone
- Locking cam for hollow profiles and as an anti-rotation device
- Small drilling diameter, quick drilling in concrete
- Metal frame anchor for light loads
- Good fitness for purpose with concrete, solid brick masonry, natural stone surfaces
- Sleeve: Sheet steel, Al/Zn coating
- Screw: Steel, white zinc-plated
- Cone: Die cast zinc

Anchor diameter	8 mm
Drive type	Internal TX
Hole diameter in component (d f)	8.5 mm
Nominal drill-bit diameter (d 0)	8 mm

This standard does not apply to walls made from glass blocks. We recommend anchors with technical approval for this application.

Plastic frame anchor W-UR 8

Frame anchor tested and approved in more than 90 stone types and in aerated concrete. Also for window installation (approved for mounting in reveal). With countersunk head screw made of zinc plated steel

- Immediate load-bearing capacity, no waiting
- Virtually no movement of the wall plug body thanks to low insertion torque and slight expansion
- High load-bearing capacities; expansion in four directions
- 2 insertion depths
- Improved load transfer in solid and hollow construction materials
- The hammer-in stop prevents premature expansion of the anchor during installation
- Low assembly workload thanks to pre-assembled plug screw
- Anchorage via friction locking between wall plug body and anchoring base
- Push-through installation

General construction permit Z-21.2-1838
European Technical Approval ETA-08/0190

Fire resistance:

Concrete: Tensile and transverse loads, R30, R60, R90, R120 (in accordance with Technical Report TR 020)

Masonry tensile load: F30 (solid sand-lime brick, solid brick, hollow sand-lime brick) Transverse load: F30, F60, F90, F120 (vertically perforated brick, hollow sand-lime brick, solid brick, aerated concrete)

Anchor diameter	8 mm
Through-hole in the component to be connected (d f)	8.5 mm

Anchor length (l)	Attachment height (t fix 1)	Art. no.	P. Qty.
60 mm	10 mm	0912 808 402	50
80 mm	30 mm	0912 808 403	50

120 mm	70 mm	0912 808 405	50
140 mm	90 mm	0912 808 406	50
160 mm	110 mm	0912 808 407	50

Plastic frame anchor W-UR 8, stainless steel A4

The first frame anchor with ETA approval. Tested and approved in more than 60 stone types and in aerated concrete. With countersunk head screw made of A4 stainless steel

- Universal frame anchor (concrete, perforated and solid brick masonry, aerated concrete)
- Push-through installation
- Immediate load-bearing capacity – no waiting
- Virtually no movement of the wall plug body thanks to low insertion torque and slight expansion
- 2 insertion depths ($h_{nom} = 50 + 70$ mm)
- High load-bearing capacities; expansion in four directions
- Improved load transfer in solid and hollow construction materials
- The hammer-in stop prevents premature expansion of the anchor during installation
- Low assembly workload thanks to pre-assembled plug screw
- Saves an additional U washer and prevents contact corrosion
- Anchorage via friction locking between wall plug body and anchoring base

Anchor diameter	8 mm
Through-hole in the component to be connected (d f)	8.5 mm

Anchor length (l)	Attachment height (t fix 1)	Art. no.	P. Qty.
60 mm	10 mm	0912 808 502	50
80 mm	30 mm	0912 808 503	50

W-UR 8, W-UR F 8 (galvanised steel, stainless steel): General construction permit Z-21.2-1838

W-UR 8 and W-UR F 8 (galvanised steel, stainless steel): European Technical Approval ETA-08/0190

Wall plug body made from high-quality polyamide

Fire resistance W-UR 8: Concrete: Tensile and transverse loads, R30, R60, R90, R120 (in accordance with Technical Report TR 020) Masonry tensile load: F30 (solid sand-lime brick, solid brick, hollow sand-lime brick) Transverse load: F30, F60, F90, F120 (vertically perforated brick, hollow sand-lime brick, solid brick, aerated concrete)

Useful information:

Drill perforated and hollow blocks with a rotary drill (without impact mechanism)

For anchoring in solid brick and solid sand-lime brick, we recommend that you perform pull-out tests due to the differences in brick manufacturing.

Drill cuttings must be removed from the drill hole

Lengths > 80 mm by special procurement

Plastic frame anchor W-UR F 8, galvanised steel

The most versatile frame anchor with ETA approval.
Tested and approved in more than 90 stone types and
in aerated concrete. With hexagon bolt made of zinc
plated steel

- With hexagonal bolt, galvanised steel and pressed-on washer
- Push-through installation
- Immediate load-bearing capacity – no waiting
- Low insertion torque of the plug screw - „slight“ expansion of the anchor, virtually no movement of the wall plug body
- 2 insertion depths (h_{nom} = 50 + 70 mm): Concrete >= C12/15; Solid brick >= Mz 10 (>= NF); vertically perforated brick >= HLz 8 (>= 2DF); solid sand-lime brick >= KS 10 (>= NF); hollow sand-lime brick >= KS L 6 (>= 2DF); hollow sand-lime brick >= KS L 6 (>= 12DF); solid blocks made from normal concrete >= Vbn 10 (>= NF); solid blocks made from lightweight concrete >= V 2 (>= NF)
- Spread in four directions – high load-bearing capacity
- Improved power transmission: Even, continuous load distribution across the entire expansion area
- Universal frame anchor (concrete, perforated and solid brick masonry, aerated concrete)
- The hammer-in stop prevents premature expansion of the anchor during installation
- Pre-assembled anchor sleeve and special screw – easier installation
- Anchor type W-UR F does not require an additional U washer and prevents contact corrosion
- Improved load transfer in solid and hollow construction materials; anchorage via friction locking between anchor sleeve and anchoring base

Anchor diameter	8 mm
Through-hole in the component to be connected (d f)	8.5 mm

Anchor length (l)	Attachment height (t fix 1)	Art. no.	P. Qty.
60 mm	10 mm	0912 808 602	50
80 mm	30 mm	0912 808 603	50
100 mm	50 mm	0912 808 604	50
120 mm	70 mm	0912 808 605	50

W-UR 8, W-UR F 8 (galvanised steel, stainless steel): General construction permit Z-21.2-1838
W-UR 8 and W-UR F 8 (galvanised steel, stainless steel): European Technical Approval ETA-08/0190
Wall plug body made from high-quality polyamide
Fire resistance W-UR 8: Concrete: Tensile and transverse loads, R30, R60, R90, R120 (in accordance with Technical Report TR 020) Masonry tensile load: F30 (solid sand-lime brick, solid brick, hollow sand-lime brick) Transverse load: F30, F60, F90, F120 (vertically perforated brick, hollow sand-lime brick, solid brick, aerated concrete)

Useful information:
Drill perforated and hollow blocks in rotating gear (without impact mechanism)
For anchoring in solid brick and solid sand-lime brick, we recommend that you perform pull-out tests due to the differences in brick manufacturing.
Drill cuttings must be removed from the drill hole

Plastic frame anchor W-UR F 8, stainless steel A4

The most versatile frame anchor with ETA approval.
Tested and approved in more than 90 stone types and
in aerated concrete. With hexagon bolt made of A4
stainless steel

- With hexagonal bolt, stainless steel A4 and pressed-on washer
- Push-through installation
- Immediate load-bearing capacity – no waiting
- Low insertion torque of the plug screw – “slight” expansion of the anchor, virtually no movement of the wall plug body
- 2 insertion depths ($h_{nom} = 50 + 70 \text{ mm}$): Concrete $\geq C12/15$; solid brick $\geq Mz 10$ ($\geq NF$); vertically perforated brick $\geq HLz 8$ ($\geq 2DF$); solid sand-lime brick $\geq KS 10$ ($\geq NF$); hollow sand-lime brick $\geq KS L 6$ ($\geq 2DF$); hollow sand-lime brick $\geq KS L 6$ ($\geq 12DF$); solid brick from standard concrete $\geq Vbn 10$ ($\geq NF$); solid brick from lightweight concrete $\geq V 2$ ($\geq NF$)
- Expansion in four directions – high load-bearing capacities
- Improved force transfer: Even, continuous load distribution across the entire expansion area
- Universal frame anchor (concrete, perforated and solid brick masonry, aerated concrete)
- The hammer-in stop prevents premature expansion of the anchor during installation
- Pre-assembled wall plug body and special screw – easier installation
- Anchor type W-UR F does not require an additional U washer and prevents contact corrosion

W-UR 8 and W-UR F 8 (galvanised steel, stainless steel): European Technical Approval ETA-08/0190

Anchor sleeve made from high-quality polyamide

Fire resistance W-UR 8: Concrete: Tensile and transverse loads, R30, R60, R90, R120 (in accordance with Technical Report TR 020) Masonry tensile load: F30 (solid sand-lime brick, solid brick, hollow sand-lime brick) Transverse load: F30, F60, F90, F120 (vertically perforated brick, hollow sand-lime brick, solid brick, aerated concrete)

Useful information:

Drill perforated and hollow blocks in rotating gear (without impact mechanism)

For anchoring in solid brick and solid sand-lime brick, we recommend that you perform pull-out tests due to the differences in brick manufacturing.

Drill cuttings must be removed from the drill hole

Plastic frame anchor W-UR F 8

The most versatile frame anchor with ETA approval.
Tested and approved in more than 90 stone types and
in aerated concrete. With pan head screw made of A4
stainless steel

- With pan head screw, A4 stainless steel
- Push-through installation
- Immediate load-bearing capacity – no waiting
- Low insertion torque of plug screw – slight expansion of the plug, virtually no movement of the wall plug body
- 2 insertion depths ($h_{nom} = 50 + 70 \text{ mm}$): Concrete $\geq C12/15$; solid brick $\geq Mz 10$ ($\geq NF$); vertically perforated brick $\geq HLz 8$ ($\geq 2DF$); solid sand-lime brick $\geq KS 10$ ($\geq NF$); hollow sand-lime brick $\geq KS L 6$ ($\geq 2DF$); hollow sand-lime brick $\geq KS L 6$ ($\geq 12DF$); solid blocks made from normal concrete $\geq Vbn 10$ ($\geq NF$); solid blocks made from lightweight concrete $\geq V 2$ ($\geq NF$)
- Spread in four directions – high load-bearing capacity
- Improved power transmission: Even, continuous load distribution across the entire expansion area
- Universal frame anchor (concrete, perforated and solid brick masonry, aerated concrete)
- The hammer-in stop prevents premature expansion of the anchor during installation
- Pre-assembled wall plug body and special screw – easier installation
- Anchor type W-UR F does not require an additional U washer and prevents contact corrosion
- Improved power transmission in solid and hollow construction materials; anchorage via friction locking between wall plug body and anchoring base

Anchor diameter	8 mm
Through-hole in the component to be connected (d f)	8.5 mm

Anchor length (l)	Attachment height (t fix 1)	Art. no.	P. Qty.
60 mm	10 mm	0912 808 902	50
80 mm	30 mm	0912 808 903	50

W-UR 8, W-UR F 8 (galvanised steel, stainless steel): General technical approval Z-21.2-1838

W-UR 8 and W-UR F 8 (galvanised steel, stainless steel): European Technical Approval ETA-08/0190

Wall plug body made from high-quality polyamide

Fire resistance W-UR 8: Concrete: Tensile and transverse loads, R30, R60, R90, R120 (in accordance with Technical Report TR 020) Masonry tensile load: F30 (solid sand-lime brick, solid brick, hollow sand-lime brick) Transverse load: F30, F60, F90, F120 (vertically perforated brick, hollow sand-lime brick, solid brick, aerated concrete)

Useful information:

Drill perforated and hollow blocks in rotating gear (without impact mechanism)

For anchoring in solid brick and solid sand-lime brick, we recommend that you perform pull-out tests due to the differences in brick manufacturing.

Drill cuttings must be removed from the drill hole

Plastic frame anchor W-UR F 10, stainless steel A4

Plastic frame anchor approved for high loads with special screw made of A4 stainless steel with hexagon head and Symcon thread

- Anchorage via friction locking between wall plug body and anchoring base
- Wall plug body made of high-quality polyamide
- Push-through installation
- Immediate load-bearing capacity – no waiting
- Virtually no movement of the wall plug body thanks to low insertion torque and slight expansion
- Very strong twist lock
- High load-bearing capacities; expansion in four directions
- Improved load transfer in solid and hollow construction materials
- The hammer-in stop prevents premature expansion of the anchor during installation
- Low assembly workload thanks to pre-assembled plug screw
- Saves an additional U washer and prevents contact corrosion

Installation temperatures

- Temperature of anchoring base: $\geq -20^{\circ}\text{C}$
- Temperature of anchor sleeve: $\geq 0^{\circ}\text{C}$

Anchor diameter	10 mm
Anchor length (l)	115 mm
Max. attachment height (t fix)	45 mm
Through-hole in the component to be connected (d f)	10.5 mm

Art. no. 0912 810 703

P. Qty.: 40

European Technical Approval

Multiple attachment of non-load-bearing systems in concrete and masonry

European Technical Approval ETA-08/0190

Fire resistance

Concrete and masonry

Concrete

Tensile and transverse loads, R30, R60, R90, R120 (in accordance with Technical Report TR 020)

Masonry

- Tensile load: F30 (solid sand-lime brick, solid brick, hollow sand-lime brick)
- Transverse load: F30, F60, F90, F120 (vertically perforated brick, hollow sand-lime brick, solid brick, aerated concrete)

- Drill perforated and hollow blocks in rotating gear (without impact mechanism)
- For anchoring in solid brick and solid sand-lime brick, we recommend that you perform pull-out tests due to the differences in brick manufacturing.
- Drill cuttings must be removed from the drill hole

Plastic frame anchor W-UR 10, stainless steel A4

Plastic frame anchor approved for high loads with special screw made of A4 stainless steel with countersunk head and Symcon thread

- Anchorage via friction locking between anchor sleeve and anchoring base
- Anchor sleeve made of high-quality polyamide
- Push-through installation
- Immediate load-bearing capacity – no waiting
- Low insertion torque of anchor screw → slight expansion of the anchor, virtually no movement of the anchor sleeve
- Very strong twist lock
- High load-bearing capacities; expansion in four directions
- Improved load transfer: Even, continuous load distribution across the entire expansion area
- Universal frame anchor (concrete, perforated and solid brick masonry, aerated concrete)
- The hammer-in stop prevents premature expansion of the anchor during installation
- Pre-assembled anchor sleeve and special screw → easier installation
- Improved load transfer in solid and hollow construction materials

Anchor diameter	10 mm
Through-hole in the component to be connected (d f)	10.5 mm

Anchor length (l)	Max. attachment height (t fix)	Art. no.	P. Qty.
100 mm	30 mm	0912 810 502	50
160 mm	90 mm	0912 810 505	50
185 mm	115 mm	0912 810 506	50

W-UR 10 (galvanised steel, stainless steel): European Technical Approval ETA-08/0190
Anchor sleeve made of high-quality polyamide
Transverse load: F30, F60, F90, F120 (vertically perforated brick, hollow sand-lime brick, solid brick, aerated concrete)
Fire resistance W-UR 10: Concrete: Tensile and transverse loads, R30, R60, R90, R120 (in accordance with Technical Report TR 020)
Masonry tensile load: F30 (solid sand-lime brick, solid brick, hollow sand-lime brick)

- Drill perforated and hollow blocks in rotating gear (without impact mechanism)
- For anchoring in solid brick and solid sand-lime brick, we recommend that you perform pull-out tests due to the differences in brick manufacturing.
- Drill cuttings must be removed from the drill hole

Plastic frame anchor W-UR F 10 SymCon®

With hexagon bolt, zinc plated steel. Approved for high loads in concrete (single attachment), aerated concrete and masonry

- Virtually no movement of the anchor sleeve thanks to low insertion torque and slight expansion
- Secure post-installation expansion thanks to SymCon plug screw
- Saves an additional U-washer and prevents contact corrosion

Anchor diameter	10 mm
Through-hole in the component to be connected (d f)	10.5 mm

Anchor length (l)	Attachment height (t fix 1)	Art. no.	P. Qty.
50 mm	10 mm	5911 010 201	40
80 mm	40 mm	5911 010 202	40
100 mm	60 mm	5911 010 203	40
115 mm	75 mm	5911 010 204	40

European Technical Approval ETA-11/0309

When anchoring in solid brick and solid sand-lime brick, we recommend performing pull-out tests due to differences in brick manufacturing

Plastic frame anchor W-UR 10 SymCon®

With countersunk head screw, zinc-plated steel. Approved for high loads in concrete (single attachment), aerated concrete and masonry

- Virtually no movement of the anchor sleeve thanks to low insertion torque and slight expansion
- Secure post-installation expansion thanks to SymCon plug screw
- Saves an additional U-washer and prevents contact corrosion

Anchor diameter	10 mm
Through-hole in the component to be connected (d f)	10.5 mm

185 mm	145 mm	5911 010 007	50
200 mm	160 mm	5911 010 008	50
230 mm	190 mm	5911 010 009	50

European Technical Approval ETA-11/0309

When anchoring in solid brick and solid sand-lime brick, we recommend performing pull-out tests due to differences in brick manufacturing

Plastic frame anchor W-UR 10 SymCon®

With countersunk head screw, A4 stainless steel.

Approved for high loads in concrete (single attachment), aerated concrete and masonry

- Virtually no movement of the wall plug body thanks to low insertion torque and slight expansion
- Reliable post-spreading characteristics thanks to SymCon plug screw
- Increased load introduction
- Low assembly workload thanks to pre-assembled plug screw
- Saves an additional U washer and prevents contact corrosion

Multiple insertion depths

- Concrete: 3 insertion depths (40, 50 and 70 mm)
- Masonry: 2 insertion depths (50 and 70 mm)

Anchor diameter	10 mm
Anchor length (l)	100 mm
Through-hole in the component to be connected (d f)	10.5 mm
Attachment height (t fix 1)	60 mm

Art. no. 5911 010 103

P. Qty.: 50

European Technical Approval ETA-11/0309

When anchoring in solid brick and solid sand-lime brick, we recommend performing pull-out tests due to differences in brick manufacturing

Plastic frame anchor W-UR F 10 SymCon®

With hexagon bolt, stainless steel A4. Approved for high loads in concrete (single attachment), aerated concrete and masonry

- Virtually no movement of the wall plug body thanks to low insertion torque and slight expansion
- Reliable post-spreading characteristics thanks to SymCon plug screw
- Increased load introduction
- Low assembly workload thanks to pre-assembled plug screw
- Saves an additional U washer and prevents contact corrosion

Multiple insertion depths

- Concrete: 3 insertion depths (40, 50 and 70 mm)
- Masonry: 2 insertion depths (50 and 70 mm)

Anchor diameter	10 mm
Through-hole in the component to be connected (d f)	10.5 mm

Anchor length (l)	Attachment height (t fix 1)	Art. no.	P. Qty.
80 mm	40 mm	5911 010 302	40
100 mm	60 mm	5911 010 303	40

European Technical Approval ETA-11/0309

When anchoring in solid brick and solid sand-lime brick, we recommend performing pull-out tests due to differences in brick manufacturing

Plastic frame anchor W-UR 14 SymCon®

Plastic frame anchor approved for high loads with special screw made of zinc plated steel with countersunk head and Symcon thread

- Virtually no movement of the wall plug body thanks to low insertion torque and slight expansion
- Reliable post-spreading characteristics thanks to SymCon plug screw
- Increased load introduction
- Low assembly workload thanks to pre-assembled plug screw

Anchor diameter	14 mm
Through-hole in the component to be connected (d f)	14.5 mm

Anchor length (l)	Attachment height (t fix 1)	Art. no.	P. Qty.
110 mm	40 mm	0912 814 402	25

360 mm	290 mm	0912 814 411	20
390 mm	320 mm	0912 814 412	20

European Technical Approval ETA-11/0309, multiple attachment of non-load-bearing systems in concrete and masonry

- For anchoring in solid brick and solid sand-lime brick, we recommend that you perform pull-out tests due to the differences in brick manufacturing
- Lengths 330 mm, 360 mm and 390 mm are not pre-assembled
- Drill perforated and hollow blocks in rotating gear (without impact mechanism)

Plastic frame anchor W-UR 14 F SymCon

Plastic frame anchor approved for high loads with special screw made of zinc plated steel with hexagon head and Symcon thread

- Universal frame anchor (concrete, perforated and solid brick masonry)
- Virtually no movement of the wall plug body thanks to low insertion torque and slight expansion
- Reliable post-spreading characteristics thanks to SymCon plug screw
- Increased load introduction
- Low assembly workload thanks to pre-assembled plug screw
- Saves an additional U washer and prevents contact corrosion
- Wall plug body made of high-quality polyamide

270 mm	200 mm	0912 814 608	20
300 mm	230 mm	0912 814 609	20
330 mm	260 mm	0912 814 610	15
360 mm	290 mm	0912 814 611	15
390 mm	320 mm	0912 814 612	15

European Technical Approval ETA-11/0309, multiple attachment of non-load-bearing systems in concrete and masonry

- For anchoring in solid brick and solid sand-lime brick, we recommend that you perform pull-out tests due to the differences in brick manufacturing
- Lengths 330 mm, 360 mm and 390 mm are not pre-assembled
- Drill perforated and hollow blocks with a rotary drill (without impact mechanism)

Plastic frame anchor W-UR 6 SymCon®

The first 6-series plastic anchor with ETA for multiple attachment in concrete. With pre-assembled counter-sunk head screw made of zinc plated steel

- Reliable post-spreading characteristics thanks to SymCon plug screw
- Increased load introduction
- Improved load transfer
- Low assembly workload thanks to pre-assembled plug screw
- The hammer-in stop prevents premature expansion of the anchor during installation
- Anchorage via friction locking between wall plug body and anchoring base
- The wall plug body is made of high-quality polyamide

Anchor diameter	6 mm
Through-hole in the component to be connected (d f)	6.5 mm

Anchor length (l)	Art. no.	P. Qty.
60 mm	0912 806 402	100
80 mm	0912 806 403	100

W-UR 6 SymCon and W-UR F 6 SymCon (galvanised steel): European Technical Approval ETA-11/0309.

The anchor has European Technical Approval for use in multiple attachment of non-load-bearing systems (e.g. suspended ceilings etc.).

- Anchoring base with approval: Standard concrete \geq C12/15
- Anchoring bases without approval: Solid brick, solid sand-lime brick, vertically perforated brick, hollow sand-lime brick, hollow lightweight concrete blocks, solid bricks and blocks made of lightweight concrete
- Installation temperatures: Temperature of anchoring base: $\geq -20^{\circ}\text{C}$ Temperature of wall plug body: $\geq 0^{\circ}\text{C}$

Drill cuttings must be removed from the drill hole.

Plastic frame anchor W-UR F 6 SymCon®

The first 6-series plastic anchor with ETA approval for multiple attachment in concrete. With pre-assembled pan head screw made of zinc plated steel

- SymCon screw: Screwing in the SymCon screw ensures optimum compression of the wall plug body plastic (virtually no undercutting)
- The hammer-in stop prevents premature expansion of the anchor during installation
- Pre-assembled wall plug body and special screw – easier installation

Anchor diameter	6 mm
Anchor length (l)	60 mm
Through-hole in the component to be connected (d f)	6.5 mm

Art. no. 0912 806 802

P. Qty.: 100

W-UR 6 SymCon and W-UR F 6 SymCon (galvanised steel): European Technical Approval ETA-11/0309

Drill cuttings must be removed from the drill hole.

Plastic frame anchor W-RD

Plastic frame anchor without collar in natural colour. Unapproved

- Through-hole mounting
- Low insertion torque of screw – slight expansion of the anchor, virtually no movement of the wall plug body
- Strong twist lock
- Expansion in 4 directions, high load-bearing capacities
- Improved load transfer: Even, continuous load distribution across the entire expansion area
- The hammer-in stop prevents premature expansion of the anchor during installation
- Wall plug body made of high-quality polyamide
- Halogen-free and silicon-free
- Thermally stable from -40 °C to + 80 °C

Anchor diameter	Anchor length (l)	Max. attachment height (t fix)	Through-hole in the component to be connected (d f)	Art. no.	P. Qty.
6 mm	60 mm	10 mm	6.5 mm	0912 806 001	100
8 mm	60 mm	10 mm	8.5 mm	0912 808 002	100
8 mm	80 mm	10 mm	8.5 mm	0912 808 003	200
8 mm	100 mm	30 mm	8.5 mm	0912 808 004	150
8 mm	120 mm	50 mm	8.5 mm	0912 808 005	100
10 mm	100 mm	30 mm	10.5 mm	0912 810 802	100

Performance data determined in Würth test laboratory

- Drill perforated and hollow blocks with a rotary drill (without impact mechanism)
- Drill cuttings must be removed from the drill hole
- Screw length = anchor length + 1x screw Ø
- Use wood or particle board screws WITHOUT an optimised thread bit (e.g. without drill tip, counter thread, ring thread etc.)

Plastic frame anchor W-RD

Plastic frame anchors with collar in natural colour.

Unapproved

- Push-through installation
- Immediate load-bearing capacity – no waiting
- Low insertion torque of screw – slight expansion of the anchor, virtually no movement of the anchor sleeve
- Strong twist lock
- Expansion in four directions – high load-bearing capacities
- Improved load transfer: Even, continuous load distribution across the entire expansion area
- The hammer-in stop prevents premature expansion of the anchor during installation
- Anchorage via friction locking and positive locking (perforated brick) between anchor sleeve and anchoring base
- Anchor sleeve made of high-quality polyamide
- Halogen and silicon-free
- Thermally stable from -40°C to +80°C

Anchor diameter	Anchor length (l)	Max. attachment height (t fix)	Through-hole in the component to be connected (d f)	Art. no.	P. Qty.
6 mm	60 mm	10 mm	6.5 mm	0912 806 101	100
8 mm	60 mm	10 mm	8.5 mm	0912 808 102	100
8 mm	80 mm	10 mm	8.5 mm	0912 808 103	200
8 mm	100 mm	30 mm	8.5 mm	0912 808 104	150
8 mm	120 mm	50 mm	8.5 mm	0912 808 105	100

Performance data determined in Würth test laboratory

Useful information:

Drill perforated and hollow blocks with a rotary drill (without impact mechanism).

Drilling dust must be removed from the drill hole.

Screw length = anchor length + 1 x screw diameter.

Use wood or particle board screws WITHOUT an optimised thread tip (drill bit, counter thread, ring thread etc.).

Scaffolding anchor system

GR 14 mm scaffold anchors for fastening free-standing scaffolding (must be used with eyelet screw GS 12)

- Anchor sleeve and eyelet screw are perfectly coordinated to guarantee maximum safety
- Anchor made of high-quality polyamide (nylon)
- Polyamide anchors may be used only once to ensure maximum load capacity

Anchor diameter	14 mm
Embedding depth (h nom)	70 mm

Nominal drill-bit diameter (d 0)	14 mm
Drill hole depth (h 1)	80 mm

Anchor length (l) (l)	Art. no.	P. Qty.
70 mm	0912 014 070	50
100 mm	0912 014 100	50
135 mm	0912 014 135	50

- The eyelet screw must be screwed into the anchor until the screw tip protrudes from the front of the anchor by at least 1x the screw diameter. This is the only way to achieve the maximum load capacity
- The polyamide (nylon) anchor must not be reused
- Drill hollow block brick without impact mechanism
- Using carbide multi-purpose drill bits allows for a much better drill hole to be produced in perforated brick and much higher extraction values
- Hollow block brick should generally be drilled without an impact mechanism

Cover cap AK

For scaffolding anchor GR 14

Colour: White

Nominal diameter	14 mm
Colour	White

Art. no. 0912 014 027

P. Qty.: 50

Eyelet screw GS

For scaffolding anchor GR, 14 mm. Steel 4.8, blue zinc-plated.

- Anchor sleeve and eyelet screw are perfectly coordinated to guarantee maximum safety
- Eyelet screw, steel 4.8

Screw diameter (ds)	Screw length	Embedding depth (h s)	Nominal drill hole diameter	Drill hole depth (t)	Art. no.	P. Qty.
8 mm	80 mm	50 mm	10 mm	60 mm	0160 808 80	20

12 mm	450 mm	170 mm	14 mm	80 mm	0160 812 450	25

- The eyelet screw must be screwed into the anchor until the screw tip protrudes from the front of the anchor by at least 1x the screw diameter. This is the only way to achieve the maximum load capacity

- Drill hollow block brick without impact mechanism
- Using carbide multi-purpose drill bits allows for a much better drill hole to be produced in perforated brick and much higher extraction values
- Hollow block brick should generally be drilled without an impact mechanism

Plastic frame anchor W-UR 14

Universal frame anchor for concrete and masonry, suitable for scaffolding eyelet screw W-GS SymCon

Anchor sleeve made of high-quality polyamide

Anchor diameter	14 mm
-----------------	-------

Anchor length (l)	Max. attachment height (t fix)	Art. no.	P. Qty.
110 mm	10 mm	0912 814 002	25
140 mm	40 mm	0912 814 003	25

Useful information:

The user must conduct test loading at each place of use, in accordance with German safety regulation BGI/GUV-I 663, item 4.6.3

For anchoring in solid brick and solid sand-lime brick, we recommend that you perform pull-out tests due to the differences in brick manufacturing

All-rounder chemical injection mortar WIT-VM 250

The all-rounder for concrete, masonry and reinforcement attachment with subsequent mortaring (REBAR)

- Individual attachment, cracked and non-cracked concrete, seismic performance category C1
- Masonry individual attachment (system with perforated sleeve WIT-SH)
- Masonry individual attachment (system with perforated sleeve SH)
- European Technical Assessment ETA-12/0164: Individual attachment + cracked and non-cracked concrete (anchor rod W-VD-A, standard threaded rod with acceptance test certificate 3.1), seismic performance category C1
- European Technical Assessment ETA-13/1040: Individual attachment + masonry consisting of solid and perforated brick, aerated concrete (perforated sleeve WIT-SH, anchor rod WIT-AS, female thread sleeve WIT-IG, aerated concrete only with perforated sleeve WIT-SH 18x95)
- European Technical Assessment ETA-16/0757: Individual attachment + masonry consisting of solid and perforated brick, aerated concrete (perforated sleeve SH, anchor rod W-VI-A, female thread sleeve, threaded rod with acceptance test certificate 3.1, aerated concrete only without perforated sleeve)
- European Technical Assessment ETA-12/0166: Reinforcement attachment with subsequent mortaring (REBAR) - 330-ml, 420-ml, 825-ml cartridges only

Type description	WIT-VM 250
Min./max. processing temperature/conditions	-10 to 40 °C/temperature in the anchorage ground during processing and hardening
Min./max. ambient temperature /Conditions	-40 to 120 °C/after completely curing process
Temperature resistance, long-term temperatures max.	72 °C

Temperature resistance, short-term temperatures max.	120 °C
Chemical basis	Vinylester, styrene free
Colour	Grey

Contents	Included in delivery (Lieferumfang)	Suitable application gun	Shelf life from production/conditions	Approval	Art. no.	P. Qty.

Chemical injection mortar WIT-PE 500

For concrete and reinforcement attachment with subsequent mortaring (REBAR). Long processing time, ideal for deep anchor depths

- Two-component reactive resin mortar, pure epoxy, styrene-free
- Reinforcement attachment with subsequent mortaring (REBAR)
- Cartridge can continue to be used until the best before date, by changing the mixer nozzle or resealing it with the end cap

Type description	WIT-PE 500
Container	Double cartridge
Min./max. processing temperature/conditions	5 to 40 °C/temperature in the anchorage ground during processing and hardening
Min./max. ambient temperature /Conditions	-40 to 72 °C/after completely curing process
Temperature resistance, long-term temperatures max.	43 °C

Temperature resistance, short-term temperatures max.	72 °C
Shelf life from production/conditions	24 Month/cool and dry storage area, 5°C to 25°C
Approval	ETA-09/0040, ETA-07/0313
Chemical basis	Pure-Epoxy, styrene free

Contents	Included in delivery (Lieferumfang)	Suitable application gun	Colour	Art. no.	P. Qty.
385 ml	Mortar cartridge 385 ml (side-by-side) + 1 x mixer nozzle	Battery-powered application gun 585ml, Pneumatic application gun 585ml, EasyMax 385 ml, HandyMax 585 ml	Grey	0903 480 004	1/12

1400 ml	Mortar cartridge 1400 ml (side-by-side) + 1 x mixer nozzle	Pneumatic application gun 1400ml	Red	0903 480 002	1/5

- European Technical Assessment ETA-09/0040: Individual attachment + cracked and non-cracked concrete (anchor rod W-VD-A., anchor rod W-VI-A, standard threaded rod with acceptance test certificate 3.1), seismic performance category C1 (M12 to M30) and C2 (M12, M16)
- European Technical Assessment ETA-07/0313: Reinforcement attachment with subsequent mortaring (REBAR)

Fire protection 50
certified

**Seismic C1
and C2**

Chemical injection mortar **WIT-PE 1000**

Pure epoxy mortar with a long processing time, ideal for large anchoring depths and drilling holes as well as high temperatures. For compound anchor, concrete and reinforcement attachment with subsequent mortaring (REBAR)

- Two-component reactive resin mortar, pure epoxy, styrene-free
- Reinforcement attachment with subsequent mortaring

Type description	WIT-PE 1000
Container	Cartridge
Min./max. processing temperature/conditions	0 to 40 °C/temperature in the anchorage ground during processing and hardening
Min./max. ambient temperature /Conditions	-40 to 72 °C/after completely curing process
Temperature resistance, long-term temperatures max.	24 °C

Temperature resistance, short-term temperatures max.	72 °C
Shelf life from production/conditions	24 Month/cool and dry storage area, 5°C to 25°C
Approval	ETA-19/0542, ETA-19/0543
Chemical basis	Pure-Epoxy, styrene free
Colour	Grey

Contents	Suitable application gun	Art. no.	P. Qty.
440 ml	Battery-powered application gun 585ml, Application gun MULTI, Pneumatic application gun 585ml, HandyMax 585 ml	5918 605 440	1/12
585 ml	Battery-powered application gun 585ml, Application gun MULTI, Pneumatic application gun 585ml, HandyMax 585 ml	5918 605 585	1/12
1400 ml	Pneumatic application gun 1400ml	5918 605 140	1/5

- European Technical Assessment ETA-19/0542: Individual attachment + cracked and non-cracked concrete (anchor rod W-VI-A, anchor rod W-VD-A, standard threaded rod with acceptance test certificate 3.1, female thread anchor W-VI-IG), seismic performance category C1 (M8 to M30) and C2 (M12 to M24)
- European Technical Assessment ETA-19/0543: Reinforcement attachment with subsequent mortaring (REBAR)

Chemical injection mortar Natural stone specialist WIT-EA 150

Special mortar for natural stone. Also suitable for solid block masonry and non-cracked concrete

- 2-component reaction resin mortar, epoxy acrylate with styrene
- No staining when used in natural stone (a test should be performed beforehand on a stone sample to check whether the mortar compound causes discolouration)
- Cartridges can be used up to expiration of the best before date by replacing the mixer nozzle or by being closed again with sealing cap

Type description	WIT-EA 150
Min./max. processing temperature/conditions	-5 to 35 °C/temperature in the anchorage ground during processing and hardening
Min./max. ambient temperature /Conditions	-40 to 80 °C/after completely curing process
Temperature resistance, long-term temperatures max.	50 °C
Temperature resistance, short-term temperatures max.	80 °C
Shelf life from production/conditions	18 Month/cool and dry storage area, 5°C to 25°C
Chemical basis	Epoxy acrylate, with styrene
Colour	Grey

Contents	Included in delivery (Lieferumfang)	Suitable application gun	Art. no.	P. Qty.
150 ml	Mortar cartridge 150 ml (coaxial) + 1 x mixer nozzle + 1 x application plunger	Battery-powered application gun 330ml, Application gun HandyMax, Application gun MULTI, Application gun WIT 330ml, Silicone application gun 310ml	5918 301 150	1/12
330 ml	Mortar cartridge 330 ml (coaxial) + 1 x mixer nozzle	Battery-powered application gun 330ml, EasyMax 330 ml, Application gun MULTI, Application gun WIT 330ml, HandyMax 330 ml	5918 300 330	1/12

Chemical injection mortar Basic WIT-PM 200

Base mortar for masonry and non-cracked concrete

- Individual attachment of non-cracked concrete:
Anchor rod W-VI-A, anchor rod W-VD-A, standard threaded rod with acceptance test certificate 3.1
- Individual attachment for masonry (system with perforated sleeve SH):
Anchor rod W-VI-A, standard threaded rod with acceptance test certificate 3.1, perforated sleeve SH
- Two-part reactive resin mortar, styrene-free polyester
- European Technical Assessment ETA-12/0569: Individual attachment
+ non-cracked concrete (anchor rod W-VI-A, anchor rod W-VD-A, standard threaded rod with acceptance certificate 3.1)
- European Technical Assessment ETA-13/0037: Individual attachment
+ masonry (anchor rod W-VI-A, standard threaded rod 3.1, perforated sleeve SH, aerated concrete only without perforated sleeve)

Type description	WIT-PM 200
Min./max. processing temperature/conditions	-5 to 35 °C/temperature in the anchorage ground during processing and hardening
Min./max. ambient temperature/Conditions	-40 to 80 °C/after completely curing process
Temperature resistance, long-term temperatures max.	50 °C
Temperature resistance, short-term temperatures max.	80 °C
Approval	ETA-12/0569, ETA-13/0037
Chemical basis	Polyester, styrene free
Colour	Grey

Contents	Included in delivery (Lieferumfang)	Suitable application gun	Shelf life from production/ conditions	Art. no.	P. Qty.
150 ml	Mortar cartridge 150 ml (coaxial) + 1 x mixer nozzle + 1 x application plunger	Battery-powered application gun 330ml, Application gun HandyMax, Application gun MULTI, Application gun WIT 330ml, Silicone application gun 310ml	18 Month/cool and dry storage area, 5°C to 25°C	5918 241 150	1/12

Chemical injection mortar Concrete Multi WIT-UH 300

High-performance mortar for concrete and reinforcement attachment with subsequent mortaring (REBAR)

- Two-component reactive resin mortar, urethane vinyl ester hybrid mortar, styrene-free
- Reinforcement attachment with subsequent mortaring

Type description	WIT-UH 300
Min./max. processing temperature/conditions	-5 to 40 °C/temperature in the anchorage ground during processing and hardening
Min./max. ambient temperature /Conditions	-40 to 160 °C/after completely curing process
Temperature resistance, long-term temperatures max.	100 °C
Temperature resistance, short-term temperatures max.	160 °C
Shelf life from production/ conditions	18 Month/cool and dry storage area, 5°C to 25°C
Approval	ETA-17/0036, ETA-17/0127
Chemical basis	Two-component resin
Colour	Grey

Double cartridge	825 ml	Battery-powered application gun 825ml, Pneumatic application gun 825ml	5918 503 825	1/8

- European Technical Assessment ETA-17/0127: Individual attachment + cracked and non-cracked concrete (anchor rod W-VI-A, anchor rod W-VD-A, standard threaded rod with acceptance test certificate 3.1, female thread anchor W-VI-IG), seismic performance category C1 (M8 to M30) and C2 (M12 to M24)
- European Technical Assessment ETA-18/0509: Individual attachment + cracked and non-cracked concrete (anchor rod W-VI-A, anchor rod W-VD-A, standard threaded rod with acceptance test certificate 3.1), seismic performance category C1 (M8 to M30) and C2 (M12 to M24)
- European Technical Assessment ETA-17/0036: Reinforcement attachment with subsequent mortaring (REBAR)

**Fire protection
certified**

**Seismic C1
and C2**

Chemical injection mortar WIT-NORDIC

The winter mortar (installation down to -20 °C possible), for concrete and masonry

Ideal for construction sites in winter

- Can be used with an ambient and mortar temperature down to -20 °C
- Cartridge and storage temperature above -20 °C
- Fixing point, cracked and non-cracked concrete, seismic performance category C1:
Anchor rod W-VI-A, anchor rod W-VD-A, standard threaded rod with acceptance test certificate 3.1
- Fixing point masonry:
Perforated sleeve SH, anchor rod W-VI-A, standard threaded rod with acceptance certificate

Type description	WIT-NORDIC
Contents	330 ml
Included in delivery (Lieferumfang)	Mortar cartridge 330 ml (coaxial) + 1 x mixer nozzle
Suitable application gun	Battery-powered application gun 330ml, Application gun MULTI, Application gun WIT 330ml, Application gun HandyMax, EasyMax 330 ml, HandyMax 330 ml

Min./max. processing temperature/conditions	-20 to 20 °C/temperature in the anchorage ground during processing and hardening
Min./max. ambient temperature /Conditions	-40 to 120 °C/after completely curing process
Temperature resistance, long-term temperatures max.	72 °C
Temperature resistance, short-term temperatures max.	120 °C
Shelf life from production/conditions	18 Month/cool, dry and dark storage, -20 °C to 20 °C
Approval	ETA-12/0164, ETA-16/0757
Chemical basis	Vinylester, styrene free
Colour	Grey

Art. no. 0903 450 102

P. Qty.: 1/12

- European Technical Assessment ETA-12/0164: Fixing point + cracked and non-cracked concrete (anchor rod W-VI-A, anchor rod W-VD-A, standard threaded rod with acceptance test certificate 3.1), seismic performance category C1
- European Technical Assessment ETA-16/0757: Fixing point + masonry (perforated sleeve SH, anchor rod W-VI-A, standard threaded rod with acceptance certificate 3.1)

**Seismic C1
and C2**

Useful information:

WIT-NORDIC is suitable for extremely low temperatures (cartridge, environment, anchoring base) down to -20°C. Use at temperatures of +20°C or above (cartridge, environment, anchoring base) is not recommended.

Chemical injection mortar WIT-VIZ Express

Fast curing composite mortar for the injection systems W-VIZ (concrete) and W-VIZ dynamic (fatigue-related influences)

- Fast curing
- Cartridge can continue to be used until the best before date, by changing the mixer nozzle or resealing it with the end cap
- Two-part reactive resin mortar, styrene-free vinylester

Type description	WIT-EXPRESS
Container	Coaxial cartridge
Contents	330 ml
Included in delivery (Lieferumfang)	Mortar cartridge 330 ml (coaxial) + 1 x mixer nozzle
Suitable application gun	Battery-powered application gun 330ml, Application gun HandyMax, Application gun MULTI, Application gun WIT 330ml
Min./max. processing temperature/conditions	-5 to 30 °C/temperature in the anchorage ground during processing and hardening
Min./max. ambient temperature /Conditions	-40 to 120 °C/after completely curing process
Temperature resistance, long-term temperatures max.	72 °C
Temperature resistance, short-term temperatures max.	120 °C

Shelf life from production/conditions	18 Month/cool and dry storage area, 5°C to 25°C
Approval	ETA-04/0095, ETA-05/0034, DIBt Z-21.3-1909, ETA-18/0979
Chemical basis	Vinylester, styrene free
Colour	Grey

Art. no. 0903 420 303

P. Qty.: 1/12

- European Technical Assessment ETA-04/0095: Individual attachment + cracked and non-cracked concrete (anchor rod W-VIZ-A, female thread anchor W-VIZ-IG)
- European Technical Approval ETA-05/0034: Individual attachment + non-cracked concrete (Anchor rod W-VD-A, anchor rod W-VI-A)
- General technical approval Z-21.3-1909: Fatigue-inducing (dynamic) + individual attachment + cracked and non-cracked concrete (anchor rod W-VIZ-A dyn)

Seismic C1
and C2

Chemical injection mortar Concrete specialist WIT-VIZ

Composite mortar for extreme loads in concrete (injection systems F-VIZ) and fatigue-related influences (injection system W-VIZ dynamic)

- Cartridge can be reused by replacing mixer nozzle or by reclosing with sealing cap
- Individual attachment, cracked and non-cracked concrete: Anchor rod W-VIZ-A or female thread sleeve W-VIZ-IG
- Individual attachment, dynamic: Anchor rod W-VIZ-A dynamic

Type description	WIT-VM 100
Container	Coaxial cartridge
Min./max. processing temperature/conditions	-5 to 40 °C/temperature in the anchorage ground during processing and hardening
Min./max. ambient temperature /Conditions	-40 to 120 °C/after completely curing process

**Fire protection
certified**

**Seismic C1
and C2**

Concrete screw, stud screw, LONG W-BS/S

Ideal for the economical mounting of pipe clamps, spacer sleeves, rails (M8 x 16 connecting thread), through thick insulation materials, zinc-plated steel

- Extremely flexible to use
- Very quick and easy assembly
- High load-bearing capacities with very low axial and edge clearance

Anchor size	6 mm
Thread diameter	7.5 mm
Connection thread	M8 x 16
Material	Steel
Surface	Zinc plated
External drive	WS10

Anchor length (l)	Attachment height (t fix 1)	Attachment height (t fix 2)	Attachment height (t fix 3)	Art. no.	P. Qty.

195 mm	160 mm	155 mm	140 mm	5929 186 160	100

ETA-16/0043 for single mounting

Option 1, cracked and non-cracked concrete

ETA-16/0128 for multiple mounting

Concrete and hollow-core prestressed concrete ceilings

Fire resistance

R30, R60, R90, R120; Technical Report TR020 (included in approvals)

A suitable tangential impact screwdriver must be used for assembly.
 If several anchors are arranged behind each other in the same load direction, only one anchor is positioned for transverse loads.

Fixing bolt anchor W-FAZ PRO/S

High-performance stud anchors for highest loads in cracked and non-cracked concrete, zinc plated steel

- Highest load values even at low edge distance and spacing
- Quick assembly with fewer reinforcement impacts
- Economical and flexible application thanks to variable anchoring depth

Material	Steel
Surface	Zinc plated

Metric anchor diameter	Anchor length (l)	Effective length (B)	Min./max. height of the fixture (t fix)	Attachment height standard (t fix,std)	Art. no.	P. Qty.

European Technical Approval ETA-20/0229 for individual attachment, option 1, cracked and non-cracked concrete:

- Static or quasi-static exposure (M8 - M16)
- Seismic exposure, performance category C1 and C2 (M8 - M16)
- Fire load R30, R60, R90, R120

Load-bearing behaviour and fire load (uniform temperature curve) - expert opinion no. GS 6.1/20-018-1:

- Fire duration 180 minutes (M8 - M16)

Compound anchor mortar cartridge W-VD

For compound anchor cartridge systems W-VD (non-cracked concrete)

- High load-bearing capacities, low axial and edge clearance
- Cured injection mortar provides best possible seal for drill hole
- Attachment with low expansion pressure allows minimal edge and axial clearance
- Anchorage via bond between mortar, anchor rod and anchoring base. Galvanised steel anchor rod in sizes M8, M10, M12, M16, M20 and M24

Min./max. processing temperature	-5 to 35 °C
Shelf life from production/conditions	18 Month/cool and dry storage area, 5°C to 25°C

European Technical Approval ETA-06/0074: Individual fastening + non-cracked concrete (Anchor rod W-VD-A)
Galvanised steel: European Technical Approval ETA-06/0074
Fire resistance: F30, F60, F90, F120: Exposure to fire on one side according to DIN EN 1363-1:1999-10

Clean the drill hole: 1x blow out, 1x brush out, 1x blow out, 1x brush out
Insert anchor rod using hammer drill or impact drill in rotation + impact mode.

Liquid anchor WIT-FIX

For fixing lightweight components, repairing and filling damaged or excessively large drill holes, or as a repair compound for wood material

- Easy and quick to apply
- Cures quickly – minimal wait before installation (3–5 minutes at room temperature)
- WIT-FIX can also be used as a repair compound for all wood materials
- Screws can be screwed directly into the compound once it has cured
- WIT-FIX can be painted over and sanded
- Also suitable for difficult and rotting materials (renovation work and old buildings)
- Attachment without expansion pressure

Type description	WIT-FIX
Contents	25 ml
Included in delivery (Lieferumfang)	2 x positive mixers, 2 x extensions and 2 x perforated sleeves 10 x 45
Optimum processing temperature for cartridge	20 °C
Min. processing temperature	10 °C
Min./max. curing time/conditions	3-5 min/at room temperature
Shelf life from production	12 Month
Chemical basis	Two-component polyurethane

Art. no. 0903 470 001

P. Qty.: 1/12

Anchor rod W-VIZ-A/S

For injection system W-VIZ/S (concrete). Zinc-plated steel

- Galvanised steel
- Push-through installation (M10 to M24) and cotter-pin installation (M8 to M24)
- High load-bearing capacities, low axial and edge clearance
- The injection anchor is suitable for cracked concrete (tension zone) and non-cracked concrete (compression zone)
- Attachment with low expansion pressure allows minimal edge and centre to centre distances
- The dimensions of the anchor rod enable safe expansion performance
- Mechanical drill hole cleaning: Easy to use, excellent drill hole cleaning, high load-bearing capacities
- Force-controlled/torque-controlled expanding galvanised steel anchor in sizes M8, M10, M12, M16, M20 and M24
- The force is transferred via the mechanical teeth of individual cones in the composite mortar and also via a combination of retention and friction forces in the anchoring base (concrete)

Type description	W-VIZ-A/S
Required injection mortar	WIT-VM 100, WIT-Express, WIT-VIZ, WIT-VIZ express

- European Technical Approval ETA-04/0095 for individual attachment, option 1, cracked and non-cracked concrete, seismic performance category C1 and C2
- Fire resistance: F30, F60, F90 and F120

Suitable injection mortar: WIT-VM 100, WIT-Express
 Clean the hole: 2x blow-out, 2x mechanical brush-out, 2x blow-out
 If the drill hole is M20 or larger, blow out with compressed air using the appropriate compressed air nozzles

Anchor rod W-VIZ-A/A4

For injection system W-VIZ/A4 (concrete). Stainless steel A4

- Push-through installation (M10 to M24) and cotter-pin installation (M8 to M24)
- High load-bearing capacities, low axial and edge clearance
- The injection anchor is suitable for cracked concrete (tension zone) and non-cracked concrete (compression zone)
- Cured chemical injection mortar provides best possible seal for drill hole
- Attachment with low expansion pressure allows minimal edge and axial clearance
- The dimensions of the anchor rod enable safe expansion performance
- Mechanical drill hole cleaning: Easy to use, excellent drill hole cleaning, high load-bearing capacities
- Applying the specified torque during the anchoring process ensures secure installation
- Force-controlled/torque-controlled expanding galvanised steel anchor in sizes M8, M10, M12, M16, M20 and M24
- The force is transferred via the mechanical teeth of individual cones in the composite mortar and also via a combination of retention and friction forces in the anchoring base (concrete)

Type description	W-VIZ-A/A4
Required injection mortar	WIT-VM 100, WIT-Express, WIT-VIZ, WIT-VIZ express
Approval	ETA-04/0095
Material	Stainless steel A4

- European Technical Approval ETA-04/0095 for individual attachment, option 1, cracked and non-cracked concrete, seismic performance category C1 and C2
- Fire resistance: F30, F60, F90 and F120

Suitable injection mortar: WIT-VM 100, WIT-Express

Clean the hole: 2x blow-out, 2x mechanical brush-out, 2x blow-out

If the drill hole is M20 or larger, blow out with compressed air using the appropriate compressed air nozzles

Anchor rod W-VIZ-A/S DYNAMIC

For injection system W-VIZ/S dynamic (concrete, fatigue-related exposure). Zinc-plated steel

- Push-through installation
- Easy installation: Anchor is supplied pre-assembled (no laborious assembly of anchor components required).
- The W-VIZ dynamic injection system enables considerably more cost-effective dimensioning of the anchorage than previous systems (much greater loads are permissible for axial and diagonal tension, a distinction can be made between static and non-static loads, and greater loads may be transferred with a limited number of load cycles)
- Cured chemical injection mortar provides best possible seal for drill hole
- Attachment with low expansion pressure allows minimal edge and centre to centre distances
- The dimensions of the anchor rod enable safe expansion performance
- Mechanical drill hole cleaning: Easy to use, excellent drill hole cleaning, high load-bearing capacities
- Cartridge can be reused by changing the mixer nozzle or resealing it with the end cap
- Force-controlled/torque-controlled expanding galvanised steel anchor in sizes M12, M16, M20 or high corrosion-resistant steel (HCR, 1.4529) in size M16
- The force is transferred via the mechanical interlocking of individual cones in the composite mortar and by a combination of retention and frictional forces in the anchoring base (concrete)

Type description	W-VIZ-A/S dyn.
Required injection mortar	WIT-VM 100, WIT-Express, WIT-VIZ, WIT-VIZ express
Approval	DIBt Z-21.3-1909, ETA-18/0979
Material	Steel
Surface	Zinc plated

Metric anchor diameter	Effective anchoring depth (h ef)	Attachment height (t fix)	Anchor length (l)	Nominal drill-bit diameter (d 0)	Art. no.	P. Qty.

M20	170 mm	50 mm	280 mm	24 mm	0905 482 001	5

General construction permit Z-21.3-1909 for individual attachment, cracked and non-cracked concrete + fatigue-inducing (dynamic)

W-VIZ/HCR dynamic in highly corrosion-resistant steel (material type no. 1.4529) available on special order

Suitable chemical injection mortar: WIT-VM 100, WIT-EXPRESS

Clean the hole: 2x blow-out, 2x mechanical brush-out, 2x blow-out

If the drill hole is M20 or larger, blow out with compressed air using the appropriate compressed air nozzles

Female thread anchor W-VIZ-IG/A4

For injection systems W-VIZ-IG/A4 (concrete). Stainless steel A4

- Standard threaded rods and screws can be used (see ETA-04/0095 for requirements)
- High load-bearing capacities
- Can be set flush with surface: Attached parts can be removed/remounted at any time.
- The injection anchor is suitable for cracked concrete (tension zone) and non-cracked concrete (compression zone)
- Cured chemical injection mortar provides best possible seal for drill hole
- Attachment with low expansion pressure allows minimal edge and axial clearance
- The dimensions of the anchor rod enable safe expansion performance
- Mechanical drill hole cleaning: Easy to use, excellent drill hole cleaning, high load-bearing capacities
- Force-controlled/torque-controlled expanding galvanised steel anchor in sizes M6, M8, M10, M12, M16 and M20
- The force is transferred via the mechanical teeth of individual cones in the composite mortar and also via a combination of retention and friction forces in the anchoring base (concrete)

Type description	W-VIZ-IG/A4
Approval	ETA-04/0095
Required injection mortar	WIT-VM 100, WIT-Express, WIT-VIZ, WIT-VIZ express
Material	Stainless steel A4
Surface	Coated

W-VD-A/S 8.8	M24	8.8	55 mm	300 mm	5915 324 300	5

The anchor rod is covered by the following approvals:

- Compound anchor cartridge system W-VD, option 8: ETA-06/0074
- BETON-MULTI WIT-UH 300 injection system, option 1: ETA-17/0127
- ALLROUNDER WIT-VM 250 injection system, option 1: ETA-12/0164
- WIT-Nordic injection system, option 1: ETA-12/0164
- WIT-PE 500 injection system, option 1: ETA-09/0040
- BASIC WIT-PM 200 injection system, option 7: ETA-12/0569

Anchor rod W-VD-A/A4

For compound anchor cartridge system W-VD and WIT injection systems in concrete. Stainless steel A4

- Stainless steel A4
- Anchor rod with point angle and hexagon socket (makes rotation-impact insertion possible with cartridge system)

Type description	W-VD-A/A4
Property class	70
Material	Stainless steel A4

- BASIC WIT-PM 200 injection system, option 7: ETA-12/0569

Female thread sleeve W-VD-IG/A4

For compound anchor cartridge system W-VD and WIT injection systems in non-cracked concrete. A4 stainless steel

Anchorage via bond between mortar, female thread sleeve and anchoring base

Stainless steel A4 female thread sleeve in sizes (female thread) M8, M10, M12 and M16

Type description	W-VD-IG/A4
Surface	Plain
Material	Stainless steel A4

The anchor rod is covered by the following approvals:

- ALLROUNDER WIT-VM 250 injection system, option 1: ETA-12/0164
- WIT-Nordic injection system, option 1: ETA-12/0164
- BETON-MULTI WIT-UH 300 injection system, option 1: ETA-17/0127
- WIT-PE 500 injection system, option 1: ETA-09/0040
- BASIC WIT-PM 200 injection system, option 7: ETA-12/0569
- W-VI injection system (WIT-Express chemical injection mortar), option 7: ETA-05/0034
- BASIC WIT-PM 200 injection system, masonry: ETA-13/0037
- ALLROUNDER WIT-VM 250 injection system, masonry: ETA-16/0757

Application gun WIT

For pressing out WIT cartridges (150 ml, 280 ml, 320 ml, 300 ml, 330 ml) and silicone cartridges

- Suitable for applying from 150 ml, 320 ml and 330 ml coaxial cartridges, 300 ml tubular film cartridges, 280 ml peeler cartridges and silicone cartridges
- Scale on dipstick for precise reading of fill level

Type description	WIT application gun, 330 ml
Suitable for injection mortar	WIT-Express, WIT-VM 100, WIT-VM 250, WIT-EA 150, WIT-Nordic, WIT-PM 200, WIT-UH 300
Suitable for cartridges type	Schlauchfolie (1:10) + 300 ml, Koaxial (1:10) + 330 ml, Koaxial (1:10) + 150 ml, Koaxial (1:10) + 320 ml, Peeler (1:10) + 280 ml
Colour	Black
Product weight (per item)	880 g

Art. no. 0891 003

P. Qty.: 1

Female thread sleeve WIT

For bonded anchors in masonry. Galvanised steel, unapproved.

Type description	Female thread sleeve WIT
Material	Steel
Surface	Zinc plated

Female thread	Length	Min./max. required screw-in depth	Nominal drill-bit diameter sieve sleeve (d 0)	Effective anchoring depth, sleeve (h ef)	Art. no.	P. Qty.
6 mm	50 mm	6-18 mm	12 mm	50 mm	0903 46 06	10
10 mm	80 mm	10-22 mm	20 mm	80 mm	0903 46 10	10
12 mm	80 mm	12-25 mm	20 mm	80 mm	0903 46 12	10

Unapproved

Perforated sleeve, metal

For WIT injection systems, masonry, unapproved

Required injection mortar	WIT-VM 250, WIT-PM 200, WIT-NORDIC
Approval	No

Diameter x length	Nominal drill-bit diameter (d 0)	Suitable for threaded rods	Art. no.	P. Qty.
11 x 1000 mm	12 mm	M6	0903 44 128	1
14 x 1000 mm	16 mm	M8, M10	0903 44 168	1

Application gun HandyMax®

For pressing out WIT cartridges (150 ml, 320 ml, 330 ml)

Suitable for pressing out coaxial cartridges 150 ml, 320 ml and 330 ml

Type description	HandyMax application gun
Suitable for injection mortar	WIT-Express, WIT-VM 100, WIT-VM 250, WIT-EA 150, WIT-Nordic, WIT-PM 200, WIT-UH 300
Suitable for cartridges type	Koaxial (1:10) + 330 ml, Koaxial (1:10) + 150 ml, Koaxial (1:10) + 320 ml
Colour	Black, Red
Product weight (per item)	1124 g

Art. no. 0891 007

P. Qty.: 1

Please consider the legal instruction at the beginning of this chapter.

Cordless application gun WIT

Powerful Li-ion battery-powered application gun for WIT cartridges

- Powerful 18 V/2 Ah Li-ion battery
- Memory function for consistent quantity of mortar
- Adjustable speed
- Drip protection
- LED light

Nominal voltage	18 V/DC
Number of rechargeable batteries/batteries	1 PCS
Rechargeable battery/battery capacity	2 Ah
Included in delivery (Lieferumfang)	Battery-powered application gun + battery charger + 18 V 2 Ah Li-ion battery + case
Min./max. ambient temperature	5 to 40 °C
Min./max. air humidity	30-80 %

Type description	Suitable for cartridges type	Pressing force	Weight of machine with rechargeable battery	Suitable for mortar cartridge	Art. no.	P. Qty.
Cordless application gun WIT, 330 ml	Koaxial (1:10) + 150 ml, Koaxial (1:10) + 330 ml, Schlauchfolie (1:10) + 300 ml	2650 N	3.6 kg	WIT-EA 150, WIT-EXPRESS, WIT-NORDIC, WIT-PM 200, WIT-VM 100, WIT-VM 250, WIT-UH 300	0891 003 330	1
Cordless application gun WIT, 420 ml	Koaxial (1:10) + 380 ml, Koaxial (1:10) + 420 ml	3950 N	3.3 kg	WIT-VM 100, WIT-VM 250	0891 003 420	1
Cordless application gun WIT, 585 ml	Side-by-side (1:3) + 385 ml, Side-by-side (1:3) + 585 ml	2650 N	3.9 kg	WIT-PE 500	0891 003 585	1
Cordless application gun WIT, 825 ml	Side-by-side (1:10) + 825 ml	5000 N	3.9 kg	WIT-VM 250, WIT-UH 300	0891 003 825	1

Mixer nozzle FILL & CLEAN

For WIT cartridges of WIT-VM 250, WIT-VM 100, WIT-Nordic, WIT-Express, WIT-PM 200, WIT-EA 150 systems. With cleaning element

Suitable for chemical injection mortar:

- WIT-VM 100
- WIT-EXPRESS
- WIT-VM 250
- WIT-EA 150
- WIT-PM 200
- WIT-NORDIC
- WIT-C 100

Suitable for mortar cartridge:

- Coaxial (1:10): 150 ml, 330 ml
- Tubular film (1:10): 300 ml

Length	21.5 cm
Diameter	8 mm
Colour	Red
Suitable for injection mortar	WIT-EA 150, WIT-Express, WIT-Nordic, WIT-PM 200, WIT-VM 100, WIT-VM 250
Suitable for cartridges type	Koaxial (1:10) + 150 ml, Koaxial (1:10) + 330 ml, Koaxial (1:10) + 380 ml, Koaxial (1:10) + 420 ml, Schlauchfolie (1:10) + 300 ml

Art. no. 0903 420 001

P. Qty.: 10

Mixer nozzle extension WIT-MV

Extension for the mixer nozzle

Type description	WIT-MV mixer extension, rigid
------------------	-------------------------------

Outer diameter	Length	Art. no.	P. Qty.
8 mm	0.185 m	0903 420 003	10
10 mm	0.2 m	0903 420 004	10
16 mm	2 m	0903 488 122	20

System case WIT-REBAR

For components of the WIT injection systems REBAR

Assembly cleaning kit for injection systems for subsequently mortared reinforcement attachments

Supplier product designation	Number of pieces in assortment/set	Art. no.	P. Qty.
REBAR-Koffer M	63 PCS	5964 903 004	1
REBAR-Koffer XXL	125 PCS	5964 903 003	1

Perforated sleeve SH

For injection systems all-rounder ALLROUNDER WIT-VM 250, WIT-NORDIC and BASIC WIT-PM 200, masonry, individual attachment

Plastic perforated sleeve

Individual attachment in masonry

- ALLROUNDER WIT-VM 250, anchor rod W-VI-A, standard threaded rod with acceptance test certificate, perforated sleeve SH
- WIT-NORDIC, anchor rod W-VI-A, standard threaded rod with acceptance test certificate, perforated sleeve SH
- BASIC WIT-PM 200, anchor rod W-VI-A, standard threaded rod with acceptance test certificate, perforated sleeve SH

Material	Plastic
Required injection mortar	WIT-PM 200, WIT-VM 250, WIT-NORDIC
Approval	ETA-13/0037, ETA-16/0757, ETA-20/0854

Type description	Diameter	Length	Nominal drill-bit diameter (d 0)	Drill hole depth (h 0)	Art. no.	P. Qty.
SH 12 x 80	12 mm	80 mm	12 mm	85 mm	0903 44 123	20
SH 16 x 85	16 mm	85 mm	16 mm	90 mm	0903 44 164	20
SH 16 x 130	16 mm	130 mm	16 mm	135 mm	0903 44 165	20
SH 20 x 85	20 mm	85 mm	20 mm	90 mm	0903 44 203	20
SH 20 x 130	20 mm	130 mm	20 mm	135 mm	0903 44 204	20
SH 20 x 200	20 mm	200 mm	20 mm	205 mm	0903 44 205	20

- European Technical Assessment ETA-16/0757 and ETA-20/0854: Individual attachment + masonry in solid and perforated brick (perforated sleeve SH, ALLROUNDER WIT-VM 250 or WIT-NORDIC, anchor rod W-VI-A, standard threaded rod with acceptance test certificate 3.1)
- European Technical Assessment ETA-13/0037: Individual attachment + masonry in solid and perforated brick (perforated sleeve SH, BASIC WIT-PM 200, anchor rod W-VI-A, standard threaded rod with acceptance test certificate 3.1)

Do not use perforated sleeve SH in aerated concrete!

Perforated sleeve WIT-SH

**For ALLROUNDER WIT-VM 250 injection system,
masonry + WIT-SH perforated sleeve**

Masonry individual attachment (system with perforated sleeve WIT-SH):

- ALLROUNDER chemical injection mortar WIT-VM 250, anchor rod WIT-AS, female thread sleeve WIT-IG
- Required for anchoring in perforated brick masonry and aerated concrete (only WIT-SH 18x95)
- The anchor rods (WIT-AS) or female thread sleeves (WIT-IG) will be held centrally in the perforated sleeve during mounting
- The perforated sleeve barbs keep the perforated sleeve or anchor rod (short dimensions) from falling out during mounting – overhead mounting

Material	Plastic
Required injection mortar	WIT-VM 250
Approval	ETA-13/1040

Type description	Diameter	Length	Nominal drill-bit diameter (d 0)	Drill hole depth (h 0)	Art. no.	P. Qty.
WIT-SH 12/50	12 mm	50 mm	12 mm	55 mm	0903 44 121	20
WIT-SH 18/95	18 mm	95 mm	18 mm	100 mm	0903 44 180	10/200

European Technical Assessment ETA-13/1040: Individual attachment plus solid and perforated brick masonry, aerated concrete (ALLROUNDER WIT-VM 250 chemical injection mortar, anchor rod WIT-AS, female thread sleeve WIT-IG)

Machine chuck Hexagonal, M6

For concrete cleaning brush and masonry cleaning brush

Connection thread	M6
Length	100 mm
Tool holding device	Hexagon

Art. no. 0905 499 101

P. Qty.: 1

Suction bell

Vacuum cleaner adapter for extracting drilling dust when drilling or cleaning holes

Applies suction directly on the base thanks to a 2-chamber system

Subsequent cleaning is reduced

Clean boring without assistance

Bore nominal diameter: 6-32 mm

Just connect to a vacuum cleaner

Connection diameter: 30-38 mm

Art. no. 0903 990 010

P. Qty.: 1/15

Cleaning brush for masonry with M6 connecting thread

For hole cleaning of WIT injection systems in masonry (WIT-VM 250, WIT-Nordic, WIT-PM 200)

- Material: Steel
- With M6 connecting thread

Nominal drill hole diameter	8 mm
Suitable for anchor rod	WIT-AS M6/50
Outer diameter	9 mm
Length	120 mm
Filling length	80 mm
Connection thread	M6
Material	Steel

Art. no. 0905 499 020

P. Qty.: 1

Cleaning brush for concrete and masonry with connecting thread M6 WIT-RMB

For drill hole cleaning in concrete and masonry (WIT-VM 250, WIT-UH 300, W-VIZ, WIT-CONCRETE SCREW, WIT-PM 200, WIT-NORDIC, WIT-PE 500)

Stainless steel wire brush with connecting thread M6

Connection thread	M6
Material	Steel
Material of the wire	Stainless steel

Nominal drill hole diameter	Suitable for anchor rod	Suitable for female thread sleeve	Suitable for sieve sleeve	Suitable for rod diameter	Art. no.	P. Qty.
10 mm	M8	FT M6			0903 489 610	1

M8	280 mm	0903 489 103	1

Blow-out pump

For „blow-out“ drill-hole cleaning

- Drill hole cleaning with handheld blower
- Blow-out tube diameter: 9 mm

Length	415 mm
Volume	900 ml
Colour	Grey
Diameter	70 mm

Art. no. 0903 990 001

P. Qty.: 1

For a nominal bore diameter of 10 mm, we recommend the „blow-out pump reducer attachment“ (reduces the diameter of the blow-out tube to 8 mm).

Fixing bolt anchor W-FAZ/S

Bolt anchor for high loads in cracked and non-cracked concrete. Steel, zinc-plated

- High load-bearing capacities, low axial and edge clearance
- Immediate load-bearing capacity – no waiting
- Time-saving through-bolt mounting

Approval ETA-99/0011 for individual attachment, option 1, cracked and non-cracked concrete, seismic performance category C1 and C2 (M8 – M20)

- Fire resistance (M8 – M16): F30, F60, F90 and F120; exposure to fire according to DIN 4102-2:1977-09 (uniform temperature curve)
- Fire resistance: R30, R60, R90 and R120; TR020 (included in ETA-99/0011)

Material	Steel
Surface	Zinc plated

Fixing bolt anchor W-FAZ/A4

Bolt anchor for high loads in cracked and non-cracked concrete. Stainless steel A4

- High load-bearing capacities, low axial and edge clearance
- Immediate load-bearing capacity – no waiting
- Time-saving through-bolt mounting

Material	Stainless steel A4
----------	--------------------

- Approval ETA-99/0011 for individual attachment, option 1, cracked and non-cracked concrete, seismic performance category C1 and C2 (M8-M20)
- Fire resistance [M8-M16]: F30, F60, F90 and F120; exposure to fire according to DIN 4102-2:1977-09 (uniform temperature-time curve)
- Fire resistance: R30, R60, R90 and R120; TR020 (included in ETA-99/0011)

Fixing anchor W-FAZ/HCR

Bolt anchor for high loads in cracked and non-cracked concrete. Highly corrosion-resistant steel, HCR

High load-bearing capacities, low axial and edge clearances

Time-saving push-through installation

Immediate load-bearing capacity

No waiting

Fixing anchor cone with patented plastic coating

Safe expansion in cracked concrete

Reduced anchoring depth

- Minimises drilling, time-saving
- Flexible fields of application

Torque-controlled expanding anchor made of highly corrosion-resistant steel A4

Material	High corrosion-resistant steel, 1.4529 X1NiCrMoCuN25-20-7

- Fire load to ZTV-ING Part 5 (uniform temperature curve – tunnel fire room curve)

Fixing bolt anchor W-FAZ/S with large washer

Bolt anchor for high loads in cracked and non-cracked concrete. Steel, zinc-plated

- High loads, small axis and edge clearance
- Immediate load-bearing capacity – no waiting times
- Time-saving push-through installation
- Reduced anchor depth
- Minimised drilling, time-saving
- Versatile applications

- Approval ETA-99/0011 for individual attachment, option 1, cracked and non-cracked concrete, seismic performance category C1 and C2 (M8-M20)
- Fire resistance (M8-M16): F30, F60, F90 and F120; exposure to fire according to DIN 4102-2:1977-09 (uniform temperature-time curve)
- Fire resistance: R30, R60, R90 and R120; TR020 (included in ETA-99/0011)

Female thread fixing bolt anchor W-FAZ-IG/S – cotter-pin installation

Female thread bolt anchor for high loads in cracked and non-cracked concrete, ideal for a clean finish on the attached part. Zinc-plated steel

- High load-bearing capacity, low centre to centre and edge clearance
- Immediate load-bearing capacity – no waiting
- Torque-controlled expanding anchor made from galvanised steel
- Safe expansion in cracked concrete owing to fixing anchor cone with patented plastic coating
- Countersunk screws ensure an elegant appearance for visible anchorages combined with high load-bearing capacity (e.g. railings)
- Also suitable for temporary anchorages (cotter-pin installation, e.g. flexible stadium seating – flush with surface to eliminate risk of injury)

Material	Steel
Surface	Zinc plated

Metric anchor diameter	Anchor length (l)	Min. screw-in depth of threaded rod (Lsd)	Art. no.	P. Qty.
M6	50 mm	9 mm	0904 706 110	100
M8	62 mm	12 mm	0904 708 110	50
M10	70 mm	15 mm	0904 710 110	25
M12	86 mm	18 mm	0904 712 110	20

- ETA-99/0011 for individual attachment, option 1, cracked and non-cracked concrete
- Fire resistance: R30, R60, R90, R120; Technical Report TR020 (included in ETA-99/0011)

- The W-FAZ-IG fixing bolt anchor must be inserted using the appropriate approved setting tools (anchor system)
- Hexagonal bolts, countersunk screws, washers, countersunk washers and nuts have a special coating and are only permissible in the anchor system in accordance with ETA-99/0011. Therefore, please order separately.
- Threaded rods may only be used if the conditions specified in approval ETA-99/0011 (material quality, dimensions, mechanical properties) are met.
- The torque required for anchoring can be applied with Würth torque wrenches and suitable attachments (open-end socket spanners).

Female thread fixing bolt anchor W-FAZ-IG/S – push-through installation

Female thread bolt anchor for high loads in cracked and non-cracked concrete, ideal for a clean finish on the attached part. Zinc-plated steel

- High load-bearing capacity, low centre to centre and edge clearance
- Immediate load-bearing capacity – no waiting
- Torque-controlled expanding anchor made from galvanised steel
- Safe expansion in cracked concrete owing to fixing anchor cone with patented plastic coating
- Countersunk screws ensure an elegant appearance for visible anchorages combined with high load-bearing capacity (e.g. railings)

M12	106 mm	18 mm	0904 712 012	20

- ETA-99/0011 for individual attachment, option 1, cracked and non-cracked concrete
- Fire resistance: R30, R60, R90, R120; Technical Report TR020 (included in ETA-99/0011)

- The W-FAZ-IG fixing bolt anchor must be inserted using the appropriate approved setting tools (anchor system).
- Hexagonal bolts, countersunk screws, washers, countersunk washers and nuts have a special coating and are only permissible in the anchor system in accordance with ETA-99/0011. Therefore, please order separately.
- Threaded rods may only be used if the conditions specified in approval ETA-99/0011 (material quality, dimensions, mechanical properties) are met.
- The torque required for anchoring can be applied with Würth torque wrenches and suitable attachments (open-end socket spanners).

Female thread fixing bolt anchor W-FAZ-IG/A4 – cotter-pin installation

Female thread bolt anchor for high loads in cracked and non-cracked concrete, ideal for a clean finish on the attached part. Stainless steel A4

- High load-bearing capacity, low centre to centre and edge clearance
- Immediate load-bearing capacity – no waiting
- Torque-controlled expanding A4 stainless steel anchor
- Safe expansion in cracked concrete owing to fixing anchor cone with patented plastic coating
- Countersunk screws ensure an elegant appearance for visible anchorages combined with high load-bearing capacity (e.g. railings)
- Also suitable for temporary anchorages (cotter-pin installation, e.g. flexible stadium seating – flush with surface to eliminate risk of injury)

Material	Stainless steel
Surface	Plain

Metric anchor diameter	Anchor length (l)	Min. screw-in depth of threaded rod (Lsd)	Art. no.	P. Qty.
M8	62 mm	12 mm	0904 808 110	50
M10	70 mm	15 mm	0904 810 110	25
M12	86 mm	18 mm	0904 812 110	20

- ETA-99/0011 for individual attachment, option 1, cracked and non-cracked concrete
- Fire resistance: F30, F60, F90 and F120; exposure to fire according to DIN 4201-2:1977-09 (uniform temperature-time curve)
- Fire resistance: R30, R60, R90 and R120; TR020 (included in ETA-99/0011)

- The W-FAZ-IG fixing bolt anchor must be inserted using the appropriate approved setting tools (anchor system).
- Hexagonal bolts, countersunk screws, washers, countersunk washers and nuts have a special coating and are only permissible in the anchor system in accordance with ETA-99/0011. Therefore, please order separately.
- Threaded rods may only be used if the conditions specified in approval ETA-99/0011 (material quality, dimensions, mechanical properties) are met.
- The torque required for anchoring can be applied with Würth torque wrenches and suitable attachments (open-end socket spanners).
- A version made from highly corrosion-resistant (HCR) steel is available on request for use in areas with very high risk of corrosion (e.g. indoor swimming pool atmospheres, road tunnels, poorly ventilated car parks, or parts that are immersed in seawater or in coastal atmospheres).

Female thread fixing bolt anchor W-FAZ-IG/A4 – push-through installation

Female thread bolt anchor for high loads in cracked and non-cracked concrete, ideal for a clean finish on the attached part. Stainless steel A4

- High load-bearing capacity, low centre to centre and edge clearance
- Immediate load-bearing capacity – no waiting
- Torque-controlled expanding A4 stainless steel anchor
- Safe expansion in cracked concrete owing to fixing anchor cone with patented plastic coating
- Countersunk screws ensure an elegant appearance for visible anchorages combined with high load-bearing capacity (e.g. railings)

- The torque required for anchoring can be applied with Würth torque wrenches and suitable attachments (open-end socket spanners).

Hexagon nut, type B/A4

DIN 934 stainless steel A4, with washer according to DIN EN ISO 7089 (DIN 125), stainless steel A4. For use with fixing bolt anchor W-FAZ-IG/A4 and threaded rod

For use with threaded rods with acceptance test certificate 3.1

Standards	DIN 934
Material	Stainless steel A4
Surface	Plain

Thread diameter	Width across flats	Art. no.	P. Qty.
6 mm	10 mm	0904 806 140	100
8 mm	13 mm	0904 808 140	50
10 mm	17 mm	0904 810 140	25
12 mm	19 mm	0904 812 140	20

Covered by approval ETA-99/0011

Hexagon screws, countersunk screws, washers, countersunk washers and nuts have a special coating and are only permissible in the anchor system in accordance with ETA-99/0011.

Concrete screw with hexagon head W-BS/A4

Highest load capacities and efficient mounting. Ideal for fastening metal structures in concrete, A4 stainless steel

- Quick, easy installation by screwing the concrete screw into the drilled hole
- No installation torque required
- Immediate load-bearing capacity – no waiting

Material	Stainless steel A4, 1.4401
----------	----------------------------

Anchor size	Thread diameter	Anchor length (l)	Attachment height (t fix 1)	Attachment height (t fix 2)	Art. no.	P. Qty.
6 mm	7.5 mm	50 mm	15 mm	10 mm	5929 226 015	100

ETA-16/0043 for individual attachment

Option 1, cracked and non-cracked concrete (size 6–10), earthquake C1 (size 8–14)

ETA-16/0128 for multiple attachment

Concrete (size 6)

Hollow-core pre-stressed concrete ceilings (size 6)

Fire resistance

R30, R60, R90, R120; Technical Report TR020 (included in approvals)

From size 8, we recommend the use of a suitable tangential impact screwdriver for installation. The recommended nominal torque must be observed.

Concrete screw with countersunk head W-BS/S

Highest load capacities and efficient mounting. For surface-flush fixtures such as railings or handrails in concrete, zinc plated steel

- Very quick and easy assembly
- No installation torque required
- Immediate load-bearing capacity – no waiting

Material	Steel
Surface	Zinc plated

Anchor size	Thread diameter	Anchor length (l)	Attachment height (t fix 1)	Attachment height (t fix 2)	Art. no.	P. Qty.

ETA-16/0043 for individual attachment

Option 1, cracked and non-cracked concrete (Size 6–10), seismic performance category C1 (size 8–10)

ETA-16/0128 for multiple attachment

Concrete (size 6)

Hollow-core prestressed concrete ceilings (size 6)

Fire resistance

R30, R60, R90, R120; Technical Report TR020 (included in approvals)

From size 8, we recommend the use of a suitable tangential impact screwdriver for installation. The recommended nominal torque must be observed. If several anchors are arranged behind each other in the same load direction, only one anchor is positioned for transverse loads.

Concrete screw with pan head W-BS/S

Ideal for mounting mounting rails, panel materials or fire-protection panels, zinc-plated steel

- High load-bearing capacities
- Low axial and edge clearance due to very low expansion effect
- Extremely flexible to use due to three anchoring depths (6–14 dia.) and a large range of types

Material	Steel
Surface	Zinc plated
Internal drive	TX30

Anchor size	Thread diameter	Anchor length (l)	Attachment height (t fix 1)	Attachment height (t fix 2)	Art. no.	P. Qty.

6 mm	7.5 mm	100 mm	65 mm	60 mm	5929 146 065	100

ETA-16/0043 for individual attachment

Option 1, cracked and non-cracked concrete (size 6)

ETA-16/0128 for multiple attachment

- Concrete (size 5 and 6)
- Hollow-core pre-stressed concrete ceilings (size 6)

Fire resistance

R30, R60, R90, R120; Technical Report TR020 (included in approvals)

From size 8, we recommend the use of a suitable tangential impact screwdriver for installation.
If several anchors are arranged behind each other in the same load direction, only one anchor is positioned for transverse loads.

Concrete screw, pan head W-BS-P/A4

Ideal for mounting mounting rails, panel materials or fire-protection panels, stainless steel A4

- High load-bearing capacities
- Virtually no expansion effect, enabling minimal centre to centre and edge distances to be maintained
- Quick and easy to install by screwing the concrete screw into the drill hole
- No installation torque required
- Immediate load-bearing capacity – no waiting
- Can be fully removed quickly and easily
- Time-saving push-through installation
- Two anchoring depths (Ø6)

Anchor size	6 mm
Thread diameter	7.5 mm
Material	Stainless steel A4, 1.4401
Internal drive	TX30

Anchor length (l)	Attachment height (t fix 1)	Attachment height (t fix 2)	Attachment height (t fix 3)	Art. no.	P. Qty.
50 mm	15 mm	10 mm		5929 246 015	100

100 mm	65 mm	60 mm	45 mm	5929 246 065	100

ETA-16/0043 for individual attachment

Option 1, cracked and non-cracked concrete

ETA-16/0128 for multiple attachment

Concrete

Hollow-core prestressed concrete ceilings

Fire resistance

R30, R60, R90, R120; Technical Report TR020 (included in the approvals)

From size 8, we recommend the use of a suitable tangential impact screwdriver for installation.

If several anchors are arranged behind each other in the same load direction, only one anchor is positioned for transverse loads.

Concrete screw, stud screw W-BS/S

**Ideal for mounting pipe clamps or spacer sleeves
(connection thread M8 x 16), zinc-plated steel**

- High load-bearing capacities
- Virtually no expansion effect, enabling minimal axis and edge distances to be maintained
- Very quick and easy to install
- No installation torque required
- Immediate load-bearing capacity – no waiting
- Extremely flexible to use as a result of three anchoring depths (Ø 6 - Ø 14) and a large variety of types
- Fastening can be adjusted up to twice after installation

Anchor size	6 mm
Thread diameter	7.5 mm
Connection thread	M8 x 16
Material	Steel
Surface	Zinc plated
External drive	WS10

Anchor length (l)	Attachment height (t fix 1)	Attachment height (t fix 2)	Attachment height (t fix 3)	Art. no.	P. Qty.
35 mm	0 mm			5929 186 000	100
55 mm	20 mm	15 mm	0 mm	5929 186 020	100
75 mm	40 mm	35 mm	20 mm	5929 186 040	100
95 mm	60 mm	55 mm	40 mm	5929 186 060	100

ETA-16/0043 for individual attachment

Option 1, cracked and non-cracked concrete

ETA-16/0128 for multiple attachment

Concrete

Hollow-core prestressed concrete ceilings

Fire resistance

R30, R60, R90, R120; Technical Report TR020 (included in the approvals)

From size 8, we recommend the use of a suitable tangential impact screwdriver for installation.

If several anchors are arranged behind each other in the same load direction, only one anchor is positioned for transverse loads.

Concrete screw, stud screw W-BS/A4

Ideal for outdoor accessories which must be uninstalled again, stainless steel A4

Extremely flexible to use

Three anchoring depths (sizes 6–14) and a large variety of types

Attachment can be adjusted up to two times after assembly

(Sizes 8–14) so as to, for example, facilitate the alignment of railings or anchor plates (observe assembly instructions in permit or enclosed leaflet)

- High load-bearing capacities
- Low axial and edge clearance due to very low expansion effect
- Very quick and easy assembly
- No installation torque required
- Immediate load-bearing capacity – no waiting

Material	Stainless steel A4, 1.4401
----------	----------------------------

Anchor size	Thread diameter	Anchor length (l)	Connection thread	Attachment height (t fix 1)	Art. no.	P. Qty.
8 mm	10 mm	105 mm	M10	40 mm	5929 268 040	50
10 mm	12 mm	140 mm	M12	60 mm	5929 261 060	25
10 mm	12 mm	160 mm	M12	80 mm	5929 261 080	25

ETA-16/0043 for individual attachment

Option 1, cracked and non-cracked concrete (sizes 6–14), seismic performance category C1 (sizes 8–14)

Fire resistance

R30, R60, R90, R120; Technical Report TR020 (included in the approvals)

From size 8, we recommend the use of a suitable tangential impact screwdriver for installation.

If several anchors are arranged behind each other in the same load direction, only one anchor is positioned for transverse loads.

Concrete screw with female thread W-BS/S

Highest load capacities and efficient mounting. For suspensions and fittings with threaded rods (step thread M8/M10), zinc plated steel

- Extremely flexible to use due to three anchoring depths (size Ø 6 – Ø 14) and a wide variety of types
- High load-bearing capacities
- Low axial and edge clearance due to very low expansion effect

Anchor size	6 mm
Thread diameter	7.5 mm
Female thread	8/10 mm
Material	Steel
Surface	Zinc plated
External drive	WS13

Anchor length (l)	Art. no.	P. Qty.
35 mm	5929 176 001	50
55 mm	5929 176 002	50

ETA-16/0043 for individual attachment

Option 1, cracked and non-cracked concrete

ETA-16/0128 for multiple attachment

- Concrete
- Hollow-core prestressed concrete ceilings

Fire resistance

R30, R60, R90, R120; Technical Report TR020 (included in approvals)

From size 8, we recommend the use of a suitable tangential impact screwdriver for installation.

If several anchors are arranged behind each other in the same load direction, only one anchor is positioned for transverse loads.

Concrete screw W-BS Compact type P

Easy installation with cordless drill. Avoids hitting reinforcement due to very low insertion depth. For concrete, with pan head, zinc plated steel

- Quick, easy installation
- Push-through installation
- Time and cost-saving assembly

Anchor size	6 mm
Anchor length (l)	28 mm
Head type	Pan head
Max. attachment height (t fix)	3 mm
Material	Steel
Surface	Zinc plated
Internal drive	TX30
Head diameter	14 mm

Art. no. 5929 506 028

P. Qty.: 100

- ETA-15/0091 for multiple attachment of non-load-bearing systems in concrete
- Fire resistance: R30, R60, R90, R120; Technical Report TR020

It is preferable to install the W-BS Compact manually.

If a cordless drill is used for assembly, at least 5 preliminary tests should be performed on location to ensure the correct screwdriver setting and to prevent over-tightening of the W-BS Compact. It is recommended that you start with the screwdriver's lowest torque setting and increase it if necessary.

A tangential impact screwdriver should not be used for assembly.

Concrete screw with hexagon head and large disc W-BS/S

Ideal for mounting wood structures (large U-washer as per DIN 440), galv. steel

Anchor size	10 mm
Thread diameter	12 mm
Material	Steel
Surface	Zinc plated
External drive	WS15

Anchor length (l)	Attachment height (t fix 1)	Attachment height (t fix 2)	Attachment height (t fix 3)	Art. no.	P. Qty.
180 mm	125 mm	105 mm	95 mm	5929 121 125	25
200 mm	145 mm	125 mm	115 mm	5929 121 145	25
240 mm	185 mm	165 mm	155 mm	5929 121 185	15
280 mm	225 mm	205 mm	195 mm	5929 121 225	15
320 mm	265 mm	245 mm	235 mm	5929 121 265	15

ETA-16/0043 for individual attachment

Option 1, cracked and non-cracked concrete, seismic performance category C1 (size 8-14)

Fire resistance

R30, R60, R90, R120; Technical Report TR020 (included in the approvals)

From size 8, we recommend the use of a suitable tangential impact screwdriver for installation.

If several anchors are arranged behind each other in the same load direction, only one anchor is positioned for transverse loads.

Concrete screw with large pan head W-BS/S

Extra large surface area specifically designed for mounting mounting rails, zinc-plated steel

Anchor size	6 mm
Thread diameter	7.5 mm
Material	Steel
Surface	Zinc plated
Internal drive	TX30

Anchor length (l)	Attachment height (t fix 1)	Attachment height (t fix 2)	Attachment height (t fix 3)	Art. no.	P. Qty.
40 mm	5 mm			5929 156 005	100
60 mm	25 mm	20 mm	5 mm	5929 156 025	100

ETA-16/0043 for individual attachment

Option 1, cracked and non-cracked concrete

ETA-16/0128 for multiple attachment

Concrete

Hollow-core prestressed concrete ceilings

Fire resistance

R30, R60, R90, R120; Technical Report TR020 (included in the approvals)

From size 8, we recommend the use of a suitable tangential impact screwdriver for installation.
If several anchors are arranged behind each other in the same load direction, only one anchor is positioned for transverse loads.

Asphalt screw anchor W-SA A-IG

For anchoring in tarmac, to be processed with chemical injection mortar WIT-PE 500. Version with female thread, zinc plated steel

- Quick, easy removal (female thread)
- Reducers also allow use of smaller metric screws or threaded elements
- The anchor can be removed at any time by unscrewing the metric screw
- Anchorage via bond between WIT-PE 500 chemical injection mortar, asphalt and asphalt screw anchor, and positive locking between asphalt and asphalt screw anchor
- WIT-PE 500 chemical injection mortar: Pure epoxy mortar
- Do not apply below +5°C
- Minimum shelf life: 12 months
- Storage temperature between +5°C and +25°C

Anchor diameter	Anchor length (l)	Drill hole diameter	Drill hole depth (h 1)	Embedding depth (h nom)	Art. no.	P. Qty.
10 mm	100 mm	16 mm	110 mm	100 mm	0901 716 102	25
16 mm	100 mm	22 mm	110 mm	100 mm	0901 722 102	20
16 mm	155 mm	22 mm	160 mm	155 mm	0901 722 157	20

Always wear safety glasses and gloves when using WIT-PE 500 chemical injection mortar. Drill cuttings must be removed from the drill hole. The asphalt screw anchor is unsuitable for constant tensile loads.

Screw anchor W-SA TC Timber Connect

For attaching wooden sills in cracked and non-cracked concrete

- High transferable tensile and transverse loads
- Invisible sill attachment: Small screw head can be countersunk in wooden beam
- Several mounting heights possible for each screw diameter.
- Loads do not depend on thickness of attached part
- Quick and easy installation and disassembly (can be inserted using the ESS ½ inch tangential impact screwdriver)
- Installation type: Push-through installation
- Immediate load-bearing capacity – no waiting
- Virtually no expansion effect, enabling minimal edge and axial clearance to be maintained
- Anchoring via positive locking
- The saw-tooth threads cut into the concrete when the sill anchor is screwed into the pre-drilled hole.

Anchor diameter	Anchor length (l)	Min./max. height of the fixture (t fix)	Nominal drill-bit diameter (d 0)	Drill hole depth (h 1)	Art. no.	P. Qty.
7.5 mm	100 mm	40-150 mm	6 mm	65 mm	0901 575 100	100
10 mm	130 mm	60-200 mm	8 mm	75 mm	0901 510 131	50

General technical approval: Z-21.1-1917

Dimensioning

- Wood connections: Dimensioning in accordance with DIN 1052:2008-12
- Concrete connections: Dimensioning in accordance with ETAG 001, Appendix C

Machine setting tool

For fast and precise hammering in of Würth fixing bolt anchors W-FAZ PRO, W-FAZ (M8–M16) and W-FAZ with hammer drill

- Standard SDS-plus drive arbor for ease of use (suitable for all Würth hammer drills with SDS-plus drive arbor)
- Particularly suitable for economical bulk installations
- Even, optimum load transfer – minimal insertion effort
- Conical mount perfectly adapted to fixing bolt anchor's connecting thread for neat, central anchor insertion
- Reduced setting times
- Also ideal for overhead installation and for hard-to-reach attachments (e.g. railings/hanging pipes)
- High-quality steel guarantees long service life

Suitable for anchor diameter	8 mm, 10 mm, 12 mm, 16 mm
------------------------------	---------------------------

Art. no. 0904 908 016

P. Qty.: 1

Setting tool

For screw anchor W-SA TC, Timber Connect

Diameter (Ø)	Tip size	Type description	Art. no.	P. Qty.

Concrete screw with hexagon head W-BS/S

Ideal for mounting metal structures, galv. steel

Extremely flexible to use

Three anchoring depths (sizes 6–14) and a large variety of types

Attachment can be adjusted up to two times after assembly

(Sizes 8–14) so as to, for example, facilitate the alignment of railings or anchor plates (observe assembly instructions in permit or enclosed leaflet)

Aerated concrete anchor W-PA

Heavy-duty anchor with male thread (type A) for individual attachment in aerated concrete. With technical approval. Steel, zinc plated

- High permissible loads for maximum safety
- Quick anchor insertion – minimal installation costs
- Immediate load-bearing capacity – no waiting
- The positive locking anchoring is largely free of expansion pressure and is achieved without expensive and complicated undercutting tools.

Assembly with and without tools possible

Mechanical application with special tool for SDS mount also possible – uses only the impact action of the hammer drill (min. 3 kg).

Embedding depth (h s)	70 mm
Material	Steel
Surface	Zinc plated

Anchor diameter	Max. attachment height (d a)	Hole diameter in component (d Bau)	Art. no.	P. Qty.
6 mm	10 mm	7 mm	0905 710 610	25
8 mm	10 mm	9 mm	0905 710 810	25
10 mm	20 mm	12 mm	0905 711 020	25

- Z-21.1-1983 General technical approval for: tension zone (cracked aerated concrete) and compression zone (non-cracked aerated concrete); light-weight ceiling cladding and suspended ceilings in accordance with DIN 18168-1:1981-10 in reinforced roof and ceiling panels, and for structurally comparable anchorages (see technical approval for maximum load)
- Fire resistance: F90, F120 (M6-M12)

The anchors may only be fixed in unplastered, uncoated masonry walls

Aerated concrete anchor W-PA

Heavy-duty anchor with female thread (type I) for aerated concrete. With technical approval. Steel, zinc plated

- High permissible loads for maximum safety
- Quick anchor insertion – minimal installation costs
- Immediate load-bearing capacity – no waiting
- The positive locking anchoring is largely free of expansion pressure and is achieved without expensive and complicated undercutting tools.

Assembly with and without tools possible

Mechanical application with special tool for SDS mount also possible – uses only the impact action of the hammer drill (min. 3 kg).

The anchors may only be fixed in unplastered, uncoated masonry walls

Hollow ceiling anchor W-HD

Female thread anchor with metric thread for secure anchoring in hollow-core prestressed concrete ceilings. With technical approval. Steel, zinc-plated

- Screws or threaded rods can be used
- The anchor can also be mounted outside the cavity axis, up to 50 mm from the prestressed strand – maximum flexibility
- Quick, easy installation – no special tool required
- Immediate load-bearing capacity – no waiting

Anchor diameter	Sleeve length	Required screw length (l s)	Required stud-bolt length (l B)	Nominal drill-bit diameter (d 0)	Art. no.	P. Qty.
6 mm	30 mm	42 mm + thickness of the add-on part (t fix)	47 + thickness of the add-on part (t fix)	10 mm	0905 120 601	50
8 mm	35 mm	47 mm + thickness of the add-on part (t fix)	53 + thickness of the add-on part (t fix)	12 mm	0905 120 801	50
10 mm	40 mm	55 mm + thickness of the add-on part (t fix)	63 + thickness of the add-on part (t fix)	16 mm	0905 121 001	50
12 mm	45 mm	61 mm + thickness of the add-on part (t fix)	71 + thickness of the add-on part (t fix)	18 mm	0905 121 201	25

- General technical approval Z-21.1-1832
- VdS approval for fixings for stationary water extinguishing systems (approval no. G 412010)
- Fire resistance (anchoring base: concrete C45/55 or C50/60): R30, R60, R90, R120: General technical approval Z-21.1-1832, fire protection test report no. (3526/3426)

- The cone is separated from the expansion sleeve when the screw or hexagon nut is tightened. – Important: At least three screw/nut rotations are required. Applying the installation torque pulls the cone into the expansion sleeve and expands it.
- Anchoring is only permissible in hollow-core prestressed concrete ceilings with a hollow space width that does not exceed 4.2 times the web width ($b_H \leq 4.2 \times b_{SI}$)

Fixing anchor W-FA/S

Bolt anchor for high loads in non-cracked concrete.
Zinc-plated steel

- Time-saving push-through installation
- Immediate load-bearing capacity – no waiting
- Torque-controlled expanding galvanised steel anchor
- Two anchorage depths – wide range of applications

Approvals:
ETA-02/0001 for individual attachment, Option 7, non-cracked concrete
ETA-06/0162 for multiple attachment of non-load-bearing systems, non-cracked and cracked concrete, M6
Fire resistance: F30, F60, F90 and F120; exposure to fire according to DIN 4102-2:1977-09 (uniform temperature-time curve)
Fire resistance: R30, R60, R90 and R120; TR020 (included in ETA-06/0162)

Fixing anchor W-FA/S see [11.1]

Fixing anchor W-FA/F see [11.1]

Wedge anchor W-ED/S

Female thread anchor with metric thread for anchoring in concrete, galvainsed steel

- Small drill hole depth
- High load-bearing capacities
- Visual setting check and hand protection when installing with the marking/expander tool
- Mechanical setting tool makes installation quicker and easier
- Immediate load-bearing capacity – no waiting
- Attached part can easily be removed at any time
- The attached part can be anchored with a fastening screw or a threaded rod
- No installation torque required
- The stop bit used with the attachable expander tool makes it quicker and easier to install. The matching drill holes make the installation even more secure.

ETA-02/0044 for individual attachment, option 7, non-cracked concrete

ETA-05/0120 for multiple attachment of non-load-bearing systems, non-cracked and cracked concrete, M6–M16

Fire resistance: F30, F60, F90 and F120; exposure to fire according to

DIN 4102-2:1977-09 (uniform temperature-time curve)

Fire resistance: R30, R60, R90 and R120; TR020 (included in

ETA-05/0120)

Wedge anchor W-ED/S-BND

Female thread anchor with collar and metric thread for economical anchoring in concrete, zinc plated steel

- Small drill hole depth
- High load-bearing capacities
- Visual setting check and hand protection when installing with the marking/spreading tool
- Mechanical setting tool makes installation quicker and easier
- Immediate load-bearing capacity – no waiting
- Attached part can easily be removed at any time
- W-ED/S has collar enabling anchor to be installed flush with the surface and preventing it slipping further into the drill hole (safer installation)
- The attached part can be anchored with a fastening screw or a threaded rod
- No installation torque required

Material	Steel
Surface	Zinc plated

Fire resistance: F30, F60, F90 and F120; exposure to fire according to DIN 4102-2:1977-09 (uniform temperature curve)

Fire resistance: R30, R60, R90 and R120; TR020 (included in ETA-05/0120)

Drive-in anchor W-ED/A4 see [13.2]

Drive-in anchor W-ED/A4

Female thread anchor with metric thread for economical anchoring in concrete, A4 stainless steel

- Small drill hole depth
- High load-bearing capacities
- Visual setting check and hand protection when installing with the marking/expander tool
- Mechanical setting tool makes installation quicker and easier
- Immediate load-bearing capacity – no waiting
- Attached part can easily be removed at any time
- The attached part can be anchored with a fastening screw or a threaded rod
- No installation torque required
- The stop bit used with the attachable expander tool makes it quicker and easier to install. The matching drill holes make the installation even more secure.

Fire resistance: F30, F60, F90 and F120; exposure to fire according to DIN 4102-2:1977-09 (uniform temperature curve)
Fire resistance: R30, R60, R90 and R120; TR020 (included in ETA-05/0120)

W-ED /S drive-in anchor, see [13.1]

Drive-in anchor W-ED

Female thread anchor with metric thread for anchoring in concrete, zinc-plated steel in sizes M12 (for core drills) and DW 15 (DYWIDAG® female thread DW15)

- Quick, cost-effective installation thanks to small drill hole depth
- Maximum safety thanks to high load-bearing capacity in non-cracked concrete
- Secure mounting using the associated manual expander tool
- Installation type: Cotter pin installation
- Immediate load-bearing capacity – no waiting
- Attached part can easily be removed at any time. The attached part can be anchored with a fastening screw or a threaded rod.

W-ED M12:

Anchor's special solid outer wall reliably prevents breaking out of the anchoring base – even in the event of sudden loading from the core drill. To be installed with the specified torque.

W-ED DW15:

Variable rod lengths and clamping strengths can be used. No need to apply torque. Thread resistant to soiling.

Material	Steel
Surface	Zinc plated

Anchor diameter	Anchor length (L H)	Thread type x anchor diameter	Art. no.	P. Qty.
12 mm	50 mm	M12	0904 010 126	50
15 mm	80 mm	DW15	0904 010 15	25

DYWIDAG® female thread (DYWIDAG® is a registered trademark of Walter Bau AG)

Expander tool

For drive-in anchor, without visual setting check

Visual setting check	No
Design	Without hand guard
SDS chuck	No

Suitable for drive-in anchor	Art. no.	P. Qty.

Heavy-duty anchor W-TM, type A

With female thread for bolts and screws with metric thread, for non-cracked concrete

- Minimal effort required to insert anchor
- Immediate load-bearing capacity – no waiting
- No setting tools required
- Can be set flush with surface: Attached parts can be removed/remounted at any time
- Triple expansion sleeve to ensure even expansion and load distribution
- Suitable for bolts and screws with a metric thread
- Applying the specified torque during the anchoring process ensures secure installation
- Load-controlled/torque-controlled expanding galvanised steel anchor in sizes M6–M12
- Cotter-pin installation

Material	Steel
Surface	Zinc plated

Anchor diameter	Anchor length (l)	Max. attachment height (t fix)	Art. no.	P. Qty.
6 mm	45 mm	150 mm	0904 901 850	50
8 mm	51 mm	200 mm	0904 901 851	50
10 mm	60 mm	250 mm	0904 901 852	50
12 mm	75 mm	300 mm	0904 901 853	25

ETA-10/0255 for individual attachment, Option 7, non-cracked concrete, galvanised steel, M6–M12; dimensioned in accordance with the European Technical Approval Guidelines (ETAG) for „Metal Anchors for Use in Concrete“, Appendix C, measurement process A

The partial safety factors of the resistances regulated in the approval and a partial safety factor of the effects of $\gamma_F = 1.4$ have been taken into account. Please refer to the European Technical Approval Guidelines (ETAG), Appendix C, for information on combining tensile and transverse loads, edge influence and groups of anchors.

The concrete has normal reinforcement. Higher values are possible for higher concrete strengths.

Compliant with approval if screws and threaded rods with acceptance test certificate 3.1 in accordance with EN 10204:2004 are proven to be the required material and to possess the mechanical properties stipulated in ETA-10/0255

Heavy-duty anchor W-TM, type S

With hexagon bolt and washer, for non-cracked concrete, zinc plated steel

- Minimal effort required to insert anchor
- Immediate load-bearing capacity – no waiting
- No setting tools required
- Can be set flush with surface: Attached parts can be removed/remounted at any time
- Triple expansion sleeve to ensure even expansion and load distribution
- Applying the specified torque during the anchoring process ensures secure installation
- Load-controlled/torque-controlled expanding galvanised steel anchor in sizes M6–M12
- Cotter-pin installation

Material	Steel
Surface	Zinc plated

If a lower mounting height is required, make a deeper drill hole accordingly

Screw anchor W-SA, type P

Ideally suited for mounting small electrical clamps.

- Anchorage via positive locking
- Push-through installation
- Immediate load-bearing capacity – no waiting
- Virtually no expansion effect, enabling minimal edge and axial clearance to be maintained
- Quick and easy installation or removal by inserting or removing screw anchor

Anchor diameter	5 mm
Anchor length (l) (l)	30 mm
Embedding depth (h nom)	30 mm
Nominal drill-bit diameter (d 0)	4 mm
Centre-to-centre distance in concrete (s)	50 mm
Edge clearance in concrete (c)	50 mm
Minimum component thickness (h min)	90 mm
Through-hole in the component to be connected (d f)	5.5 mm
Internal drive	TX20
Material	Steel
Surface	Zinc plated

Hammer drill bit Plus Quadro-L Vario

The perfect solution for reinforcements and hard materials, featuring a symmetrical, one-piece head with four cutting edges and a four-spiral Vario feed helix with core reinforcement.

- The symmetrical 4 x 90° cutting edge geometry (up to Ø 10 mm with solid carbide head) prevents the drill bit from hooking in or running off centre when striking e.g. reinforcements
- Noticeably quicker drilling
- Thanks to the four cutting edges and four-spiral geometry of the drill bit, the bit is optimally guided into the drilled hole
- The special self-centring tip enables precise spot drilling
- Perfect bore properties over the entire service life thanks to head geometry that is tailored to the drill bit diameter
- 5–16 mm: One-piece carbide element – maximised attachment surface with the steel body gives high stability
- 18–32 mm: Multi-piece cemented carbide element for faster drilling progress and improved buffering of the torsional forces thanks to the trisection
- Vario spiral conveyor with core reinforcement and back that narrows at the front and widens at the rear, as well as sharper angle at the spiral end ensures reduced friction, high stability and maximum transmission of impact energy

Iron reinforcements may only be drilled through with permission from a structural engineer.

Hammer drill bit Max Quadro-L Vario

The perfect solution for reinforcements and hard materials, featuring a symmetrical head with four cutting edges and a Vario conveyor with core reinforcement.

- The symmetrical 4 x 90° cutting edge geometry prevents the drill bit from hooking in or running off centre when striking e.g. reinforcements
- The advanced tip geometry and asymmetrically placed elevations on the cutting edges ensure improved traction
- Perfect bore properties over the entire service life thanks to head geometry that is tailored to the drill bit diameter
- Vario spiral conveyor with back that narrows at the front and widens at the rear, as well as sharper angle at the spiral end ensures reduced friction, high stability and maximum transmission of impact energy
- Drill bit with four cutting edges and diameter-optimised geometry to ensure that the bit is guided perfectly into the drilled hole
- The special self-centring tip enables high-precision spot drilling

Hammer drill bit Max Quadro-S

Strong hammer drill bit with X-shaped head geometry and four-spiral feed helix for fast drilling speed with significantly smoother running and greater precision in comparison with conventional drill bits featuring a head with two cutting edges.

- **No hooking in thanks to 4x cutting edge geometry**
- **Precise drilling**
- **Greater precision**

Hammer drill bit Plus Duo-S Vario

Solid hammer drill bit with aggressive 2-cutter head, centring point and Vario spiral conveyor with core reinforcement for a significantly improved drilling speed. Specially optimised for cordless hammer drills.

- Noticeably quicker drilling
- Optimum drilling performance with reinforced chamfers
- Precise spot drilling
- Vario spiral conveyor with core reinforcement and back that narrows at the front and widens at the rear, as well as sharper angle at the spiral end ensures reduced friction, high stability and maximum transmission of impact energy

Iron reinforcements may only be drilled through with permission from a structural engineer. Ø 4.8 and 6.3: Special drill bit for SFS spike mounting system. With long drill bit lengths, pre-drill using a short drill bit of the same diameter.

Hammer drill bit cassette with SDS-plus drive arbor, Duo-S Vario

7 pieces. Solid hammer drill bit with aggressive 2-cutter head, lathe centre and Vario spiral conveyor with core reinforcement for a significantly improved drilling speed. Specially optimised for cordless hammer drills.

- Optimised tip geometry and asymmetrically arranged embossing on the cutting edges for improved propulsion
- Reinforced carbide reinforcement element with significantly enlarged chamfers noticeably reduces the likelihood of jamming and increases resistance
- Precise spot-drilling through special self-centring tip
- Vario conveyor spiral with reinforced core and back which is narrow at the front, becoming wider at the rear. Spiral angle steeper at the end of the spiral

Hammer drill bit multi-pack with SDS-plus drive arbor, Duo-S Vario

12 pieces, 3 x Ø 6 x 160/100, 4 x Ø 8 x 160/100, 3 x Ø 10 x 160/100, 2 x Ø 12 x 160/100. Solid hammer drill bit with aggressive 2-cutter head, centring point and Vario spiral conveyor with core reinforcement for a significantly improved drilling speed. Specially optimised for cordless hammer drills.

- Noticeably quicker drilling
- Optimum drilling performance with reinforced chamfers
- Highly accurate tapping
- Vario spiral conveyor with core reinforcement and back that narrows at the front and widens at the rear, as well as sharper angle at the spiral end.

Hole puncher

With 3 cutting tips for punching out holes

3 cutting tips

- Less deformation of the material being punched
- No sticking at the draw bolt
- No damage to the screw thread
- Improved support

4 notches on the die

Precise alignment with the cross line

Can be used in steel (St37), aluminium, copper and plastics up to a material thickness of max. 2.0 mm

Diameter	Art. no.	P. Qty.
28.3 mm	0619 005 283	1
31.7 mm	0619 005 317	1
35 mm	0619 005 350	1

Sheet metal puncher with metric splitting punch

Metric ISO sizes in accordance with EN 50262

Individual (without draw bolt)

Long service life

Specially developed cutting geometry

3x splitting of the material in the die — no punching waste sticks to the draw bolt, guaranteed even tool wear and precise, burr-free, circular holes

Precise alignment with the cross line

4 notches on the die

Thread type x nominal diameter	Suitable for pipe (PG)	Internal diameter	Screw diameter x screw length	Drill diameter	Art. no.	P. Qty.
M12		12.5 mm	6 x 40 mm	6.2 mm	0619 702 125	1
M16		16.2 mm	9.5 x 50 mm	10 mm	0619 702 162	1
M20	PG 13,5	20.4 mm	9.5 x 50 mm	10 mm	0619 702 204	1

Thread type x nominal diameter	Suitable for pipe (PG)	Internal diameter	Screw diameter x screw length	Drill diameter	Art. no.	P. Qty.
M25		25.4 mm	25.4 x 50 mm	10 mm	0619 702 254	1
M32		32.5 mm	32.5 x 75 mm	19.5 mm	0619 702 325	1
M40		40.5 mm	40.5 x 75 mm	19.5 mm	0619 702 405	1
M50		50.5 mm	50.5 x 75 mm	19.5 mm	0619 702 505	1
M63		63.5 mm	63.5 x 75 mm	19.5 mm	0619 702 635	1

For draw bolt Ø19.0 mm, pre-cutting is also possible with sheet metal puncher size M20 (PG 13.5) as an alternative.

For pre-drilling: HSS twist drill, art. no. 0624...

For greasing the draw bolt: AL 1100 art. no. 0893 110 1

Sheet metal puncher with metric splitting punch

Metric ISO sizes in accordance with EN 50262

With ball bearing draw bolt

Plastic-encapsulated ball bearing draw bolt provides protection against dirt and ensures a longer service life.

Long service life

Newly developed cutting geometry

3x splitting of the material in the die — no punching waste sticks to the draw bolt; guaranteed even tool wear and precise, burr-free, circular holes.

Precise alignment at the cross line

Four notches on the die

Thread type x nominal diameter	Internal diameter	Screw diameter x screw length	Drill diameter	Art. no.	P. Qty.
	30.5 mm	9.5 x 50 mm	10 mm	0619 701 305	1
M12	12.5 mm	6 x 40 mm	6.2 mm	0619 701 125	1

For draw bolt Ø19.0 mm, pre-cutting is also possible with sheet metal puncher size M20 (PG 13.5) as an alternative.

For pre-drilling: HSS twist drill, art. no. 0624...

For greasing the draw bolt: AL 1100 art. no. 0893 110 1

Sheet metal puncher assortment

8 pieces

- Contents:
- Stamp and dies M16, M20, M25, M32, M40 and 30.5
- KL draw bolt Ø 9.5 and 19.0
- Splitting punch
- Durable
- Long service life
- Precise, burr-free, circular holes
- Precise alignment with the cross line

Art. no. 0619 701 001

P. Qty.: 1

For draw bolt Ø19.0 mm, pre-cutting is also possible with sheet metal puncher size M20 (PG 13.5) as an alternative.

Hole puncher assortment

12 pieces. With manual/hydraulic punch.

- Splitting punch
- Long life
- Long service life
- Precise, burr-free and circular holes
- Precise alignment on cross-hairs
- Compact manual-hydraulic punch pressure relief valve

Contents:

- Manual hydraulic punch
- Stamp and dies M16, M20, M25, M32, M40 and 30.5
- Tension bolt Ø 9.5 and 19.0
- Distance bushing set

Art. no. 0619 701 002

P. Qty.: 1

For draw bolt Ø19.0 mm, pre-cutting is also possible with sheet metal puncher size M20 (PG 13.5) as an alternative.

Sheet metal puncher assortment Plumbing

Sheet metal punchers Ø28.3, 31.7 and 35.0 mm with three cutting tips for punching out the holes for stainless steel sink units.

- Three cutting tips
- 4 notches on the die – precise alignment with the cross line
- Can be used for materials up to 2.0 mm thick
- Contents:
 - 1 x punch Ø 28.3 mm, die and draw bolt
 - 1 x punch Ø 31.7 mm, die and draw bolt
 - 1 x punch Ø 35.0 mm, die and draw bolt
 - 1 x 17-mm combination spanner
 - 3 x draw bolts 12.9, M 10 x1 x 50

Art. no. 0619 005

P. Qty.: 1

Sheet metal conical drill bit HSS

With two cutting edges

- CBN (cubical boron nitride), deep ground
- Stepless drilling and widening of holes within the diameter range of 3–61 mm
- No countersinking or pre-drilling required
- Burr-free drilling without causing the sheet metal to deform. Excellent heat conductivity for longer service life thanks to axial and radial CBN relief grinding
- Mounting shank with three-phase grinding
- With laser scale for easy identification of the required drilling hole diameter

Cutting material	HSS
Shank style	3-face shank

Size	Min./max. drill diameter	Length	Shaft diameter	Art. no.	P. Qty.

8	5-31 mm	103 mm	9 mm	0694 024 31	1

- Speed table included
- Increase service life and cutting power using drilling and cutting oil or cutting paste

Sheet metal conical drill bit HSS, titanium nitride

Titanium nitride for powerful performance Burr-free drilling without causing the sheet metal to deform. Excellent heat conductivity for longer service life thanks to axial and radial CBN relief grinding.

- Titanium nitride for powerful performance
- Universal application
- User-friendly
- With two cutting edges and drive arbor with three-phase grinding

Cutting material	HSS

HSS sheet metal conical drill bit box

3 pcs: One each of 3–14 mm; 5–20 mm; 16–30.5 mm

- CBN (cubical boron nitride), deep ground
- Stepless drilling and widening of holes within a diameter range of 3–30.5 mm
- Two cutting edges
- No countersinking or pre-drilling required
- Burr-free drilling without causing the sheet metal to deform. Excellent heat conductivity for longer service life thanks to axial and radial CBN relief grinding
- Drive arbor with three-phase grinding
- Laser scale for easy identification of the required drilling hole diameter

Art. no. 0694 024 01

P. Qty.: 1

- Speed table included
- Increase service life and cutting performance using drilling and cutting oil or cutting paste

Sheet metal conical drill bit box, titanium nitride HSS

3 pieces: 1 each of Ø 3-14 mm; Ø 5-20 mm; Ø 16-30.5 mm

- Cutting speed and feed rate increase by up to 100%
- Service life is doubled or even quadrupled
- CBN (cubical boron nitride), deep ground
- Stepless drilling and widening of holes within the diameter range of 3-61 mm
- With two cutting edges
- No countersinking or pre-drilling required
- Burr-free drilling without causing the sheet metal to deform and excellent heat conductivity for longer service life thanks to axial and radial CBN relief grinding
- Mounting shank with three-phase grinding
- With laser scale for easy identification of the required drill hole diameter

Art. no. 0694 025 01

P. Qty.: 1

- Speed table included
- Increase service life and cutting performance using drilling and cutting oil or cutting paste

Double-ended drill bit HSS WN type RN

Assembly drill bit for working in thin-sheet steel, tip angle 118°

Highly precise drilling

The robust twist drill with its extra short design ensures highly precise drilling.

Self-centring

The split point ensures an excellent centring effect even on round materials, eliminating the need for centre-punching or piloting.

For drill bit/material assignments, see overview tables.

Stoneware drill polygon shaft

The ideal solution, even for extremely hard porcelain stoneware tiles up to Mohs/scratch hardness 9, as well as glass and porcelain.

- Precise drilling
- No slippage in the drill chuck
- No cooling required (dry drilling)

Versatility (points system)	●○○○
Service life (points system)	●●●○
Drilling speed (point system)	●●○○
Bore hole quality (point system)	●●●●
Shaft diameter	10 mm
Tool holding device	Polygon

Diameter (Ø)	Length	Art. no.	P. Qty.
5 mm	103 mm	0641 415 011	1/3
6 mm	105 mm	0641 416 011	1/3
8 mm	106 mm	0641 418 011	1/3
10 mm	107 mm	0641 411 011	1/3
12 mm	110 mm	0641 411 211	1
14 mm	114 mm	0641 411 411	1

- Max. Speed: Diameter 5 mm (800 rpm), diameter 6 and 8 mm (600 rpm), diameter 10 and 12 mm (400 rpm), diameter 14 mm (200 rpm)
- Not suitable for impact drilling. For rotary drilling only!
- Optimum contact pressure: 35–45 kg
- If the recommended drilling speed is observed and the optimum contact pressure applied, but you can no longer hear a scraping sound, the drill bit has reached the end of its service life.
- Avoid placing high contact pressure on the drill bit when it is not rotating → Risk of breakage!
- Contact pressure too low and/or drilling speed too high → Service life ends prematurely!
- Avoid tilting and swivelling movements during the drilling process → Risk of breakage!
- We recommend drilling test holes (ideally in waste material from the tiles to be drilled)
- If the 14-mm diameter drill bit is used, pre-drilling must be carried out with an additional drill bit (8 mm).

Stoneware drill bit multi-pack, polygon shaft

3 pieces The ideal solution, even for extremely hard porcelain stoneware tiles up to Mohs/scratch hardness 9, as well as glass and porcelain.

- Precise drilling
- No slippage in the drill chuck
- No cooling required (dry drilling)

Forstner drill bit Longlife & speed

The high-performance Forstner drill bit with up to ten times higher working speed and up to three times longer service life than conventional Forstner drill bits.

- Ideal for drilling precise, tear-free holes in soft and hard woods, coated chipboard and MDF boards.

Wood twist drill bit HSS

With 1/4" bit shank DIN 3126 shape C

- High-quality ground drill bit made from high-performance, high-speed steel (HSS) 100 Cr6. Meets the highest requirements in terms of precision and service life.
- Specially designed for use in hand drills in conjunction with a bit holder
- Extremely low manufacturing tolerances with precisely defined surface and profile quality.
- Accurate drilling
- Pre-cutter in drawn version (pre-cutter height 0.3 - 0.5 mm).
- Extremely sharply ground cutting edges
- Back bevel prevents any deviation in diameter (no off-centre drilling)

12 mm	110 mm	81 mm	0650 011 200	1

When using on abrasive materials, e.g. plastic-coated pallet materials, a shorter service life must be expected.

Spot weld drill bit DIN 1897 HSCo Longlife

The extremely durable spot weld drill bit with magma multi-layer coating for loosening spot welds with hand-held drills on high-strength bodywork panels up to 1200 N/mm² strength on all kinds of vehicles

- Special Magma multilayer coating for up to 9 times longer service life and up to 2 times longer service life compared to conventional coatings (heat resistant up to 800°)
- Extra stable tip geometry for difficult drilling conditions with all common hand drills
- Excellent centring of the drill bit on the spot weld and precise bores due to the 115° centring point

Quality	Würth-Standard
Cutting material	HSCo
Surface	Magma multilayer coating
Suitable for tensile strength up to	1200 N/mm ²
Shank style	Cylindrical
Type	DIN 1897 Longlife
Service life (points system)	●●●○
Drilling speed (point system)	●●●○
Bore hole quality (point system)	●●●●
Versatility (points system)	●●●○
Drilling behaviour (point system)	●●●○

Diameter	Length	Chip flute length	Shaft diameter	Art. no.	P. Qty.

9 mm	84 mm	47 mm	9 mm	0710 740 090	1
10 mm	89 mm	43 mm	10 mm	0710 740 100	1

- Not for use in pneumatic machines (e.g. Vario drill, Spitznagel etc.)
- Do not use in drills with an impact chuck or spindles

Weld point drill bit HSCO

The economical standard spot weld drill for loosening spot welds with hand-held drills on conventional bodywork panels up to 850 N/mm² strength on all kinds of vehicles

- Extra stable tip geometry for difficult drilling conditions with all common hand drills
- Optimised tip geometry for longer service life compared to conventional spot weld drills
- Excellent centring of the drill bit on the spot weld and precise bores due to the 115° centring point

Quality	Würth-Standard
Cutting material	HSCo
Surface	Plain
Suitable for tensile strength up to	850 N/mm ²
Shank style	Cylindrical
Type	Standard DIN 1897
Service life (points system)	●●○○
Drilling speed (point system)	●●○○
Bore hole quality (point system)	●●●●

9 mm	84 mm	37 mm	9 mm	0710 009	1
10 mm	89 mm	43 mm	10 mm	0710 010	1

- Not for use in pneumatic machines (e.g. Vario drill, Spitznagel etc.)
- Do not use in drills with an impact chuck or spindles

Stepped spot weld drill HSCO

The perfect solution with step on the drill tip for the safe loosening of spot welds with hand-held drills on conventional bodywork panels up to 850 N/mm² strength without running the risk of drilling through to the second panel. Suitable for all types of vehicles.

- The step on the drill tip acts as a drill stop and indicates to the user the precise drilling depth
- If the user notices that the step is only touching the metal on one side, then the drill is tilted
- Optimised tip geometry for longer service life compared to conventional spot weld drills

Quality	Würth-Standard
Cutting material	HSCo
Surface	Plain

Continuation **Stepped spot weld drill HSCO**

Suitable for tensile strength up to	850 N/mm ²
Diameter of stop	10 mm
Length	88 mm
Shaft diameter	10 mm
Shank style	Cylindrical
Type	Specialist with step on the drill tip

Subland stepped drill bit, DIN 8374 RN fine, 90°

With straight shank for the production of through holes according to ISO 273, while simultaneously producing countersinks (90°) in form A. The cutting speed depends on the large diameter, the feed on the small one.

CNC|TEC

Product code	841
Material to be processed	Steel, Cast metal, Copper, Brass, Aluminium, Plastic
Standards	DIN 8374
Cutting material	HSS
Surface	Vaporised
Angle of the tip	118 Degree
Countersink angle	90 Degree
Shank style	Cylindrical
Number of teeth	2 PCS
Coolant supply	External
Tolerance of cutting edge diameter	h8
Tolerance of shank diameter	h8
Type description	Quality grade fine

Suitable for screw	Pilot hole diameter (d1)	Spot-facer diameter (d2)	Length (l1)	Chip flute length (l2)	Art. no.	P. Qty.

Service life (points system)	●●●○
Drilling speed (point system)	●●●●
Bore hole quality (point system)	●●●●
Number of pieces in assortment/set	5 PCS
Tool holding device	Cylinder shank

Art. no. 0641 200 005

P. Qty.: 1

Not suitable for impact drilling. For rotary drilling only!

Multi-purpose drill bit box MFD-S Plus

7 pieces. The MFD-S multi-purpose drill bits can drill through virtually any material.

- Extra-sharp cemented carbide cutting edges with special diamond grinding on all sides
- Outstanding, rapid transport of drilling dust
- Drive arbor, suitable for SDS-plus, with impact stop function
- Suitable for drilling holes intended for anchor connections that are subject to approval

Not suitable for impact drilling. For rotary drilling only!

Multi-purpose drill bit box MFD-S straight shank

7 pieces. The MFD-S multi-purpose drill bits can drill through virtually any material.

- Extra-sharp carbide cutting edges with special diamond grinding on all sides
- Outstanding, rapid transport of drilling dust thanks to patented 4-fold graded profile
- Suitable for drilling holes intended for anchor connections that are subject to approval

H7 NC machine reamer HSCO WN

Universal. Creates an H7 hole tolerance.

- NC-compliant design similar to DIN 212 (shape D) with even shaft diameter for standardised mounting, especially in hydraulic expansion chucks or high-precision chucks.
- Twisted flute design
- Left-hand spiral for maximum true running accuracy and process reliability.
- No special mounts are required.

Material to be processed	Steel, Cast metal, Stainless steel, Titanium, Copper, Brass, Aluminium, Plastic
Standards	DIN Similar to 212
Form	B
Cutting material	HSCo
Surface	Uncoated
Groove type	Left-hand twist, 8°
Shank style	Cylindrical DIN 6535-HA

Tolerance of fit	H7
Max. drilling depth (D)	8xD
Hole type	Clearance hole
Coolant supply	External
Service life (points system)	●●●○
Versatility (points system)	●●●●
Tolerance of cutting edge diameter	h7
Tolerance of shank diameter	h6

Precision wood twist drill bit HSCo

For hardwood, wood and plastics. The hardwood professional for optimum centring and chip removal.

- With a precision-ground centring point with two pre-cutters
- Special groove geometry and double bevel
- Extremely low manufacturing tolerances with precisely defined surface and profile quality
- Blade-like ground cutting edges
- Double bevel prevents any deviation in diameter (no off-centre drilling)

HPC end mill Speedcut 4.0 Inox, DIN 6527L, long, four-lipped drill, uneven angle of twist gradient

Particularly suitable for machining austenitic stainless steels: Finishing, rough finishing and rough machining with one tool. Uneven angle of twist gradient produces smooth, low-vibration running and excellent surface quality.

CNC|TEC

Ultradur coating

Special coating for machining challenging materials

Product code	8247

Auger drill bit Longlife & Speed

High-performance auger drill bit with newly developed thread tip and edge geometry, offset cutting head and special surface treatment for an optimum tension with minimum friction and a significantly higher service life of the taper tap in deep holes in softwoods and all hardwoods.

- Significantly longer service life compared to conventional auger drill bits
- Ideal in softwoods and all hardwoods (even in exotic hardwoods, such as Azobé/Bongossi)
- Minimum force required due to independent feed with even less friction

Auger drill bit Longlife & Speed assortment, effective length 165 mm

6 pieces. High-performance auger drill bit with newly developed thread tip and edge geometry, offset cutting head and special surface treatment for an optimum tension with minimum friction and a significantly higher service life of the taper tap in deep holes in softwoods and all hardwoods.

- Significantly longer service life compared to conventional auger drill bits
- Ideal in softwoods and all hardwoods (even in exotic hardwoods, such as Azobé/Bongossi)
- Minimum force required due to independent feed with even less friction

Working length	165 mm
Number of pieces in assortment/set	6 PCS

Art. no. 0650 776 165

P. Qty.: 1

Auger drill bit Longlife & Speed assortment, effective length 250 mm

6 pieces. High-performance auger drill bit with newly developed thread tip and edge geometry, offset cutting head and special surface treatment for an optimum tension with minimum friction and a significantly higher service life of the taper tap in deep holes in softwoods and all hardwoods.

- Significantly longer service life compared to conventional auger drill bits
- Ideal in softwoods and all hardwoods (even in exotic hardwoods, such as Azobé/Bongossi)
- Minimum force required due to independent feed with even less friction

Working length	250 mm
Number of pieces in assortment/set	6 PCS

Art. no. 0650 776 250

P. Qty.: 1

Auger drill bit Longlife & Speed assortment, effective length 390 mm

6 pieces. High-performance auger drill bit with newly developed thread tip and edge geometry, offset cutting head and special surface treatment for an optimum tension with minimum friction and a significantly higher service life of the taper tap in deep holes in softwoods and all hardwoods.

- Significantly longer service life compared to conventional auger drill bits
- Ideal in softwoods and all hardwoods (even in exotic hardwoods, such as Azobé/Bongossi)
- Minimum force required due to independent feed with even less friction

Working length	390 mm
Number of pieces in assortment/set	6 PCS

Art. no. 0650 776 390

P. Qty.: 1

Auger drill bit Longlife & Speed assortment, effective length 580 mm

6 pieces. High-performance auger drill bit with newly developed thread tip and edge geometry, offset cutting head and special surface treatment for an optimum tension with minimum friction and a significantly higher service life of the taper tap in deep holes in softwoods and all hardwoods.

- Significantly longer service life compared to conventional auger drill bits
- Ideal in softwoods and all hardwoods (even in exotic hardwoods, such as Azobé/Bongossi)
- Minimum force required due to independent feed with even less friction

Working length	580 mm
Number of pieces in assortment/set	6 PCS

Art. no. 0650 776 580

P. Qty.: 1

Special drill bit for COLDMELT® anchors

For creating precise drill holes for COLDMELT® anchors in lightweight panels.

Shaft diameter	10 mm
Material	Hardened steel

Diameter	Length	Art. no.	P. Qty.
10.3 mm	105 mm	0650 683 101	1
10.3 mm	70 mm	0650 683 107	1
20 mm	105 mm	0650 683 201	1

Please consider the legal instruction at the beginning of this chapter.

Please consult the design data to ensure that the drill bit is used and adjusted correctly.

Twist drill HSCO, DIN 1869, R1, type RN

The extra-long, twisted stainless steel deep hole drill for processing stainless steel (e.g. V2A, V4A), heat-resistant steels and for a wide range of general applications in steel with strength of up to 1,000 N/mm² and cast iron.

- Special clamping groove profile (reduced machining times due to fewer chip removal cycles)
- Precise and straight drilling process thanks to double drill heels
- Approx. 30% longer service life than untreated surfaces thanks to fibre nitration

Suitable for machine type	Drill, Cordless screwdrivers, Milling/drill center, Pedestal drilling machine
Material to be processed	Steel, Cast iron, Stainless steel, Titanium
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 1869/20xD
Shank style	Cylindrical
Surface	Fase nitrated
Cutting material	HSCo
Type	RN
Angle of the tip	130 Degree
Service life (points system)	●●●○
Drilling speed (point system)	●●●○
Bore hole quality (point system)	●●●●
Versatility (points system)	●●●○
Drilling behaviour (point system)	●●●○
Self-centring	Yes
Suitable for tensile strength up to	1000 N/mm ²

Diameter (Ø)	Length (l1)	Chip flute length (l2)	Art. no.	P. Qty.
4 mm	175 mm	120 mm	0626 460 400	1

13 mm	295 mm	205 mm	0626 461 300	1

- When using the drill according to DIN 1869, it is recommended to create a pilot hole with a depth of 1xD to 2xD. Our extra-short long-life drill according to DIN 1897 (art. no. 062674 etc.) is ideal for this purpose.
- See overview table for drill bit/material assignments

Twist drill bit HSCO, DIN 1869, R2, type RN

The extra-long, spiralised stainless steel deep hole drill bit for machining stainless steel (such as V2A, V4A) heat-resistant steels and for general, broad applications in steel up to 1000 N/mm² strength, as well as in cast iron.

- Special clamping groove profile (reduced machining times due to fewer chip removal cycles)
- Precise and straight drilling thanks to double drill heels
- Fibre nitration to increase tool life by approx. 30% compared to untreated surfaces

Suitable for machine type	Drill, Cordless screwdrivers, Milling/drill center, Pedestal drilling machine
Material to be processed	Steel, Cast iron, Stainless steel, Titanium
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 1869/25xD
Shank style	Cylindrical
Surface	Fase nitrated
Cutting material	HSCo
Type	RN
Angle of the tip	130 Degree

Twist drill bit HSCO, DIN 1897, type RN, MAGMA

Precise, extra short length, long-life drill with magma coating for processing stainless steel (e.g. V2A, V4A), heat-resistant steels and titanium. Also suitable for general applications in steel with strength up to 1,200 N/mm² and in cast iron.

- Special Magma multilayer coating for a longer tool life and a higher cutting speed (heat resistant up to 800°C)
- Optimised split point for precise spot drilling without centring, even on curved surfaces

Suitable for machine type	Drill, Cordless screwdrivers, Milling/drill center, Pedestal drilling machine
Material to be processed	Steel, Stainless steel, Cast iron, Titanium, Special alloy
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 1897/3xD
Shank style	Cylindrical
Surface	Magma multilayer coating
Cutting material	HSCo

Twist drill HSCo DIN 338 MFD Speed

Manually operated high-speed drill bit for precise drill holes in nearly all materials, such as stainless steel (e.g. V2A, V4A), heat-resistant steels and titanium. Also for general applications in conventional steel up to a strength of 1,200 N/mm² as well as in cast iron and non-ferrous metals (such as aluminium, aluminium alloys, bronze, plastic).

- Up to 50% faster than conventional, ground twist drill thanks to speed geometry
- 135° tip angle and optimised cross thinning for outstanding centring
- Exclusive Vario coil
- Exclusively available from Würth

3-face shank (from Ø 4 mm):

- No movement in the drill chuck
- Optimum power transmission
- Protects the drill chuck against damage
- Minimal effort required to open and close the drill chuck

Suitable for machine type	Drill, Cordless screwdrivers
Material to be processed	Steel, Cast iron, Stainless steel, Titanium, Aluminium
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 338/5xD
Surface	Multiple refined
Cutting material	HSCo

Twist drill bit HSCO DIN 338 type RN oxide

The precise high-performance drill for processing stainless steel (e.g. V2A, V4A), heat-resistant steels and titanium. Also suitable for general broader applications in steel with strength up to 1,000 N/mm² and in cast iron.

- Rapid drilling with perfect chip removal thanks to large chipping spaces and small core
- Highly precise tip grinding for precise drilling

Suitable for machine type	Drill, Cordless screwdrivers, Pedestal drilling machine
Material to be processed	Steel, Cast iron, Stainless steel, Titanium
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 338/5xD
Shank style	Cylindrical
Surface	Oxide finish
Cutting material	HSCo
Type	RN OXIDE

13 mm	151 mm	101 mm	0625 011 300	1

Twist drill bit HSCO, DIN 338, type RN, MAGMA

Precise long-life drill with magma coating for working with stainless steel (e.g. V2A, V4A), heat-resistant steels and titanium. Also suitable for general applications in steel with strength up to 1,200 N/mm² and in cast iron.

- Special Magma multilayer coating for a longer tool life and a higher cutting speed (heat resistant up to 800°C)
- Optimised split point for precise spot drilling without centring, even on curved surfaces

Suitable for machine type	Drill, Cordless screwdrivers, Pedestal drilling machine
Material to be processed	Steel, Stainless steel, Cast iron, Titanium, Special alloy
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 338/5xD
Shank style	Cylindrical
Surface	Magma multilayer coating
Cutting material	HSCo
Type	RN
Angle of the tip	130 Degree
Service life (points system)	●●●●
Drilling speed (point system)	●●●●
Bore hole quality (point system)	●●●●
Versatility (points system)	●●●○
Drilling behaviour (point system)	●●●○
Self-centring	Yes
Suitable for tensile strength up to	1000 N/mm ²

Twist drill bit assortment HSCO DIN 338 type RN MAGMA

19 pieces Precise long-life drill with magma coating for processing of stainless steel (e.g. V2A, V4A), heat-resistant steels and titanium. Also suitable for general applications in steel with strength up to 1,200 N/mm² and in cast iron.

- Special Magma multilayer coating for increased service life and increased cutting speed (resistant up to temperatures of 800°C)
- Optimised split point for precise spot drilling without centring, even on curved surfaces

Number of pieces in assortment/set	19 PCS
Surface	Magma multilayer coating
Standard/drilling depth	DIN 338/5xD

Twist drill bit HSCO, DIN 338, type RN, MFD VARIO

Premium all-rounder for use in stationary machinery for high-precision machining of virtually all materials, such as stainless steel, heat-resistant steels and titanium, as well as for general applications in conventional steel up to 1200 N/mm² strength, in cast iron and non-ferrous metals (such as magnesium alloys, brass, bronze, plastic).

- Exclusive Vario helix for low friction and fast chip removal
- Special four-surface grinding with optimised point thinning
- Top guidance characteristics and precision (extremely high torsional rigidity) thanks to a combination of double drill heel and single drill heel
- Special Magma multi-layer coating for a long tool life (heat resistant up to 800°C)

Suitable for machine type	Milling/drill center, Pedestal drilling machine
Material to be processed	Steel, Stainless steel, Cast iron, Titanium, Special alloy, Non-ferrous metal
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 338/5xD
Shank style	Cylindrical

Twist drill bit assortment HSCO DIN 338 type RN MFD VARIO

19 pieces. Premium all-rounder for use in stationary machines for highly accurate processing of almost all materials, e.g. stainless steel, heat-resistant steels and titanium and for general applications in conventional steel up to a strength of 1,200 N/mm² in cast iron and non-ferrous metals (such as magnesium alloys, brass, bronze, plastic).

- Exclusive Vario coil for low friction and rapid chip removal
- Special 4-faced polished section with optimised tip
- Superb guiding and accuracy (extremely high torsional rigidity) thanks to the combination of double drill heel and single drill heel
- Special Magma multilayer coating for a long service life (heat-resistant up to 800°C)

Number of pieces in assortment/set	19 PCS
Surface	Magma multilayer coating
Standard/drilling depth	DIN 338/5xD

Twist drill bit HSCO DIN 340 type RN OXIDE

Long, precise, high-performance drill for deep drilling in stainless steel (e.g. V2A, V4A), heat-resistant steels and titanium. Also suitable for general broader applications in steel with strength up to 1,000 N/mm² and in cast iron.

- Rapid drilling with perfect chip removal thanks to large chipping spaces and small core
- Highly precise tip grinding for precise drilling

Suitable for machine type	Drill, Cordless screwdrivers, Pedestal drilling machine
Material to be processed	Steel, Cast iron, Stainless steel, Titanium
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 340/10xD
Shank style	Cylindrical
Surface	Oxide finish
Cutting material	HSCo
Type	RN
Angle of the tip	130 Degree
Service life (points system)	●●●○
Drilling speed (point system)	●●●○
Bore hole quality (point system)	●●●●
Versatility (points system)	●●●○
Drilling behaviour (point system)	●●●○
Self-centring	Yes
Suitable for tensile strength up to	1000 N/mm ²

- When using the twist drill according to DIN 340, prior drilling of a centring bore is recommended. Our NC spotting drills (art. no. 063644 etc.) are perfectly suited to this.
- Also recommended in conventional steel if longer service life compared to uncoated HSS drills is a priority.
- See overview tables for drill/material assignments

Twist drill bit HSCO DIN 345 type RN

The powerful stainless steel morse taper drill for column-type drills for processing stainless steel (e.g. V2A, V4A), heat-resistant steels and titanium. Also suitable for general broader applications in steel with strength up to 1,000 N/mm² and in cast iron.

- Optimum cross-grinding for highly accurate drilling without centring, even on curved surfaces
- Vaporised surface for excellent adhesion of cooling lubricants and a reduced tendency towards build-up

Suitable for machine type	Pedestal drilling machine
Material to be processed	Steel, Cast iron, Stainless steel, Titanium
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 345/5xD
Shank style	Morse taper
Surface	Vaporised
Cutting material	HSCo
Type	RN
Angle of the tip	118 Degree
Service life (points system)	●●●○
Drilling speed (point system)	●●●○
Bore hole quality (point system)	●●●●
Versatility (points system)	●●●○
Drilling behaviour (point system)	●●●○
Self-centring	Yes
Suitable for tensile strength up to	1000 N/mm ²

Twist drill bit assortment HSCo DIN 338 type RN bronze tipped

19 pieces. Affordable, robust assembly drill bits for machining stainless steel and heat-resistant steels.

Also suitable for general, broad applications in steel up to 1000 N/mm² strength, as well as in cast iron.

- Self-centring, extremely robust, quiet drilling and high degree of break resistance thanks to combination of form A and form C point thinning
- Robust and durable design, ideal for construction site and assembly applications

Number of pieces in assortment/set	19 PCS
Surface	Bronze
Standard/drilling depth	DIN 338/5xD

Art. no. 0635 010 001

P. Qty.: 1

Twist drill bit assortment HSCo DIN 338 type RN bronze tipped

82-piece in system case. Affordable, robust assembly drill bits for machining stainless steel and heat-resistant steels. Also suitable for general, broad applications in steel up to 1000 N/mm² strength, as well as in cast iron.

- Self-centring, extremely robust, quiet drilling and high degree of break resistance thanks to combination of form A and form C point thinning
- Robust and durable design, ideal for construction site and assembly applications

ORSY

Number of pieces in assortment/set	82 PCS
Surface	Bronze
Standard/drilling depth	DIN 338/5xD

Art. no. 5964 063 501

P. Qty.: 1

See overview tables for drill bit/material assignments

Twist drill bit assortment HSCO DIN 338 type RN Oxide

25 pieces. Precise high-performance drill bit for machining stainless steel (such as V2A, V4A), heat-resistant steels and titanium. Also suitable for general, broad applications in steel up 1000 N/mm² strength, as well as in cast iron.

- Rapid drilling with perfect chip removal thanks to large chip spaces and small core
- Very precise point geometry for accurate drill holes

Number of pieces in assortment/set	25 PCS
Surface	Oxide finish
Standard/drilling depth	DIN 338/5xD

Twist drill bit assortment HSCo8 WN MAGMA

19 pieces The extremely long-lasting drill with Magma multi-layer coating and 8% cobalt alloy for universal processing of conventional steels, titanium and hard-to-machine materials (e.g. Hardox) with extremely high strengths up to 1550 N/mm².

- Exceptionally high drilling stability and cutting force, extra-high breakage resistance
- Special Magma multilayer coating and 8% cobalt alloy
- Outstanding centring during work and reduction in force required

Number of pieces in assortment/set	19 PCS
Surface	Magma multilayer coating

Art. no. 0618 940 001

Twist drill bit HSCo8 WN TYPE RH

The extra stable morse taper drill bit with 8% cobalt alloy for column drills for working with hard-to-machine materials (e.g. Hardox) with extremely high strengths of up to 1,400 N/mm², such as excavator shovels, lorry attachments, armour plating, snow ploughs, agricultural machinery, etc.

- Highest level of stability and cutting power due to extra-short drilling section and strengthened core
- Optimised cutting edge and special flat spiral angle for high breakage protection

Suitable for machine type	Pedestal drilling machine
Material to be processed	Hard and tough material
Quality	ZEBRA-Premium
Standard/drilling depth	CS/3xD
Shank style	Morse taper
Surface	Vaporised
Cutting material	HSCo8
Type	RH

HPT twist drill, extra short, DIN 1897

With Forte special profile for optimised chip formation. Particularly suitable for use on machining centres and turning machines. Wide application range in all, preferably long-chipping materials up to approx. 1300 N/mm², also for stainless austenitic steels. Suitable for dry machining in steel materials.

CNC|TEC

Product code	900
Material to be processed	Steel, Cast metal, Stainless steel
Standard/drilling depth	DIN 1897/3xD
Design	Extra short
Shank style	Cylindrical
Surface	TiAlN
Cutting material	HSCo-PM
Angle of the tip	130 Degree
Suitable for tensile strength up to	1300 N/mm ²

Twist drill HSS DIN 1869 R1 type RN

Extra-long drill bit for deep hole drilling in hardened or high strength steel up to a strength of 850 N/mm², in cast iron and in composite materials (e.g. plastic profiles with steel core).

- Vaporised surface for excellent adhesive properties of cooling lubricants and a reduced tendency towards the build-up of material deposits

Material to be processed	Steel, Cast iron
Quality	Würth-Standard
Standard/drilling depth	DIN 1869/20xD
Shank style	Cylindrical
Surface	Vaporised
Cutting material	HSS
Type	RN
Angle of the tip	118 Degree
Service life (points system)	●●○○
Drilling speed (point system)	●●○○
Bore hole quality (point system)	●●○○
Versatility (points system)	●●○○
Drilling behaviour (point system)	●●●○

Continuation **Twist drill HSS DIN 1869 R1 type RN**

Self-centring	Yes
Suitable for tensile strength up to	850 N/mm ²

Suitable for machine type	Diameter (Ø)	Length (l1)	Chip flute length (l2)	Art. no.	P. Qty.

When using a drill bit in line with DIN 1869, the creation of a pilot hole of 1xD to 2xD depth is recommended. Our extra short precision drill bit in line with DIN 1897 (art. no. 062470...) is ideal for this task.
See overview tables for drill bit/material assignments

Twist drill HSS DIN 1869 R2 type RN

Oversized steel deep hole drill for deep-hole drilling in steel up to a strength of 850 N/mm², in cast iron and in composite materials (e.g. plastic profiles with steel core).

- Vaporised surface for excellent adhesive properties of cooling lubricants and a reduced tendency towards the build-up of material deposits

Suitable for machine type	Drill, Cordless screwdrivers, Milling/drill center, Pedestal drilling machine
Material to be processed	Steel, Cast iron
Quality	Würth-Standard

Twist drill bit HSS DIN 1897 type RN

The extra-short steel precision drill bit for general, broad applications in steel up to 850 N/mm² strength and in cast iron.

- Optimised cross thinning for 20% lower infeed force compared to conventional drills as well as quicker progress and a more gentle way of working
- Optimised split point for precise spot drilling without centring, even on curved surfaces
- Very precise point geometry for accurate drill holes
- Vaporised surface for excellent adhesive capability of coolant lubricants and reduced tendency for material to build up

Suitable for machine type	Drill, Cordless screwdrivers, Pedestal drilling machine
Material to be processed	Steel, Cast iron
Quality	ZEBRA-Premium

Twist drill HSS DIN 338 SMART STEP

The manually operated high-performance drill with unique SMART STEP technology (from dia. 2.5 mm) for high-precision circular drill holes in steel up to 1000 N/mm², aluminium, plastic, non-ferrous metals, hard and soft wood.

- The first twist drill with stepped drill bit tip geometry
- Precise circular holes without a centre punch
- Significantly quicker than conventional ground twist drill

Suitable for machine type	Drill, Cordless screwdrivers, Pedestal drilling machine
Material to be processed	Steel, Cast iron, Non-ferrous metal, Wood, Hardwood
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 338/5xD
Surface	Multiple refined
Cutting material	HSS
Type	SMART STEP

For blind bores, please note the extended drill tip (see dimension l3)!

Twist drill bit assortment HSS DIN 338 SMART STEP

19 pieces. The manually operated high-performance drill with unique SMART STEP technology (from dia. 2.5 mm) for high-precision circular drill holes in steel up to 1000 N/mm², aluminium, plastic, non-ferrous metals, hard and soft wood.

- The first twist drill with stepped drill bit tip geometry
- Precise circular holes without a centre punch
- Significantly quicker than conventional ground twist drill

Number of pieces in assortment/set	19 PCS
Surface	Multiple refined
Standard/drilling depth	DIN 338/5xD

Art. no. 0624 930 001

P. Qty.: 1

See overview tables for drill/material assignments.
For blind holes, please observe the extended drill tip!

Twist drill bit assortment HSS DIN 338 SMART STEP

25 pieces The high-performance drill with unique **SMART STEP** technology (from Ø 2.5 mm) for high-precision, circular through holes for hand-guided use in steel up to 1000 N/mm², aluminium, plastic, non-ferrous metals, hardwood and softwood.

- The first twist drill with stepped drill bit tip geometry
- Precise circular holes without a centre punch
- Significantly quicker than conventional ground twist drill

Number of pieces in assortment/set	25 PCS
Surface	Multiple refined
Standard/drilling depth	DIN 338/5xD

Art. no. 0624 930 004

P. Qty.: 1

See overview tables for drill bit/material assignments

Twist drill bit HSS DIN 338 type RN 118°

The affordable, robust steel assembly drill bit for applications in steel up to 850 N/mm² strength.

- Excellent break resistance due to chipless manufacturing process
- Ideal for construction site and assembly applications that do not require high precision
- Excellent adhesive capability of coolant lubricants and reduced tendency for material to build up thanks to vaporised surface

Material to be processed	Steel
Quality	Würth-Standard
Standard/drilling depth	DIN 338/5xD
Shank style	Cylindrical
Surface	Vaporised
Cutting material	HSS
Angle of the tip	118 Degree
Service life (points system)	●●○○
Drilling speed (point system)	●○○○
Bore hole quality (point system)	●○○○
Versatility (points system)	●○○○
Drilling behaviour (point system)	●●○○
Self-centring	No
Suitable for tensile strength up to	850 N/mm ²

Twist drill bit HSS DIN 338 type RN 130°

Steel precision drill for general, broad applications in steel up to 850 N/mm² strength and cast iron.

- Optimised cross thinning for 20% less infeed force and more rapid work progress with less expenditure of effort
- Optimum cross-grinding for highly accurate drilling without centring, even on curved surfaces
- Highly precise tip grinding for precise drilling
- Vaporised surface for excellent adhesion of cooling lubricants and a reduced tendency towards build-up

Suitable for machine type	Drill, Cordless screwdrivers, Pedestal drilling machine
Material to be processed	Steel, Cast iron
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 338/5xD
Shank style	Cylindrical
Surface	Vaporised
Cutting material	HSS
Type	RN
Angle of the tip	130 Degree
Service life (points system)	●●●○
Drilling speed (point system)	●●●○
Bore hole quality (point system)	●●●●
Versatility (points system)	●●○●
Drilling behaviour (point system)	●●●○
Self-centring	Yes
Suitable for tensile strength up to	850 N/mm ²

- The Ø 13.0 mm drill shank is reduced to Ø 12.7 mm
- For drill bit/material assignments, see overview tables

Twist drill bit assortment HSS DIN 338 type RN 130°

82-piece in system case. Steel precision drill bits for general, broad applications in steel up to 850 N/mm² strength and in cast iron.

- Optimised cross thinning for 20% lower infeed force compared to conventional drills as well as quicker progress and a more gentle way of working
- Optimised split point for precise spot drilling without centring, even on curved surfaces
- Very precise point geometry for accurate drill holes
- Vaporised surface for excellent adhesive capability of coolant lubricants and reduced tendency for material to build up

ORSY

Number of pieces in assortment/set	82 PCS
Surface	Vaporised
Standard/drilling depth	DIN 338/5xD

Twist drill bit assortment HSS DIN 338 type RN 118°

19 pieces. Affordable, robust steel assembly drills for applications in steel up to 850 N/mm² strength.

- Excellent break resistance due to chipless manufacturing process
- Ideal for construction site and assembly applications that do not require high precision
- Excellent adhesive capability of coolant lubricants and reduced tendency for material to build up thanks to vaporised surface

Number of pieces in assortment/set	19 PCS
Surface	Vaporised
Standard/drilling depth	DIN 338/5xD

Twist drill assortment HSS DIN 338 type RN 130°

91 pieces Steel precision drill for general, broad applications in steel up to 850 N/mm² strength and cast iron.

- Optimised cross thinning for 20% less infed force and more rapid work progress with less expenditure of effort
- Optimum cross-grinding for highly accurate drilling without centring, even on curved surfaces
- Highly precise tip grinding for precise drilling
- Vaporised surface for excellent adhesion of cooling lubricants and a reduced tendency towards build-up

Number of pieces in assortment/set	91 PCS
Surface	Vaporised
Standard/drilling depth	DIN 338/5xD

Art. no. 0624 000 003

P. Qty.: 1

Twist drill bit HSS DIN 338 type RW

Aluminium professional drill for precision drilling in soft and long-chipping materials with a strength up to 600 N/mm² (e.g. aluminium and aluminium alloys ≤ 10% Si, zinc, copper, thermosetting plastics).

- Short design ensures highly accurate drilling
- Self-centring
- HC (High Speed Cutting) grinding and precise cutting geometry ensure consistent drilled hole quality while at the same time guaranteeing a high degree of precision and a long service life
- The bare spiral groove ensures excellent chip removal

Suitable for machine type	Drill, Cordless screwdrivers, Pedestal drilling machine
Material to be processed	Non-ferrous metal
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 338/5xD
Shank style	Cylindrical
Surface	Plain
Cutting material	HSS
Type	RW
Angle of the tip	130 Degree
Service life (points system)	●●●●
Drilling speed (point system)	●●●●
Bore hole quality (point system)	●●●●
Versatility (points system)	●○○○
Drilling behaviour (point system)	●●●●
Self-centring	Yes
Suitable for tensile strength up to	600 N/mm ²

Continuation **Twist drill bit HSS DIN 338 type RW**

Twist drill bit HSS DIN 340 type RN 130°

The long steel precision drill bit for deep drilling in steel up to 850 N/mm² strength and in cast iron.

- Optimised cross thinning for 20% lower infeed force compared to conventional drills as well as quicker progress and a more gentle way of working
- Optimised split point for precise spot drilling without centring, even on curved surfaces
- Very precise point geometry for accurate drill holes
- Vaporised surface for excellent adhesive capability of coolant lubricants and reduced tendency for material to build up

Suitable for machine type	Drill, Cordless screwdrivers, Pedestal drilling machine
Material to be processed	Steel, Cast iron
Quality	ZEBRA-Premium
Standard/drilling depth	DIN 340/10xD
Shank style	Cylindrical
Surface	Vaporised
Cutting material	HSS
Type	RN
Angle of the tip	130 Degree

Twist drill bit HSS DIN 345 type RN

Excellent value steel morse taper drill for general, broad applications in steel with a strength of up to 850 N/mm² and cast iron for use in column-type drills.

- Optimum cross-grinding for highly accurate drilling without centring, even on curved surfaces
- Vaporised surface for excellent adhesion of cooling lubricants and a reduced tendency towards build-up

Suitable for machine type	Pedestal drilling machine
Material to be processed	Steel, Cast iron
Quality	Würth-Standard
Standard/drilling depth	DIN 345/5xD
Shank style	Morse taper
Surface	Vaporised
Cutting material	HSS
Type	RN
Angle of the tip	118 Degree
Service life (points system)	●●●○
Drilling speed (point system)	●●●○
Bore hole quality (point system)	●●●○
Versatility (points system)	●●○
Drilling behaviour (point system)	●●●○
Self-centring	Yes
Suitable for tensile strength up to	850 N/mm ²

Continuation **Twist drill bit HSS DIN 345 type RN**

See overview tables for drill/material assignments

Twist drill bit HSS Pilot WN type RN

**HSS drill bit with centring tip for universal use in wood
and steel, tip angle 118°/174°**

Highly accurate drilling

The robust twist drill with extra-long design with self-centring pilot tip ensures highly accurate drilling

Also suitable for drilling deep holes

The reinforced core provides sufficient stability even for the long drill lengths required

Suitable for machine type	Cordless screwdrivers, Drill
Material to be processed	Wood, Steel
Quality	Würth-Standard
Standard/drilling depth	CS/25xD
Shank style	Cylindrical
Surface	Vaporised
Cutting material	HSS
Type	RN
Angle of the tip	118 Degree
Service life (points system)	●●○○
Drilling speed (point system)	●●○○
Bore hole quality (point system)	●●○○
Versatility (points system)	●○○○
Drilling behaviour (point system)	●●○○
Self-centring	Yes

Diameter (Ø)	Length (l1)	Chip flute length (l2)	Art. no.	P. Qty.

To achieve optimum drilling progress and avoid jamming, frequent „ventilation“ of the drill bit is also required for large drilling depths. For drill bit/material assignments, see overview tables

Ideal for predrilling in profiles for AMO III screws:

- Screw Ø 7.5 mm, 6 mm drill bit
- Screw Ø 11.5 mm, 10 mm drill bit

Solid carbide twist drill bit, DIN 6537K, internal cooling

With internal cooling channels for universal applications. High robustness and universal application owing to straight main cutter. Special grinding ensures optimal chip breakage, high centring accuracy and low cutting forces.

CNC|TEC

Product code	6717
Material to be processed	Steel, Cast metal, Stainless steel, Titanium, Copper, Brass, Aluminium
Standards	DIN 6537
Design	Short
Surface	TiAlN-S
Max. drilling depth (D)	3xD
Cutting material	VHM
Number of guiding chamfers	2 PCS
Angle of the tip	140 Degree
Number of cutting edges	2 PCS
Coolant supply	Internal
Tolerance of cutting edge diameter	h7
Tolerance of shank diameter	h6

Solid carbide twist drill bit, DIN 6537K

For universal applications. High robustness and universal application owing to straight main cutter. Special grinding ensures optimal chip breakage, high centring accuracy and low cutting forces.

CNC|TEC

Product code	6727
Material to be processed	Steel, Cast metal, Stainless steel, Copper, Brass, Aluminium, Plastic
Standards	DIN 6537
Design	Short
Surface	TiAlN-S
Max. drilling depth (D)	3xD
Cutting material	VHM
Number of guiding chamfers	2 PCS
Angle of the tip	140 Degree
Number of cutting edges	2 PCS
Coolant supply	External
Tolerance of cutting edge diameter	h7
Tolerance of shank diameter	h6

Solid carbide twist drill bit, DIN 6537L, internal cooling

Solid carbide high-performance drill bit with internal cooling channels for universal applications. High robustness and universal application owing to straight main cutter. Special grinding ensures optimal chip breakage, high centring accuracy and low cutting forces.

CNC|TEC

TiAlN-S coating

Special coating for maximum cutting performance

Product code	6737
Material to be processed	Steel, Cast metal, Stainless steel, Titanium, Copper, Brass, Aluminium
Standards	DIN 6537
Design	Long
Surface	TiAlN-S
Max. drilling depth (D)	5xD
Cutting material	VHM
Number of guiding chamfers	2 PCS
Angle of the tip	140 Degree
Number of cutting edges	2 PCS
Coolant supply	Internal
Tolerance of cutting edge diameter	h7
Tolerance of shank diameter	h6

HPC solid carbide drill Speeddrill 4.0-Inox, DIN 6537K, 3xD short, 4 drill heels, with internal cooling

Solid carbide, high-performance drill with internal cooling channels, in particular for machining stainless steels. The special point thinning results in perfect chip removal. Optimal roundness of the hole through 4 drill heels allows precise alignment of the hole with optimal surface quality. Generation 4.0 sets new standards in machining performance.

CNC|TEC

Product code	6887
Material to be processed	Steel, Stainless steel, Cast metal, Titanium
Standards	DIN 6537
Design	Short
Surface	NANODUR
Max. drilling depth (D)	3xD
Cutting material	VHM
Number of guiding chamfers	4 PCS
Angle of the tip	140 Degree
Number of cutting edges	2 PCS
Coolant supply	Internal

Continuation **HPC solid carbide drill Speeddrill 4.0-Inox,**
DIN 6537K, 3xD short, 4 drill heels, with internal cooling

Tolerance of cutting edge diameter	h7
Tolerance of shank diameter	h6

HPC solid carbide drill Speeddrill 4.0-Inox, DIN 6537L, long 5xD, 4 drill heels, with internal cooling

Solid carbide, high-performance drill with internal cooling channels, in particular for machining stainless steels. The special point thinning results in perfect chip removal. Optimal roundness of the hole through 4 drill heels allows precise alignment of the hole with optimal surface quality. Generation 4.0 sets new standards in machining performance.

CNC|TEC

Product code	6897
Material to be processed	Steel, Cast metal, Stainless steel

Continuation **HPC solid carbide drill Speeddrill 4.0-Inox,**
DIN 6537L, long 5xD, 4 drill heels, with internal cooling

Standards	DIN 6537
Design	Long
Surface	NANODUR
Max. drilling depth (D)	5xD
Cutting material	VHM
Number of guiding chamfers	4 PCS
Angle of the tip	140 Degree
Number of cutting edges	2 PCS
Coolant supply	Internal
Tolerance of cutting edge diameter	h7
Tolerance of shank diameter	h6
